SMB Series Snap-on Coaxial Plug and Jack Connectors

M/A-COM Omni Spectra uses beryllium copper center contacts and brazed right angle bodies for increased durability in all SMB Series connectors. All connectors are gold plated.

Coaxial, Between-Series Adapters

M/A-COM Between-Series Coaxial Transmission Line Adapters provide convenient transitions between all popular series coaxial connectors. The adapter design provides a minimum length consistent with good electrical performance. The small, low VSWR, and

broad frequency coverage permits a wide range of applications in both measurement and systems use. All dielectrics are TFE fluorocarbon. The center contacts are made of beryllium copper, gold plated.

OSX Subminiature Snap-On Connectors

- ▶ 30% Smaller Mated Height Than SMB
- ▶ Improved Force to Engage/Disengage

- ▶ Snap-On Interface
- ▶ Broadband Frequency (DC-6 GHz)

OSX subminiature snap-on connectors are an excellent blend of size, weight, durability and performance for applications such as GPS, automotive, and wireless communications.

Proseal Environmental Crimp Splices and Terminals

- Heat Tools For Industry
- Resists Water, Condensation, Salt and Corrosion
- Resists Abrasion: The tough nylon sleeve of Proseal components resist abrasion and cut-through damage, provides strain relief and protection from vibration and helps maintain the products insulation and sealing properties-even in very rugged environments
- Temperature: The nylon used in proseal devices is exceptionally heat-stable compared to that typically used in preinsulated termination products. Proseal devices remain flexible and impact-resistant long after other nylon termination products have become brittle

Proseal preinsulated heat-shrinkable nylon splicing and terminating devices provide a tough, environmentally sealed wire connection. They insulate and protect electrical connections from mechanical abuse wire pullout and abrasion. These components resist water, salt and other contaminants. The one-piece construction consists of a crimp barrel

Sealed Crimp Splices

1. Strip wires $\frac{3}{8}$ " and insert into crimp barrel of the correct Proseal size. Match the color of the splice with the color of the crimp cavity on the crimping tool.

2. Crimp.

3. Heat crimped splice with Master heat tool until tubing recovers and adhesive melts and flows.

Sealed Crimp Terminations

1. Strip wire $\frac{1}{4}$ " and insert into crimp barrel of the correct Proseal size. Match the color of the splice with the color of the crimp cavity on the crimping tool.

2. Crimp.

3. Heat crimped device with Master heat tool until tubing recovers and adhesive melts and flows. Avoid heating the outside metallic part.

Ring Terminal

Fork Terminal

Butt Splice

- Easy Installation: Proseal products are easily installed. A properly stripped wire is inserted into the metallic barrel, crimped and the tubing is heated with a Master heat tool
- Versatility: Proseal connectors accommodate wire gauge sizes 22 to 10. They are color-coded for easy identification of correct gauge sizes, yet are transparent for visual inspection of the finished splice

or terminal encased in a rugged heat-shrinkable nylon tubing lined with a special hot-melt adhesive. When the product is properly crimped and heated, the tubing shrinks and the adhesive melts and flows around the wire connection, creating an environmental seal.

*Note: All accessories and replacement parts carried in Allied's inventory. Contact your local Allied sales office for assistance.

DIP Socket Series

- **Open Frame:** For Easy Inspection of Solder Joints and Better Air Flow
- **Closed Bottom Contacts:** Prevents Flux Intrusion and Solder Wicking
- **Stackability:** X and Y Stackable
- **BeCu Inner Contact:** For Optimal Electrical and Mechanical Performance
- **Accommodates:** 6-64 DIP ICs with .015" to .022" Diameter Leads

Contact Specification

All types on this page have an inner clip of beryllium copper alloy 172 with a plating of gold over nickel. The outer sleeve is 1/2 hard brass alloy with tin plating.

ZIF Sockets

- ▶ Housing: LCP, Glass Filled, UL 94V-0 Rated
- ▶ Contact: Phosphor Bronze
- ▶ Plating (Contact Area): 30 μ " Gold Over 50 μ " Nickel

- ▶ Plating (Solder Tail): 100 μ " Tin-Lead Over 50 μ " Nickel
- ▶ Actuator: Die Cast Zinc Alloy
- ▶ Operating Temperature: -55°C to 105°C
- ▶ Operating Voltage: 250 VAC

Pin Grid Array Sockets

- ▶ Footprint Options: Over 1000 Off-the-Shelf Footprints Available — Please Call!
- ▶ High Reliability, Ultra Low Insertion Force Pin Grid Array Sockets for Microprocessor, RISC, ASIC, FPGA, and DSP Devices

- ▶ Solder Tail, High Reliability Screw Machine Contacts
- ▶ Other Pin Options: 878S — Male/Male; 996E — Compliant Pressfit; 402B — Wire Wrap
- ▶ All-Solder Tail Pins

Insulator Body Material: High-temperature 40% glass reinforced UL94V-0. **Outer Sleeve:** 1/2 hard brass alloy 360. **Inner Contact:** Beryllium Copper alloy 172, 6-finger, 10 μ " gold over min. 50 μ " nickel. **Solder Tail Length:** 0.125". **Solder Tail Diameter:** .020". **Rated Voltage:** 100 VRMS/150 VDC. **Temperature Range:** -55°C to 200°C. **Current Rating:** 3 amp max. **Insulation Resistance:** 10K meg Ω min.

IC Sockets With Integral Decoupling Capacitor

Low profile IC-Socket with integral decoupling capacitor. 100 nF 20% - 50 V multilayer ceramic Epoxy encapsulated. **Temperature Range:** -25°C to +85°C. **Insertion Characteristics:** 4-finger standard.

Strip, DIP and Transistor Sockets

Standard Solder Tail DIP Sockets

Most popular line of standard low profile IC-Sockets. Open frame design leaves space beneath IC for improved heat dissipation, easier PCB cleaning and inspection.

Strip Sockets Solder Tail

On .100 Centers

Materials. Insulator Body: Glass-filled thermoplastic polyester, self-extinguishing rated; UL94V-9; color — black; resistant against detergents, mineral acids, solvents, greases and oils (short time). **Receptacle (Sleeve):** Screw-machined brass, plated 200µ" tin-lead. **Pin:** Phosphor bronze, plated 200µ" tin-lead over 80-120µ" nickel. **Contact:** Stamped beryllium-copper, plated 30µ" gold. **Mechanical Life:** 100 cycles minimum.

Electrical Data. Rated Current: 1A. Rated Voltage: 100 VRMS/150VDC. Contact Resistance: 10mΩ max. Insulation Resistance: 10,000MΩ min. Dielectric Strength: 1000 VRMS min. Capacitance: 0.3 pF max.

Environmental Data. Operating Temperature Range: -55°C to +125°C. Vibration: 10-2000 Hz, 15g. Shock (No Elect. Discontinuity Greater Than 1 µs): 150 g. Solderability: IEC 68-2-20 Ta. Resistance to Soldering Heat: IEC 68-2-20, 260°C, 5s. Resistance to Atmospheric Corrosion: IEC 68-2-42 and 43.

Nylon Connector Designer Kits

Polarized nylon connector kits include male and female housings in all circuit capacities, terminals and tools, in individual compartments. Lightweight, unbreakable; snap-lock.

Type WM-72 Miniature Kit. 56 connectors using .062" terminals, crimp & ejector tools.

863-0600EACH 56.52

Type WM-50 Standard Kit. 45 connectors using .093" terminals, crimp & ejector tools.

863-0610EACH 64.42

Standard .093" Terminal Housings

Dual Row Straight Pin Breakaway Headers

- Stackable Side-to-Side and End-to-End (on Unbroken Edges)
- Easy Breakaway to Smaller Sizes
- Standoffs Facilitate Post Solder Cleaning
- Drawn .025" Square Wire Provides 4-Sided Smooth Surface for Quality Interface

Mates with female connectors on .100" grid. Single and dual row PCB connectors: e.g. 70192, 7990. Single and dual row IDT connectors: e.g. 70400-A, 70451-A. Single and dual row crimp connectors: e.g. 70068-A, 70450-A. Ribbon cable connectors: e.g. 40312. Flat flexible connectors: e.g. 70430-A, 40556 Shunts; e.g. 7859, 90058.

Two Circuit Shunt or Jumper

- Mates with .100" Grid Male Connectors: Dual or Single Row Headers — e.g. 8624 and 70343, .025" Square and Round Wire Pins — e.g. 4168
- Easily Applied — No Soldering
- Reliable — No Accidental Disconnects
- Low Cost Alternative to DIP Switches
- Increases Current Flow and Decreases Resistance vs. DIP Switches
- Dual Beam Terminals: 2 Points of Contact Per Pin

- Open and Closed Top Versions
- Closed Top Prevents Upside Down Mating
- Stackable End-to-End and Side-to-Side

Specifications: Terminal Material: Phosphor Bronze. Housing: Glass filled polyester. U.L. recognized 94V-0. Contact Resistance: 15 milliohms maximum (gold). Current Rating: 2 amps at 30°C rise over ambient.

Mini Fit BMI Series, Power Connectors, and Solderless Terminals

Mini Fit BMI Series Blind Mating Interconnect

- ▶ Appropriate For Both Power and Signal Applications
- ▶ Tin Plated
- ▶ UL Recognized, CSA Certified, TUV Licensed
- ▶ 94V-2 Rated
- ▶ Uses Same Terminals and Tools as Standard Mini-fit Jr. on Page 290

Mini Fit BMI Series is designed for high current/high density applications.

Multi-Purpose Hand Crimper (Fig. I)

Type ABC-500. For use with 22-AWG through 10-AWG, cuts and strips wire, cuts and rethreads bolts. Constructed of tempered steel alloy.

863-1250.....EACH 21.81

Kelvin Clips

The Kelvin clip is used for 4-wire resistance measurement systems. The two jaws of a Kelvin clip are electrically isolated from each other when open and shorted to each other through the component lead under test when closed. One jaw provides a current path for the source while the other provides a circuit path for the sense.

Specifications: 75-K—Copper/Silver Plated; 78-K—Gold Plated Copper. **Handles:** 75-K—Glass Filled Nylon; 78-K—Glass Filled Nylon. **Maximum Jaw Opening:** 75-K— $1/16$ "- $7/8$ "- $1 1/16$ ". **Maximum Wire Size:** 75-K—#18 AWG; 78-K—#16 AWG. **Fulcrum:** 78-K—Slotted Screws; 78-K—Allen Head Set Screws. **Std. Pk.:** 75-K—10; 78-K—1.

"Pigmy Hippo" And "Hippo" Clips

41A

46A

High quality, coated springs are carefully designed for maximum strength and long life. Maximum jaw spread, minimum handle spread. Jaws clamp solidly on terminal, stud or bare battery post. Furnished with tough vinyl insulators in red or black. Steel, bright copper-plated.

Hippo-Clip Type 41-A. For fast chargers, battery booster cables. Cable attaches quickly and securely with built-in solder strap and cable clinching ears. Detachable lug also available. Marked for polarity (+ and -). Length 6". Jaws open $1 1/16$ ". **Shpg. wt.** per 100, 41 lbs.

Pigmy-Hippo Clip Type 46-A. For trickle chargers, battery operated devices, automotive test. Choice of high solder strap on one leg for larger wires, lower strap on other leg. Matched clinching ears grip wire securely at end of leg. Won't "squirt away" when squeezed. Length 3". Jaws open $1 1/16$ ". **Shpg. wt.** per 100, 5 1/4 lbs.

BNC Connectors, Test Prods, and Insulated Banana Jacks

NO. PS-30101-0 Insulated BNC Male Connector

Fully insulating polyamide housing ensures maximum protection against electrical shock hazard. 1000V AC/DC insulation. Special crimp system designed for RG-58 (50 OHM) coaxial cable. Available in black only. Length: 51mm (2").

860-4545. PS-30101-0 EACH 8.87

NO. PS-30102-0 Insulated BNC Female Connector

Fully insulating polyamide housing ensures maximum protection against electrical shock hazard. 1000V AC/DC insulation. Special crimp system designed for RG-58 (50 OHM) coaxial cable. Available in black only. Length: 62mm (2 7/16").

860-4550. PS-30102-0 EACH 8.87

NO. PS-30501-0 Insulated BNC Bulkhead Receptacle

Solder connection to center and solder lug for shield with 1/8" coupling-nut thread. Polyamide insulation protects against electrical shock hazard. Available in black only. Length: 25mm (1").

860-4555. PS-30501-0 EACH 7.00

NO. PS-30502-0 Insulated BNC Bulkhead Receptacle
Crimp-on connection to center and outer conductors with 1/8" coupling-nut thread. Polyamide insulation protects against electrical shock hazard. Available in black only. Length: 25mm (1").

860-4560. PS-30502-0 EACH 7.39

NO. PS-30503-0 Insulated BNC Bulkhead Receptacle

Designed for solder connection to printed circuit boards with 30mm solder leads and 1/8" coupling-nut thread. Polyamide insulation. Available in black only. Length: 25mm (1").

860-7512. PS-20431-2 (Red) EACH 9.59

NO. PS-20432 Insulated Mini-Plunger Clamp Clip

Mini-plunger clamp makes difficult to reach test points accessible. Two wire hooks emerge from the plunger tip and spread open as the plunger is depressed. Solder leads, pins and wire up to 5mm (.2") in dia. can be gripped and held between the hooks. Highly flexible Bowden cable tip reaches into narrow passages. Silicone insulation is resistant to heat from soldering procedures. Available in two lengths. Plunger Body: Fully insulated 6.6 polyamide. Rating: 1000V, 1 Amp. Plunger Clamp: Nickel-plated spring steel. Color: Red and Black. Mech. Connection: 4mm insulated banana jack (right angle). Length: 20432 — 127mm (5").

860-7514. PS-20432-0 (Black) EACH 10.59

860-7516. PS-20432-2 (Red) EACH 10.59

NO. PS-20434 Insulated Mini-Plunger Jaw Clip

Pair of powerful jaws can securely grab thick wire and cable, ground leads and rails, and even screw heads. When plunger is depressed, the steel jaws extend to a length of 12mm (.48") and open to a width of 20mm (0.8"). The 20435 model has jaws insulated with synthetic resin to prevent short-circuits while the jaws are open. Right angle banana jack accepts Ultra-Flex test leads and other insulated and conventional banana plugs and helps eliminate interference from the cable during testing. Plunger Body: Fully insulated 6.6 polyamide. Rating: 1000V, 16 Amp. Plunger Jaws: Nickel-plated stainless steel. Color: Red and Black. Synthetic-resin varnish on model 20435. Length: 128mm (5 1/16"). Mech. Connection: 4mm insulated banana jack (right angle).

Maintenance Kit

DH-111 Crimp Tool Kit

Size 11 $\frac{5}{8}$ " x 15" x 2 $\frac{1}{2}$ "

Ideal for tool room or tool crib area. This popular kit comes complete with 50 test clips, insulators and a hand held Crimp Tool designed to crimp Mueller clips to wires ranging from 14 AWG to 24 AWG. Laminated road map allows wax crayon price marking. A great "stock bin" for the large clip user. (Shipping weight 12 Lbs.) Contains 1 #900 Crimper; 30 #30 clips; 30 #30-C clips; 20 #32 insulator; 30 #30-BL clips; 30 #30 T80 clips; 20 #31 insulators; 20 #34 clips; 20 #34-C clips; 20 #36 insulators; 20 #45 clips; 20 #45-C clips; 20 #47 insulators; 20 #48-B clips; 20 #48-C clips; 20 #51-C clips; 20 #55 clips; 20 #49 insulators; 30 #60 clips; 20 #62 insulators; 20 #85 clips; and 20 #87 insulators.

No. 115 "Clip Bar" Merchandiser

- Ideal for Tool Room or Tool Crib
- Size 12 $\frac{1}{2}$ " x 18 $\frac{3}{8}$ " x 3 $\frac{1}{4}$ "

Popular compartmented merchandiser furnished complete with over 500 test clips and insulators. Solid metal-baked gray finish with 16 individual compartments display Mueller's most popular test clips and insulators. Laminated road map allows wax crayon price marking. An excellent sales tickler for the distributor. A great "stock bin" for the large clip user. **Shipping Weight:** 12 lbs. Contains 40 #30 clips; 20 #30C clips; 40 #34 clips; 20 #32 insulators; 20 #36 insulators; 60 #45 clips; 20 #47 insulators; 80 #60S clips; 40 #60HS clips; 30 #60CS clips; 20 #60CHS clips; 40 #62 insulators; 10 #63 insulated clips; 40 #85 clips; 20 #87 insulators and 12 #201 micro-clippers.

860Q4200. DH-115 Kit.....EACH 239.00

XLR "X" Series Cable Connectors

Shells: Die cast zinc. **Insets:** Fiberglass reinforced hard polyester. Satin nickel housing and silver contacts standard — "B" suffix on the type number designates black chrome housing and gold contacts. Wire diameter range is .11" to .315". Also available in 6 and 7 pin.

Single And Dual Binding Posts

Type 137. Head: Captive, octagonal, nickel-plated. Body: brass, nickel-plated. Accepts: phone tip, spade lug, banana plug, alligator clip or wire strand. Can be completely insulated from panel. With two hex nuts. **Type 1482.** Head: captive, molded lexan. Body: brass, nickel-plated. Accepts: phone tip plug, spade lug, banana plug, alligator clip or wire strand. Can be completely insulated from panel. With 2 hex nuts. **Type 1517.** Head: captive, molded lexan with brass, gold-plated insert. Body: brass, gold-plated. Washer: molded lexan, with brass, gold-plated inserts. Accepts: phone tip plug, spade lug, banana plug, alligator clip or wire strand. Molded washers completely insulate post from panel. Miniature washers and narrow fluted head require min. panel space. Mounts in 3/8" round or "D" hole in panel as indicated. Wrap-around solder terminal on stud for direct connection. **Type 899:** Standard multiple connection Insulated Hex Head Binding Post, mounts in 1/2" round or D hole, includes all mounting hardware. **Type 3015:** Miniature multiple connection insulated binding post, mounts in 1/4" round or D hole, includes all mounting hardware. **Type 110:** All metal binding post, brass nickel-plated, mounts in #8 clearance hole, includes all mounting hardware. **Type 459:** Standard multiple connection all insulated fluted head binding post, mounts in 1/2" round or D hole, includes all mounting hardware. Accepts standard banana plugs, .080 phone tips, wire, alligator clips and spade lug. Accepts miniature banana plugs, .080 phone tips, wire, alligator clips and spade lug. 1 K volts 60 cycle AC continuous working voltage, when insulated from panel as recommended. Capacitance: 5.0 mmfd. (Type 1517, 3.0 mmfd).

Dual Binding Posts Type 1477 and 269: Standard dual insulated binding posts, mounts in two 1/2" holes on 3/4" centers, panels up to 1/4" thick, includes all mounting hardware.

§ Capacitance: 2.0 mmfd. between conductors, 3.0 mmfd. top panel. † Rated at 15 amps AC for 10° temp. rise continuous duty, 2 KV volts cycle AC continuous working voltage.

Dual Banana Plug Adapters

All are molded standard dual banana plugs on 3/4" centers. **Type 210.** Takes up to #12 wire; stackable; molded polystyrene body. **Type 1675:** Set screws to secure leads to conductor. **Type 1676:** Turret terminals for solder connection of component leads. **Type 1686:** To BNC female. **Type 1687:** To BNC male.

Model 699 Universal Test Lead Kit

Universal Test Lead Kit offers 50 leads in one for complete interchangeability. Retrofits to most existing equipment. **Kit includes:** prod (made of KJB-Type ABS plastic 94V-0), 4 phone tips, 2 needle tips, 2 alligator clips, 2 spade lugs, 2 banana plugs, 18 PVC-covered wire (48" nom. overall length), and 1 red and 1 black lead. Prod features ribbed finger grip and non-slip finger guard.

IC Sockets (DIP and STRIP)

ICA Series Screw Machine Sockets

Feature four finger Beryllium copper contacts with high retention design. Low profile body with mounting holes. "S" in Mfr.'s Type number indicates solder dip sockets. "WB" in Mfr.'s Type number indicates 3-level wire wrap. Body material is glass-filled black polyester. PCB hole .035" ± .002". IC lead and socket leads are coincident. **Plating:** TG30 has 30µ inch minimum gold on contact area. 200µ inch minimum tin in the terminal area. TG30 includes an underplate of 50µ inch minimum nickel. **Temperature Range:** -65°C to +125°C.

ICT Series of Open Frame IC Sockets

Feature four finger Beryllium copper contacts with high retention design. Open frame body for excellent connection cooling. "S" in Mfr.'s Type number indicates solder dip sockets. Body material is glass-filled black nylon. PCB hole .035" ± .002". IC lead and socket leads are coincident. **Plating:** TG30 has 30µ inch minimum gold on contact area. 10µ inch minimum gold on terminal area. Both options include an underplate of 50µ inch minimum nickel. **Temperature Range:** -65°C to +125°C.

SBE Series Strip Socket

SBE Series. Solder dip strip socket. Accepts .015" dia. pins. Body material is black polyester, glass-filled. Contact material is phosphor bronze and contact finish is gold. **Mounting instructions.** PCB hole: .035" ± .002" (0.89 ± 0.05mm). Socket is offset .026" (.66mm) from IC leads. **Temperature range:** -65°C to +125°C. Accepts .016" - .021" dia. pins. **Solder tail:** .040" ± .022". **WB wire wrap tail:** .055" ± .002". **Flammability:** UL 94V-0 **Temperature Range:** -65°C to +105°C.

ICN Series Wire Wrap Sockets

Types with WB in Mfr.'s Type number are wire wrap sockets and include terminal barbs which allow self-lock into PC board, rugged socket body design and RN side wipe contact design. **PCB Hole:** .037 ± .002" (.94 ± .05mm). Socket leads are offset .018" (.46mm) from IC leads. Suffix "-T" denotes tin contact finish. "GG" denotes gold on contacts, tails tin plated. **Temperature Range:** -65°C to +125°C.

ICN Series Solder DIP Production Sockets

The ICN Series features the RN dual leaf side wipe contact design which increases the contact area by 100% over edge-bearing type contacts. The S4 series configuration offers the E-Z entry feature to help guide leads on large LSI devices into the contact area. The contacts are protected from damage by closed entry mold design. Contacts are designed to accept leads up to .015 inch thick. The S4 series has rib type body structure which improves convection cooling. Are supplied with anti-wicking wafers and standoffs for easy flux removal. **Body Material:** black polyester, glass-filled. **Contact Material:** phosphor bronze. **Contact Finish:** Suffix G, 10µ inch (.254mm) min. gold over 50µ inch (1.27µm) min. nickel. Suffix T, 30µ inch (.762µm) min. hot tin dip and wipe. **Temperature Range:** -65°C to +125°C. **Flammability:** UL 94V-0. **PCB Hole:** .035" ± .002" (0.89 ± 0.05mm). Socket Leads are offset .026" (0.66mm) from IC leads.

ICB Series Solder DIP Production Sockets

Dual contact, low profile socket allows dense board-to-board spacing. Features closed bottom body design and self-locking tail. Dual wiping contact design offers high compression for gas-tight reliability. Beryllium copper contacts. **Body:** black polyester, glass-filled. **Contact Finishes:** Contact Area 10µ inch min. gold over 50µ inch min. nickel. **Terminal Area:** 100µ inch min. electro tin over 50µ inch min. nickel. **Temperature Range Rating:** -65°C to +125°C. **PCB Hole Mounting:** .040" ± .002" 3 dia.

ICL Series Solder DIP Production Sockets

Designed primarily for high volume applications. Low profile (.150") allows very dense board-to-board spacing; the socket is stackable side-to-side and end-to-end to optimize board surface usage. The body material is glass-filled black polyester. **Contacts:** Beryllium Copper. Suffix "T" denotes tin contact finish, "TG" denotes gold over nickel contact finish. **Terminal range:** -65°C to +125°C. **PCB Hole:** .031" ± .002" (.79 ± .05 mm). IC leads and socket leads are coincident. **Temperature range:** -65°C to +125°C.

NOTE: Sockets available with Tin Gold Contacts.

Plastic Leaded Chip Carrier

- Accepts chip carriers conforming to latest Jedic specifications
- 20-100 pin versions available
- Molded-in standoffs for easy cleaning and heat dissipation
- Mold polarization and pin one locator ensure positive alignment

Materials and specifications: Body is PPS contacts are phosphor bronze. Contact resistance is 30 milliohms max insulation resistance is 1000 megohms min dielectric withstanding voltage 500 volts AC with a current rating of 1 ampere plating is 80 pinch (2.30 µm) minimum tin on contact area 50 pinch (1.27 µm) minimum nickel underplate.

PLCC-SMT Series Surface Mount Plastic Leaded Chip Carrier Sockets

High-density, low profile 0.200" (5.08) maximum height. Open frame design allows for visual inspection of solder joints. Footprint matches device. Phosphor bronze contacts with tin-over-nickel plating. High-temperature, black polyphenylene sulfide insulator, rated UL94V-0, is compatible with IR reflow and wave soldering. **Insertion force:** 180g/pin maximum. **Withdrawal force:** 28.35g pin minimum. **Contact resistance:** 20mΩ **Current Rating:** 1A. **Temperature range:** -55°C to +105°C. For Automatic assembly. Available with or without location posts.

Pin Grid Array Sockets

6-point contact provides consistent insertion/withdrawal and contact resistance. Low insertion force (2.5 ounces) for easy installation and removal. Beryllium copper contacts finished with 10 micro-inch gold on contact area and 200µ" tin/lead on terminal area over 50µ" nickel underplate. Precision machined half hard brass shell that protects against flux contamination and solder wicking. Standard 0.125" long solder tail termination. **Current rating:** 1A. **Temperature range:** -65°C to +125°C Black polyester, glass-filled body. Rated UL94V-0.

IDS-NPK and IDS-PK Series 0.100 x 0.100" (2.54 x 2.54) Grid IDC Socket Connectors

For quick connect/disconnect with all 0.025" post headers, IDS -NPK series sockets offer

total resistance to MIL-C-83503. IDS-PK series sockets incorporate a center polarization tab to meet DIN-41651 and BT-224. Phosphor bronze copper contacts plated with 10µ Robex™ on contact area and 100µ tin on terminal area over 50 micro-inch nickel. Black, glass-filled polyester body and lid, rated UL94V-0. 0.420" wide x 0.235" high. Grid: 0.100 x 0.100". Temperature range: -55°C to +105°C. Order strain reliefs separately below. UL recognized, CSA certified.

IDH-PK Series 4-Sided 0.025" (0.635) Square Post IDC Headers

Four-sided body design provides foolproof socket polarization and pin protection. Mounting configurations include headers for straight (vertical) or right angle (horizontal) applications. MIL-C83503, DIN 41651 and BT-224 compatible. Allows convenient multiple sourcing. Phosphor bronze contacts plated with 10µ Robex™ on contact area and 100µ tin on terminal area over 50µ nickel. Temperature range: -65°C to +125°C. Housed in black, glass-filled polyester, rated UL94V-0. All solder tails are rounded to 0.028" for easy PCB insertion. UL recognized, CSA certified. Order socket ejector latches separately at right.

IDH-LP Series Low-Profile 0.025" (0.635) Square Post Headers

► Robex™ Plating: Provides "better than gold" cycling and environment performance.

Designed for use where space saving is critical, these low profile headers provide mechanical polarization with full shrouding when mated with socket connectors that have center polarization tab. Available for straight or right angle applications. Phosphor bronze contacts plated with 10µ Robex™ on contact area and 100µ tin on terminal area over 50µ nickel. Temperature range: -65°C to +125°C. Housed in black, glass filled polyester, rated UL94V-0. Tall length: 0.102" (2.59). All solder tails are rounded to 0.028" for easy 0.062" thick PCB insertion. UL recognized, CSA certified.

NSH Series 0.025" (0.635) Square Post Non-Shrouded Headers

Notched body design allows easy break-to-length capability. 0.100" (2.54) spacing. Phosphor bronze contacts available with Robex™ plating on contact area and tin on terminal area over nickel for types with TR suffix; or tin over nickel for types with a T suffix. Current rating: 1A at maximum temperature range: -65° to -125°C. Available in 36 contact single row or 80 contact dual row design, in straight or right angle termination. UL recognized, E73764.

CP Series Standard DIN Plug Connectors

DIN 41612 compatible plug designed for daughter board mounting. Features 3 row, 0.100" (2.54) gnd that permits high density packaging. Retent clip secures connector during wave solder. Grey, thermoplastic glass-filled body. Copper alloy contacts. Termination style/tail length: Solder, right angle/0.114" (2.90mm). Plating is 10µ min. Robex™ on contact area. 100µ tin on terminal area. 50µ Nickel underplate. Current rating: 1A @ 100°C. PC board hole: 0.039 0.002". UL recognized, rated UL 94V-0.

SIMS Series SIMM Sockets

Single row, edge card SIMM sockets provide low insertion force and easy extraction of high density memory devices. Symmetrical copper alloy contact maintains 200 grams normal force and eliminates memory module bow. 100 minimum cycle durability. Gas-tight connection maintained even when module thickness varies. High-temperature, black liquid crystal polymer body ruggedly designed to secure modules without latches. Vertical 90° entry allows for robotic or gang insertion/withdrawal without removal of neighboring socket. 0.050" (1.27) contact pitch. Accept JEDEC standard module per MO-116. Current rating: 1 A maximum per contact @ 250V DC. Contact resistance: 20mΩ maximum. Temperature range: -55°C to +105°C.

RN PAK-50® P25E Series 50 MIL IDC Sockets

Accepts 30 AWG, 25 mil center flat cable P25E and P50E sockets are designed to mate with P50E series IDC board mount plugs, ordered separately on this page. Offer 3-dimensional mating: vertical, horizontal and parallel. Latching eject mechanism facilitates mating/unmating. The P25E provides daisy chain capability. The P50E socket accommodates backward and forward capability in that standard .100" and .050" connectors can be used on one cable assembly. Redundant ribbon contact design provides lower insertion/withdrawal forces, lower contact resistance, high normal force and high wear resistance. Contacts are recessed and fully protected on three sides, minimizing pin deformation. Phosphor bronze contacts plated with gold over nickel on contact area, tin over nickel on terminal area. Contact resistance: 30mΩ. Current rating: 0.5A. Black, glass-filled nylon body, rated UL94V-0. Temperature range: -55°C to +105°C.

CS Series Standard DIN Socket Connectors

Compatible with VME Bus backplane applications. Mate with C-Form and R-Form plugs. Types with SI suffix have solder termination, 0.157" (3.99mm) tall, and retent clip. Type with PS suffix has FLEXPRESS® contacts that permit solderless mounting; 0.236" (5.99mm) tall. Grey thermoplastic, glass-filled body. Phosphor bronze contacts. Same plating and current rating as C-Form plugs above UL recognized, rated UL 94V-0.

RN PAK-50® 2-PC. 50-MIL Pitch Connectors

RN PAK-50® interconnect system features a redundant ribbon contact that provides lower insertion/withdrawal forces, lower contact resistance, high normal forces and high wear resistance. 3 dimensional mating versatility-horizontal, vertical and packaging. Both male and female contacts are recessed and fully protected on 3 sides, minimizing pin deformation. Available in 20-100 pin positions. 0.118" (3.00) long straight and right-angle soldered terminals with retention clip to eliminate hardware and secure connector during wave soldering. Phosphor bronze contacts plated with gold on contact area and tin on terminal area over nickel. Contact resistance: 25mΩ maximum. Current rating: 0.5A/contact. Black, glass-filled nylon housing with flange, rated UL94V-0. Insulation resistance: 1000 MΩ minimum @ 500VDC.

5-Way® Binding Posts

BP31 Series have LEXAN polycarbonate resin insulating parts. All others have nylon plastic per MIL-P-20693A, Type IV. All metal grounding type designed for rapid ground connections. Made of machined brass, gold plated and polished. Design complements other hex nut 5-way binding post. Hex and fluted nut types are rated for 30 Amps, 1000 Volts working, except BP21 which is 15 Amps. UL recognized standard 1244. IEC 348.p30 ANSI C39.5-1974. Double assembly type are for use where binding posts are mounted on 3/4" (19 mm) centers. Rated for 30 Amps, 1000 Volts working.

* Nickel plated.

NOTE: Also available from factory in White, Blue, Yellow, and Green. Also available as double assembly (1 black and 1 red) and with nickel or tin plated current carrying brass parts.

Supercon® Electrical Connectors

For safe, quick positive panelboard connections. Available in 25,50,100, and 250 Amp capacities. 25, 50, and 100 Amp types are rated 125-250 VAC or DC current interrupting; 600 V unenergized connector disconnect use only. CSA certified, File #LR-17812. 250 Amp types rated 600 V unenergized connect or disconnect use only. Plugs: Wiring connections to the same plugs can be either soldered or solderless. Cable fastening screws are provided for accommodation of a wide range of cable sizes. Grips are two-piece threaded construction. Receptacles: Color-matched nylon caps and bodies. Wiring connection is made to a threaded stud by wire wrap-around, lug, or bus bar connection.

Male and Female Q-G® Audio Connectors

Plugs and receptacles offer up to 5-contact versatility by means of up to four circuit contacts plug electrically integrated ground terminal on shell. Neoprene cable strain relief bushing keyed to shell; ribbed for easy access to male plugs. Die-cast zinc alloy with satin-nickel finish. Receptacles will mate with all standard audio connectors. Right angle configuration reduces "cable clutter."

EN3™ Mini Weathertight Connectors

Applications

- ▶ Transportation
- ▶ Process Control
- ▶ Communication
- ▶ Marine Electronics
- ▶ Medical Instrumentation
- ▶ Geothermal Instrumentation
- ▶ General Industrial Electronics

Features and Benefits —

- ▶ Superior Leakage Protection. Contact Area is Double-Sealed for Excellent Moisture and Chemical Resistance
- ▶ Reduced Part Count for Reduced Labor to Assemble
- ▶ Thermoplastic Rubber Body Simulates Closed Entry Contact System to Prevent Probe Damage or Accidental Loss of Spring Retention Due to Misaligned or Bent Pins
- ▶ Exceeds Coast Guard Specifications for Water Tightness (CFR 46 Part 110.20)
- ▶ Integral O-Ring and Gasket. O-Ring Is Molded Onto Cord Housing Assembly and Gasket Is Molded Onto Panel Housing Assembly to Prevent Leakage and Eliminate Need for Additional O-Rings and Gaskets
- ▶ Abrasion-Resistant Thermoplastic Boot Provides Strain Relief and Accepts Cable Diameter .195" to .265"
- ▶ Contact Terminal: Solder Cup Contacts (Factory Assembled into Panel/Cord Connector Housings Ready to be Terminated)
- ▶ No Grommets. Cable Clamp Assembly Features Living Hinges, Which Snap Easily Onto and Holds the Cable
- ▶ Easy Contact Removal
- ▶ Low Insertion Force Required
- ▶ Housing Rated UL 94V-0 Against Flammability

Primary Power Receptacles

UL and CSA Approved, International Standard CCE-22

Shell: Black glass reinforced thermoplastic polyester. UL flammability rating 94 V-0, yellow card #E45575. **Pins:** silver-plated brass. **Terminals:** electroplated brass except EAC-333, silver-plated brass.

EAC-333: 3-pin male recp. with rt. angle housing for PC board mount. Rear of panel mounting. PC terminals project .125" to extend through PC board. Ground pin is integral with the ground solder lug on rear of recp. Two additional .136" holes for fastening to panel or chassis.

EAC-309: 3-pin male recp. with standard lug terminals. Mounts from front or rear of panel with two #5 screws or .125" rivets (not supplied).

EAC-311: 3-pin male recp. with FASTON terminals. Mounts from front or rear of panel with two #5 screws or .125" diameter rivets (not supplied).

EAC-305 — 3-contact female receptacle front mount with two #4 screws or .094" rivets (not supplied).

EAC-405 — 3-contact female receptacle with standard solder lug terminals. Snap-in panel mounting.

EAC-409 — 3-pin male receptacle with standard solder lug terminals. Snap-in panel mounting.

EAC-411 — 3-pin male receptacle with FASTON terminals. Snap-in panel mounting.

* Panel mounts are for .040 panel thickness. Snap-in for other panel thickness also available.

DIN Plugs and Sockets

DIN is the name given to this high-quality family of versatile miniature audio connectors. Features include solder lug or PC terminations, as well as bright nickel-plated or colorful plastic snap-on shells. Designed for audio circuitry, they are also ideal for test equipment, computers and other types of low level circuits. Precision manufactured. The parts listed are a small representation of a large and growing family. Call the closest sales office for parts not shown.

Right Angle, PC Mount Receptacles

Mini-DIN Receptacles

SMD8FRA111

Miniature DIN connectors are designed for personal computer and enhancements, as well as data communications, medical and instrumentation equipment and systems. Available with 3 thru 8 contacts, receptacles also have a separate ground contact system. Ground terminal is "snap in" type. "Snap-in" terminal is bifurcated to assure tight hold down on PC board...before, during and after

soldering. Also solder wicking around the terminal adds a greater measure of physical strength to the connection. Additionally, PC terminals are staggered to assure more "hold down" capability during soldering. Receptacle/plug retention is "friction" type, with a separate outer shield.

These same terminals are available in larger, bulk packaging at substantial savings. Add 1 to the Allied stock number to get the same part in bulk.

Vinyl Insulated Ring—Insulation Support

STA-KON terminals and tools exceed test specifications requirements of military, UL and CSA. These ring terminals are insulated with a PVC insulation sleeve of extra length to give protection and relieve bending stress at wire's flex point. Braze seam barrel is serrated to obtain high pull-out value. Terminal is made of high conductivity electrolytic copper, electro-tin plated. Insulation material is color coded.

Nylon Insulated Ring—Insulation Grip

Self-insulated with high dielectric-strength nylon sleeves, these ring terminals are recommended for temperatures up to 105°C. An inner bronze insulation grip sleeve lengthens the flexing radius of the conductor and eliminates conductor creep. The nylon jacket is color-coded.

System 311 Female Socket with .050 Contact Spacing for .025 Pitch Flat Cable

Physical Properties. Insulation Material: Glass reinforced thermoplastic rated UL 94V-0, black. Contacts: Beryllium copper, 30 microinches gold over nickel plating in the mating area, tin/lead plating in the termination area. Environmental Properties. Temperature Rating: -55°C to 125°C. Cable Requirements. PVC Insulation: 30 AWG solid .025 pitch; 30 AWG stranded .025 pitch. Teflon: 30 AWG solid .025 pitch; 32 AWG stranded .025 pitch.

.025" Pitch Flat Cable 136 Series — 30 AWG Solid PVC

137 Series — 30 AWG Stranded PVC

136 Series
Physical Properties. Insulation Material: Flexible PVC, blue/gray. Conductors: 30 AWG, solid bare copper. Environmental Properties. Temperature Rating: -20°C to 105°C. Electrical Properties. Voltage Rating: 150 Vrms. Insulation Resistance: >10¹⁰ ohms. Impedance: 80 ohms. Capacitance @ 1 MHz: 62.3 pF/m (.190 pF/ft.). Inductance @ 1 MHz: .49 µH/m (.15 µH/ft.). Propagation Delay: -5.25 nSec/m (1.60 nSec/ft.).

137 Series
Physical Properties. Insulation Material: Flexible PVC, blue/gray conductors — 30 AWG, 7/38 tinned, stranded copper. Electrical Properties. Voltage Rating: 150 Vrms. Insulation Resistance: >10¹⁰ ohms. Impedance: 70 ohms. Capacitance @ 1 MHz: 82.0 pF/m (25.0 pF/ft.). Inductance @ 1 MHz: .46 µH/m (.14 µH/ft.). Propagation Delay: -5.08 nSec/m (1.55 nSec/ft.). Environmental Properties. Temperature Rating: -20°C to 105°C.

Slimline PCB Solder Transition Connectors

- PCB Solder Transition Connectors provide fast, permanent termination of flat cable to printed circuit boards.
- Available in solder tail lengths for 1.57mm (0.62") or 3.18mm (.125") board thickness.
- Narrow design maximizes packaging density—designed to fit into a standard 2.54mm $\times$ 2.54mm (.100" $\times$.100") male header grid pattern.
- Contact Material: Beryllium Copper, 100 μ inches tin over 50 μ inches nickel in contact zone; tin-lead over nickel in termination area.

For .062" (1.57mm) PC Boards

Male Connectors

Ansley® Male Connectors are designed to mate with female socket transition connectors. Used primarily for in-line cable splice and "T" tap applications, they are available with optional mounting ears for I/O applications, as well as optional retainer/ejector latches for ease of disconnect. **SPECIFICATIONS.** **Insulation Material:** Glass reinforced thermo-plastic, rated 94 V-O. **Contact Material:** Beryllium copper. **Contact Plating:** Gold over nickel. **Current Rating:** 1 A. **Insulation Resistance:** $>1 \times 10^9$ Ohms @ 500 VDC. **DWV:** >500 V rms (Sea level). **Temperature Rating:** -55° to $+125^\circ\text{C}$. **Color:** Blue.

NOTE: Part numbers shown indicate connector without ejector/retainer latches
Following options are available as special order items

- Add suffix "E" for latches to accommodate female socket connectors without strain relief
- Add suffix "ES" for latches to accommodate female socket connectors with strain relief

Low Profile DIP Plugs With Heavy Duty Pins

Ansley® Low Profile DIP Plug Connectors are primarily used as a disconnectable interface to DIP Sockets. DIP plugs with heavy duty contacts are used in disconnect applications with DIP sockets. DIP Plugs with tin plated contacts provide a permanent flatcable transition to printed circuit boards. **Insulation Material:** Glass filled thermoplastic, rated 94 V-O, blue. **Contact Material:** Beryllium copper; 30 μ inches minimum gold over 50 μ inches nickel in contact zone; tin-lead over nickel in termination area. **Current Rating:** 1 Amp. **Insulation Resistance:** $>1 \times 10^9$ Ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** -55° to $+125^\circ\text{C}$.

Ansley® Standard PCB Male Headers

These headers mate with socket connectors with center polarization tab. Parts with an "E" suffix have short ejectors for female sockets without strain relief. Parts with an "ES" have long ejectors for female sockets with strain relief.

Female Socket Connectors

- Polarization Keyways Standard, Polarization Tabs Optional
- Snap-On Strain Reliefs (Optional)
- One-Piece Connector Design with Mechanical Side Latches

- Positive Cable Stop Design
- Ridges in Connector Top Align with Ansel® Flat Cable
- 30 Microinches (Minimum) Gold Plating in Contact Mating Area

With Center Polarization Bump

Standard W/O Center Polarization Bump

PCB Male Headers, Low Profile with Lock and Eject Option

- Ansel® Low Profile Headers also available in Ejector/Retainer versions, add Suffix "E" for headers with short ejectors to accommodate female socket without strain relief; add suffix "ES" for header with long ejectors to accommodate female socket with strain relief.

The Low Profile PCB Male Header is designed to provide stability, reliability, convenience, and positive polarization when mated with a Female Socket Transition Connector in PC board applications which require repeated connection and disconnection. **Insulation Material:** Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Phosphor bronze; 30µ inches minimum gold over 50µ inches nickel in contact zone; tin-lead over nickel in termination area. **Current Rating:** 1 Amp. **Insulation Resistance:** >1 x 10⁹ Ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** -55°C to 125°C.

Female Sockets, Headers, and D-Sub Hardware

Female Socket Transition Connectors (622-Series)

The Thomas & Betts 622 Female Socket Transition Connector is designed to mate with a wide variety of Male Headers in PC board applications which require repeated connection and disconnection. **Insulation Material:** Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Beryllium copper: 30 µ inches minimum gold over 50 µ inches nickel in contact zone; tin-lead over nickel in termination area. **Current Rating:** 1 Amp. **Insulation Resistance:** >1 x 10⁹ Ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** -55°C to 125°C.

Vertical Ejector Headers

Description/Application

Unlike conventional designs where the ejector latches swing left and right, the "vertical" ejector latches swing front and back, permitting headers to be soldered end-to-end with no wasted board space. **Insulation Material:** Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Phosphor bronze: 30 µ inches minimum gold over 50 µ inches nickel in contact zone; tin-lead over nickel in termination area. **Current Rating:** 1 Amp. **Insulation Resistance:** >1 x 10⁹ Ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** -55°C to 125°C.

*Suffix "E" indicates headers with ears for Female sockets WITHOUT Strain Relief. Suffix "ES" for sockets WITH Strain Relief.

"D" Connector Hardware

Backshell Screwlock Assembly. Used with backshell strain relief to retain two "D" connectors to each other through a Panel or PC Board. Stainless steel.

515-4020. Type 609-005. PER SET 10.52

Jackscrew Assembly. Used with 609-002 for Front Panel Mounting or 609-004. Stainless steel.

515-4010. Type 609-003. PER SET 4.75

Jackscrew Assembly. Used with 609-003 to retain two "D" connectors (Plastic only) to each other as a mated pair cable splice. Stainless steel.

515-4005. Type 609-002. PER SET 5.35

Screwlock Assembly. To retain two "D" connectors (Plastic only) to each other through a Panel or PC Board. Stainless steel.

515-4000. Type 609-001. PER SET 6.33

Slide Lock Post. Used with slide lock retainer assembly 609-50-SL. Discard flat washer for 3/32" panel; retain for 1/16" panel. Discard lock washer when No. 609-008-50 is used with No. 609-50S-M(1) or 609-50P-M(2).

515-4040. Type 609-008-50. PER SET 2.20

Backshell Jackscrew Assembly. Used with Backshell Strain Relief and 609-003 to retain two "D" connectors to each other as a mated pair cable splice. Stainless steel.

515-4015. Type 609-004. PER SET 5.82

Rear Panel Mount Jackscrew Assembly. 609-006 for .090 In. panels, 609-007 for .125 In. panels.

515-4025. Type 609-006-1. PER SET 4.75

515-4030. Type 609-007-1. PER SET 4.75

Slide Lock Retainer. Used to lock a mated pair of 50-position "D" connectors. Must be used with slide lock post 609-008-50. Discard lock washers when 609-50SL is used with 609-50S-M(1) or 609-50P-M(2).

515-4035. Type 609-50SL. PER SET 4.09

Jackscrew. Used to lock a 50-position "D" connector to a metal shell "D" connector with jackscrew. Mounting holes in panel are 3.99" ±.05" (.157" +.002") diameter.

515-4045. Type 609-009-50. PER SET 2.20

Bale Lock Assembly. To lock a mated pair of 50-position "D" connectors with a backshell. **Bracket Material:** Stainless steel, spring temper. **Screw:** Zinc-plated.

515-4050. Type 609-50BL. PER SET 2.58

"D" Connectors, Plastic for Flat Cables

► For Mounting Hardware, See Page 315

Plastic "D" Connectors are used in panel-mounted I/O applications, providing mass termination, convenience and IDC integrity while maintaining compatibility with all industry-standard "D" connectors. **Insulation Material:** Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Beryllium copper: 30 μ inches minimum gold over 50 μ inches nickel in contact zone; tin-lead over nickel in termination area. **Metal Shell:** Steel with tin plating. **Current Rating:** 1 Amp. **Insulation Resistance:** $>1 \times 10^9$ Ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** -55°C to 125°C .

Ansley® Metal Shell Low Profile "D" Connectors

► For Mounting Hardware, See Page 315

Low Profile Metal Shell "D" Connectors are designed for reliable EMI/RFI protected "D" connector interfaces in modern, high-density applications. The low-profile "D" can be integrated into even the most dense applications.

Insulation Material: Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Beryllium copper: 30 μ inches minimum gold over 50 μ inches nickel in contact zone; tin-lead over nickel in termination area. **Metal Shell:** Steel with tin plating. **Current Rating:** 1 Amp. **Insulation Resistance:** $>1 \times 10^9$ Ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** -55°C to 125°C .

Model 779-2100 Hand Crimp Tool Frame and Dies

Features and Benefits
 ► Allows mass termination of up to 64-conductor flat cable with Ansley® IDC connector, for wide application flexibility
 ► Hand tool terminate in seconds without wire stripping or soldering, for low installed cost.
 ► Shure Stake™ mechanism eliminates operator guesswork, assures a reliable crimp cycle every time.

Type 779-2100. Tool frame accommodates snap-in interchangeable dies to install the entire range of Ansley® IDC connectors.
 515-4100EACH 260.99

Flat Cable Cutter

Type 779-5030M. Cable Cutter for up to 64 conductor flat cable.
 515-4160EACH 98.85

Flat Cables

Ansley® flat cable is designed to mass terminate all types of Ansley® connectors without wire stripping or soldering. The flexible, symmetrical cable is extruded, not laminated. In order to maintain exacting .050" (1.27 mm) pitch tolerance from conductor to conductor. Connectors can be terminated to flat cable in up or down configurations or 180° from each other.

Series-171—Standard Gray Flat Cable

Dark blue stripe on number 1 conductor for positive polarization. Alternating red and blue stripes every fifth conductor. 28 AWG stranded conductors .050" (1.27mm) conductor spacing. 105°C/PVC insulated, 300 VRMS. UL style 2651. Primarily designed for intra-cabinet wiring applications.

Series-200—Twisted Pair Flat Cable

Ansley® Twisted Pair Flat Cable is designed for applications where crosstalk reduction is required. It combines the time and cost savings of mass termination with the electrical performance of twisted pairs, making it ideally suited for differential driver or signal-ground circuit applications.

The cable consists of stranded round conductors insulated with color-coded PVC, twisted into pairs and laminated to a polyester film. reverse twisting of adjacent pairs assures optimal signal performance. 18" twisted pair and 2" flat section or termination with IDC connectors. 28AWG stranded conductors. 1.27mm (.050") flat zone conductor spacing. Rated 105°, 300 volts UL20184.

Series 196—Ground Plane Flat Cable

Ansley® Soft-Tear Ground Plane Flat Cable is designed for intra- and inter-cabinet high speed data transmission applications. It provides high density, consistent, and repeatable electrical characteristics, with particularly low crosstalk, for high-speed data transmission.

The unique economical Soft-Tear design combined with Ansley® notching and trimming tools greatly simplifies the removal of insulation and ground plane, reducing preparation time by as much as 70% over conventional ground plane cable. The extruded insulation maintains exacting pitch tolerances from conductor to conductor over the life of the cable 28 AWG stranded conductor 1.27mm (.050") conductor spacing. .127(.005") thick ground plane. Number 1 conductor acts as a drainwire (dark blue polarity stripe).

Plug-In Screw Connector System For Printed Circuit Boards — Series 120 and 121

Conecta® Series plug and header connectors provide reliable contact for applications which require frequent disconnections. Headers are shrouded to ensure proper mating. **Specifications. Center to Center Spacing:** Series 120 — 5 mm/.197"; Series 121 — 5.08 mm/.200". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — 40°C/104°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 33%. **Screw:** M3. UL File E69841 — 10 A, 300 V, 12-26 AWG. CSA File LR24322 — 10 A, 300 V, 12-26 AWG. Functionally equivalent to Phoenix Contact Series MSTB, Weidmüller Series BL/SL and Wieland Series 8113. Larger pole configurations are available on request.

Screw Connectors For Printed Circuit Boards With Elevator Style Clamping Mechanism — Series 150

Series 150 Multilift connectors feature elevator style clamping, captive screws, test holes and dovetail interlocking which allows for assembly to the required number of poles while maintaining center to center spacing. **Specifications. Center To Center Spacing:** 5 mm/.197". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 33%. **Screw:** M3. UL File E69841 — 20 A, 300 V, 10-26 AWG. CSA File LR24322 — 20 A, 300 V, 10-26 AWG.

Parallel Screw and Wire Entry Terminal Blocks For Printed Circuit Boards — Series 180

Series 180 features dual PCB pins which provide a more stable platform and higher torque absorption during the screw tightening process. **Specifications. Center To Center Spacing:** 5 mm/.197". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 33%. **Screw:** M2.5. UL File E69841 — 15 A, 300 V, 12-26 AWG. CSA File LR24322 — 20 A, 300 V, 12-26 AWG.

Screw Connectors For Printed Circuit Boards With Elevator Style Clamping Mechanism — Series 99

Series 99 low profile connectors feature elevator style clamping and captive screws. Versions are available from 2 to 28 poles. **Specifications. Center To Center Spacing:** 5 mm/.197". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color black. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 25%. **Screw:** M3. UL File E69841 — 15 A, 250 V, 14-22 AWG. CSA File LR24322 — 15 A, 300 V, 14-22 AWG.

Plug-In Screw Connector Systems For Printed Circuit Boards — Series 93-FL and 95-FL

These two-part plug and pinstrip combinations provide a small footprint, low profile design. Versions are available with 3.5 mm (.138") or 5 mm (.197") center to center spacing.

Series 93-FL

Specifications. Center To Center Spacing: 3.5 mm/.138". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 32%. **Screw:** M2. 8.011	8.033	8.066	8.190
-------	-------	-------	-------

Tab Arrangements

Series 98 barrier style connectors offer a choice of screws or 4.8 mm (.187") tabs to suit various connection requirements. Depending on the product chosen, up to 6 connections can be made per pole. **Specifications. Center To Center Spacing:** 10 mm/.394". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-2, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 25%. **Screw:** M2.5. UL File E69841 — 15 A, 300 V, 12-26 AWG. CSA File LR24322 — 20 A, 300 V, 12-26 AWG.

Terminal Strips, Ceramic Blocks, and Interface Modules

Screw Terminal Strips For Panel/Chassis Mounting — Series 300

Series 300 terminal strips are used for connecting stripped, unterminated, solid or stranded copper wires, ranging from 6 to 26 AWG depending on the product selected. Each strip has 12 circuits and can be easily cut to the required number of poles. Mounting holes are provided between each circuit. Captive screws are backed out and ready for wiring.

Each circuit has a wire protector to prevent damage to the wire from the turning screw. All metal parts are completely recessed in the flexible polyamide moulding. This dead front design ensures safety and prevents short circuiting.
Specifications. Insulating Material: Polyamide, self extinguishing to UL 94, V-0 or V-2, natural. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 25% (33% for types 326 and 327). UL File E69841. CSA File LR24322.

Ribbon Cable Interface Modules — Series MTB

MTB interface modules are designed to facilitate the connection of flat ribbon cables to discrete wires. Standard modules are equipped with 10 to 64 pole IDC connectors with ejectors according to DIN 41651. They are designed to mate with DIN 41651 female plugs equipped with strain relief clamps. When plugged, the ejectors lock the plug in place. **Nominal Rated Voltage:** 60 VAC. **Nominal Rated Current:** 1 A.

DIN EN 50022 Rail Mounted Terminal Blocks — Series EURO

DIN rail mounted terminal blocks provide a flexible connection system with a wide capacity range, an efficient use of space, and a built-in capacity to monitor and maintain electrical systems.

The EURO Series also offers logical organization and a flexible and clear marking system that allows efficient and safe monitoring and maintenance of the system. **Specifications. Insulating Material:** Polyamide, self extinguishing to UL 94, V-2, color grey or yellow/green. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 28%. Wiring Duct — Series LKV

Series LKV wiring duct provides an organized routing of electrical wiring for control panel applications. The design also protects and enables easy location of the wires. Slots on either side of the duct allow wiring to exit in order to connect equipment or components. All ducts are suitable for horizontal or vertical mounting.

Ducts and covers are shipped assembled in 2 meter lengths (6.5') which can easily be cut as required. Series LKV ducts may also be mounted to DIN EN 50022 mounting rails with the use of type LK-RA DIN rail adapter. **Specifications. Insulating Material:** Rigid PVC, grey — RAL 7030. **Temperature Limits:** Short time — 80°C/176°F; Continuous — 60°C/140°F; Low limit — -20°C/-4°F. **Comparative Tracking Index:** CTI >400. CSA File LR25478-2.

WIRE PRO, INC.

PC Board, Mini Hex, and Blue Ribbon Connectors

Series 133 .156" Center PC Plugs

Mate with 143 Series. Brass, cadmium plated guide pins; cadmium plated end caps; gold over albaloy plated brass contacts. Two .128" holes for bolting to wiring board. Last two digits in type number indicate tail style. **Type 21:** eyelet tail, 600 V rms. 5 amps. 3250 VDC breakdown. **Shipping weight:** 2 oz.

Series 225 PC Connectors

.156" Contact Center
Mate with .054" to .071" PC boards. Last two digits indicate tail type. **Type 01:** solder eyelet. **Type 04:** dip solder. **Dielectric:** black glass-filled phenolic. 5,000 megohms minimum resistance. **Contacts:** copper alloy. .000020" minimum gold over copper plating. Rated 5 amps, 600 VAC (RMS) at sea level. 150 VAC at 70,000 feet. **Temperature Range:** -65°C to +125°C. Solder eyelets accept up to three #20 AWG wires. Dip solder terminals are designed for .043" diameter holes. .140" row-to-row spacing.

Series 26 Blue Ribbon Connectors

► Self-Cleaning Contacts
► Matching Positive Polarization
► For Heavy-Duty Applications

Rugged, heavy duty interconnections for when larger gauge wires must be used and size is not a limiting factor. High-impact diallyl phthalate dielectric with molded-in mounting plates of corrosion-resistant passivated stainless steel. Float mount bushings provide .028" radial movement. Contacts .000030" gold over copper base. Self cleaning wiping action. Solder eyelet tails. **Maximum wire size:** 16 gauge. Rated 5 amps per contact, 750 VDC at sea level. 300 VDC at 60,000 feet. Estimated service life of 25 years in mated condition. UL recognized.

Plug and Socket Connectors

Make inexpensive cable connectors of standard sockets, plugs, and receptacles. Type 86-3-13 is steel end outlet $\frac{7}{16}$ " I.D., has a wire insulator and a black epoxy finish. 86-3-24 is steel, has a cable clamp, $\frac{3}{8}$ " wire insulator and a black epoxy finish. Type 86-3-858 is black thermoplastic and has a $\frac{5}{16}$ " end outlet with strain relief. Use with the connectors in this section that don't have mounting plates.

Magnetizer/Demagnetizer

- ▶ Magnetize Your Own Tools and Parts on the Job
- ▶ Powerful Permanent Magnet for Extended Life
- ▶ Magnetize or Demagnetize Tools and Small Parts Instantly
- ▶ Shatterproof Box is Made From Durable ABS Plastics

Powerful permanent magnet ideal for magnetizing tools and small steel parts. (+) To Magnetize (-) To Demagnetize. Dimensions: 2.1" x 2" x 1.1 (52 mm x 50 mm x 29 mm).

951-4001. 40010 EACH 8.50

BONDHUS Balldriver Hex Tools

- ▶ Screws Can Be Tightened or Loosened at Angles Up to 25°
- ▶ Works in Hard to Reach Areas When Ordinary Hex Wrenches Simply Can't
- ▶ Faster Insertion and Removal. Full 360° Turning
- ▶ Available in Inch and Metric Dimensions

Electricians Insulated Sets

Model 32090. 4 piece set. 1 each insulated. Slotted: 3/4" x 4", 3/16" x 5". Phillips: #1 x 3, #2 x 4". 951-3209. 32090 PER SET 21.30

Model 38006. Multi bit set. 1/4" insulated magnetic driver. Slotted: 4.5 x 25 mm, 6.0 x 25 mm, 8.0 x 25 mm. Phillips: #1 x 25 mm, #2 x 25 mm, #3 x 25 mm. 951-3800. 38006 PER SET 16.95

WIHA® Bits-Selector

- ▶ 10 Assorted Bits, Magnetic Adapter, Durable Storage Box
- ▶ Light Weight, Compact Durable High Impact Plastic Holder
- ▶ Molded Hex Cavity Turns Box Into Handle for Quick Fastening Jobs
- ▶ Quick Bit Access With Slide Out Drawer
- ▶ Includes Magnetic Adapter/Extender for Power Tool Use

951-7924. 79243 SET 17.95

Compact Precision Tool Sets

- ▶ Hardened Reversible Tool Steel Blades
- ▶ Compact Indexed Storage Box — (3.75" x 6.25" x .68")
- ▶ Adjustable Blade Lengths
- ▶ Exact Fit Precision Tips
- ▶ Rotating Finger Tip Control Cap

26995 TORX Set. Set contains 4 Blades; 7 Tips: T6, T7, T8, T9, T10, T15, T20. Weight: .25 lbs. 951-2695 PER SET 26.50

26996 Slotted and Phillips Set. Set contains 4 Blades; 4 Slotted Tips: 1.5, 2.0, 3.0, 3.5mm; 4 Phillips Tips: #000, #00, #0, #1. Weight: .25 lbs. 951-2696 PER SET 30.50

26997 Slotted, Phillips and TORX Set. Set contains 8 Blades; 4 Slotted Tips: 1.5, 2.0, 3.0, 3.5; 4 Phillips Tips: #000, #00, #0, #1; 6 TORX Tips: T6, T7, T8, T9, T10, T15. Weight: .34 lbs. 951-2697 PER SET 50.90

26998 Metric Nutdriver Set. Set contains 8 Blades; 9 Sizes: 2.0, 2.5, 3.0, 3.2, 3.5, 4.0, 4.5, 5.0, 5.5mm. Weight: .43 lbs. 951-2698 PER SET 59.10

WIHA® Precision Electronic Tools

Tray Handle SG

Profile extruded aluminum tray handle available in three lengths featuring ease of installation. Anodized with a matte finish in natural or black. Does not require screws for metal thicknesses of 1-2.5 mm. Two rubber inserts guarantee tight and secure installation. Two cross-slotted grooves for M4 screws offset by 90° provides firm connection or may be used as mounting aids. **Version A:** Installation by means of an upper rubber insert that pushes in from the back. **Version B:** Installation by means of two countersunk screws from outside. *Dimensions are mm.

Micro Series Shearcutter — Heavy Duty

- Heavy Duty For IC Pins, Cables and Harnesses
- Maximum Durability
- Safety Clip (On Some Models) Prevent Flying Leads
- Maximum Operator Safety
- 1178M, 2178M Feature Light Blue Grips
- 1178D, 2178D Feature Static-Dissipative Black Grips
- 2178M, 2178D Feature Safety Clips
- 1178D, 2178D Especially Hardened and Plated

Stainless Diagonal Cutting — Slim Nose

- For Cutting Soft Non-Ferrous Wire, Max. As Specified, No. 25 Gauge (.016") and Smaller Soft Steel Wire
- Ideal For Tip Cutting In Delicate Electronic Circuitry Work and Where Small Lightweight Pliers are Required For Use By Women Engaged In Electronic Component Assembly
- Precision-Machined, Ground Flush Cutting Edges, Back Clearance, Patented Handle Spring
- Offers Up To Four Times The Life Of Regular Miniature Diagonal Pliers

Utility Pliers — 50CG Ignition Pliers

MS91528 Style, Black, Knobs

Explanation of Type Numbers

70-3-BL-2G

- (70) Diameter: 50 - 1/2", 70 - 3/4", 90 - 1", 125 - 1 1/4".
 (-3) Type: 1-Plain Round, 2-Round/Ring Skirt, 3-Round-Dial Skirt, 4-Plain Pointer Bar, 5-Pointer/Ring Skirt Bar, 6-Crank.
 (BL) Style: WD-White Dot, BL-Backlighted Skirt.
 (-2) Shaft Hole Size: 1-.127", 2-.252".
 (G) Finish: Mirror Finish, G-Matte Finish (both black).

All are molded from high-impact polycarbonate with corrosion-resistant aluminum inserts for maximum strength. Two setscrews: 4-40 UNC-3A on 50, 70 series and 1/8" shaft models; 8-32 UNC-3A on others. Meets or exceeds requirements of MIL-K-3926.

Knob Locks

Knob locks are positive friction locking devices for holding knobs in a specific position under conditions of shock and vibration. Knob locks used only with standard round and pointer knobs. **Knob Diameter:** 3/4". **Thread:** 9/32-32. **Dimensions:** A=1" (25.4 mm); B=.721" (18.3 mm).

Shaft Lock and Seal

Shaft locks prevent control shafts from rotating under conditions of shock, vibration, or accidental contact. They form a dust and waterproof seal at the shaft and also at the panel surface.

Specifications: Nylon - MIL-M-20693. **Insert** - Brass per QQ-B-626. Nickel plated per QQ-N-290, Class I, Type V. **Shock** - 50 g's. **Vibration** - 5 hours at 10 to 55 cps with amplitude of 0.06". **Water Immersion** - 50 hours under 3 ft. head of water. Control shaft rotated every 10 hours. **Temperature Shock** - Five cycles of 30 minutes at each extreme, -55°C and +85°C. **Humidity** - 150 hours at 95% relative humidity 40°C. **Life Wear** - 10,000 complete cycles.

*Use with any 90 Series, or larger, ring or dial skirted round, skirted pointer, or crank knob.

Transparent Static Shielding Bags

Static sensitive electronic components must be protected from electrostatic discharge while in storage, shipping and transport, as well as during assembly and handling operations. Static shielding bags ensure that static electricity will have a controlled, nondestructive path to ground, independent of environmental factors. By using static shielding bags, premature product failure, due to static related damage, can be eliminated. **Specifications. Thickness:** 3.1 mil (79 microns), ASTM D374. **Tensile Strength:** 9700 lbs/in.² (67 N/mm²), ASTM D882. **Seal Strength:** 5 lbs/in.² (870 N/m²), ASTM D882.

Conductive Foam

Non-Corrosive Conductive Foam

Low density cushioning material: 24 x 36" sheet.

Conductive foam protects static-sensitive electronic devices in-plant and during shipment. Two types, cushioning and semi-rigid are both non-corrosive. **Cushioning (CFC):** Low density spongy material for delicate parts subjected to rough handling. **Semi-Rigid (CFSR):** High density design protects IC leads from static damage and deformation. **Specifications. Cushioning (CFC). Polyurethane Density:** 2-2.5 lbs/ft³ (32-40 kg/m³). **Semi-Rigid (CFSR). Polyurethane Density:** 2-2.5 lbs/ft³ (40-48 kg/m³). Both Products. **Surface Resistivity:** 10⁹ - 10¹¹ Ohms per unit square. **Volume Resistivity:** 10⁹ - 10¹¹ Ohms-cm. Test Standard-ASTM D257.

† JEDEC-14 (Joint Electron Device Engineering Council). ‡ Military Standard 129H. * Labels also provide space where contents may be identified. Supplied in rolls of 500 labels on a 3-inch I.D. core.

Portable Field Service Grounding Kit

Now you can remove and prevent static build-up during field service of electronic systems with this portable kit. **Components include:** one portable grounding work surface made of static dissipative vinyl 24 x 18" with reinforced edges and corners. This surface provides two integral pockets 11 x 6" as well as two male ground snaps and an interconnect snap (AIS-1). One (AWCC) wrist strap with coiled ground cord (max. extension 5 ft) and one (AGC-18-15) straight ground cord.

Electronic Equipment Terminal Mats

Protects you from:

- Loss of Critical Data
- Garbled Printouts
- System Shut Down
- Personnel Discomfort

Electrostatic discharge can cause costly breakdowns and malfunctions of your electronic systems. Terminal mats overcome static problems while providing the protection electronic systems require. The terminal mat is a flexible mat apparatus to serve as a safe, non-destructive ground path for static. **Specifications. Thickness:** 3/32". **Weight:** 1 lb/ft². **Surface Resistivity:** 10⁹ Ohms per unit square. **Volume Resistivity:** 10⁹ Ohms-cm. **Static Decay Time:** Less than 0.05 seconds.

Touch'n Type

Ideal for:

- Word Processors
- Computers
- Electronic Cash Registers, Scales, and Typewriters
- Teletype Machines
- Photo Copiers

The Touch'n Type™ strip is the best method available to quickly route dangerous static electricity away from electronic equipment. Electronic memories can be modified or erased completely and entire computer system failures can be caused by static electricity discharges. Easily mounted on electronic equipment. As soon as the operator makes contact with the Touch'n Type™ strip, the static is safely drained away. **Specifications. Thickness:** 3/64" (1.2mm). **Surface Resistivity:** 10⁹ - 10¹¹ Ohms per unit square. **Volume Resistivity:** 10¹⁰ - 10¹² Ohms-cm. **Static Decay Time:** Less than .05 sec. **Dimensions:** 3/4 x 30 x 3/64". Includes 15 ft. ground cord, alligator clip and extra ring terminal.

Work-Guard™ and Work-Guard B™ Air Ionizers

Work-Guard™

Work-Guard B™

Work-Guard™. Ends static problems in work areas. The standard is a non-blown ionizer that generates ions through corona discharge at two needle points. Propagation to the work area is done by coulomb repulsion. **Specifications. Power Input:** 110VAC (also available with 220VAC adapter). **Ion Output:** Positive and negative. **Induced Voltage:** <100V on 10 pf object 12" from unit. Below computer/microprocessor interference. **Dimensions:** 4 x 4 1/2 x 1 1/2" (101.6 x 114.2 x 38.1mm). **Weight:** 1.5 lbs. (680.5g).

Work-Guard B™. Ionizer with blower, operates on the same principle of ionization as the standard Work-Guard. Low velocity air stream increases the effective area of operation. **Specifications. Power Input:** 110VAC or 220VAC. **Ion Output:** Positive and negative. **Induced Voltage:** 100V on 10 pf object 12" from unit. EMI-RFI; below computer/microprocessor interference. **Dimensions:** 6 x 6 1/4 x 3 1/4" (152 x 158.8 x 82.6mm). **Weight:** 3.1 lbs. (1420g). Available with or without heater.

725-0422	IMSC	Wrist band (IMB) with 5 ft. straight ground cord (SC-5)	26.54	23.59	21.23

Note: All above wrist strap-cord combinations also include an alligator clip for grounding flexibility. All ESS ground cords have one megohm resistor built into the cord for user safety.

ESS straps safely remove static electricity from personnel who handle static-sensitive devices. The strap is worn on the wrist of the user, and a ground cord is attached to the strap, thereby serving as a drain path for static electricity. The wrist strap is available in light blue velcro material and is adjustable to fit most wrist sizes. It features excellent skin contact, washability and operator comfort. Ground cords are available in both straight and coiled cord models and in a variety of lengths and termination configurations. All ESS ground cords have a one megohm resistor built into the cord for user safety.

Flexible Table Mats

- Permanently Static Dissipative
- Will Not Curl on Work Surface
- Durable and Flexible
- Eliminates Capacitance Surge (Common in Laminated Material)
- Heat- and Flame-Resistant
- Humidity Independent
- Acid- and Alkali-Resistant
- Durable and Flexible

ESS work surface table mats provide a static dissipative surface to protect sensitive electronic components from damaging electrostatic discharge (ESD) during manufacturing. Static charges from personnel and conductive objects placed in contact with the mats are quickly and safely drained to ground. Because the mats are static dissipative, sparking electrostatic discharge is eliminated, reducing the electrostatic damage and discomfort to personnel. **Specifications:** Thickness: 3/32 In. (2.4mm). **Unit Weight:** 1 lb/ft² (4.9 kg/m²). **Surface Resistivity:** 10⁹ Ohms per unit square. **Color:** Beige (light blue on request). **Rigid mats also available.**

Ergonomic Hand Tools

- ▶ Meet The Optimum Criteria For Ergonomic Hand Tools
- ▶ Provides More Gripping Accuracy. Long Finger Bearing Surface Reduces Pressure on Sides of Fingers Decreasing The Risk of Skin, Nerve and Blood Vessel Damage
- ▶ Lightweight Construction Helps Reduce Operator Fatigue
- ▶ Disperses Gripping Force More Uniformly Over All Four Fingers and The Entire Palm Area To Reduce Pressure On The Median Nerve
- ▶ Extended Handle Length Allows Even Application of Force From All Four Fingers To Reduce Both Fingers and Hand Fatigue
- ▶ Exclusive, Smooth, Soft Foam Cushion Grips Are Free of Abrupt Edges and Finger Indentations Reducing Pinching or Finger Nerves and Blood Vessels
- ▶ Grip Material Is Non-Slip and Compressible To Allow Positive Gripping and To Absorb Mechanical Shock
- ▶ Handle Contours Adaptable For Either Right or Left Hand Use To Protect Against Discomfort and Injury Resulting From Careless Holding of Dedicated Right or Left-Hand Tools In The Wrong Hand
- ▶ E Designates "Accu-Lite" Ergonomic Design With Anti-Static Foam Grips. Available Only On MS54 Series, GA54 Series, LN54 Series, NN54 Series, LNT15 Series and all Erem Tools; Additional Charge Per Pair

Alignment Tools, Kits and Magnifiers

Tool Kits

Alignment and Specialty Tool Kit — Fig. A

This kit contains a selection of popular alignment and service tools in a handsome carrying case, ideal for the technician and engineer. Each tool's application is described on inside of case. The kit, containing 44 tools, includes: five hex tools, three hex wrenches, four screwdrivers, eight aligners, three Tel-A-Turn tools, wirestripper, wrench kit, inspection mirror, K-Tran tool, Neo-Lite tester, Lo Volt tester, fuse puller, tweezers, TV channel tuning tool, capacitor tool, two 2-IN-1 tools, oiler, reamer tool, heat sink, solder probe, brush/scrapper tool, ruler, burnishing tool, transistor tool, and double end tool.

796-5060. Type 5050EACH 103.86

GC Type 9200 Alignment Tool Kit — Fig. B

Wall mounting kit includes 27 most needed radio-TV alignment tools. Housed in sturdy, 3-color steel panel with 2-hole mounting. Precision made of the finest materials including low-loss plastics and extra-hard bone fiber; tips are hardened spring steel. Includes: various length alignment screwdrivers, special short tools; alignment wrenches; channel tuners; core aligners; oscillator adjust tools; trimmer, IF aligners; solder probe; nylon replacement tip for long reach aligner; hex tools; etc. panel is 9³/₄" high and 18³/₄" wide.

796-9200. Shpg. Wt. 8 oz.EACH 58.82

Type 8280 TV Tool Kit — Fig. C

Contains 15 TV alignment tools in a handy roll-up plastic case. Includes: "Shorty" duplex aligner; 1/8" sq. socket wrench; K-Tran tool; 0.100 hex wrench; recessed screwdriver; others. Tip of Delrin, extra-hard bone fiber, or hardened spring steel.

7-In-1 Stripper

This 7-function tool strips 6-16 AWG solid and 8-18 AWG stranded wire, cuts stranded, solid, Romex and U.F. wire up to 6 gauge, crimps bare and insulated terminals for 10-22 AWG wires sizes, cuts unhardened, commonly sized bolts and screws, gauges solid and stranded wire, loops wire, and reams and de-burrs conduit.

954-3029. 45-777. 7-In-1 Stripper	EACH	23.86
-----------------------------------	------	-------

E-Z Check® Receptacle Circuit Tester

Used for fast, simple testing and fault identification in 3-wire, 125 V circuits, without probes or meters. Tests for open ground, reverse polarity, open hot, open neutral, hot and ground reversed, hot on neutral, and hot open.

954-6135. 61-035. E-Z Check® Receptacle Circuit Tester	EACH	15.00
--	------	-------

E-Z Check® Plus GFI Circuit Tester

Checks for correct wiring, open ground, reverse polarity, open hot, open neutral, hot on neutral, hot and ground reversed with open hot and ground fault interruption.

988-6151. 61-051. E-Z Check® Plus GFI Circuit Tester	EACH	34.25
--	------	-------

IDEAL Vol-Con® Voltage/Continuity Tester

Three testers in one. Heavy duty voltage tester, up to 600 V, low voltage indicator, as low as 5 V AC or DC, non-switching continuity tester.

954-4681. 61-076. IDEAL Vol-Con® Tester with Standard Prods	EACH	54.20

KA-260 Contact Insertion Kit

KR-260 Contact Removal Kit

These kits provide invaluable assistance to the technician. They include the specialized tools required for the insertion and removal of the most popular connectors, all contained in a small handy case. Designed for use with subminiature connectors conforming to MIL-C-26482, MIL-C-26500, MIL-C-26518, and MIL-C-81703 standards, these kits include the most common and popular tools in the industry. They are completely compatible with "original manufacturer" tooling from all major suppliers such as AMP, Amphenol, Bendix, Burndy, Cannon and Deutsch and will work with virtually any connector of this type. The KA260 Insertion Kit includes the three most popular sized insertion tools for contact sizes 12 (yellow), 16 (blue) and 20 (red). The KR-260 Extraction Kit includes the three most popular sized extraction tools for contact sizes 12 (yellow), 16 (blue) and 20 (red). Both kits are packaged in an attractive and durable padded zipper case and have been carefully designed to save both time and effort, plus ensure efficient, on-the-job operation.

Hand Wrapping Tools

This wire wrap tool has a handle and shell, each covered with a sleeve of insulating material. It has a .073" diameter hole and .750" deep to accommodate a terminal, and a hole near the handle to facilitate removal of broken wires. It is used on terminals of wire spring relays, number 5 crossbar wire spring number group, and other components having similar terminals.

20-Piece Precision Tool Kit

K-600. Designed for electronic assembly service and repair. These high quality tools were specially produced for: servicing, adjusting, trouble-shooting, of complex equipment. Special assortment makes it easy and economical for use in assembly work. The Durable leather zipper case contains the following: pliers, screwdrivers, magnifier, soldering equipment, tweezers, alignment tools, needle files, burnisher with blades, pin vise and drivers.

830-0350. Model K-600. 1-3...EACH 196.26 4-Up.....EACH 182.08

52-Piece Instrumentation and Computer Tool Kit

TK-300. Kit contains virtually all basic tools used for adjusting, maintaining and servicing all types of computers, electronic instruments, radar and other electro-mechanical devices. Tools may be used to service complex data processing and electronic equipment. Tools are precision made and individually mounted on 2 removable boards for ease of service. Extra-large space for more tools and papers. Tools can be modified or exchanged to suit your requirements. All tools are mounted on 2 removable boards in rough-duty, leather-finish case. Kit weighs 13 lbs. and measures 14 x 18 x 4 3/4" deep. Includes pliers, screwdrivers, wrenches, and tweezers of various sizes, solder (rosin core), solder aid, inspection mirror, adjuster spring, crimper and cutting tool, circuit tester, tension gauge, vinyl electrical tape, and contact cleaner spray.

830Q0570. Model TK-300. 1-3 EACH 805.07 4-Up.....EACH 751.40

78-Piece Universal Tool Kit

TK-500. Now with just one kit you can install, adjust, service and maintain central office systems (inside and outside plant), telecommunications systems, switchboards, R & D production, general repair (work of precise nature in labs and service shops for all industries). Designed especially for on-the-spot service, adjustment and maintenance in any location. No loss of time for lack of certain tools. Contains removable boards for instant selection of all tools. Extra pockets for your favorite tools and separate compartments for your notes and papers provided. All 76 tools are securely mounted in individual pockets in a highly durable, scratch-resistant Barco case. Complete kit weighs only 16 lbs. and is 5 1/2 H x 18 1/4 W x 16 1/4 D. Kit includes spring adjusters, wrenches, screwdrivers and blades, nutdrivers, pliers and tweezers of various sizes. Also included are soldering equipment, test probe, circuit tester, crimping and cutting tool, hand magnifier, penlight and wire stripper.

M-216C Socket Wrench

— NEW —

Socket wrench, double end, 3/8" and 7/16" hex, plastic handle, 7" long. Used in placing fuses in cable terminals and connecting wires to fuses and binding posts. The walls on both sockets are thin enough so they can be used to work locking devices on most terminals and cabinets.

830-0366. Model M-216C.....EACH 13.50

**Dynamometer
Tension
Gauges**

Large Gauge (Round Tip)

Small Gauge (Flat Tip)

These precision dial type gauges deliver accurate measurement of forces required to actuate relays and other sensitive mechanisms. Reading can be taken in both directions: clockwise and counter-clockwise. Maximum reading indicator moves with indicator when testing and remains at maximum force measured until reset. No need to look at dial hand while measuring, thus avoiding reading errors. Measuring springs are of hard tempered annealed beryllium copper. Dial is protected by breakproof glass. Each unit packaged in rigid, fitted case for protection. 0.1% accuracy. Dynamometer gauges are available in 2 sizes and 13 different ranges. Easy to use. Easy to read.

Carrying Handles

Model 8350. Spring glide handle, manufactured of black genuine leather with chrome plated steel hardware. Handle lies flat on case when not in use. Will not rattle under vibration. Maximum extended height at center line, 1 1/4". **Model 8351, 8352, 8353.** The retracto link handle manufactured of black genuine leather with nickel plated steel hardware, is internally constructed of rubber impregnated cellulose over a spring steel core. Handle folds flat on case when not in use. **Model 8354, 8355.** Molded of high impact styrene with steel nickel plated hardware. Folds flat on case when not in use. Mounts with #10-32 screws (not supplied). **Model 8356, 8357.** Molded of polypropylene with a leather grain look. Folds flat on case when not in use. Mounts with rivets or #6 screws (not supplied).

Scored Turret Terminal Boards

Terminals: Brass, ASTM-B16. **Plating:** Hot Tin Dipped, MIL-T-10727. Recommended for longer shelf life and better solderability. Other platings can be furnished. **Material:** Your choice of either PBE or GEE phenolic. PBE: Paper base electrical, MIL-P-3115C, Type XXXP natural, Temp. 250°F max. GEE: Glass epoxy, MIL-P-18177, Type G-10, 300°F max.

PC Mount Screw Terminal Connectors

These easy-to-mount, multipurpose screw type terminals are a practical, low-cost alternative to PC screw type edge connectors, barrier blocks, terminal boards and terminal strips. Stable and easy to install, they accommodate solid or stranded wire, crimp-type terminals or lugs. Multi-placement of these low-profile terminals make them ideally suited for high-density packaging. Supplied unassembled or with screw installed and

Nylon Spacer Supports

- Easy to install
- Low cost
- Secure and stable
- Releasable
- Flame retardant nylon per 94V-0

Two Styles Available: locking and tension

Spacer Organizer

Avail yourself of all practical sizes and types of spacers and standoffs. Maintain a neat complete inventory of the most frequently used parts in day-to-day operations. An assortment of various sizes and styles in brass, aluminum and nylon with tapped or thru-hole. Metal cabinet designed to be stacked on one another or wall mounted. Clear plastic drawers labeled for easy identification. The following organizer kits are available from stock!

1/4" Hex Threaded
Brass Zinc Plated: Assortment of 1500 pieces 1/4", 3/8", 1/2", 3/4", and 1" lengths. With threaded sizes of 4-40, 6-32 and 8-32. 100 pieces of each size complete with cabinet. **839-0014. STH-14**.....EACH 354.46

Aluminum Iridite Finish:
Assortment of 1500 pieces in 1/4", 3/8", 1/2", 3/4", and 1" lengths. With threaded sizes of 4-40, 6-32 and 8-32. 100 pieces of each size complete with cabinet. **839-0022. STH-22**.....EACH 244.89

1/4" Round Clear Nylon 6/6:
Assortment of 1500 pieces in 1/4", 3/8", 1/2", 3/4", and 1" lengths. With clearance holes for #4, #6, and #8. 100 pieces of each size complete with cabinet. **839-0008. SPR-8**.....EACH 174.01

1/4" Hex Male/Female
Brass Nickel Plated: Assortment of 750 pieces in 1/2", 3/4", 1", 1 1/4" and 1 1/2" lengths. With threaded sizes of 4-40, 6-32 and 8-32. 50 pieces of each size complete with cabinet. **839-0019. STH-19**.....EACH 322.22

LED Spacer Mounts

- Internal design eliminates crimping or shorting of leads
- Positive self-alignment of leads on .100 centers
- Cost and labor saving
- No special tools required

"Future-Tech" designed for T-1 and T-1 1/4 LEDs. These unique, new self-aligning LED mounting spacers simplify preassembly to the printed circuitboard. The spacer features an internally tapered barrier which guides the leads. The bosses serve the dual purpose of heat dissipation and easy post soldering cleanup. Natural nylon, UL rated 94V-2.

Vertical P.C. Test Jack

Accepts .80" Tip. This low profile vertical jack allows dense packing where space is limited. Mounts into a .052" diameter hole. Provides easy access and positive electrical contact. The contact is recessed to prevent accidental shorting. Capacitance between two adjacent jacks less than 1.0 pF at 1 MHz. Operating voltage is 1500 volts RMS. Current rating 5 amps max. **Material Specifications.** Body: nylon per ASTM D4066. Contact: Beryllium copper silver plated.

Low Profile Horizontal PC Test Jack

Allows dense packing on .160" centers. Side by side mounting. Closed entry design for tips less than .084" — will accept probes of .074" minimum diameter. Mounts on .400" centers on .52" holes. **Current Rating:** 5A. **WVAC:** 1500V max. **Contact Resistance:** 0.01 ohms max. **Material:** Body — nylon per ASTM D4066; Contact — Beryllium copper, gold plated. Choice of colors.

Sockets For TO-3

Various Molded Boss Heights. Held underneath chassis — semiconductor is inserted into the contacts of the socket holding the assembly in position. 6-20 screws engage the formed holes in collector pins to complete the mounting. **Top Plate:** Molded nylon. **Base:** Phenolic.

Stock No.	Mfr.'s Type	Dim. "A"	EACH

Printed Circuit Socket For TO-3

Easily assembles onto printed circuit board. Eliminates wiring. Stops on P.C. terminals provide sufficient spacing between socket and P.C. board to permit proper assembly of transistor to socket. Can be screwed down tightly to heat sink. **Top Plate:** Molded nylon. **Base:** Phenolic.

One-Piece All Molded Transistor Sockets For TO-3 Case

All-in-one mounting plate and solder tabs for complete electrical isolation of solder tab connection. **Material:** Insulating base filled with reinforced polyester — 94V-0 rating. **Contacts:** Phosphor bronze tin plate. **Mounting Bracket:** Brass tin plate. **Rating:** 5 amps DC continuous; 15 amps DC intermittent. Model 4513 features transistor lead-in insulating shoulders.

Hand Tools (Lifetime Guarantee)

Standard Diagonal Cutting Pliers

Basic diagonal cutting pliers with tapered nose and standard bevel cutting knives. Model D245-5C has coil spring to hold jaws open. Red plastic-dipped handles. Dimensions. Overall Length: 5" (127 mm). Jaw Length: 1 1/8" (17 mm). Jaw Width: 9/16" (14 mm). Jaw Thickness: 3/8" (10 mm).

- 726-1000. D245-5. Standard Diagonal CutterEACH 17.06
726-1005. D245-5C. Standard Diagonal Cutter with Coil SpringEACH 17.78

Standard Nose, Semi-Flush Cutting Pliers

General-purpose cutter with short, strong, tapered nose. Knives are semi-flush cutting. With coil spring.

Overall Length: 4 3/8" (106 mm). Jaw Length: 1/2" (13 mm). Jaw Width: 7/16" (11 mm). Jaw Thickness: 1/4" (6 mm).

- 726-1030. D257-4CEACH 18.10

Slim Pointed Nose Pliers

Semi-flushed cutting pliers are relieved in the back to permit entry into confined areas. Specifically designed for tip cutting. With coil spring. Plastic-dipped handles. Overall Length: 5" (106 mm). Jaw Length: 1/2" (11 mm). Jaw Thickness: 1/4" (6 mm).

- 726-1035. D219-4C. Semi-Flush CuttingEACH 18.98
726-1040. D219-5C. Semi-Flush CuttingEACH 20.94

Standard Nose, High-Leverage Cutter

High-leverage design provides a 36% greater mechanical cutting and gripping advantage than regular 7" and 8" heavy-duty diagonal cutters. Standard bevel cutting knives. Red plastic-dipped handles.

- 726-2288. D228-8EACH 18.64
726-2287. D228-7EACH 18.24

Tapered Nose, Midget Jaw, Full-Flush Cutting Pliers

These small, diagonal cutting, clean room electronics pliers are designed to permit working in very close quarters with maximum visibility. Fully polished head and neck. With coil spring. Plastic-dipped handles. Overall Length: 4 3/8" (106 mm). Jaw Length: 1/2" (13 mm). Jaw Width: 3/8" (10 mm). Jaw Thickness: 1/4" (6 mm).

- 726-1050. D295-4CEACH 21.86

Special Long-Reach Designer Pliers

Longer handles for more convenient use and greater jaw gripping power. Knurled jaws. Yellow plastic-dipped handles. Overall Length: 8" (203 mm). Jaw Length: 1 1/8" (49 mm). Jaw Width: 1 1/8" (17 mm). Jaw Thickness: 3/8" (10 mm). Point Thickness: 3/32" (2 mm).

- 726-1125. D314-8EACH 16.00

Midget Slim Nose

This small, light, slim nose plier is designed for precision sub-miniature assembly work. Knurled jaws. With coil spring. Plastic-dipped handles. Overall Length: 4 3/4" (121 mm). Jaw Length: 1 1/8" (27 mm). Jaw Width: 7/16" (11 mm). Jaw Thickness: 1/4" (6 mm). Point Thickness: 1/32 x 1/16" (.8 x 1.6 mm).

- 726-1130. D321-41/2CEACH 15.42

Wire-Stripping

11045

11046

11047

Compact, lightweight strippers gauge, cut, strip and loop wire. Spring-loaded, self-opening action. Flat design makes them easy to store and carry. Narrow nose fits into tight places. Strip wire quickly, cleanly, evenly. Strong, hardened-steel with precision-ground stripping holes. Clear gauge markings on both sides. Black oxide finish. Comfortable plastic-dipped handles. Overall Length: 6" (152 mm). Do not use on live electrical circuits.

- 726-1215. 11045. Yellow Handle. Solid Wire. Strips AWG Gauges No. 10, 12, 14, 16, 18 (2.6, 2.1, 1.6, 1.3, 1.0 mm)EACH 11.98
726-1220. 11046. Red Handle. Stranded Wire. Strips AWG Gauges No. 16, 18, 20, 22, 24, 26 (1.2, 1.0, .81, .64, .51, .40 mm)EACH 11.98
726-1225. 11047. Yellow Handle. Solid Wire. Strips AWG Gauges No. 22, 24, 26, 28, 30 (.64, .51, .40, .32, .25 mm)EACH 11.98

Slim Long Nose Pliers

Longer nose and handles for deeper reach into work. Knurled jaws. With or without coil spring. Yellow plastic-dipped handles. Overall Length: 5 9/16" (141 mm). Jaw Length: 1 9/4" (44 mm). Jaw Width: 1 7/32" (13 mm). Jaw Thickness: 9/16" (8 mm). Point Thickness: 1/16" (1.6 mm).

726-1145. D307-5 1/2C. With Coil SpringEACH 17.20

Long Needle Nose Pliers

Designed for accurate assembly work in hard to reach areas. Provides maximum visibility. Features knurled jaws, coil spring, and yellow plastic-dipped handles. Overall Length: 5 13/32" (137 mm). Jaw Length: 1 3/4" (44 mm). Jaw Width: 1 1/2" (13 mm). Jaw Thickness: 9/16" (8 mm). Point Thickness: 1/16" (1.6 mm).

- 726-1155. D318-5 1/2CEACH 17.88

Cable Cutters

This handy, economical tool handles most

cable-cutting jobs with ease. Special high-leverage design gives it amazing cutting capability for its size. Cable-gripping, shear-type jaws cut up to 4/0 aluminum (Not ACSR)...up to 2/0 soft copper...up to 100-pair, 24-gauge communication cable. Makes clean, efficient cuts. Compact...only 9 1/4" (241 mm) long, can be carried in tool pouch or Klein No. 5112 or No. 5112T tool holders. Ideal for working in confined spaces. Tough comfortable, red plastic-dipped handles. Not designed for cutting steel or ACSR.

- 726-6305. 63050EACH 25.12

Multi-Purpose 6-In-1 Tool

Designed for a variety of applications — shears bolts clean; cuts, strips, and gauges wire; measures stud sizes; crimps insulated terminals. With red plastic-covered handles. Length: 7 1/2" (191 mm).

- 726-1230. 1000EACH 18.21

All-Purpose Tool

Will crimp insulated and non-insulated terminals, lugs, and splices; cut and strip wire; cut bolts; crimp 7 mm ignition and distributor terminals. For sizes 10 to 22 AWG. Features wire cutter in nose and full-sized red-plastic-covered handles. Length: 8 1/2" (216 mm).

- 726-1235. 1002EACH 21.36

Long-Nose All-Purpose Tool

Combination cutter/crimper features crimping dies for insulated and non-insulated connectors from 10-22 gauge, and cutters for 4-40, 5-40, 6-32, 8-32, 10-32, and 10-24 screws. Designed to cut screws and cut, strip, and crimp wire. Cutters and strippers located in front of the pivot. With narrow serrated plier jaws to pull, loop, and bend wire, and blue plastic-covered handles. Length: 8 1/4" (210 mm).

- 726-1245. 1010EACH 18.66

Adjustable Wire Stripper/Cutter

Strips six standard wire sizes without nicking wire: No. 10 through 20 AWG and 5.3 through

5 metric. Scissors action of 1/2" wide cutter makes clean cuts with little effort. Serrated nose jaws to bend, shape, or pull wire; holes for looping wire ends. Compact; only 6" long. Coil spring reduces fatigue. Comfortable, blue plastic-covered handles.

- 726-1011. 1011EACH 12.81

Electrician's Scissors

Designed for heavy-duty use. Strong, tough, tempered steel. Nickel-plated finish. Scraper and file on outside of both blades. Sharp points. Scrow hinge permits adjustment. Overall Length: 5" (12.7 cm).

- 726-2100. 2100-5EACH 12.86

Stripping Notches

Similar to No. 2100-5 above, but with lower blade serrated to minimize slippage of wire when cutting. Upper blade has notches for stripping 19- and 23-gauge wire. Rounded points. Overall Length: 5" (12.7 cm).

- 726-2107. 2100-7EACH 14.94

Crimping Tools

Type 1006. For crimping non-insulated solderless terminals and connectors (10 to 22 AWG.) Features tapered nose containing specially hardened wire cutter and plastic-dipped handles (one black, one red). Length: 9 3/4" (248 mm).

- 726-1240. 1006EACH 23.68

Type 1005. For insulated and non-insulated terminals and connectors; will handle wire from 10 to 22 AWG. Features thin nose for work in tight areas, wire cutter in nose, and red plastic-dipped handles. Length: 9 3/4" (248 mm).

- 726-1250. 1005EACH 22.94

Wire Stripping Tools

Strips AWG Gauges: 10, 12, 14, 16, 18, 20, 22 (2.6, 2.1, 1.6, 1.3, 1.0, .81, .64 mm).

- 726-1226. 11062. EACH 32.19

Continuity Tester

- Extra Long 36" Lead Wire
Deluxe Comfortome® Amberyl Handle

Checks for defective controls and switches, broken leads or lines, motors, appliances, etc. Tests for continuity of circuit with power off. Bulb in handle glows when circuit is complete. Pointed 3 3/4" probe. Large 4" handle with removable nylon cap holds replaceable bulb and battery. Long 36" test lead with alligator clip. Shipping Weight: 1 lb.

- 979-7000. 69133EACH 10.70

Wire Stripper-Cutter

A handy, light, compact tool for stripping insulation from wire. Convenient hole for looping or bending wire. With or without hold-open spring. Yellow plastic-dipped handles.

- 726-1237. 1004. With Spring. 5" (127 mm)EACH 6.67
726-1236. 1003. Without Spring. 5" (127 mm)EACH 5.36

Model 333 Rapid Assembly Circuit Board Holder

This holder features 8 position rotating adjustment and 6 lock positions in the vertical plane. Cross bars are available up to 30 inches in length to hold larger boards. Spring loaded, the 333 features tilt angle and height adjustment and quickboard rotations for easy component insertion and soldering. Includes 12" cross bar.

890-4420 Model 333.....EACH 60.99

Model 300. Standard PanaVise® Base.

890-4457 Model 300.....EACH 18.99

Model 311. Bench clamp base mount.

890-4450. Model 311.....EACH 34.99

Model 303. Standard head.

890-4460. Model 303.....EACH 21.99

Model 371. Solder and iron holder.

890-4411. Model 371.....EACH 7.99

Model 312. Tray base mount.

890-4458. Model 312.....EACH 19.99

Model 315. Circuit board holder. Holds PC boards up to 12" W.

890-4498. Model 315.....EACH 25.99

Model 380. Vacuum base

890-4461. Model 380.....EACH 30.99

Model 305. Low-profile base.

890-4515. Model 305.....EACH 18.99

Model 366. Wide opening head. Opens a full 6" with a jaw width of 1 3/4".

890-4505. Model 366.....EACH 26.49

Model 376. Self-centering extra-wide opening head. Jaws open to 9".

890-4510. Model 376.....EACH 35.99

Stainless Steel Pliers
5-Piece Precision Stainless Steel Pliers Set — NEW —

Fills diverse needs for technicians, designers, hobbyists and quality assurance professionals. Micro-Flat Nose is perfect for cutting and trimming work where blade size thickness must be minimal. Snub-Nose Micro-Cutting Nippers are ideal for trimming components and soft, copper wire. Micro-Round Nose Pliers snip tiny wires and trim solder connections. Long Nose Pliers with razor-sharp blades are perfect for trimming film, insulation and plastic chassis boxes. Micro-Bent Nose style covers multiple applications for design, repair and micro-assembly. Spring-loaded handles are extra-cushioned for added comfort. Overall length is only 4".

Patch-Check

Telephone/Data Wiring Tester™

Patch-Check™ is a hand held instrument designed to test telephone (RJ11) and computer data-link (RJ45) wiring. Patch-Check™ identifies open, shorted and cross connected wires with a clear LED display. Depress the pushbutton to review a sequential comparison of the wire position and continuity of the plugs at each end of the cable. The instrument is powered by a 9 volt battery supplied with each unit.

Patch-Check Plus

Tester for Installed Telephone/Data Wiring

Patch-Check Plus Verifies continuity of each wire of RJ11 or RJ45 cable installations up to 1200 feet in length from one end. Patch-Check Plus identifies open shorted and cross connected wire with a clear LED display and audible signal. Each touch of the test button connects the relationship of one pin on the transmit side with the corresponding pin at the far end receiver. Transmitter and receiver are shipped with 9 volt batteries installed and system interconnects for RJ11, RJ45 and MMJ (DEC).

Series 99® Service Kits

Series 99 service kits and sets are made up primarily of various screwdriver, nutdriver, and other blades which can be used interchangeably in Series 99 handles. All blades are high quality steel, hardened and tempered for optimum performance. Plastic handles have a patented spring device that holds blades firmly, yet permits quick, easy insertion and removal. Regular handles accommodate all blades, single and reversible. Stubby, Tee, and Ratchet handles can only be used with single-end blades.

Compact Convertible Tool Sets

Compact convertible tool sets do more jobs with fewer tools, save bench space, and lighten the service kit. Each set is equipped with a remarkable black "Piggyback" torque amplifier handle that slips over the top of color-coded Midget drivers to provide larger gripping surface, extended reach, and increased driving power. Sets housed in attractive, easy to open, clear plastic cases. All individual screwdrivers and nutdrivers are available separately.

PS-88 Screwdriver Set — Inch Sizes (Color-Coded Handles)

984-9901. PS88.....EACH 29.00

984-0060. M-60.....EACH 14.00

PS-120 Nutdriver Set — Inch Sizes (Color-Coded Handles)

984-3501. PS-120.....EACH 36.62

PS-130 Screwdriver and Nutdriver Set — Inch Sizes (Color-Coded Handles)

984-9910. PS-130.....EACH 37.84

Nutdriver Set

Set Contains: Seven pieces, all hollow shaft, numbers HS6, HS8, HS10, HS11, HS12, HS14, and HS16 in plastic pouch.

984-0177. 177.....EACH 43.34

Receiving, Readout, Industrial, and Special-Purpose Tubes

ALLIED

NOTE: Most of the tubes in this listing were purchased by their generic number from the manufacturer with the best price at the time of purchase. Should you desire a specific

manufacturer or quantity pricing, please contact the Allied Facility nearest you at 1-800-433-5700.

Receiving, Industrial, and Special Purpose Tubes

With increasing demands on replacement tubes and the need to satisfy those demands becoming increasingly more difficult, we ask that you contact Allied for any

requirements you may have. The list below is only a sampling of the many tube types we can supply.

Mfr.'s Type	Tube Type	EACH
0A2	Volt Regulator	7.31
0B2	Volt Regulator	7.05

Outdoor LEDs

Featuring...

- ▶ New LED material — InGaAlP — for the highest intensity Yellow and Amber/Orange colors
- ▶ High-intensity outdoor LED lamps — usable from 0.5 mA to 50 mA
- ▶ Red LEDs up to 13,000 mcd typ.
- ▶ Yellow LEDs up to 13,000 mcd typ.
- ▶ Amber/Orange LEDs up to 18,000 mcd typ.
- ▶ Dual chip and Dual color in Outdoor LEDs
- ▶ Applications are: illumination, indicators, signboards, signals

Kilo Bright LEDs — Red

- Ultra-low Power Requirements
- High Contrast Ratio
- Long Life
- Easy Application
- Wide Viewing Angle

- Fast Response Time (40ms @ 25°C)
- Wide Temperature Range (-30°C to +85°C)
- CMOS Compatible
- High Stability Polarizers

Parameter	Wide Temperature
Applied Voltage	5 V RMS
DC Drive Component	50 mV
Operating Temperature	-30°C to +85°C
Storage Temperature	-40°C to +85°C
Operating Frequency	30 to 100 Hz

Field Effect LCDs. Feature state-of-the-art construction and performance characteristics. Connector pins are phosphor bronze, permanently affixed on both sides of display with conductive epoxy. This ensures contact and provides an excellent resistance to bending, warping, and lifting. High resistance to moisture penetration.

Reflective aluminum foil pinned configuration, wide temperature liquid crystal material (-30°C to +85°C). High temperature/high humidity polarizer. Other models available. Contact the Allied facility nearest you at 1-800-433-5700.

Chicago Miniature Lamp

Chicago Miniature Lamp, Inc., an American owned American manufacturer, is proud to offer one of the broadest, most comprehensive lines of miniature lighted components in the industry. Chicago Miniature Lamp supports you with over 80 years of concept design and manufacturing leadership. Chicago Miniature Lamp's vast and intimate knowledge of incandescent lamps, neon lamps, halogen lamps, indicator lights and light emitting diodes (LEDs) can prove to be a valuable technical asset in your product's design and manufacture.

Non-Relampable Indicator Lights

CML Series Cartridge Indicators
Indicators with T-1³/₄ incandescent lamps for instrumentation, telemetry and EDP equipment. Mount holes 0.375" D (9.53) to 0.219" (5.56) panel thickness. Meet MIL-L-3661. To complete unit, order cartridge holders, mounting clips and connectors separately on page 372.

Subminiature Solid-State Indicator Lights

Submidjet style with built-in bright LED; 70 viewing angle. Resistant to shock and vibration. Can be powered with low electrical energy supply or driven directly with solid-state circuitry. Operates on 1.8 to 2.8VDC. Maximum DC current: 50ma. Mounts in 0.193" (4.90) dia. "D" hole in 0.188" (4.78) thick (max.) panel, on 0.344" (8.74) centers min. 6" wire leads, 105 C PVC insulation.

749-1404	CML10-204-1	Flat Solder Lug	8.46

CML Series Indicator Connector

Cartridge indicator terminal pins plug into indicator connector, providing simple installations, changes, replacements. Fits CML series cartridge indicators types CML53, CML 63 and CML64, ordered separately. Sold in multiples of 10.

749-9905. CM21-3 PER PK./10 11.20

CML Series Mounting Clip

Clips mount cartridge indicators directly to panels. Fits CML series cartridge indicators types CML53, CML63 and CML64 ordered separately. Sold in multiples of 10.

749-1406. CML-10380. 10-99 EACH .40

900 Series Instrument Lights

900-200

900-006

Ideal for panel, switch, meter and legend plate applications where localized light is required. Type 900-200 has fixed hood, solder lug terminals, and mounts hole 0.688" diameter to 0.406" panel thickness. Rated 120 volts, 3 watts. Accepts T-3/4 miniature bayonet lamp. Type 900-006 has rotatable hood, screw terminals and mounts hole 1" diameter to 0.500" panel thickness. Rated 250 volts, 1 amp, 75 watts. Accepts S-6 or C-7 candelabra screw base lamp. Order lamps separately.

Dot Matrix LCD Module

Applications

- ▶ Portable Computer Terminals
- ▶ Word Processors
- ▶ Telecommunications
- ▶ High Class Electronic Calculators
- ▶ Display Devices
- ▶ Automobile Display Panes
- ▶ Chemical Analyzers
- ▶ Measuring Equipment
- ▶ Medical Instruments

Features

- ▶ By The Combination Of Dots It Can Display Many Kinds Of Characters And Symbols
- ▶ Due To Low Drive Voltage and Low Current Consumption, It Can Be Operated With Battery
- ▶ Custom Character Generator Is Included

TN type for cost effective basic requirements; STN type for wider view angle and high contrast. **Standard Temperature:** Operating Temperature — 0°C~+50°C; Storage Temperature — -20°C~+70°C. **Backlights:** LED — Character modules, bright, longer life; CCFL — Graphic modules, long life and low power consumption.

Standard Pin Connections*

Inverters For CCFL Backlight

Character Module Interface To MPU

Miniature Link Fiber-Optic Components

Interface directly with industry-standard ST and SMA connectors. Designed for auto insertion and wave soldering. No mounting hardware required. These components provide cost effective, high performance fiber-optic communication links for computers, central office switch, PBX, local area network and industrial-control applications.

Type HFBR-0410 Miniature Link ST Evaluation Kit

HFBR-0410 ST evaluation kit is used with ST type HFBR-1400 transmitters and type HFBR-241X-T receivers, both of which are listed separately on this page. Kit contains one each of the following: HFBR-1412 transmitter; HFBR-2412 five megabaud TTL receiver; three meters of ST connected 62.5/125 μ m fiber-optic cable with plastic ferrules; HFBR-0400 series data sheets; HP application bulletin 73; ST connector and cable data sheets.

782-2200. Type HFBR-0410.....EACH 49.95

Miniature Link High-Speed Fiber-Optic Transmitters

With SMA Port

With ST Port

HFBR-1400 series contains an 820 nm GaAlAs emitter capable of launching optical power into four different optical fiber sizes: 62.5/125 μ m, 100/400 μ m, 50/125 μ m and 200 μ m PCS. Designed to operate with the HFBR-2400 series Miniature Link receivers ordered separately on this page. Standard transmitter, type HFBR-1402 has an SMA connector that typically can couple -11.5 dBm of optical power into large size 100/140 μ m fiber cable. High power transmitters types HFBR-1404 and HFBR-1404T are optimized for small size fiber and typically can launch -16.5 dBm optical power into 50/125 μ m fiber and -12 dBm into 62.5/125 μ m fiber. HFBR-1404 has an SMA connector; HFBR-1414 has a threaded ST connector. **Operating Temperature Range:** -40° to $+85^{\circ}\text{C}$.

Stock No.	Mfr.'s Type	Min. Output Power	Input Current		Power	EACH
			Peak	DC		
782-2205	HFBR-1402	-19.0 dBm	120 mA	60 mA	Standard	21.75

782-2215	HFBR-1414T	-15.0 dBm	120 mA	60 mA	High	23.75

Versatile Link Plastic Fiber-Optic Component

The Versatile Link series of components is ideal for solving problems with voltage isolation/insulation, EMI/RFI immunity or data security. Versatile Link applications include motor controller triggering, automotive communications, power supply control, robotics communication. Standard performance 1 MBd and High performance 5 MBd are available.

Standard Attenuation Plastic Fiber-Optic Cable For Versatile Link

Simplex Cable

Duplex Cable

Simplex fiber-optic cable is constructed of a single step index plastic fiber sheathed in a PVC jacket. Duplex fiber-optic cable has two plastic fibers joined with a web. UL recognized and passes UL VW-1 flame retardancy specs.

Connected Cable

Stock No.	Mfr.'s Type	Length	Cable Type	EACH
782-2290	HFBR-PNS001	1 m	Simplex	3.55

Versatile Link Polishing Kit

Type HFBR-4593 polishing kit contains one each of the following: plastic polishing tool, 600-grit abrasive paper and 3 μ m pink lapping film. Designed for use on all connectors. Polishes two simplex connectors simultaneously or one duplex connector.

782-2325. Type HFBR-4593.....EACH 2.50

Miniature Link Fiber-Optic Receivers

Receivers are designed to operate with the HFBR-1400 series transmitters ordered separately on this page. Types HFBR-2402/2412 TTL/CMOS compatible receivers with -25.4 dBm sensitivity incorporate an integrated-photo IC containing a photodetector and DC amplifier driving an open-collector Schottky output transistor. Types HFBR-2404/2414 preamp receivers for data rates up to 35 MBd. Both models contain a PIN photodiode and low noise transimpedance pre-amplifier integrated circuit with an inverting output. Types HFBR-2406/2416 PIN-preamp receivers for data rates up to 150 MBd are well suited for demanding link designs that require wide receiver dynamic range. No mounting hardware required for all types. **Operating Temperature Range:** -40° to $+85^{\circ}\text{C}$.

Receivers With SMA Connector

Stock No.	Mfr.'s Type	Description	Max. Supply Volts	Input Power	EACH

782-2285	HFBR-BXS010	10 m	ST Connector, 62.5/125 Fiber	117.95

Versatile Link 1 MBd Standard Evaluation Kit

Kit contains one each of the following: Type HFBR-1524 transmitter, HFBR-2524 receiver, HFBR-4506 duplex connector with crimp ring, HFBR-4501 gray simplex connector with crimp ring, HFBR-4513 blue simplex latching connector with crimp ring, HFBR-4505 gray adapter. Kit also contains 5 meters of connected simplex cable with blue and gray latching connectors, polishing tool, 600 grit paper and data sheet with a brochure.

782-2220. Type HFBR-0501.....EACH 24.95

Versatile Link Transmitters And Receivers

Transmitter

Receiver

Transmitters incorporate a 660 nm LED in a gray horizontal housing that can be easily interfaced to standard TTL logic. **Peak Input Current:** 100 mA. **DC Input Current:** 80 mA. Order receiver separately below.

Stock No.	Mfr.'s Type	Transmitter Description	Output Power	EACH
782-2225	HFBR-1524	1 MBd, Standard	-5.1 dBm max.	6.20
782-2230	HFBR-1521	5 MBd, High Performance	-8.0 dBm max.	8.05

Blue plastic receivers feature a shielded, integrated photodetector and a wide bandwidth DC amplifier for high EMI immunity. **Supply Voltage:** 7.0 V. **Output Voltage:** 18 V. Order transmitter separately above.

Stock No.	Mfr.'s Type	Receiver Description	Sensitivity @ 8 mA, 25°C	EACH
782-2235	HFBR-2524	1 MBd, Standard	-20 dBm min.	7.00
782-2240	HFBR-2521	5 MBd, High Performance	-21.6 dBm min.	9.00

Optical Potentiometers

Optical potentiometers have 2-channel outputs and a single 5V supply input that are accessed through a 6" cable. TTL compatible. Designed to mount in a 3/8" hole, 1/4" diameter shaft. 1/2" shaft length. Operating temperature range: **HEDS-7500/7501** are -40°C to +85°C; **HRPG-A** are 0°C to +70°C.

General Purpose Motion Control ICs

Fig. 1

Fig. 2

HCTL-1100 is a general purpose motion control CMOS IC that provides closed loop control of DC, DC Brushless, and Step Motors, using a digital incremental encoder for feedback. 5V operation. TTL compatible. 24 bit position counter. 4 control modes. Programmable digital filter and brushless motor commutator. 40 pin plastic DIP package. Row spacing: 0.600". Operating temperature range: -20°C to +85°C. **HCTL-2000/2016** are CMOS ICs that interface digital incremental encoders to microprocessor systems. The IC's include a 4X quadrature decoder, binary up/down counter, and tristate bus interface. 5V operation. TTL compatible. Operates at clock frequencies up to 14 MHz. 16 pin plastic DIP package. Row spacing: 0.300". Operating temperature range: -40°C to +85°C. **HCTL-2000** has a 12 bit binary counter, **HCTL-2016** has a 16 bit binary counter.

Stock No.	Mfr.'s Type	Fig.	Description	EACH
782-2000	HCTL-1100	1	CMOS Motion Controller 100KHz to 2 MHz clock	38.77
782-2005	HCTL-2000	2	CMOS 12 Bit Quadrature Decoder/Counter	12.15
782-2010	HCTL-2016	2	CMOS 16 Bit Quadrature Decoder/Counter	12.15

2 and 3 Channel Encoders

HEDS-5010/6010

HEDS-9000/9100

HEDS-5500

HEDS-5500 are high performance optical incremental encoders. 2-channel digital outputs and single 5V supply input are accessed through five 0.025" square pins on 0.1" centers. Operating temperature range: -40°C to +100°C. **HEDS-5010/6010** 3-piece encoder kits consist of 1.13" (28mm) dia. encoder body, metal code wheel and emitter end plate. 3-channel digital outputs, and uses a single 5V supply which is accessed through a 2-foot 1-pin ribbon cable (included in kit). Operating temperature range: -55°C to +100°C. Both series are TTL compatible. Mechanical phasing of the encoder outputs is required during assembly for **HEDS-5010/6010**; no mechanical or electrical adjustments are needed for **HEDS-5500**.

Stock No.	Mfr.'s Type	Resolution	Shaft Diameter	Output	EACH
782-2015	HEDS-5500 G06	360 cpr	1/4"	2 channel	33.10

Two-Channel Encoder Modules

HEDS9000/9100 are high performance, optical-incremental encoder modules. When operated in conjunction with a codewheel, the modules detect rotary position. Supply input: 5V. Five 0.025" square pins located on 0.1" centers. Operating temperature range: -40°C to +100°C. TTL compatible **HEDS-5120** and **HEDS-6100** are precision metal codewheels for use with the **HEDS-9000/9100** encoder modules. Order codewheels separately below.

Stock No.	Mfr.'s Type	Optical Radius	Resolution	EACH
782-2050	HEDS-9000 A00	24mm	500 cpr	22.50

Optical Reflective Sensor

Hewlett Packard's family of sensor products are fully integrated modules designed for applications requiring optical-reflective sensing. They are packaged in a TO-5 metal sealed package and are available in three wavelengths and resolutions. Possible applications include: Bar Code Scanning; Edge sensing; Pattern recognition and verification; Tachometry; Optical limit switching.

Stock No.	Mfr.'s Type	Wavelength	Resolution	EACH
782-6000	HEDS-1200	820nm	0.130mm	37.00

Bar Code Decoder ICs

High-performance decoder ICs simplify the implementation of bar code reading capability in any OEM system. **Type HBCR-1610/1611** accepts digital wand inputs and supports the following bar code symbologies: 3 of 9 Code; Code 128; Interleaved 2 of 5; Codabar and UPC/EAN/JAN. **Type HBCR-2210/2211** accepts both digital wand and Laser inputs and supports the previously mentioned symbologies as well as MSI code and Code 11. To include the user's programming manual, add -B01 to the end of the type number when ordering.

Stock No.	Mfr.'s Type	Package Type	Input Devices Supported	EACH
782-6010	HBCR-1610	40 pin DIP	Digital Wand Input Only	33.00
782-6012	HBCR-1611	44 pin PLCC	Digital Wand Input Only	35.00
782-6014	HBCR-2210	40 pin DIP	Wand and Laser Input	60.00
782-6016	HBCR-2211	44 pin PLCC	Wand and Laser Input	64.00

Bar Code Wands

Digital Bar Code Wands

These rugged Polycarbonate wands operate in direct sunlight and have a low continuous current drain of less than 5mA @ 5V. To order in a box with a data sheet, simply add -A01 to the end of the type number when ordering.

Stock No.	Mfr.'s Type	Connector Type	Switch	ESD Isolation	EACH

SmartWand Bar Code Reader: Digital Wand with Built-in Decoder

The SmartWand is an intelligent peripheral designed to easily add bar code scanning capability to any host system which can support a +5V serial asynchronous interface. The SmartWand may be programmed optically by scanning bar code labels. The SmartWand comes with a 9-pin D-sub connector. **Type HBSW-8205** is a SmartWand Kit that comes with a **HBSW-8200** SmartWand, a user's manual, and a wand holder. Supported Bar Code symbologies include: Code 3 of 9, Interleaved 2 of 5, UPC/EAN/JAN, Codabar, Code 128, Code 11, and MSI Code.

*Kit Includes Reader Manual and Wand Holder.	

KeyWand Bar Code Reader: PC Interface Wand

The KeyWand bar code reader lets you scan directly into a personal computer via the keyboard interface, without hardware modifications. All electronics are self-contained within the compact wand for clutter free operation.

Type HBKW-1240. Universal KeyWand kit that includes a KeyWand bar code reader, a user's manual, wand holder and interface adapters.

782-6034. HBKW-1240	EACH 325.00
782-6040. HBKW-1210. KeyWand for IBM PC/XVAT 5-pin DIN	EACH 325.00
782-6042. HBKW-1220. KeyWand for PS/2 6-pin Mini-DIN	EACH 350.00

Accessories

782-6044. HBKW-1910. KeyWand User's Manual	EACH 20.00
782-6046. HBKW-1920. Wand Holder	EACH 5.00
782-6048. HBKW-1925. Interface Adapters (2)	EACH 20.00

Digital Slot Readers

Designed to provide excellent scanning performance on a wide variety of bar-coded cards and badges. Black textured epoxy finish. **Slot Width:** 0.125". Straight cable of 48" terminating in a 5-pin, 240° locking DIN connector. To order in a box with a data sheet, simply add -A01 to the end of the type number when ordering.

Solid-state LED numeric displays for applications such as instruments, weighing scales, meters and point-of-sale terminals. Dual-in-line package. Available in character sizes from 7.62mm (0.3") to 20mm (0.8") and colors, red, AlGaAs deep red, high-efficiency red (HER in tables below), yellow and high-performance green, AlGaAs displays are tested and selected for their excellent low current characteristics to ensure that the segments match at low currents. Type numbers ending in "1" are Common Anode; Type numbers ending in "3" and "0" are Common Cathode.

Solid-state alphanumeric LED displays are available in 16 segment monolithic smart, 5 x 7 dot matrix smart, and 5 x 7 dot matrix intelligent versions. Low power on-board CMOS IC contains memory, ASCII decoder and driver circuitry. Dual-in-line (DIP) packaging, TTL compatible, wave solderable and end-stackable. **Types HPDL-1414** and **HPDL-2416** decode 64 ASCII characters. **Types HPLR-, HPLD-, HDLA-, HDLG-2416** decode 128 ASCII characters. **Types HDSP-2110** thru **-2113** decode 128 ASCII characters, has an on-board RAM that stores up to 16 user-definable characters, and features flashing characters, full display blinking, multi-level dimming and self test. **Types HCMS-2001** thru **-2003** shows full ASCII set of characters and feature integrated shift registers with constant current drivers. All of these devices are ideal for a variety of applications in avionics, industrial control and instrumentation.

LED light bars designed for fixed message annunciation. All are configured in a dual-in-line DIP package except **types HLMP-2300, -2350, -2400, -2450, -2500, -2550** which are SIP packages. Each of the eight X-Y stackable package styles offers one, two or four large, uniformly illuminated light emitting surfaces. 0.100" centers; flush mountable. Available in high-efficiency red, yellow and high-performance green colors. Diffused lens. Ideal use for backlighting legends or simple indicators. For panel and legend mount capabilities, order corresponding part separately in table below. Replace the X in stock number with following color code: 1 (Red), 2 (Yellow), 3 (Green).

Single Channel

Type 6N135 is for use in TTL/CMOS, TTL/LSTTL or wide bandwidth analog applications. Current Transfer Ratio (CTR) is 7% minimum at $I_F=16\text{mA}$. Type 6N136 is designed for high speed TTL/TTL applications. CTR is 19% minimum at $I_F=16\text{mA}$. Type 6N137 is LSTTL/TTL compatible. 5V supply. Ideal in high speed digital interfacing applications. Type 6N138 is designed for use in TTL applications. 300% minimum CTR enables operation with 1 U.L. out with a 2.2K Ω pull-up resistor. Type 6N139 is for use in CMOS, LSTTL or other low power applications. 400% minimum CTR is guaranteed over a 0-70°C operating range for a 0.5mA LED current. All are 8-pin, UL recognized.

Motor & Industrial Control

The HCPL-3000, HCPL-3100 and HCPL-3101 have integrated amplifiers and provide isolation between the motor controller and the high voltage transistors which regulate the motor. HCPL-3000: CMR=1.5kV/us at Vcm=600V; Vcc=5.4 to 18 Volts; Output Current $I_{O1}=1.0\text{A}$ Peak; 0.5 A Continuous; $I_{O2}=2.0\text{A}$ Peak; 0.6 A Continuous; Propagation Delay=2us. HCPL-3100/3101: CMR=1.5kV/us @ Vcm=600V; Vcc=15 to 30 Volts; Output Current I_{O1} & $I_{O2}=0.4\text{A}$ Peak, 0.1 A Continuous; Propagation Delay=1us (HCPL-3100) or 0.3us (HCPL-3101). The HCPL-7800 is the world's smallest isolation amplifier and provides a very low cost isolation solution in the feed back portion of a typical motor control drive circuit. CMR=15kV/us @ Vcm=1000 V; 4.6uV/C Offset Drift vs. Temp.

Glo-Dot Miniature Neon Pilot Lights Series 2150, 2110

These miniature neon pilot lights are engineered for long service reliability. Rugged, unaffected by shock and vibration. Two lens shapes, flush and high-hat which are available in five colors: red, amber, white, clear and green. Mounting hole is .31" minimum diameter. **Average Operating Life:**

25,000 hours. UL recognized and CSA approved. Supplied with push-on speed nut (SN1287). Units supplied with 4.4"-4.8" wire terminals, stripped 1/2" or .187"-.020" tinned brass terminals.

Tiny-Mite Indicator Light Assemblies

Ordering Information: The complete assembly consists of socket plus lens plus lamp. All sold separately.
Mounting: Model 4610 (without thread) supplied with push-on speednut—can be keyed to prevent rotation.
Lens: Polycarbonate. **Bezel:** Polished stainless steel. **Socket:** Black nylon. Model 4611 (threaded) supplied with zinc finish hex nut and internal tooth lock washer.

Incandescent and Solid State Indicators

Series 1090 is identical to Series 1050 except these indicators are incandescent and are available in 6, 12, or 28 volt types. Series 1091M is solid state, complete with built-in current limiting resistor and rectifier diode. For solid state lens colors, insert 1-Red, 2-Green, 3-Yellow, where X appears in the stock number. For incandescent lens colors, insert 1-Red, 2-Green, or 3-Yellow, 4-White.

† With 4.4/4.8" long wire leads, stripped .43/.57". ‡ With .250" tinned brass terminals. Speed nuts supplied.

Oil-Tight Series 6000

- Fully gasketed construction
- Meets NEMA Specification ICS1-110.60
- Neon Models come with Built-In Current Limiting Resistor. LED Models Come With Built-In Current Limiting Resistor and a Rectifier Diode

Mounting: Supplied with internal tooth lockwasher and hex nut; requires .38" (9.65) min. dia. hole. **Wire Leads:** No. 22 AWG (105°C), 4.4/4.8" (11.8/121.9) long, stripped .43/.57" (10.9/14.5). **Lens:** Polycarbonate. **Bezel:** Stainless Steel. **Gaskets:** Buna-N. **Housing:** Black Nylon.

Series 7002X and 7008X

- Non-Diffused
- Package Color: Clear
- Viewing Angle: 120°
- Rated Current: 10 mA
- Premium Brightness in Miniature Chip-Type LED Assemblies
- Ideally Suited for Applications Such As Telecommunications, Data Processing Peripherals and Networking Units As Replacements for Through-Hole Products
- Also Ideal for Backlighting or Light Pipe Applications
- Integral Reflection Cup Maximizes Output
- Compact Size: 3.5 mm Wide × 2.8 mm Deep × 2 mm High
- Compatible with Full Range of IR and Vapor Phase Reflow Processes, and Conductive Adhesives, to Facilitate High-Speed Board Loading
- Packaged for Automatic Component Placement in Pocketed Anti-Static Tape Reels.

Series 6200 Sub-Miniature 1.65 mm Right Angle Block Assembly

Designated the model 6200 series, these devices position LEDs for easy visibility, particularly in applications where boards are mounted in parallel close to one another. 6200 series surface mount LEDs are available in red, amber, green, and yellow colors, in standard and low-current versions, and in both standard and low-current 5 volt resistor-included versions. 6200 series LEDs are designed and packaged to meet the requirements of automated surface mount production lines. These devices will withstand processing temperatures of either IR or vapor-phase reflow, and are compatible with most common fluxes and cleaning agents. **Housing:** Black Polyphenylene Sulfide, UL 94V-0.

LED Displays and Lamps, Vacuum Fluorescent Display Modules, Mounting Hardware

HERCULES™ Series LED Displays

LED character displays ranging from .27 to 4.0". Common anode or common cathode (CA or CC) single and dual digit models with left-hand or right-hand decimal points (LHDP or RHDP). Seven and fourteen segment numeric and hexadecimal versions plus dot matrix models are available. Some models have internal TTL MSI decoder driver and latch. Many HERCULES displays are compatible with ATLAS Display Mounting Hardware. Low power DC operation. Compact "dual-in-line" packages. These devices are equivalent to many models from other manufacturers. Type number suffixes denote display color: R=red, E=red-orange, H=high efficiency red.

"FLIP™", "NO-FRILLS™" and "NINETY SERIES™" Modules

"FLIP™", "NO-FRILLS™" modules feature 5 x 7 dot matrix characters, an on-board microprocessor, and operation from a single +5 VDC power supply. Type 3601-9X-XXX FLIP "NINETY SERIES™" modules are manufactured using SMT and feature software dimming, accented European characters, and can display several user-defined "downloadable" characters. They are very compact and UL recognized.

The New Flip Century™ Series Vacuum Fluorescent Display Modules

3602-100-05420

- Small Size — Surface Mount Technology
- Interface to Intel and Motorola Microprocessors
- Emulates Hitachi Type LCD Controllers
- Data Entry-Serial RS-232-C or 8 Bit Parallel
- Bell/Alarm Output (Selected Models)
- Reset Controls — Hardware and Software
- Low Power Requirements: 5 Volt DC
- Standard Temperature Range: -20° to +70°C
- Extended Temperature Range (-40° to +85°C) Available
- Five Unique User Downloadable Characters

- Five Selectable Character Sets: ASCII, European, Katakana, Cyrillic and Hebrew
- Scroll Modes — Vertical and Horizontal
- Blink Field and Underline Modes (Selected Models)
- Dimming Level Control — Hardware and Software (8 Levels)
- Screen Saver Control for Increased Tube Life
- Extensive Self-Test Mode with Both Hardware and Software Control
- Other Models Available

Used with IEE's HERCULES LED display, ATLAS Universal Mounting Hardware allows design of three basic assemblies with 1 to 8 digits and display character heights from .27" to 1.02". To make an assembly, the displays are installed in a socket, then attached to a molded bezel with integral 4-40 mounting studs. Bezels can be specified with clear or colored polarized or non-polarized filters. Most versions can be assembled using DMD1760 series Decoder/Driver modules (one DMD unit per digit) creating attractive, ready to use BCD input display-bezel assemblies. Front panel installation is quick; two mounting nuts secure the assembly firmly in the panel. The ATLAS selection table below will help when choosing basic combinations. Ask ALLIED for combinations not shown. Made in U.S.A.

*The body width of each display used may vary among manufacturers. **Bezels and sockets may be purchased separately. Contact your local Allied Sales Office for information and Atlas catalogs. ***Allied stocks the red plex (P). Contact your local Allied Sales Office for the following additional colors: R=Red Polarized, A=Amber Polarized, G=Green Plex, M=Magenta Plex, N=Neutral Polarized, C=Clear Plex, J= Neutral Plex and K=No Screen. †Note: Other display widths (1, 3, 5, and 7 digits) are available. Ask Allied for catalogs and information.

JUPITER™ Series LED Indicator Lamps

Solid state (LED) lamps in industry standard packages from T-1 through T-1 1/4. Encapsulated in colored-transparent, colored-diffused, clear-diffused or water-clear housings. T-1 1/4 right-angle indicators are end-stackable, housed in contrasting black cases designed to seat flush on the mounting surface. These have wide viewing angles with tinted-diffused lamps. In the JUPITER Series, illumination values range from 2 mcd to 3,000 mcd. Low current and high efficiency versions are offered. Ten element bar graphs are made in standard colors (red, yellow, and green). Customers may specify multi-color combinations not listed below. Ask your local Allied office for the JUPITER BAR GRAPH FLYER and SOLID STATE LAMP CATALOG.

Series 11-200 Single-Contact Candelabra Bayonet Lampholders For T-4 1/2 and S-8 Lamps — UL/CSA Recognized, Series 12-200 Double-Contact Candelabra Bayonet For G6, S6, 10C7 and NE-48 Lamps — UL/CSA Recognized

Both series designed with zinc-plated steel shells; mounting brackets are .025" to .042" zinc-plated steel; 6" built-in #18 AWG, bare copper wire, PVC insulation, leads stripped 1/2", UL/CSA rated at 105°C. The 11-200 Series Consists Of: One center contact mounted on fiber insulator with one wire lead; brackets are grounded to shell. Can also be supplied with wire grounded to the internal spring for those customers that need a second wire lead for ease of installation. Call Allied with your lampholder requirements today. The 12-200 Series Consists Of: Two center contacts mounted on Phenolic-insulated disc with two wire leads; brackets and wire leads are grounded independent of contacts. Designed for incandescent and neon-glow lamps. Lampholders 11-240 and 12-240 snap into 15/16" hole. **Note:** Reference is made to other lampholders to clarify mounting or bracket styles and types. **Maximum Ratings 11-200 Series:** 25 Watts, 12 Volts. **Maximum Ratings 12-200 Series:** 75 Watts, 125 Volts.

Halogen Sockets — 22-00 Series Double Contact Halogen Candelabra Bayonet and 26 Series Double Ended Single-Contact Halogen Cycle

► Both Series UL/CSA Recognized

The 22-00 Series is designed with nickel-plated steel shell; two built-in #18 AWG, stripped 1/2", nickel-plated copper wire with silicone rubber insulation, UL Style 3135, UL/CSA rated for 200°C. **Note:** Reference is made to other lampholders to clarify mounting or bracket styles and types.

The 26-00 Series is designed with high-heat resistant ceramic housing; one tab terminal .25" or one 4" built-in #18 AWG tinned copper wire, stripped 1/2", silicone rubber, lacquered glass braid insulation, UL/CSA rated for 200°C. **Maximum Ratings For 22-00 Series:** 500 Watts, 125 Volts. **Maximum Ratings For 26-00 Series:** 2000 Watts, 600 Volts.

700 Series Miniature Bayonet Lampholders For T-3 1/4, G-3 1/2 and G-4 1/2

Series designed with zinc-plated steel shell; mounting brackets are .025" to .032" zinc-plated steel and are insulated; two solder terminals, tinned for easy soldering. For low-voltage incandescent lamp applications. The 07-35 and 07-35J are specifically designed for PC boards. The 07-35J is a shorter, lower profile version of the 07-35, with a mounted height of .68". **Note:** Reference is made to other lampholders to clarify mounting or bracket styles and types. **Maximum Ratings:** 10 Watts, 50 Volts.

Halogen Cycle Bi-Pin Base

QLB Series For G5.3 Lamps — UL/CSA Recognized

The QLB Series is designed with high heat-resistant ceramic housing; two built-in #18 AWG, silicone rubber with lacquered glass braid insulation, stripped 1/2", UL Style 3135, UL/CSA rated for 200°C. DYH, DYT, DZA, EPX and PLH. **Maximum Ratings:** 750 Watts, 300 Volts.

27V-00 Series For G-4 Lamps — UL/CSA Recognized

The 27V-00 Series is designed with a polyester housing; with two 6" built-in #18 AWG, tinned copper wire with PVC insulation, UL Style 1015, UL/CSA rated 105°C. This series may also be supplied with tab terminals. **Maximum Rating:** 12 Watts, 12 Volts.

21-00 Series For T-2 1/4 Wedge Base Halogen Lamps

27-00 Series For G4 Bi-Pin Halogen Lamps — UL/CSA Listed

28-00 Series For G4 Bi-Pin Halogen Lamps

38-00 Series For G6.35 Bi-Pin Halogen Lamps — UL/CSA Recognized

These Series offer variety with halogen lamp products, all are supplied with high heat-resistant ceramic housings; two tab terminals or two built-in #18 AWG wire leads, stripped 1/2", UL Style 3135, 200°C; mounting brackets which are .025" to .032" zinc-plated steel. **Maximum Rating 38 Series:** 50 Watts, 12 Volts. **Maximum Rating 21-00, 27-00 and 28-00 Series:** 50 Watts, 14 Volts. **Note:** Reference is made to other lampholders to clarify bracket or mounting styles and types.

53-00 Series Wedge Base Lampholders For T-1 3/4 Lamps New! Plug Button and Twist and Lock Wedge Base Lampholders

► Ideal When Space Is A Premium

Series Design Includes: Nylon-molded housings; mounting brackets are .025" to .032" zinc-plated steel; available with two tinned solder terminals or two 6" built-in #22 AWG, stranded tinned copper wire leads, stripped 1/2", UL/CSA rated for 105°C. For PC Board applications, the 53-35 has two tinned solder terminals and 69-35 is designed for rear mount and requires no soldering. Grounded units also offered. **Note:** Reference is made to other lampholders to clarify mounting or bracket styles and types. **Maximum Ratings:** 10 Watts, 28 Volts.

LEDs

L3251 Series T-1³/₄ Right Angle Wedge Circuit Board Indicator

These LEDs are designed with Standard, Super Bright LEDs, Low Current LEDs or Built-In Resistor Chip LEDs that operate off 5 V or 12 V supply without external resistor. Supplied with Black Housing to assure proper LED alignment and enhance contrast. Standoffs on housing facilitate PC board cleaning and prevent flux entrapment. Vibration and shock resistant design. Other colors and higher brightness LEDs are available, call Allied with your requirements. **Reference Figure:** L3251

L7111 — Vertical LED Circuit Board Indicators — T-1³/₄

► Several Options Available With Different Housing Sizes To Choose

The L7111 Series Vertical Indicators represent an economical and reliable solution for elevating free standing, unstable, discrete LEDs which when moved from station to station, may have a tendency to be jostled out of position easily. This series is designed with a white nylon housing in the following height choice. Complete the part number with the height representing the distance from the board in thousands of an inch. **Standard Height Sizes:** 260, 375, 440, 565 (thousandths of an inch). Other colors and higher brightness LEDs are available, call Allied with your requirements. quantity pricing always available. **Example Part Number:** L7111-DR-260, diffused red LED 260 thousandths of an inch from the PC board. **Reference Figure:** L7111.

LB611 Bi-Level Circuit Board Indicators

These low power consumption LED indicators are designed with High Intensity Diffused LEDs and can be ordered in many combinations. Supplied with Black Housing to assure proper LED alignment and enhance contrast. Standoffs on housing facilitate PC board cleaning and prevent flux entrapment. Vibration and shock resistant design. Please fill in the colors desired, with X for the top LED and Y for the Bottom LED. Use R for Red, G for Green, or Y for Yellow. Other LEDs are available, call the factory with your requirements. **Example Part Number:** LB611D-RG; LED bi-level circuit board with red for top LED and green for bottom LED. **Reference Figure:** LB611.

L3353 Series — T-1 1/4 Tri-Color Right Angle Cylinder

This series features a tri-color from a single LED lamp. Design includes a three lead design with common cathode and standoffs to prevent flux entrapment. Supplied with Black Housing to assure proper LED alignment and enhance contrast. Standoffs on housing facilitate PC board cleaning and prevent flux entrapment. Vibration and shock resistant design. Other LEDs are available, call Allied with your requirements. Quantity pricing always available. **Reference Figures:** L3353.

*Available in reverse color combinations. Allied and Lighting Components and Design can make product according to your requirements. Call Allied today.

L4101 2 mm × 5 mm Vertical Block LEDs, L4102 2 mm × 5 mm 8 LEDs Vertical Block

The L4101 LED indicators feature a block mounting design for consistent height and side-by-side alignment. Press-in pin design secures LED to board during soldering. Supplied with Black Housing to assure proper LED alignment and enhance contrast. Standoffs on housing facilitate PC board cleaning and prevent flux entrapment. Vibration and shock resistant design. Other colors and higher brightness LEDs are available, call Allied with your requirements. Other LEDs are available, call Allied with your requirements. Quantity pricing always available. **Reference Figure:** L4101.

LM611 "Build Your Own" Modular Array Circuit Board Indicators

- May Be Ordered Individually Or As Customized LED Modular Array
- Minimizes Insertion Costs and Provides Uniformity
- Provides Optimum Color and Array Length Versatility
- Individual Modules Easily Slide Together Without Tools Or Extra Mating Pieces
- Quantity Pricing Always Available

These low power consumption LED indicators are designed to easily slide together with High Intensity Diffused LEDs. Other LED colors are available. **Reference Figure:** LM611.

Ledu Taskmaster Magnifiers

- ▶ Stamped Metal Shade Houses a 5" Diameter Lens, Available in a 3-Diopter (1.75X) and Includes a 22-Watt Fluorescent Tube
- ▶ Swivel Joint in Neck Permits Head to Rotate 90-Degrees to Left or Right of Direction Arm Faces
- ▶ A 42" Arm with External Springs is Mounted in a Drafting Board Style Clamp
- ▶ Comes with a 3-Conductor Cord, a Built-In Convenience Outlet (Rated for 600 Watts), and is UL Listed
- ▶ Available in Matte Black or White

Stock No.	Mfr.'s Type	Description	EACH	
			1-5	6-11
707-1036	707-1037	IM12D Magnifier, 3-Diopter	153.84	139.39

Wave Magnifier Series

— NEW —

- ▶ Large 6.75" x 4.5" Lens, 3-Diopter (1.75X) Makes It Easy to See Large Areas without "Hunching" Over the Magnifier
- ▶ Dual 7-Watt Compact Fluorescent Tubes (Included) Are Individually Switched and Provide Full Illumination, or, With Only One Light On, Better 3-Dimensional Viewing
- ▶ Heavy Duty K-Arms, .5" Square Tubing, Provide Superior Strength and Durability
- ▶ Choice of Arm Lengths, Mounting Options and Accessory Lenses
- ▶ Come with 3-Conductor Cord; All Models UL Listed
- ▶ Available in Light Gray or Black

Stock No.	Mfr.'s Type	Description	EACH

Handheld UV Magnifier

- ▶ The One-Piece Body is Molded from Durable Noryl Thermoplastic and Houses a 4" x 2", 5-Diopter (2.25X) Rectangular Lens
- ▶ Comes with Two 4-Watt Ultraviolet (UV) Tubes and Two 4-Watt Standard Fluorescent Tubes
- ▶ Dual Switches Insure Only One Type Light On at a Time
- ▶ UV Tubes Used for Checking Conformal Coatings, Contaminants, Metal Fatigue and Stress Testing Where a UV Indicator is Present; Standard Fluorescent Used in Normal Inspection Processes
- ▶ Comes with 3-Conductor Cord; UL Listed

— NEW —

Exhaust Fan Lamp

- ▶ Cast Aluminum Head Houses Powerful Exhaust Fan Which Delivers 100 CFM at 2900 RPM
- ▶ 3-Way Switch Permits 22-Watt Fluorescent Tube (Included) and Fan on Together, or 22-Watt Tube by Itself; Lamp Immediately Turns On Just by Touching the "Instant On" Switch
- ▶ Heavy Duty K-Arms, .5" Square Tubing, Provide Superior Strength and Durability
- ▶ Calibrated, Heat Treated Springs Insure Proper Arm Balance without the Sagging Effect Experienced in Lesser Grade Arms
- ▶ Come with 3-Conductor Cord; UL Listed
- ▶ Available in Light Gray

LC Series (Combination Models)

- ▶ Two Light Sources, a 22-Watt Circine Fluorescent Tube and 60-Watt Bulb (Both Included), Provide Color Balanced Light for Seeing Colors Correctly — Easier on the Eyes for Repetitive, Detailed Assembly Tasks
- ▶ All Models Available on L-Arms (External Spring Arm)
- ▶ Arms Have Individually Calibrated, Heat-Treated Springs for Perfect Balance and Durability
- ▶ All Models Come with 3-Conductor Cords and Are UL Listed
- ▶ LS Models Available in Black or White, or Light Gray or Oyster as Special Order

The wide selection of miniature incandescent lamps fill the requirements of today's electronic design engineers. The lamps described are designed for applications where space is at a premium low power consumption and long life are rigid requirements. Four basic criteria govern the operating characteristics of miniature incandescent lamps. Voltage, Current, Luminous Intensity, and Life. Power consumption in relation to envelope size and environmental consideration are important and data relating to these perimeters are listed for ease in selecting the correct lamp. All lamps are identified by an industry standard number which indicates all physical and electrical characteristics including bulb type, design voltage, current, M.S.C.P., and rated life. Aging and selection for special tolerances and colored lamps are available on "Special Order" only. For additional lamp offerings or data, call your nearest Allied Sales Office at 1-800-433-5700. Quantity pricing always available.

Liquid Crystal Displays

NL128102AC20-04. Diagonal Display Size: 33 cm (13 Type). **Application:** Workstation, Monitor. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.067 (H) × 0.201 (V) mm. **Pixel Pitch:** 0.201 (H) × 0.201 (V) mm. **Pixel Number:** 1280 × 1024. One pixel is defined as an RGB dot trio. **Display Size:** 257.28 (H) × 205.824 (V) mm. **Back-light:** 4 cold cathode fluorescent lamps. **Luminance:** 100 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 100:1 (typ.) (Ta = 25°C). **Display Color:** Full color. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 50 msec (max.) (Ta = 25°C). **Outline Dimension:** 310.0 (H) × 255.5 (V) × 37.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 23 V, 12 V, 10 V, 5 V. **Power Consumption:** 28 W (typ.). **Input Signal:** Analog RGB (0.7 Vp-p, 75 Ω of input impedance) Hsync, Vsync.

NL128102AC20-05. Diagonal Display Size: 33 cm (13 Type). **Application:** Workstation, Monitor. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.067 (H) × 0.201 (V) mm. **Pixel Pitch:** 0.201 (H) × 0.201 (V) mm. **Pixel Number:** 1280 × 1024. One pixel is defined as an RGB dot trio. **Display Size:** 257.28 (H) × 205.824 (V) mm. **Back-light:** 4 cold cathode fluorescent lamps. **Luminance:** 80 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 100:1 (typ.) (Ta = 25°C). **Display Color:** 4096. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 50 msec (max.) (Ta = 25°C). **Outline Dimension:** 310.0 (H) × 255.5 (V) × 37.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 24 V, 12 V, 5 V. **Power Consumption:** 22 W (typ.). **Input Signal:** Digital RGB (4 bit × 2 each). Dot clock (53.75 MHz), Hsync, Vsync.

NL10276AC24-01. Diagonal Display Size: 31 cm (12.1 Type). **Application:** Workstation, Monitor. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.08 (H) × 0.24 (V) mm. **Pixel Pitch:** 0.24 (H) × 0.24 (V) mm. **Pixel Number:** 1024 × 768. One pixel is defined as an RGB dot trio. **Display Size:** 245.76 (H) × 184.32 (V) mm. **Back-light:** 4 cold cathode fluorescent lamps. **Luminance:** 200 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 150:1 (Ta = 25°C). **Display Color:** 4096. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 310.0 (H) × 235.0 (V) × 18.5 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 12 V, 5 V. **Power Consumption:** 15.6 W (typ.). **Input Signal:** Digital RGB (4 bit × 2 each), Dot clock (32.5 MHz), Hsync, Vsync.

NL10276AC20-02. Diagonal Display Size: 26 cm (10.4 Type). **Application:** Workstation, Laptop PC. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.069 (H) × 0.207 (V) mm. **Pixel Pitch:** 0.207 (H) × 0.207 (V) mm. **Pixel Number:** 1024 × 768. One pixel is defined as an RGB dot trio. **Display Size:** 211.968 (H) × 158.976 (V) mm. **Back-light:** 2 cold cathode fluorescent lamps. **Luminance:** 85 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 100:1 (typ.) (Ta = 25°C). **Display Color:** 4096. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 282.0 (H) × 190.0 (V) × 13.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V, 6 to 20 V. **Power Consumption:** 7.6 W (typ.). **Input Signal:** Digital RGB (4 bit × 2 each), Dot clock (32.5 MHz), Hsync, Vsync.

NL8060AC26-02. Diagonal Display Size: 26 cm (10.4 Type). **Application:** Notebook PC. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.088 (H) × 0.264 (V) mm. **Pixel Pitch:** 0.264 (H) × 0.264 (V) mm. **Pixel Number:** 800 × 600. One pixel is defined as an RGB dot trio. **Display Size:** 211.2 (H) × 158.4 (V) mm. **Back-light:** 1 cold cathode fluorescent lamps. **Luminance:** 90 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 150:1 (typ.) (Ta = 25°C). **Display Color:** 4096. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 270.0 (H) × 183.0 (V) × 13.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V, 5.2 to 20 V. **Power Consumption:** 5.2 W (typ.). **Input Signal:** Digital RGB (4 bit each), Dot clock (38.362 MHz), Hsync, Vsync.

NL8060AC26-04. Diagonal Display Size: 26 cm (10.4 Type). **Application:** Notebook PC. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.088 (H) × 0.264 (V) mm. **Pixel Pitch:** 0.264 (H) × 0.264 (V) mm. **Pixel Number:** 800 × 600. One pixel is defined as an RGB dot trio. **Display Size:** 211.2 (H) × 158.4 (V) mm. **Back-light:** 1 cold cathode fluorescent lamps. **Luminance:** 70 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 150:1 (typ.) (Ta = 25°C). **Display Color:** 262,144 colors. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 243.0 (H) × 179.0 (V) × 8.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 3.3 V, 5.0 V. **Power Consumption:** 2.7 W (typ.) @ 3.3 V dc. **Input Signal:** Digital RGB (6 bit each), Dot clock (38.362 MHz), Hsync, Vsync.

NL8060AC24-01. Diagonal Display Size: 24 cm (9.4 Type). **Application:** Notebook PC. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.08 (H) × 0.24 (V) mm. **Pixel Pitch:** 0.24 (H) × 0.24 (V) mm. **Pixel Number:** 800 × 600. One pixel is defined as an RGB dot trio. **Display Size:** 192.0 (H) × 144.0 (V) mm. **Back-light:** 1 cold cathode fluorescent lamps. **Luminance:** 90 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 110:1 (typ.) (Ta = 25°C). **Display Color:** 4096. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 259.5 (H) × 179.0 (V) × 12.5 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V, 6 to 20 V. **Power Consumption:** 5.1 W (typ.). **Input Signal:** Digital RGB (4 bit each), Dot clock (38.362 MHz), Hsync, Vsync.

NL6448AC33-11. Diagonal Display Size: 26 cm (10.4 Type). **Application:** Notebook PC, Monitor. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.11 (H) × 0.33 (V) mm. **Pixel Pitch:** 0.33 (H) × 0.33 (V) mm. **Pixel Number:** 640 × 480. One pixel is defined as an RGB dot trio. **Display Size:** 211.2 (H) × 158.4 (V) mm. **Back-light:** 2 cold cathode fluorescent lamps. **Luminance:** 120 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 135:1 (typ.) (Ta = 25°C). **Display Color:** Full color. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 270.0 (H) × 183.0 (V) × 16.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V, 5.2 to 20 V, 6 to 20 V. **Power Consumption:** 9.8 W (typ.). **Input Signal:** Analog RGB (0.7 Vp-p, 75 Ω of input impedance), Dot clock (25.175 MHz), Hsync, Vsync.

NL6448AC33-10. Diagonal Display Size: 26 cm (10.4 Type). **Application:** Notebook PC. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.11 (H) × 0.33 (V) mm. **Pixel Pitch:** 0.33 (H) × 0.33 (V) mm. **Pixel Number:** 640 × 480. One pixel is defined as an RGB dot trio. **Display Size:** 211.2 (H) × 158.4 (V) mm. **Back-light:** 1 cold cathode fluorescent lamps. **Luminance:** 90 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 150:1 (typ.) (Ta = 25°C). **Display Color:** 4096. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 270.0 (H) × 183.0 (V) × 13.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V, 5.2 to 20 V. **Power Consumption:** 4.8 W (typ.). **Input Signal:** Digital RGB (4 bit each), Dot clock (25.175 MHz), Hsync, Vsync.

NL6448AC32-01. Diagonal Display Size: 26 cm (10.2 Type). **Application:** Notebook PC. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.107 (H) × 0.321 (V) mm. **Pixel Pitch:** 0.321 (H) × 0.321 (V) mm. **Pixel Number:** 640 × 480. One pixel is defined as an RGB dot trio. **Display Size:** 205.44 (H) × 154.08 (V) mm. **Back-light:** 1 cold cathode fluorescent lamps. **Luminance:** 70 cd/m2 (typ.) (Ta = 25°C, lamp voltage = 455 Vrms, lamp current = 3.5 mAmps). The luminance is measured at a saturation point. **Contrast Ratio:** 150:1 (typ.) (Ta = 25°C). **Display Color:** 262,144. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 264.2 (H) × 180.2 (V) × 9.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 3.3 V or 5.0 V. **Power Consumption:** 2.9 W (typ.) (Vcc = 3.3 V, at above luminance condition). **Input Signal:** Digital RGB (6 bit each), Dot clock (25.175 MHz), Hsync, Vsync, DE signal.

NL6448AC30-09. Diagonal Display Size: 24 cm (9.4 Type). **Application:** Notebook PC, Monitor. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.1 (H) × 0.3 (V) mm. **Pixel Pitch:** 0.3 (H) × 0.3 (V) mm. **Pixel Number:** 640 × 480. One pixel is defined as an RGB dot trio. **Display Size:** 192.0 (H) × 144.0 (V) mm. **Back-light:** 2 cold cathode fluorescent lamps. **Luminance:** 120 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 135:1 (typ.) (Ta = 25°C). **Display Color:** Full color. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 257.0 (H) × 179.0 (V) × 16.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V, 6 to 20 V, 6 to 20 V. **Power Consumption:** 11 W (typ.). **Input Signal:** Analog RGB (0.7 Vp-p, 75 Ω of input impedance), Dot clock (25.175 MHz), Hsync, Vsync.

NL6448AC30-12. Diagonal Display Size: 24 cm (19.4 Type). **Application:** Notebook PC. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.10 (H) × 0.30 (V) mm. **Pixel Pitch:** 0.30 (H) × 0.30 (V) mm. **Pixel Number:** 640 × 480. One pixel is defined as an RGB dot trio. **Display Size:** 192.0 (H) × 144.0 (V) mm. **Back-light:** 1 cold cathode fluorescent lamps. **Luminance:** 70 cd/m2 (typ.) (Ta = 25°C, lamp voltage = 450 Vrms, lamp current = 3.7 mAmps). The luminance is measured at a saturation point. **Contrast Ratio:** 150:1 (typ.) (Ta = 25°C). **Display Color:** 4096. **Viewing Angle:** U/D25°, R/L45° (typ.) (Ta = 25°C). **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 241.8 (H) × 178.8 (V) × 10.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V. **Power Consumption:** 2.7 W (typ.) (at above luminance condition). **Input Signal:** Digital RGB (4 bit each), Dot clock (25.175 MHz), Hsync, Vsync.

NL6448CC30-15. Diagonal Display Size: 24 cm (9.4 Type). **Application:** Overhead Projection. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.10 (H) × 0.30 (V) mm. **Pixel Pitch:** 0.30 (H) × 0.30 (V) mm. **Pixel Number:** 640 × 480. One pixel is defined as an RGB dot trio. **Display Size:** 192.0 (H) × 144.0 (V) mm. **Display Color:** 4096. **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 241.8 (H) × 178.8 (V) × 10.0 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V. **Power Consumption:** 1 W (typ.). **Input Signal:** Digital RGB (4 bit each), Dot clock (25.175 MHz), Hsync, Vsync, DE signal.

NL6448AC20-02. Diagonal Display Size: 17 cm (6.5 Type). **Application:** Measuring Instrument. **Drive Method:** Active matrix (Amorphous Si TFT). **Dot Pitch:** 0.069 (H) × 0.207 (V) mm. **Pixel Pitch:** 0.207 (H) × 0.207 (V) mm. **Pixel Number:** 640 × 480. One pixel is defined as an RGB dot trio. **Display Size:** 132.48 (H) × 99.36 (V) mm. **Back-light:** 1 cold cathode fluorescent lamp. **Luminance:** 120 cd/m2 (typ.) (Ta = 25°C). The luminance is measured at a saturation point. **Contrast Ratio:** 100:1 (typ.) (Ta = 25°C). **Display Color:** 4096. **Viewing Angle:** U/D30°, R/L45° (typ.) (Ta = 25°C). More than the contrast ratio of 10:1. **Designed Viewing Direction:** 12 o'clock direction (upper direction). **Response Time:** 40 msec (max.) (Ta = 25°C). **Outline Dimension:** 178.8 (H) × 126.8 (V) × 12.5 (max.) (D) mm. The inverter size is 32 (H) × 127 (V) × 12.5 (max.) (D) mm. **Operating Temperature:** 0 to 50°C. Measured at the center of the panel surface. **Storage Temperature:** -20°C to +60°C. **Power Supply:** 5 V, 12 V. **Power Consumption:** 5 W (typ.). **Input Signal:** Digital RGB (4 bit each), Dot clock (25.175 MHz), Hsync, Vsync.

*One pixel is defined as an RGB dot trio. †Consult Allied for pricing and delivery.

Character Type/DMC Series

- ▶ 8-Bit or 4-Bit MPU Interface Is Available
- ▶ 160 JIS Type Characters Such As Alphabet, Numeral and Kana and 32 Special Characters and Symbols Can Be Displayed By Internal Character Generator (ROM)
- ▶ Random Symbols Can Be Displayed By Character Generator (RAM)
- ▶ Many Instructional Functions By Means Of Program Such As "Clear Display", "Home Cursor", "On/Off Cursor", "Blank Character", "Shift Display", "Shift Cursor", "Read/Write Display Data", Etc. Are Available
- ▶ Compact and Light Weight Design Enable Easy Assembly On Device
- ▶ Single "+5 V" Power Supply (Except For Extended Temperature Type)
- ▶ Low Power Consumption
- ▶ European Font Available Upon Request
- ▶ Operating Temperature: Normal — 0°C+50°C; Extended — -20°C+70°C
- ▶ Storage Temperature: Normal — -20°C+70°C; Extended — -30°C+80°C

OPTREX LCD Character Modules are available in many backlighting options as well as in standard TN and STN Fluid Technologies.

Graphic Type/DMF Series

Applications

- ▶ Personal Computer
- ▶ Electronic Typewriter
- ▶ Word Processor
- ▶ Facsimile
- ▶ Plain Paper Copier
- ▶ Telecommunication System
- ▶ Instrument Devices
- ▶ POS Terminal
- ▶ Fish Finder
- ▶ Overhead Projector
- ▶ Oscilloscope
- ▶ Handheld Terminal

With a liquid crystal display of excellent characteristics and reliability, OPTREX has developed the "DMF Series" for large area graphic display. These are exceptional in the following advantages, (1) low voltage operation, low power consumption; (2) compact, light, thin; (3) graphic, figure, and character display; (4) high contrast, wide viewing angle, as Super TN LCDP are employed; and (5) large area display as CRT, Neutral Mode, Yellow Mode and Blue Mode etc., are available. *Various types of back light are available in its series, and stated with following abbreviations. R — Reflective Type, EL — With EL, FL — With cold cathode fluorescent tube, OHP — Transmissive for OHP, BW — Black and white with FL.

CdS Photoconductive Cells

Photoconductive cells provide a very economical and technically superior solution for many many light level sensing applications. They offer wide dynamic range and sensitivity to low light levels. EG&G Vactec is a major world supplier of photoconductive cells. Vactec's photocells are available in low cost plastic encapsulated packages as well as hermetic packages (TO-46, TO-5, TO-8). The following table lists a few of the standard packages and resistance ranges available.

Electrical/Optical Characteristics @ 25°C (16 Hrs. Light Adapt, Min. @ 30-50 fc)

Photodiodes with Solderable Contacts

EG&G Vactec manufactures large area photodiodes with solderable contacts. They serve a variety of applications. Many of our customers have found it cost effective for us to do the value added assemblies, such as PCB assembly and/or custom testing. A sampling of popular solderable contact photodiodes is listed below.

Package Style: ¹TO-46 Hermetic; ²TO-5 Hermetic; ³8 mm Ceramic; ⁴Mini DIP, ⁵Flat Sidelooker; ⁶Lensed Ceramic; ⁷Long T-1.

IR Emitters and Phototransistors

EG&G Vactec offers a broad line of high performance IREDs and detectors in a variety of packages and specifications. Vactec makes both GaAs (940 nm) and GaAlAs (880 nm) IREDs. GaAlAs IREDs provide almost twice the power output at the same drive current. These IREDs are often used with solid state phototransistor or photodarlington detectors having internal gains from 100 to over 100,000. A sampling of available standard package styles is listed below.

552	3/4	1 1/2
952	1 1/32	3

These vitreous enameled power rheostats are designed to provide exceptional reliability through the application of modern manufacturing techniques and the use of sophisticated materials. The base and ring are molded of high density ceramic. The winding is uniform to maintain maximum resolution and power dissipation. The insulator is molded of high density, porcelain/ceramic. Three terminals permit use as a potentiometer or a rheostat. Vitreous enamel provides the bonding medium necessary to securely attach the ring and base together and to lock the windings from shifting. 300° rotation. MP06A has 1/8" shaft; MP10A, MP15A, MP25A, and MP30A have 1/4" shaft; MP40A has 3/8" shaft. Standard position for the locating tab is at 6 o'clock with the terminals down. Additional features, wattages, values, and configurations available as custom orders. Manufacturer's literature available upon request.

12.5 Watts 7/8" Dia.

Model Series RB 1 13/16" Dia. Turns Counting Dial

The RB Series is an analog 1 13/16" diameter 15-turns counting dial for 1/4" diameter shafts with 3/8" bushings. Single set screw. 0.100" high numerals. Knob is black plastic. Dial has black numerals on satin chrome. Housing is satin chrome. Positive locking action mechanisms. **Weight:** 3.0 oz. **Operating Temperature Range:** -55° to +71°C.

525-0010. RB EACH 19.20

Model Series 2600 7/8" Dia. Turns Counting Dial

The 2600 Series is an analog 7/8" diameter 20-turns counting dial for 1/4" diameter shafts with 3/8" bushings. The 2606 has single set screw. The 2607 has dual set screw. Both have 0.05" high black numerals on satin chrome with black plastic knob and satin chrome housing finish. Positive locking action mechanisms. **Weight:** 0.60 oz. **Operating Temperature Range:** -55° to +71°C.

525-0020. 2606 EACH 12.60
525-0030. 2607 EACH 13.40

Model Series 2640 7/8" Dia. Turns Counting Dial

The 2640 Series is an analog 7/8" diameter 20-turns counting dial for 1/4" diameter shafts with 3/8" bushings. The 2646 has single set screw. The 2647 has dual set screw. Both have 0.05" high white numerals on black matte with black plastic knob and satin chrome housing finish. Positive locking action mechanisms. **Weight:** 0.60 oz. **Operating Temperature Range:** -55° to +71°C.

525-0040. 2646 EACH 12.60
525-0050. 2647 EACH 13.40

Model Series 2100 Rectangular Turns Counting Dial

The 2100 Series is a digital 1" wide 10-turn counting dial for 1/4" diameter shafts with 3/8" bushings. Dual set screws. Positive locking action mechanisms. Three 0.12" high white numerals on black background. **Weight:** 1.5 oz. **Operating Temperature Range:** -55° to +71°C.

525-0060. 2157. Clear Anodized EACH 26.00
525-0070. 2167. Black Anodized EACH 26.00

Model 64 Series 1/4" Sq. Multi-Turn Trimmer

The Model 64 is a 15-turn cermet trimming potentiometer. These essentially infinite resolution trimmers are 1/4" square. They are 1/4-watt at 85°C derating to 0 at 125°C. The metal electrical adjustment screw has a slot .02" wide x .02" deep. **Standard Tolerance:** ±10%. They are sealed to have no leaks in 85° Florinert® test. **Maximum Temperature Coefficient:** ±100 ppm/°C. **Operating Temperature Range:** -65°C to +150°C. **Rotational Life:** 200 cycles. **Load Life:** 1000 hours at 85°C at 0.25 watts. Clutch action mechanical stops at both ends. Solderable terminal pins. **Resistance to Solder Heat:** 260°C for 10 seconds. **Nominal Weight:** .014 oz. Additional pin configurations available as special order item. Manufacturer literature available upon request.

Model 78 Series 1 1/4" Rectangular Multi-Turn Trimmer

The Model 78 is a 22-turn cermet trimming potentiometer. These essentially infinite resolution trimmers are 1 1/4" rectangular. They are 1-watt at 70°C derating to 0 at 125°C. The metal electrical adjustment screw has a slot .025" wide x .031" deep. **Standard Tolerance:** ±10% (< 100 ohms = ±20%). They are sealed to have no leaks in 85° Florinert® test. **Maximum Temperature Coefficient:** ±100 ppm/°C. **Operating Temperature Range:** -55°C to +125°C. **Rotational Life:** 200 cycles. **Load Life:** 1000 hours at 70°C at 0.5 watts. Clutch action mechanical stops at both ends. Solderable terminal pins. **Resistance to Solder Heat:** 260°C for 10 seconds. **Nominal weight:** .09 oz. 56BW adapter is used for panel mounting the 78 Series. Additional pin configurations available as special order item. Manufacturer literature available upon request.

3324 Series — 4 mm Square Sealed Single-Turn Cermet SMD Trimmer

These 1/4 watt (@ 70°C) trimmers are compatible with most surface mount soldering processes. Standoffs facilitate board washing and mechanical stability. Plastic housing allows use in RF applications. **Tolerance:** ±20%. **Soldering Heat:** 260°C for ten seconds or less. **Operating Range:** -55°C to +125°C. **Rotational Cycling:** 100 cycles. **Mechanical Angle Rotation:** 250°. **Weight:** 0.01 oz.

EC Encoders — Incremental Digital Contacting Encoder

The sturdy construction and exceptionally long life of the digital contacting encoder make it a good choice where reliability and dependability are required. The EC encoder produces a 2-channel, 2-bit gray code quadrature signal which is suitable for digital systems where both magnitude and direction of adjustment must be provided. Channel A leads Channel B by 90° (electrical) with clockwise rotation. The output of this device is a digital gray code signal, rather than a conventional potentiometric voltage ratio output. The advantage of the digital contacting encoder is that it permits the direct entry of digitized analog data into a digital circuit without A/D conversion. The 2 channel gray coded signal of this incremental encoder allows the user's decode circuit to sense analog direction of rotation as well as up-down counter capabilities. This is done without the time and cost of A/D conversion. This approach can reduce memory overhead, wiring and wiring interconnects, and can provide greater MPU program speed. Electrical travel and mechanical angle are continuous. **Weight:** 0.75 oz. Additional configurations available as special order. Call for pricing, delivery and ordering conditions. Manufacturer literature available upon request.

3310 Series — 9 mm Square Sealed Panel Controls

This single turn linear conductive plastic panel control uses compact size to save board and panel space. The control may be panel mounted with the threaded bushing or PC board mounted using the PC pins. Sealed to withstand typical industrial washing processes. 0.25-watt power at 70°C. **Tolerance:** ±20%. Request manufacturer's literature describing other options including mounting details and multiple functions such as switching.

Modular Potentiometers

Model 81. Combines design versatility and advanced modular construction with factory assembled reliability and quality assurance. The net result is a consistently high quality $\frac{3}{8}$ " square panel control. **Temperature Range:** -55°C to 125°C . **Temperature Coefficient:** ± 1000 ppm/ $^{\circ}\text{C}$. **Running Torque:** 0.2 to 1.5 oz.-in. 1000 VAC dielectric with standing voltage @ sea level. **Minimum Resistance:** 2 Ohms. **Infinite Resolution:** Single Turn.

Model 83/84. The only 10 turn precision modular control in the industry. **Resistance Tolerance:** $\pm 5\%$. 1000 VAC dielectric withstanding voltage @ sea level. **Temperature Range:** -55°C to 125°C . **Temperature Coefficient:** ± 50 ppm/ $^{\circ}\text{C}$. **Load Life:** 1000 hrs. Moisture resistant. Compatible with all Model 80 Series. Resistance value available only up to 10K.

Model 91. Construction features include a one-piece molded shaft and rotor. The one-piece rotor shaft provides virtually infinite electrical circuit isolation. **Temperature Range:** -55°C to $+125^{\circ}\text{C}$. **Temperature Coefficient:** 1000 ppm/ $^{\circ}\text{C}$. **Load Life:** 1000 hrs. 1000 VAC dielectric withstanding voltage @ sea level.

Models 3252 Multi-Turn, Cermet

Stable, infinite resolution cermet element. Listed on the DESC QPL for style RJ22 per MIL-R-22097. Low temperature coefficient ± 100 ppm/ $^{\circ}$ C over entire temperature and resistance range. High temperature, all plastic case. Superior humidity-proof performance under the most severe conditions. **Temperature Range:** -65° to $+150^{\circ}$ C. **Power Rating:** .75 Watt at 85° C. **Resistance Tolerance:** $\pm 10\%$.

Multi- and Single-Turn Wirewound and Cermet Trimmers

Model 3290 Multi-Turn, Wirewound

This 3/8" square wirewound potentiometer is listed on DESC QPL for style RT24 per MIL-R-27208 and RTR24 per High-Rel MIL-R-39015. **High Performance:** 1 Watt @ +85°C. **Temperature Range:** -65°C to +150°C. All plastic case provides sealing against liquids and potting compounds. **Resistance Tolerance:** ±5%. **Dielectric Strength:** 1000 VAC @ sea level. **Moisture resistance.** **Mechanical Life:** 200 cycles. Solder PC pin terminals.

Other Resistance Values Available. Call for Pricing.

H-800 Trim Bin™ Kit

- Multi-Turn, Wirewound and Cermet
- Multi-Turn, Cermet, Square
- Single-Turn, Cermet and Wirewound
- Open Frames, Cermet

This kit contains over 125 parts representing 50 varieties of resistance and pin styles. You are able to select the size, shape, type of element and method of adjustment to suit your applications from these popular styles of trimming potentiometers. Also included in the package are adjustment tools and the latest product literature.

Model 3640S KNOBPOT®

10 turn; 2.5 watt; 1 1/4" dia. Integral clock face readout. Cost saving; pre-phased; Highly readable. Easy mounting; drill two holes, install and secure with lock washer and nut. **Temperature Range:** -65°C to +85°C. **Power Rating:** 2.5 watts @ +25°C. **Tolerance:** ±3%. **Temperature Coefficient:** ±50 ppm/°C.

Model 3650S KNOBPOT®

10 turn; 2.5 watt; 1 1/4" dia. Easy one-hole mounting with recessed cup furnished. Integral digital readout; cost saving; pre-phased; excellent readability. **Temperature Range:** -25°C to +85°C. **Temperature Coefficient:** ±50 ppm/°C. **Power Rating:** 2.5 watts @ +25°C. Output accuracy within 0.15% of total applied voltage. **Tolerance:** ±3%.

H-490 Series Turns Counting Dials

1" dia. turn counting dials for use with precision potentiometers or other rotating devices up to 30 turns. Simplified mounting, no special holes required, uses only 1" dia. panel space. No backlash, mounted directly to shaft. Excellent legibility. Available with or without brake. Two set screws standard on all models. **Temperature Range:** -15°C to +85°C.

MIL RV4, MIL RV6, MIL JA1N, MIL JA1L and 53C Potentiometers

MIL JA1N/JA1L Carbon Potentiometers

— NEW —

Type J hot-molded carbon composition potentiometers are used in industrial and military applications for reliable, dependable and exceptional service requirements. Meet MIL-R-94. JA1N Series has 3/8" bushing length with 1/4" dia., 7/8" long slotted shaft. JA1L Series has 1/2" bushing with 1/4" dia., 5/8" long slotted shaft. They are dust, corrosion and splash resistant. Made of non-magnetic material. Coated terminals. **Tolerance:** 10%. Linear taper. 2.25 watts. 100,000 rotations cycle life. Supplied with locating pin and hardware.

MIL-R-94 RV4 2-Watt and Commercial 53C Series Conductive Plastic Potentiometers

Crafted of the finest materials available to insure long, reliable service. Provides extra long life with very low noise level. Rated 2 watts. Precision construction is completely enclosed. Conductive plastic element. RV4L and 53C2 designate 5/8" screwdriver slotted shaft FMS with 1/2" split locking bushing. RV4N and 53C1 designate 7/8" screwdriver slotted shaft FMS with 3/8" long bushing. 53C1 designates 2" long round shaft FMS with 3/8" long bushing. All have 1/4" diameter shaft. **Average Shipping Weight:** 4 oz.

Specifications. Resistance Tolerance: 100 to 1 Meg — ±10%; over 1 Meg — ±20%. **Rotation:** 312° ±3%. **End Resistance:** Per MIL-R-94. **Working Voltage:** 500 VDC across end terminals: Linear Taper. **Tolerance:** ±20%.

RV6/392M Series 1/2-Watt MIL Potentiometers

Military Potentiometer. RV6/392M and RV6/382M Series 1/2-Watt conductive plastic. **RV6/392M Series.** Economical sealed potentiometers meet the flow solderability and washability test requirements, and MIL-R-94 apply where appropriate. QPL listed. Highly stable unit with high resolution for applications requiring miniaturization and reliability. 1/8" dia. metal shaft (7/8" long STD; 5/8" long on locking). 1/2" body diameter. **Dynamic Noise:** 1.5%. **Rotational Life:** 50,000 cycles. **Operating Temperature:** -40° to +120°C. **RV6/382M Series.** Same as above except with metal body. **Dynamic Noise:** 1%. **Operating Temperature:** -55° to +120°C. Other shaft lengths and styles, tolerances and tapers, resistance values and bushings available as special order items.

Specifications. Resistance Tolerance: ±10%. **Power Rating:** 0.5 watt @ 70°C. Derated to zero power @ 120°C. **Electrical and Mechanical Rotation:** 295° ±5°. **Effective Rotation:** 265° ±0° -10°. **End Resistance:** 5 max. — up to 750; 10 max. — above 750. **Functional Output:** Linear. **Dielectric Strength:** 750 VAC for 60 seconds @ ATM; 350 VAC for 60 seconds. 3.44 in H.G. **Working Voltage:** 350 VDC maximum, but power not to exceed rating. Available with standard or locking type bushing. RV6L — locking bushing; RV6N — standard bushing.

Series RA Wirewound Potentiometers

The RA30 is the Military 4-watt version of the 58C Series. The RA20 Series is a 2-watt potentiometer and meets strict military standard MIL-R-19. The RA30NASD Series has 1/4" dia., 7/8" long FMS slotted shaft with 3/8" long bushing with 3/8-32 NEF-2A threads. The RA30LASB Series has 1/4" dia., 5/8" long FMS screwdriver slotted shaft with 1/2" long split locking bushing with 3/8-32 NEF-2A threads. Hardware not supplied. The RA20NASD Series has 1/4" dia., 7/8" long FMS slotted shaft with 3/8" long bushing with 3/8-32 NEF-2A threads. The RA20LASB Series has 1/4" dia., 5/8" long FMS screwdriver slotted shaft with 1/2" long split locking bushing with 3/8-32 NEF-2A threads. **Specifications. Operating Temperature:** -55°C to 105°C. **Tolerance:** 10%. **Standard Effective Rotation:** 280°. **Electrical Rotation:** 300°. Hardware not supplied.

Series 58 4-Watt Wirewound Potentiometers

58C Series potentiometers are an industrial grade 4-watt potentiometer. 58C1 Series has 1/4" dia., 2" long round shaft FMS with 3/8" long bushing with 3/8-32 NEF-2A threads. 58C2 Series has 1/4" dia., 5/8" long screwdriver slotted shaft FMS with 1/2" long split locking bushing with 3/8-32 NEF-2A threads. **Specifications. Operating Temperature:** -55°C to 105°C. **Tolerance:** 5%. **Standard Effective Rotation:** 280°. **Electrical Rotation:** 300°. Hardware not supplied.

308/309/408/409 Series Potentiometers

The 308 and 309 series potentiometers are high performance, low cost potentiometers. The 408 and 409 series are high performance potentiometers designed for wave soldering applications for mounting to PC boards. The 308 and 408 are 0.5 watt with conductive plastic element and the 309 and 409 are 1.0 watt with thick film cermet element. All feature a compact 1/2" miniature, modular size. They are cost effective with design simplicity through fewer component parts. Horizontal or vertical mounting with support plates. Nickel-plated brass shaft and bushings in various diameters and lengths. Insert molded gold plated terminals for strength. The conductive element is precision made using screen printed conductive elements. The stability for the 308 and 408 series is -40° to +150°C. Both the 308 and 309 have solvent resistant housing, but are not immersion sealed. Both the 408 and 409 have O-ring shaft seal and the entire unit is sealed for wave solder and wash processing. 295° ± 5° electrical rotation. 350 VDC across end terminals, but power not to exceed rating. N=non-locking 1/4" dia. × 1/4" long bushing with 1/8" dia. × 3/4" long (FMS) slotted shaft. L=locking 3/8" dia. × 1/4" long bushing with 1/8" dia. × 7/16" long (FMS) slotted shaft. NS=S.P.D.T. rotary switch. PPS=push-pull S.P.D.T. switch. 309 for 409 locking bushing available as special order. Also available as special order with S.P.S.T. or S.P.D.T. switches up to three multiple sections, log tapers and reverse log tapers. 408 and 409 available with PC pins as special order. Call Allied for price and delivery info on custom parts. Manufacturers literature and catalog available on request.

2-Watt Series 380 Thick Film Conductive Plastic Called the "Quiet Ones"

These quiet, precision-made potentiometers are made by a controlled process that virtually insures a reliable, homogeneous and strain-free resistance element with 1% dynamic noise and 5% independent linearity. All have stainless steel shafts. **Type C1** has 2" round shaft FMS. $\frac{3}{8}$ " long bushing with $\frac{3}{8}$ " $\times$ 32. NEF-2A thread. **Type C2** has $\frac{5}{8}$ " screwdriver slotted shaft FMS with a $\frac{1}{2}$ " split locking bushing. **Type C3** has $\frac{7}{8}$ " screwdriver shaft FMS $\frac{3}{8}$ " long bushing with $\frac{3}{8}$ " $\times$ 32-NEF-2A thread. **Resistance Tolerance:** up to 1 megohm $\pm 10\%$, above $\pm 20\%$. **Dielectric Strength:** 1000 VAC. **Weight:** 1 oz.

Series 392 Immersible 0.5 Watt Potentiometers

Economical potentiometer designed to meet wave soldering applications for mounting to PC boards. Meets flow solderability and washability test requirements. MIL-R-94 standards apply where applicable. **Resistance Tolerance:** Linear, up to 1 Meg ohm $\pm 10\%$, above 1 Meg to 5 Meg $\pm 20\%$. Tapers, up to 250K $\pm 10\%$, above 250K to 5 Meg $\pm 20\%$. **Resistance Range:** 100 ohm to 5 Meg ohm, linear, 500 ohm to 2 Meg ohm, tapered. **Power Rating:** 0.5 watt maximum continuous power rating for linear taper, but voltage not to exceed rating. **Working Voltage:** 350 VDC across end terminals, but power not to exceed rating. **Linearity:** $\pm 5\%$ Independent. **Torque Range:** .20 to 2.0 oz. in. **Shafts, Standard:** .125 dia. **Solvent Resistance:** Housing resistant to trichlorethylene, chloroethane, NU Freon TMS, Freon TMC, carbon tetrachloride, toluene, MEK ethylacetate and gasoline.

†Not available in 392JB series.

Series CR Rheostats

The CR series of rheostats is ideal for use over long periods of time. Features vitreous enamel to bond the core and base, wiper tracks are buffered to assure smooth rotation and uniform contact, three terminals for potentiometer applications, and minimum backlash. The series is made in accordance to MIL-R-22. The 25 and 50 watt models are UL approved. The 12.5 watt units are not UL approved. $\pm 10\%$ resistance tolerance. High strength ceramic hub insulates the shaft and bushing from all line parts.

Series 381 1-Watt $\frac{5}{8}$ " Diameter Thick Film Conductive Plastic

- Precision Machined from Corrosion Resistant and Non-Magnetic Materials
- Rotational Life 100,000 Cycles Under Load
- Homogeneous, Strain-Free Thick-Film Resistance Element with 1% Dynamic Noise, 5% Independent Linearity
- Meets Stringent MIL-R-94 Specifications

381N has plain $\frac{1}{4}$ " long bushing with $\frac{1}{4}$ -32NEF-2A thread and $\frac{1}{8}$ " dia. $\frac{3}{4}$ " (FMS) long shaft. 381L is a locking bushing that has $\frac{3}{8}$ " long bushing with $\frac{1}{4}$ -32NEF-2A thread and long $\frac{1}{8}$ " dia. $\frac{7}{16}$ " (FMS) shaft. D381 is the same as the 381N but is dual ganged using the same resistance value for both sections. Dimensions are the same as 381N except total depth is $\frac{49}{64}$ " ($\pm \frac{1}{32}$). 381NS is the same as the 381N except it includes a factory attached SPST switch (1 A, 125 V AC/DC). 381N-Z is the same as the 381N except using a Z-taper. Dust and splash proof housing. Cover is sealed to base with epoxy seal. Terminals are molded into base and sealed for solderability per MIL-STD-202, Method 208B. **Resistance Tolerance:** $\pm 10\%$ through 500 K; $\pm 20\%$ above 500 K.

Claroknobs

The Claroknob is a high quality knob fabricated from machined aluminum. Manufactured to enhance products, the Claroknob comes in a variety of styles for your requirements. HD series is a control knob with a sawcut indicator. JD series is a straight knurl with top and side indicator. DD series is a straight knurl with side indicator. The DDS series is a straight knurl with arrow on skirt. Stainless-steel setscrews are standard. One setscrew for HD series and two setscrews for JD, DD, DDS series. For use with 1/8" or 1/4" diameter shafts. Anodized in clear or black, gloss or matte finishes.

*NOTE: To complete stock number replace the letter with the number of the option desired. For X: 5=1/4" shaft; 6=1/8" shaft. For Y: 1=Clear, 2=Black, 3=Matte Clear, 4=Matte Black. †For matte finish, add \$.20 each.

Clarodials

A high quality concentric scale dial designed to be used in conjunction with the 73JB multiturn potentiometer, the series 316 is available in clear brushed metal design or black anodized metal with white numerals at slightly higher cost. Price inducements are available when the 73JB and 316 dial are purchased together as a set.

Readout and Operation: Unit shall register a total count of 15 turns. The number in the window (0-14) indicates completed number of turns of the drive sleeve. Graduated circular dial indicates the percent of a partial turn of the drive sleeve. **Transfer Point:** The number in center of window shall change as graduated dial rotates between 94 and 0. **Rotation:** Readout shall increase with clockwise and decrease with counterclockwise rotation. **Brake Lever Operation:** 1st Position (15° movement of Brake Lever) operates a high torque system for fine adjustment; 2nd Position (15° additional movement of Brake Lever) actuates brake. **Accuracy:** Backlash shall be zero between graduated dial and drive sleeve. **Mounting:** Install mounting bracket between panel and panel nut. Clarodial shall mount directly to shaft with No. 2-56 spline socket set screw, located adjacent to No. 50 on graduated dial. **Numerical Size:** 0.075 high. **Graduation Size:** Numerical graduations .045 long (1.14) intermediate graduations .030 long (0.76). **Finish:** Exposed metal parts—Brushed metal finish; Turning knob and brake lever knob—Black plastic. **Numerals:** Graduated Dial—black; Turns Counter—white on black background. **Weight:** 0.7 oz. max. (19.84 gm).

Resistor Decade Box

- 1 to 999,999 Ohms in One-Ohm Intervals
- Dissipates Up to 225 Watts
- Terminals Accept 3 Kinds of Connections
- Wirewound Resistors Used Throughout

Model 240-C Bench Type

Allows selection of any value from 1 to 999,999 ohms in one-ohm increments. Six dials read Rx1, Rx10, Rx100, Rx1 K, Rx10 K and Rx100 K for quick setting and quick readout. Dissipates up to 225 W; max VDC 1000, or 660 VAC per decade, 2% tol. except Rx1 decade, 5%. Max. current rate range from 5 A for Rx1 to .005 A for Rx100 K. Rugged, long-lasting wirewound power resistors used throughout. Two sets of terminals accept any of the following: banana plugs, spade lugs or plain wire connections. 8 1/2" x 13" x 5 3/4". **Shipping Weight:** 1 1/4 lbs.

2 Watt Wirewound Precision 10-Turn Potentiometers

73JA/73JB

62JA

The 73 series is a 2-watt precision 10-turn potentiometer. The 73JB is the economical version of the 73JA, offering all the electrical features of the 73JA, but employing a long life nylon shaft construction. The 73JB has a metal bushing with glass filled black nylon shaft. The 73JA has a stainless steel shaft and metal bushing. Both shafts are 1/4" dia. 13 1/8" long FMS and have 5/16" plain threaded bushing, screwdriver slots, and 50,000 cycles rotational life. End resistance is 0.3% of total resistance or 1Ω, whichever is greater. 5% tolerance. 500 WV max. **To complete stock number, see Table B.**

600 Encoders

- Optical Incremental Encoders
- Analog to Digital Converters

- TTL Compatible All Models
- Only 1.125" Diameter $\times$.484" Deep

SPECIFICATIONS. Input Power: 5 volts DC $\pm 5\%$ @ 30 MA max. plus external requirements. Output Rate 128 pulses/revolution per channel-standard; Other pulses/revolution between 60 and 128 are available. Channels: Two separate output channels in quadrature, 90 $^{\circ}$ $\pm 45^{\circ}$. Output Voltage: High level voltage—2.4 volts min. with 10 K Ω load to ground; Low level voltage—4 volt max. Operating Temp: -20 $^{\circ}\text{C}$ to +65 $^{\circ}\text{C}$. Vibration: 10 to 2000 Hz, 15 G peck; MIL-STD-202 method 204 test C. Shock: 100 G @ 6 ms MIL-STD-202 method 213 condition 1.

The Series 600 controls are manually operated, rotary, optical encoders that output two square waves in quadrature at a rate of 128 pulses per channel per revolution as a standard with other resolutions down to 60 pulses available. The outputs are TTL compatible. The variation in this series is in the terminal configuration: either pin leads or cable leads.

MECHANICAL CHARACTERISTICS. Shaft Rotation: Continuous in either direction. Operating Speed: 300 rpm max. Rotational Life: 10 million revolutions. Rotational Torque: 1.5 oz. in. max. Shaft: $\frac{1}{4}$ " diameter standard, stainless steel. Bushing: $\frac{3}{8}$ " diameter standard, brass, nickel plated. Terminals: P/C Type—0.25 by 0.12 thick brass, gold plated to facilitate soldering. Cable Type—Four lead ribbon cables, color-coded, with .050 spacing, 28 AWG stranded copper wire, 0.39 diameter. Strength: Terminals withstand 2 lb. push and pull and a 90 $^{\circ}$ bend. Mounting Hardware (not supplied): For

$\frac{3}{8}$ " bushing, use hex mounting nut $\frac{3}{8}$ " $\times$ 32 thread, $\frac{1}{2}$ " across flats, $\frac{3}{32}$ " thick; internal tooth lockwasher $\frac{11}{16}$ " O.D. by .022 thick. Seals: Mounting seal and shaft seal available. Controls are not sealed for board washing. Weight: P/C type or cable type. 1 in. FMS shaft and $\frac{3}{8}$ " bushing-.046 lb. (21 G). Loc. Pin (NOT STANDARD): Single pin located $\frac{1}{32}$ " from center can be supplied.

388E Mechanical Encoders

Only one half inch square, the Series 388E is a direct digital, contacting, mechanical encoder for low resolution limits in such applications as sensing, cursing, scanning or robotics. Meets those requirements for a digital output component for limited space applications. Bushing: $\frac{1}{4}$ " $\times$ $\frac{1}{4}$ " inches. Shaft: $\frac{1}{8}$ " dia. $\times$ $\frac{3}{4}$ " in. FMS. Ig. screwdriver slotted. Terminals: .875 in. lg., P.C. Pins. Locating Pin: 9 o'clock.

500 Mechanical Rotary Encoder

Control Dimensions, Single Control

- Cost Effective
- High Resolution
- Expandable

- Stability
- Variability

The Series 500 Controls are manually-operated, rotary, mechanical encoders that provide a 2-bit grey code for relative reference applications and a 4-bit grey code for absolute electrical reference applications. In 2-bit grey code, the L channel leads the R channel by 90 $^{\circ}$ electrically in CW position. Continuous electrical travel. It has a rotational life of more than 100,000 shaft revolutions, a positive detent feel and can be combined with a second modular section in a concentric-shafts construction. This series is small sized (.83" sq. $\times$.343" thick) and commonly used in limited-space, panel-mounted applications where the need for costly front-panel displays can be completely eliminated. Direct digital output, which eliminates A/D converts. Up to 36 electrical and mechanical detented positions. -55 $^{\circ}\text{C}$ to +105 $^{\circ}\text{C}$ operating temperature. PC type terminals on .100" grid lines. Molded housing/bushing and shaft are polyester PBT, chosen for heat resistance and electrical characteristics. Program code board is glass epoxy, copper clad with nickel plating. Horizontal or vertical mountings relative to the PC board as well as metric shafts and bushings are available as special order. Also available as special order is dual constructions with concentric shafts. Hexadecimal, BCD, and counting codes and rotational position stops are available as special order.

10 Turn or 3 Turn Pots

Model MW22B-10. Wirewound element, $\frac{7}{16}$ " diameter $\times$ $\frac{3}{4}$ " long, 10 or 3 turns. Ten turn unit features 1,000,000 turns life, 2 watt power rating and .25% linearity. Three turn unit features 300,000 turns life, 1 watt power rating and 0.5% linearity. Both units have extremely smooth rotation, brass bushing and gold plated terminals. **Operating Temperature Range:** -55°C to $+105^{\circ}\text{C}$. Slotted shaft. **Also available:** 5 turn, multi-ganged and high-torque units. Also: see our page on turns counting dials.

 - Hybrid Elements
 - Additional Ganging of Pots

► Circuitry for Positioning
Contact your Allied office for more information.

Type MC20-1. Motor-Controlled 10-Turn Potentiometer gives the design engineer new latitudes in speed controls and temperature and valve positioning. This single-ganged, ten-turn pot operates from 6 or 12 VDC input, from an operational amplifier or external power supply. Slip clutch allows for manual adjustment of pot, plus prevents stop breakage. Panel mounts in a .407" diameter mounting hole. **Potentiometer RPM:** 1, 3, 10, and 18. **Potentiometer Power Rating:** 3 Watts at 70°C . **Resistance Tolerance:** $\pm 3\%$. **Independent Linearity:** $\pm 25\%$. **Rotational Life:** 2,000,000 turns. **Modifications Available:** 3 and 5 turn pots; 24 VDC inputs; other RPMs; hybrid element for 10,000,000 turn life. Allow 2-8 weeks delivery. Call for pricing.

Turns Counting Dials

ALLIED

Combination 10-Turn Dial/Pot

Model DC22. 10-Turn dial/pot combination mounts in 1 1/8" dia. hole in panel up to 3/16" thick. ±5% resistance tolerance, 2 watts. Gold plated terminals, over the center lock. Uses DC27 dial with MW22B-10MM pot.

Model DC27 1 1/16" Turns Counting Dial

Model DC27. 1 1/16" dia. concentric dial counts 1-10 turns. Over the center lock. Accepts 1/4" shaft dia. High temp. black plastic housing. Other shaft sizes available on special order.

Combo® 3— 10-Turn Dial/Pot Combination

Model DW22-10 (Combo® 3). Reduce assembly costs by eliminating the time-consuming mounting and calibrating of dial to pot. The COMBO 3 is a pre-mounted and pre-calibrated digital dial mounted to an ETI Systems Model MW22B-10MM precision 10 turn potentiometer. Gold plated terminal lugs. ±5% resistance tolerance. ±0.5% read-out accuracy. 1,000,000 turns life, 2 watts.

*See Table A below for ordering information.

The LCP12 series conductive plastic element and the LW12 series wirewound element both feature essentially infinite resolution, high precision, a contact resistance variation less than 2%, 500 VAC dielectric strength, and a choice of shaft styles. The LCP12 offers a long life of 20,000,000 strokes, output smoothness less than 0.1% input voltage, and 10% resistance tolerance. The LW12 offers excellent high speed tracking, 100 ohms max. noise, life of 100,000 strokes, and 5% resistance tolerance.

M1326 Wirewound

AMERICAN MADE

The M1326 linear motion wirewound potentiometer enjoys a unique position. It combines the best electrical characteristics in the smallest size at the lowest cost. A solid precious metal contact, engaging the precision wirewound mandrel, produces exceptional linear and resolution characteristics. For applications where forces are limited, such as in instrumentation, the M1326 is ideal because of its low shaft frictional force as well as small size and light weight Nylon bearings.

Conductive Plastic Slide Potentiometer P2333

AMERICAN MADE

This slide action linear motion potentiometer was developed for applications requiring high reliability, infinite resolution and long life. The range of electrical strokes is 1 to 4 inches. Repeatability is 0.2%; taper is linear. The combination of a raised molded resistive track and a compatible formulated contact, make this unit practically impervious to dust, oil or moisture. It therefore is suitable for use in the hostile environment often found in a steel mill, tire factory or mining operation. In addition, this construction makes possible the exceptionally long life of 5,000,000 cycles. With the knob removed, the lever arm may be attached to machinery to monitor the position of any linear motion.

Conductive Plastic P1613

AMERICAN MADE

Elec. Travel	1.000	2.000	4.000
A	2.000	3.000	5.000
B	1.800	2.800	4.800

The P1613 linear motion conductive plastic potentiometer is designed with simplicity in mind. It combines all the excellent features of the more expensive transducers yet is the smallest available in the market as well as the least costly. The molded raised track, combined with the special formulated contact, results in phenomenal life—the life expectancy at 60 inches/min. is 50,000,000 strokes. Total resistance tolerance: $\pm 20\%$. Operating Temperature Range: -55° to 105°C . Nylon bearings.

AMERICAN MADE

P2080

Conductive Plastic Type. These precision transducers feature molded, raised tracks and graphite composition contacts for long life in a hostile environment. They are impervious to dust, water, and oil. High contact pressure offers resistance to severe vibration and shock effects. Trouble-free operation in factories and mills. Operating temperature range: -55° to 105°C .

Rheostats, Dial Plates and Knobs

Vitreous-Enameled Rheostats

- Choose from 12½ to 300 Watts in a Wide Range of Resistances
- Highly Reliable and Economical
- U.L. Approved.

All porcelain vitreous-enameled, silicon-ceramic for smooth action and electrical control. Choose from 12½ to 300 watts in a wide range of resistances. Rheostats are highly reliable and economical; cannot smoke, char, shrink or shift. Metal-graphite contact brushes, varied to fit current and resistance. Ratings at full setting. U.L. approved 25 watts and up. Less knobs; see knobs, dial plates and handwheel below. Other resistances available as special order items.

12½ Watt – Type R12½

Rheostats have three terminals for use as a potentiometer. Resistance Tolerance: ± 10%. Running Torque: 1 to 6 inch oz. Rotation: 300° ± 5%. Mounting for Panels: up to ⅛". Standard Resistance: 1-5000 ohms. Shpg. wt.: 2½ oz.

25 Watt – Type R25

Wiper tracks on this rheostat are buffed and polished to assure smooth rotation and uniform wiper contact. A high strength ceramic hub is used to insulate the shaft and bushing from live parts. The wiper design assures minimum backlash. A vitreous enamel bonds core and base together for uniform heat dissipation and structural integrity. Cores on the larger sizes are enameled prior to winding to increase core strength and improve bond between wire and core. UL approved. ¼" dia. shaft. Resistance Tolerance: ± 10%. Running Torque: .25 to .5 inch-pound. Rotation: 300° ± 5%. Mounting for Panels: up to ¼". Standard Resistance: 1-10K ohms. Shpg. wt.: ½ lb.

50 Watt – Type R50

UL approved rheostats have vitreous enamel bonded core and base. Buffed and polished wiper tracks assure smooth rotation and uniform wiper contact. Rheostats have three terminals to allow use as potentiometers. ¼" dia. shaft. Resistance Tolerance: ± 10%. Running Torque: .25 to 2 inch-pound. Rotation: 300° ± 5%. Mounting for Panels: up to ¼". Standard Resistance: 1-10K ohms. Shpg. wt.: ¾ lb.

Rheostats

These rheostats are designed and manufactured to operate smoothly and reliably over long periods of use. All models are constructed with metal and ceramic and are coated with protective vitreous enamel or Ohmicon silicone-ceramic. Used for motor speed controls, light dimmers and for equipment requiring convenient variable resistance settings. Windings are linear taper on stock models. Tapered windings available as custom order. Ceramic body, high grade resistance alloy windings, vitreous enamel coating (some models silicone-ceramic), metal spring contact arm, metal graphite composition and solder coated terminals. **Tolerance: ±10%.** Wattage based on 25°C.

7 1/2 Watt. Core Diameter: .515". Shaft Diameter: 1/8".

Dials

Handsomely finished dials for rheostats. Figures and lines are etched on a black background for contrast and ease of readability. Divisions, which indicate approximate percentage of rheostat resistance in circuit, are marked from 0 to 100.

Model 534 Ten-Turn Wirewound Precision Potentiometer

Ten-Turn wirewound precision potentiometer. Glass filled thermoset plastic housing with nickel plated brass bushing mount. Stainless steel 1/4" dia. shaft. Solderable brass plated terminals. Moisture resistant. 3-watt power rating at 40°C. 5% tolerance. 0.25% linearity tolerance. -55°C to +125°C operating temperature. 0.875" D x 0.750" L. 1,000,000 turn rotational life. 0.75 oz.

Models 248 and 249 Potentiometers

The model 248/249 has proven high performance characteristics in a cost effective package. They are designed to become the choice when seeking high quality, inexpensive panel or PCB mounting potentiometers. The model 248 is conductive plastic with $\pm 20\%$ resistance tolerance and the 249 is cermet with $\pm 10\%$ tolerance. The 248 is 0.5 watts at 70°C with a temperature coefficient of 1000 ppm/°C. The 249 is 1.0 watts at 70°C with a temperature coefficient of 100 ppm/°C. Both have 295° ($\pm 5^\circ$) mechanical rotation with 265° ($\pm 5^\circ$) electrical rotation. **Rotational Life:** 50,000 cycles. **Shaft:** Plated brass. The housing and rear lid are flame retardant plastic. **Terminals:** Phosphor bronze with solder plated. **Operating Temperature:** -55°C to +125°C. **Load Life:** 1000 hours at 70°C. Additional configurations such as rear standoffs, solder hook terminals, rear locating lugs, audio taper and various shaft lengths in plastic or metal are available as special order items. Manufacturer's literature available upon request.

Model 157 Precision Industrial Potentiometer

The model 157 features a rugged moisture resistant one piece aluminum anodized metal housing with a rear lid, stainless steel shaft, long 2,000,000 turns rotational life, wide operating range and solderable terminals. These 1.0 watt at 40°C are derated to 0 watts at 125°C. **Load Life:** 900 hours. **Electrical Travel:** 340° ($\pm 4^\circ$). **Mechanical Travel:** 360° continuous. The bushing uses a sleeve bearing. **Resistance Tolerance:** $\pm 20\%$ with 600 ppm/°C temperature coefficient. **Operating Temperature:** -55°C to +125°C. Optional features that are available as special order items include mechanical stops at 340°, internal shaft seal, high torque, 1/8" diameter shaft, shaft slot, special shaft lengths, no locating pin and special electrical angles. Manufacturer's literature available upon request.

Model DE2 Incremental Encoder

This incremental encoder uses a patented silver-in-glass switching technology. It features a two channel quadrature output. The 32 pulses per revolution can be resolved to 128 increments per revolution. Internal active CMOS de-bounce circuitry provides clean, high level outputs. **Rotational Speed:** 200 RPM continuous and 400 RPM periodic. **Housing:** Molded glass filled thermoplastic. **Shaft:** Stainless steel in a nickel plated brass bushing. **Terminal Pins:** Phosphor bronze and are solderable. **Weight:** 1 ounce maximum. Channel Z is an optional index output available as special order item. Optional 64 pulses per revolution which can be resolved to 256 increments per revolution is also available as special order item.

Hardware and Adjustment Tool

Spectrol's standard 3/8" and 1-1/4" rectangular trimming potentiometers (models 43 and 70), may be easily panel mounted through the use of the Model 6 Panel Mount Adapters. These standard trimmer models can be quickly, easily, conveniently and economically converted into panel mount trimmers. Assembly is accomplished with the trimmer by snap-in, providing for minimal installation time. Adjustment tool is used to adjust trimmers. Can be used without magnetic or capacitance influence on the circuit.

Model 76 single turn cermet trimming potentiometers are 1/4" square with standard features which include the ability to withstand immersion cleaning processes, a multi-finger wiper to minimize CRV and a rotor designed for automatic adjustment. They are rated at 1/2 watt at 70°C derated to 0 watts at 125°C. **Resistance Tolerance:** ±10% with a temperature coefficient of ±100 ppm/°C. **Angle Of Rotation:** 270° nominal. **Rotational Life:** 200 cycles. Terminal Pins are solderable. **Load Life:** 1000 hours at 0.5 watt at 70°C. **Temperature Range:** -55°C to +125°C. **Weight:** 0.02 oz. Manufacturer's literature available upon request.

The models 4G and 4J are single-turn 5 mm cermet trimming potentiometers that have been designed for high performance and stability with optimum packaging density. Both the J-lead (4J) and the gull wing (4G) are fully sealed for wave, vapor phase, reflow soldering and immersion cleaning processes. Designed for both manual or automatic operation, and fitted with mechanical stops, both models are available as standard on tape and reel or in bulk (as special order item). **Electrical Travel:** 220°C $\pm 15^\circ$. **Mechanical Travel:** 270°C $\pm 10^\circ$. **Linear Power Rating:** 0.2 watts at 85°C. Logarithmic taper not available. **Resistance Tolerance:** $\pm 20\%$. **Temperature Range:** -55°C to +125°C. **Load Life:** 1000 hours at 0.2 watt at 85°C. **Rotational Life:** 100 cycles. **Max Unit Weight:** 0.15 grams. Manufacturer's literature available upon request.

[illegible]

The model 4H is an open frame 4 mm single turn cermet trimming potentiometer that has excellent solder wettability and excellent solder heat resistance as well as high solder leaching resistance with the nickel barrier layer construction. The model 4M is a single turn, miniature, superthin ($4.7 \times 4.0 \times 2.0$ mm), highly reliable sealed cermet trimming potentiometer. It is suitable for flow and reflow soldering and is sealed to withstand immersion cleaning process. No cleaning process is necessary after soldering. **Max. Working Voltage:** 50 VDC. **Resistance Tolerance:** $\pm 5\%$. **Power:** 0.1 watt at 70°C. **Effective Rotational Angle:** 4H — $270^\circ \pm 10^\circ$; 4J — $240^\circ \pm 10^\circ$. **Temperature Range:** -55°C to $+125^\circ\text{C}$. **Rotational Life:** 20 cycles. Manufacturer's literature available upon request.

- Feeds to all automatic machines the same as tape/reel.
- Saves shelf space compared to tape/reel.
- More cost effective than tape/reel.
- Ask your Allied sales office for automatic machine application information.

Introduction

Metal Oxide Film Resistors have been developed for application in circuits where stability under high temperature conditions is required.

Features

- Small Size and High Performance.
- Uniform Quality, and High Reliability.
- Flame Proof.
- Long Term Stability.
- Low Noise.
- 1W and 2W Supplied in Tape and Box: 1000 Pcs/Box
- 5W Supplied in Tape and Box: 500 Pcs/Box

Model 627, 628 Series SMD DIP Networks

These dual-in-line (DIP) thick film resistor networks are small outline surface mount devices (SMD). The A configuration is isolated resistors and the B configuration is bussed resistors. They are 1.28-watts per package at 70°C derated to 0 at 150°C. **Resistance Tolerance:** at 25°C is 2% (<33 ohm = ±1 ohm). **Resistance Temperature Coefficient:** ±100 ppm/°C (<100 ohms = 250 ppm/°C). **Resistance to Solder Heat:** 280°C for 10 seconds. **Operating Temperature Range:** -55°C to +125°C. **Lead Material:** Copper alloy dipped in 60/40 tin-lead solder. Leads are in a gull-wing configuration. An alumina substrate material is used with cermet resistor material enclosed in epoxy body material. Additional tolerances and packaging available as special order items. Manufacturer's literature available upon request.

A-Circuit, Isolated Resistors

627: N = 14 Leads 628: N = 16 Leads

B-Circuit, Bussed Resistors

Solder Pad Layout

Model 664, 668 Series SMD DIP Networks

These dual-in-line (DIP) thin film precision resistor networks are small outline surface mount devices (SMD). The A configuration is for isolated resistors. The 664 is .4-watts per package and the 668 is .5-watts per package at 70°C derated to 0 at 125°C. **Resistance Tolerance (and ratio):** at 25°C is A = 0.1%/0.05%; B = 0.1%/0.1%; D = 0.5%/0.1%; F = 1.0%/0.5%. **Resistance Temperature Coefficient:** ±25 ppm/°C. **Resistance to Solder Heat:** 280°C for 10 seconds. **Operating Temperature Range:** -55°C to +125°C. **Lead Material:** Copper alloy dipped in 85/15 tin-lead solder. Leads are in a gull-wing configuration. An alumina substrate material is used with nichrome resistor material enclosed in a molded epoxy body material. Manufacturer's literature available upon request.

Notes:
1. Leads are within .005/0.13 of the true position.
2. Maximum allowable mold excursion = 0.006"

667: N = 14 Leads
668: N = 16 Leads

Model 694, 698, 699 Series DIP Networks

These dual-in-line (DIP) thin film precision resistor networks are thru-hole devices. They are isolated resistors in each package. The 694 is .4-watts per package, the 698 and 699 are .6-watts per package at 70°C derated to 0 at 150°C. **Resistance Tolerance (and ratio):** at 25°C is A = 0.1%/0.05%; B = 0.1/0.1%; D = 0.5/0.1%; F = 1.0%/0.5%. **Resistance Temperature Coefficient:** ± 50 ppm/°C. **Resistance to Solder Heat:** 280°C for 10 seconds. **Operating Temperature Range:** -55°C to +125°C. **Lead Material:** Copper alloy dipped in 60/40 tin-lead solder. Leads are in PC-pin configuration. An alumina substrate material is used with nichrome resistor material enclosed in a molded epoxy body material. Manufacturer's literature available upon request.

Model 898, 899 Series DIP Networks

These dual-in-line (DIP) thick film precision resistor networks are thru-hole devices. The -1 configuration is bussed, the -3 configuration is isolated and the -5 is dual terminator in each package. The 898 is 2-watts per package and the 899 is 1.28-watts per package at 70°C derated to 0 at 125°C. **Resistance Tolerance:** at 25°C is 2% (<100 ohm = ± 2 ohm). **Resistance Temperature Coefficient:** ± 100 ppm/°C (<100 ohms = ± 250 ppm/°C). **Resistance to Solder Heat:** per MIL-STD-202, method 210, cond. B. **Operating Temperature Range:** -55°C to +125°C. **Lead Material:** Copper alloy dipped in 60/40 tin-lead solder. Leads are in PC-pin configuration. An alumina substrate material is used with cermet resistor material enclosed in a molded epoxy body material. Custom circuit configurations are available as special order items. Manufacturer's literature available upon request.

Model L-Series Networks

These single in-line thick film resistor networks are conformal coated and low profile. The power dissipation at 70°C per package is 0.6 watts for L06; 0.8 watts for L08; 1.0 watts for L10. They are derated from 100% at 70°C to 0 watts at 125°C. **Standard Tolerance:** 2% at 25°C. **Temperature Coefficient:** ±100 ppm/°C (<100 ohms = ±250 ppm/°C). **Operating Temperature Range:** -55°C to +125°C. **Substrate Material:** Alumina. **Resistor Material:** Cermet. **Body Material:** Conformal epoxy resin. The leads are steel alloy for most economy (lowest resistances are copper alloy) and have a lead finish of 90/10 tin-lead. Package has UL-94V-0 flammability rating.

MP Series Heat Sink Mountable Resistors in the TO-126 and TO-220 Style Power Packages

Case "A"
(TO-126 STYLE)
MP915

Case "B"
(TO-220 STYLE)
MP930 and
MP850

All dimensions in inches and (millimeters)

Standard Tolerance: 1%. **Temperature Coefficient:** TC taken at 25°C and 150°C. **MP850:** 5 ohms and above, 0 to +50 ppm/°C; below 5 ohms down to 0.5 ohm, 0 to +100 ppm/°C; below 0.5 ohm down to 0.2 ohm, 0 to +200 ppm/°C. **MP915/MP930:** 0.5 ohm and above, 0 to +100 ppm/°C; 0.05 ohm to 0.49 ohm, 0 to +200 ppm/°C. **Dielectric Strength:** 1500 Vrms AC. **Measurement Note:** Below 1 ohm the resistance measurement shall be made at a point 0.2 inch (5.08 mm) from the resistor body. **The MP915 and MP930 feature an exposed ceramic heat dissipating mounting surface. The MP850 has a copper heat sink integral in the molded package.**

Stock No.	Mfr.'s Type	Case Type	Power Rating	Max. Voltage	Ohms/Range	EACH

0.5	015	10	060	75	185	1K	356	—	—

Derating (Thermal Resistance):
MP915: 0.12 W/°C (8.33 °C/W)
MP930: 0.24 W/°C (4.17 °C/W)
MP850: 0.40 W/°C (2.50 °C/W)

***Power Rating:** The case temperature is to be used for purposes of establishing the maximum applied power. See Derating Curve. The case temperature measurement is made with the thermocouple contacting the bottom insulated mounting surface of the package (center of bottom surface), the device mounted on a heat sink, thermal grease applied at a mounting torque of 8 in-lbs (0.90 N-m) maximum. **Without a heat sink, when in free air at 25°C, the MP930 and MP850 are rated for 2.25 watts, the MP915 is rated for 1.25 watts.**

Mounting Note: The MP915/MP930 and MP850 must be mounted using a screw and compression washer mounting technique. This will provide sufficient pressure on the package over time and through large temperature variations to maintain the maximum power dissipation capability. Maximum torque to be applied to mounting screw is 8 in-lbs (0.90 N-m) maximum. **See Power Rating Note** for instructions on determining maximum power dissipation on your heat sink.

Type MK Radial Lead Precision Power Resistor, CK06 Size, 1 Ohm to 100 Meg, 0.75 Watt Rating

Standard Tolerance: 1%. **Temperature Coefficient:** 5 ohm to 5 Meg, ±50 ppm/°C; <5 ohm ±200 ppm/°C; >5 Meg, ±80 ppm/°C; TC referenced to +25°C, ΔR taken at -15°C and +105°C. **Operating Temperature:** -55°C to 175°C, 100% rated power at 125°C derated linearly to zero at 175°C. **Leadwire:** Tinned Copper.

Dale Wirewound Kits

KD-WSC1/2 Dale Precision Power Wirewound Kit. 1/2 watt 1% precision power wirewound surface mount resistor. 5 pieces per value of 6 values for a total of 30 pieces in a sturdy, clear, see-through plastic case with 6 individual compartments. Case C12.
777-0701. KD-WSC1/2EACH 58.23

KD-WSC1 Dale Precision Power Wirewound Kit. 1 watt 1% precision power wirewound surface mount resistor. 5 pieces per value of 6 values for a total of 30 pieces in a sturdy, clear, see-through plastic case with 6 individual compartments. Case C12.
777-0702. KD-WSD1EACH 56.95

KD-WSC2 Dale Precision Power Wirewound Kit. 2 watt 1% precision power wirewound surface mount resistor. 5 pieces per value of 6 values for a total of 30 pieces in a sturdy, clear, see-through plastic case with 6 individual compartments. Case C12.
777-0703. KD-WSD2EACH 58.23

KD-LVR1 Dale Precision Power Wirewound Kit. 1 watt 1% precision power wirewound axial lead low value MIL/qualified resistor. Proprietary processing technique produces extremely low resistance values. 10 pieces per value of 6 values for a total of 60 pieces in a sturdy, clear, see-through plastic case with 6 individual compartments. Case C12.
777-0704. KD-LVR1EACH 56.95

GL-25 Resistor Kit. Quantity of 1050 (25 of each value) 1/4 W deposited carbon film resistors in 42 resistance values from 0.5 ohms to 4.7 M ohms. 0.250"L, 0.095" diameter. $\pm 5\%$ tolerance. Conformal multi-coating, solder coated lead wire, EIA std. color coding. For microcircuits. Exceed MIL-R-11F performance characteristics. Case C42.
777-0025. GL-25EACH 45.10
777-0050. GL-50 (as above except 1/2-watt)EACH 54.50
777-0018. GL-18 (as above except 1/8-watt)EACH 52.45

CEC-180 Economy Kit. High quality 1206 size 1/8 watt 5% surface mount chip resistors. High reliability and wave flow solderability. Dramatic space saving advantage with extremely miniature size. Mounts on either side of PC board. 18 different resistance values. 10 pieces per value. 180 pieces total. Case C18.
777-0180. CEC-180EACH 28.75

RC-1200 Resistor Kit. 1/8 W 5% highly reliable metal glazed chip resistors. 60 resistance values from 2.7 ohms to 2.2 M ohms — 20 pieces of each value, total of 1200 pieces. Miniature size, wave flow solderability. Mount on either side of PC board. With X8/X16 magnifying glass and chip-designed tweezers. Case C62.
777-1200. RC-1200EACH 215.20

EMF-55 Resistor Kit. 1/4 W 1%, 50 ppm metal film resistors. 10 pieces of each value, with 111 values from 10 ohm through 1 M ohm, for a total of 1110 resistors. Case C15.
777-0055. EMF-55EACH 184.75

CEC-215 Economy LED Kit. 177 pieces, 30 different types, high quality LEDs in T-1 and T-1 3/4 package size. Red, yellow, green and orange colors in both clear and diffused lens types. Stand-off and flush type leads. Standard, super and ultra brights. Supplied in flip-open notebook type cabinet. Case C62.
777-0215. CEC-215EACH 147.00

Quick Pick Resistor Organizer
Featuring top quality deposited carbon film resistors. 60 resistance values from 2.2 through 2.2M ohms. Case C15.

Model 1815. 1/8 W 5% resistors. 25 pieces of each value for a total of 1500 pieces.
777-1815. 1815EACH 157.50

Model 2515. 1/4 W 5% resistors. 25 pieces of each value for a total of 1500 pieces.
777-2515. 2515EACH 115.45

Model 2530. 1/4 W 5% resistors. 50 pieces of each value for a total of 3000 pieces.
777-2530. 2530EACH 153.25

Model 5015. 1/2 W 5% resistors. 25 pieces of each value for a total of 1500 pieces.
777-5015. 5015EACH 131.20

Model CEC-450-1W. 450 pieces, 45 values, 10 pieces each value. 1 watt. 5% CF resistors, 4.7 ohms-1.0 M ohm.
777-4501. CEC-450-1WEACH 143.80

Model CEC-450-2W. 450 pieces, 45 values, 10 pieces each value. 2 watt. 5% CF resistors, 4.7 ohms-1.0 M ohm.
777-4502. CEC-450-2WEACH 139.60

SEI Kits

Surface mount thick film chip resistor design kits for RMC-1/8 (1206 size) in 5% and 1% tolerances, RMC-1/16 (0805 size) in 5% and 1% tolerances and RMC-1/16 (0603 size) in 5% tolerance only. Kits have 30 samples per value. 5% kits have 60 values (E24) and 1% kits have 120 values (E96). Kit includes product specifications, packaging guidelines, performance data and the chip samples. Replacement parts available in 1000 piece bulk packaging or 5000 piece tape and reel. Packaged in plastic notebook pages in three-ring binder.

Fixed Types

These precision wirewound resistors are especially designed to meet a wide variety of military, industrial and general consumer applications. They offer long life and extremely reliable service. For use as voltage droppers, bias resistors and bleeders in applications where resistance need not be varied. Feature fine alloy wire, wirewound on quality ceramic cores and covered with vitreous enamel coatings — the best conductor of heat for a material which must also be a good electrical conductor. Resistance Tolerance: $\pm 5\%$ for values 1 ohm or higher. Wattage ratings are for use in free air. See Table B (Below) Before Ordering. Mounting brackets and extra slider bands sold separately.

Adjustable Types

For voltage dividing networks, power supplies, transmitters—anywhere adjustable resistance is required. These resistors feature fine alloy wire, precision wound on high quality ceramic cores and insulated by vitreous enamel coatings. Slider lug included with each resistor. Resistance tolerance is $\pm 10\%$ of the total resistance value. Wattage rating applied only when the entire resistance is in the circuit; with adjustable lug at intermediate point, rating is reduced in the same proportion. Wattage ratings are for free air mounting. Important — See Table B (below) Before Ordering. Mounting brackets and extra slider bands sold separately.

Silicone Coated—SC Series

The Clarostat SC Series of precision silicone coated power resistors is manufactured in complete accordance with all applicable portions of MIL-R-26. These precision resistors provide an outstanding degree of reliability and stability in ratings of 1, 3, and 5 watts. All standard precision resistors are offered with a 1% tolerance and in standard MIL Styles RW70U, RW79U, and RW74U. **SC1A Terminal Strength:** Pull Test 7 Lb. Max., Approx. Weight .33 Grams. **SC3D Terminal Strength:** Pull Test 15 Lb. Max. Approx. Weight 1.3 Grams. **SC5E Terminal Strength:** Pull Test 15 Lb. Max. Approx. Weight 4 Grams. All resistors have Copperweld, Tinned leads and solderability conforms to MIL-R-26E.

NOTE: Not all values available in all wattages or types.

3, 5 and 10 watt wirewound resistors adapted to printed circuit, terminal board and point-to-point wiring applications. Through elimination of mounting brackets and terminal lugs there are considerable space-saving aspects. **Standard Resistance Tolerance:** ± 5%. **Lead Length:** 1 1/2". **Lead Diameter:** .032" for Type VC3D; Types VC5E and VC10F are .036" Diameter. See table below before ordering. Replace XX (last two numbers of stock number) with ohms value. Example: Mfr.'s Type VC3D, 7.5 ohms is stock number 880-4007. **Note:** Not all values available in all wattages or types.

CMC Series Chassis Mounted Power Resistors

Standard Specifications. Power Rating: 5-50 watts depending upon style. 275° C maximum hot-spot at 25°C ambient. Conforms to MIL-R-18546. 1% maximum Δ R in 1000 hour load life. Proper heat sinks as follows: CMC-5 and CMC-10—4 x 6 x 2 x 0.040 aluminum chassis; CMC-25 and CMC-50—5 x 7 x 2 x 0.040 aluminum chassis. **Temperature Range:** -55°C to +275°C. **Standard Temperature Coefficient of Resistance:** <1 ohm ± 90 ppm; >1 ohm to <10 ohms ± 50 ppm. 10 ohms ± 20 ppm. **Construction:** Windings are wound on ground ceramic cores. Terminals are electronically welded to end caps for maximum strength. A high temperature silicone encapsulant is used to mold the wound assembly. **Standard Terminal Material:** Copperweld, tinned (Material Code 9) 5-50 watt sizes. **Standard Resistance Tolerance:** ± 1.0% order code F. **Dielectric Withstanding Voltage:** 1000 volts for CMC-5 and CMC-10; 2500 volts for CMC-25 and CMC-50. Note: Not all resistance values available in all wattages.

HL series resistors for inexpensively dissipating larger amounts of power in DC or low frequency AC circuits. Special applications include grid resistors, voltage dropping resistors, high voltage bleeder resistors in power supplies, bias supply resistors, voltage divider networks, filament dropping resistors, load resistors, and shunt resistors. Steatite core is chemically inert and will withstand severe thermal shock and is impervious moisture. Element is highest quality copper-nickel alloy or nickel-chrome alloy, depending on ohm value. Special high temperature silicone coating, cured at much lower temperatures than vitreous enamels. Tinned leads. 5% resistance tolerance. Adjustable types, styles, tapped, non-inductive, additional ohm values, wattages, tolerances and lead styles available as custom order. Contact Allied for price and delivery info and manufacturer's literature.

Silicone Coated Wirewound Resistors

High-temperature silicone coating and welded construction. High power/size ratio. RS series has ceramic, steatite or alumina core (depending on size) and stainless steel end caps. CW series has a heat conductive ceramic core and weldable metal alloy end caps. Both have copper-nickel or nickel-chrome alloy element (depending on resistance value) and tinned Copperweld® terminals. Additional values, tolerances, wattages and other specifications available as custom orders. Call for price and delivery quotes. Manufacturer literature available upon request.

Complete welded and molded construction for total environmental protection in aluminum housed wirewound chassis mount resistor. Mounts on chassis to utilize heat-sink effect. High stability at conventional power ratings. Flat marking surface for easy identification. Series has ceramic, steatite or alumina core (depending on size). Copper-nickel, manganese copper or nickel-chrome alloy element (depending on resistance value) with stainless steel end caps and tinned Copperweld® terminals. -55°C to +275°C operating temperature range. Additional values, tolerances, wattages and other specifications available as custom orders. Call for price and delivery quotes. Manufacturer literature available upon request.

Film and Chip Resistors

Model RN and CMF Metal Film Resistors

Small size, flame retardant epoxy conformal coating with excellent high frequency characteristics. Low noise, low voltage coefficient and controlled temperature coefficient. 1% tolerance. Fire-cleaned high purity ceramic core with vacuum-deposited nickel-chrome alloy element. Standard lead material is solder-coated copper. Leads are solderable and weldable. Resistance shifts due to storage at room temperature are negligible. Additional values, tolerances, temperature coefficients, terminal material, special pre-conditioning, fusible and flameproof versions available as custom orders. Call for price and delivery quotes. Manufacturer literature available upon request.

Single-Inline and Dual-Inline Thick Film Resistor Networks

CSC Thick Film Resistor Network Series

Resistor elements protected by tough epoxy conformal coating. Highly stable thick film resistor element. Reduces total assembly costs. Tin-lead plated copper alloy leads. 0.100" lead spacing. 0.195" maximum seated height. Bussed style typically used for pull-up/pull-down applications. Isolated style typically used for pull-up/pull-down, LED current limiting, line termination, and long-line impedance balancing. **Power Rating:** For bussed style, .20-watt; for isolated style, .30-watt. **Operating Temperature:** -55°C to +125°C. **Dimensions:** A: 6-Pin — .59; 8-Pin — .79; 10-Pin — .99. B: 6-Pin — .60; 8-Pin — .80; 10-Pin — .90.

Axial-Lead Vitreous Enamel Resistors

- Low Cost Wirewound Resistor with Vitreous Enamel Coating
- Popular Small Size for Circuit Board, Point-to-Point, or Terminal Board Applications
- Welded Terminations and Lead/End Cap Assembly Assure Maximum Reliability
- Low Temperature Coefficient

Uniform winding and coating assure uniform heat dissipation and excellent appearance. Balanced thermal expansion between core, wire and high temperature vitreous enamel assures reliable performance. Uniformly tinned leads assure reliable electrical and mechanical connections. **Resistance Tolerance:** 5%. **Temperature Coefficient:** ± 150 PPM. Available in non-inductive winding, lower TC, closer tolerance and additional resistance values as special order items. Call for pricing and delivery information. Manufacturer literature available.

Silicone Coated Power Resistors

- Complete Welded Construction
- High Temperature Silicone Coating and Molding
- Meets Applicable Requirements of MIL-R-26
- 1% Tolerance

SL-1 (MIL-RW70U); SL-3 (RW79U); SL-5 (MIL-RW74U). Made with ceramic, steatite or alumina core, depending on size. Copper-nickel alloy or nickel-chrome alloy, depending on resistance value. Stainless steel end caps. Standard terminals are tinned copperweld. Also available in non-inductive styles with Aryton-Perry winding, various elements available for special TC, special configurations, closer tolerances, special matching TC and tolerance. Call for pricing and delivery information. Manufacturer literature available.

Tubular Vitreous Lug/Leaded Resistors

- Tubular Construction Provides Excellent Heat Dissipation
- Welded Terminals and Termination Guarantees Positive Electrical Connections
- Tinned Terminals

Balanced thermal expansion between core, wire and high temperature vitreous enamel assures reliable performance. Long term stability results from firing at temperatures exceeding 1000°F. Uniform winding and coating assure uniform heat dissipation and excellent appearance. Supplied with 1½" solder leads. **Resistance Tolerance:** $\pm 5\%$. **Temperature Coefficient:** ± 100 PPM. Available in non-inductive winding, lower TC, closer tolerance and additional resistance values as special order items. Call for pricing and delivery information. Manufacturer literature available.

Fixed Resistors

► Long Term Stability

Used for voltage dropping or dividing, bias, bleeders, power supplies and other military, industrial, commercial and general consumer applications. Uniform winding and coating provides uniform heat dissipation and excellent appearance. Tinned terminals provide reliable solder or mechanical connections. Balanced thermal expansion between core, wire and high temperature vitreous enamel assures reliable performance. Tubular construction provides excellent heat dissipation. Welded terminals and termination guarantees positive electrical connections. Long term stability results from firing at temperatures exceeding 1000°F. **Resistance Tolerance:** ±5%. **Temperature Coefficient:** ±100 PPM. On adjustable resistors, the wattage rating applies when the entire resistance is in the circuit. With the adjustment lug at an intermediate point, the wattage is reduced in the same proportion. Wattage ratings are for free air mounting. Quick disconnect terminals, other/additional mounting hardware, closer tolerances, lower TC, and other resistance values available as special order. Manufacturer literature available. Units are not supplied with mounting hardware; see mounting hardware listed below each wattage listing. Two (each) are required to mount each resistor.

Resistor Assortment

Each cabinet contain the most popular resistance values, including "Mil" specified resistors. Each cabinet is an organized system designed for research and development, prototype laboratory work, education instruction, maintenance and replacement. All cabinets are labeled to identify the resistor series contained and all the drawer compartments identify the resistance values. The cabinets have interlocking bases and tops which permits stacking and helps conserve space. Cabinet models composed of two or more cabinets are stacked and reinforced with metal braces which allow mounting onto walls or pegboards. Each individual cabinet is 9" wide x 4 3/4" high x 5 1/4" deep.

Decade-Ranger Model No. 3416

A precision, $\pm 1\%$ accuracy, 6 decade resistance box. This unit eliminates the guesswork and aids in the determination of appropriate resistance values. The substitution box is an easy-to-use, dedicated unit which facilitates circuit design, breadboarding, and resolving circuitry problems. The unit has sturdy metal housing, universal binding posts and a grounded metal post for effective shielding. Rotary tap switches operate in either direction. Direct digital readout. 1/4" watt per resistor. **Range:** 1 ohm thru 1,111,110 ohm in 1 ohm increments. **Switch Life:** In excess of 50,000 operations. **Dimensions:** 10.5"W x 3.75"H x 4.675"D. **Weight:** 3 lbs. 10 oz.

296-1195. Model 3416.....EACH 227.96

Ohm-Ranger Model No. 3420

An economical, portable 7-decade resistance selector with a range of over 11 Meg ohms in 1 ohm increments. This unit eliminates the guesswork and aids in the determination of appropriate resistance values. The substitution box is an easy-to-use, dedicated unit which facilitates circuit design, breadboarding, and resolving circuitry problems. Has three binding posts, one to ground the case. The handy slimline size is housed using rugged metal construction. Slide switches are used to change the resistance values. **Power:** 1/2 watt (not to exceed 250 V). **Accuracy:** $\pm 1\%$ over 10 ohms, $\pm 5\%$ under 10 ohms. **Size:** 4" x 6" x 1". **Weight:** 13 oz.

296-1200. Model 3420.....EACH 109.59

Cap-Ranger Model No. 3430

An economical, portable capacitance selector with 3 binding posts, one to ground the rugged metal case. This unit eliminates the guesswork and aids in the determination of appropriate resistance values. The substitution box is an easy-to-use, dedicated unit which facilitates circuit design, breadboarding, and resolving circuitry problems. Slide switches provide range of 100 picofarads to 11.111 microfarads in 100 picofarads. **Accuracy:** $\pm 2\%$. 200 VDC maximum. **Residual Capacitance:** 60 pf (typical). **Size:** 4" x 6" x 1". **Weight:** 13 oz.

296-1205. Model 3430.....EACH 137.03

Vitreous Enamel Conformal Wirewound Resistors

Features

- ▶ Rugged Vitreous Enamel Coating Withstands High Humidity And Temperature Cycling
- ▶ Durable Construction, Recommended For Industrial Applications Where Reliability Is Paramount
- ▶ All-Welded Construction
- ▶ Flame Resistant Vitreous Enamel Coating
- ▶ 5% Tolerance

Rugged and flame resistant vitreous enamel coating withstands high humidity and temperature cycling. Durable all welded construction ideal for industrial applications where reliability is paramount. These resistors offer the durability of a silicone-free conformal coated resistor and ideal for computer, communications and industrial applications in which coast, quality and reliability are key considerations. Ceramic core with solder coated axial leads. Tolerance: $\pm 5\%$.

5 W	.953	24.2	.234	5.9	20	1.80
11 W	1.796	45.6	.343	8.7	20	6.40

Features

- ▶ Molded Construction Provides Consistent Shape And Size (Permits Mounting In Clips Which Extends Power Rating)
- ▶ Meets Mil-R-26 Requirements For Insulated Resistors
- ▶ All-Welded Construction
- ▶ Flame Resistant Vitreous Enamel Coating
- ▶ 5% Tolerance

Molded construction provides consistent shape and size which permits mounting in clips to extend power rating. Mechanical integrity is enhanced by the all-welded construction and the vitreous enamel coating is flame resistant. The durable vitreous enamel coating, which is silicone-free, permits the resistors to maintain a hard coating while operating at high temperatures. Ceramic core with solder coated axial leads.

1 1/2 Watts

TA Series — NEW — Power Chip Resistors

The Ohmite Power Chip Resistor is a thick film resistive ink resistor. These resistors are lightweight, economical, non-inductive, have high power density and require minimal board space. It is constructed on an alumina substrate with copper plated silver conductors, ruthenium oxide resistance material, and a glass passivation layer. The resistors have very low inductance of 50 nH measured at 1 MHz. The thin profile and low inductance are specifically designed for switch mode power supplies. Repetitive transient withstand capability is 5 times peak as long as the one second average dissipation remains equal to or less than rating. Terminals are solder plated brass.

TWW/TWM — NEW — Ceramic Housed Power Resistors

- Economical Commercial Grade for General Purpose Use
- Wirewound and Metal Oxide Construction
- Flameproof

Ceramic housing for fiberglass or metal oxide core with cement based filling. 5% tolerance. Short time overload is wirewound 10x rated wattage for 5 sec.; metal oxide 5x rated wattage for 5 sec. results in $\pm 2\%$. Derate from 100% at 70°C to 0% at 275°C. Incombustibility at 16x rated wattage for 5 min. is not flamed. Moisture proof load life at 40°C 95% RH on-off cycle 1000 hours yields $\pm 5\%$.

TW Series Vertical Mount Radial Wirewound Resistors

- Radial Leads for PC Mounting
- 2.5 to 7 Watts Power Ratings
- Solder Coated Radial Leads
- Fiberglass Core with Ceramic Coating
- Linear Derating From 100% @ 25°C to 0% @ 250°C

Ceramic housed wirewound resistors in vertical configuration. The radial leads are solder coated and are ideal for PC board mounting. The fiberglass core has a ceramic coating and is in a vertical mount configuration. Linear derating from 100% @ 25°C to 0% @ 250°C. Power rating is based on 25°C free air. 10% tolerance available as special order item. Call for pricing, delivery and minimums.

- ▶ Economical
- ▶ Applications Include Commercial, Industrial and Communications Equipment
- ▶ Stability Under High Temperature Conditions
- ▶ All-Welded Construction

Economical conformal silicone-ceramic coated resistors. These all-welded resistors are characterized by low temperature coefficients and resistance to thermal shock, ideal for communications and a wide range of electrical and electronic applications. Ceramic core and solder coated axial leads.

Silicone-Ceramic Conformal Wirewound Resistors

High quality conformal silicone-ceramic coated resistors for applications requiring high precision, power and stability. These resistors have a low temperature coefficient and maintain a high degree of stability under demanding conditions. They feature all-welded construction and have the ability to maintain accurate resistance values due to being stabilized. Meet or exceed MIL-R-26 specifications. Ceramic core with solder coated axial leads. Parts are marked with both Mil designation and Ohmite stock part number.

Edgewound/Round Wire Power Resistors

Roundwire

Edgewound

Pow-Ribs™ are designed to handle 700-1000 watts of power. Their construction consists of thick, heavy resistance alloy wound around porcelain ceramic core insulators supported by a metal mounting bar. The bar is slotted on each end to facilitate installation. Edgewound Pow-Ribs™ provide low resistance at high current ratings, while Round Wire Pow-Ribs™ provide higher resistance at lower current ratings. Clamp-type terminals on the Edgewound units permit a reliable connection which can be moved along the resistive element to obtain intermediate values. **Tolerance: ±10%.** **Average Weight: 3 lbs. 16.25" long between mounting centers.**

Fixed/Adjustable Vitreous Enamel High Power Corrib Resistors

Corrib resistors are ideal for applications involving high currents at very low resistance values — as low as 0.1 ohm at 300 watts. These large, heavy-duty resistors are designed to withstand frequent start-stop cycles characteristic of motor starting, dynamic braking, and other similar applications. They are manufactured with corrugated resistive wire. Ribbed construction aids in rapid cooling. To accelerate cooling, the wire is securely fused to the ceramic core by a protective vitreous enamel coating to improve durability. Corrib resistors are hollow-core units which can be securely fastened to chassis surfaces with the same thru bolts and brackets used with the 210/270 series resistors. **Tolerance: ±10%.** **Core Diameter: 8.5" long × 1.125". Overall Height: 1.895".**

Metal-Mite Aluminum Housed Axial Lead Wirewound Resistors

These molded-construction metal housed axial-lead performance resistors are available in higher power ratings than standard axial-lead resistors and are better suited to withstand shock, vibration and harsh environmental conditions. Metal-Mite resistors are aluminum housed to maintain high stability during operation and to permit secure mounting to chassis surfaces. The metal housing also provides heat-sinking capabilities, allowing the units to exceed the power ratings set by Mil specifications. Meets or exceeds MIL-R-18546 specifications. Solder coated axial lead terminals. **Tolerance: ±1%.** Power rating based on chassis mounting area and temperature stability. Proper heat sink for wattage is: 4" × 6" × 2" × .040" aluminum chassis for 5 and 10 watt units; 5" × 7" × 2" × .040" aluminum chassis for 25 watt units; 12" × 12" × .059" aluminum panel for 50 watt units.

Type 270 Fixed Vitreous Enamel Power Resistors

Suitable for applications requiring higher wattage ratings from 12½ to 225 watts. The rugged vitreous enamel coating provides electrical insulation, excellent heat conduction, and is flame resistant. These wirewound resistors are wound on a high quality ceramic core with lug terminals suitable for soldering or sturdy bolt connection. For sturdy mounting, the hollow core permits fastening with spring-type brackets, thru bolts or thru bolts with slotted-steel brackets. **Tolerance:** ±5%. Power rating based on 25°C free air rating. Mounting brackets, thru bolts and hardware sold separately on page 462.

Type 210 Adjustable Vitreous Enamel Power Resistors

Type 210 adjustable resistors are used for applications requiring settings at different resistance values. These wirewound resistors are equipped with a screwdriver adjustable lug, making them ideal for adjusting circuits, obtaining odd resistance values and setting equipment to meet various line voltages. These resistors have a vitreous enamel coating with a strip of uncovered wire that makes contact with the adjustment lug. One screwdriver adjustment lug is provided with each resistor. The hollow core permits secure fastening with spring-type clips, thru bolts or thru bolts with washers. They also offer the durability and flame resistance of vitreous enamel coating and all-welded construction. **Tolerance:** ±10%.

NOTE: The stated wattage rating applies only when the entire resistance is in the circuit. Setting the lug at an intermediate point reduces the wattage by the approximate same proportion. Mounting brackets, thru bolts and hardware sold separately on page 462.

200 Series Vitreous Enamel Wirewound Power Resistor

These resistors have a rugged, fire resistant vitreous enamel coating to ensure successful performance under high temperatures. Small, exceptionally durable power resistors use all-welded construction and have a self supporting lead mounting option. **Tolerance:** $\pm 5\%$. Power rating based on 25°C free air. Can be mounted using mounting hardware for 210/270 series resistors or by using attached leads.

5 1/4 Watt. Length: .625. OD: .250. ID: .135.

10 Series Molded Silicone Axial Lead Wire Element Resistors

These molded silicone resistors are ideal for current sensing applications. They have low inductance (non-inductive below 0.25 μ). Terminals are constructed of solder-plated copper leads or copper clad steel depending of ohm value with silicone molding encapsulation compound. **Tolerance:** 1%. Power rating based on 25°C free air. **Temperature Range:** 55°C to +275°C.

Dimensions

Power Rating	Dimensions			
	D $\pm$.010	L $\pm$.010	d $\pm$.002	M
2 W	.094	.406	.032	1.156
3 W	.205	.560	.032	1.310
5 W	.330	.925	.040	1.675

Hardware for Power Resistors

Brackets fit inside cores of 210 Type and 270 Type resistors and remain in place by spring tension. Standard brackets are plated steel. Thru bolt kits along with plated steel brackets, centering washers and insulating washers (included) allow for secure perpendicular mounting of these resistors to panels up to 1/4" thick.

CR-Series Carbon Film Resistors

CR-Series resistors are high-performance, high-reliability low cost carbon film resistors. They are particularly well suited to those applications that require significantly better performance than can be obtained with carbon composition resistors. These resistors feature very low noise, excellent stability, and wide operating frequency range, in minimum size for their power ratings. These resistors have high temperature and time stability approaching those of industrial metal film resistors. This series features durable design rugged epoxy coating, are well suited to automatic assembly, wave soldering, conveyorized handling and easily withstand industrial solvents used in cleaning circuit boards. Marked using 4 color bands. Tape and Reel product available in multiples of 5000 pc/reel as custom order. Call for price and delivery.

Type SFR-Series Metal Film Resistors

Designed for high value manufacturing and automatic insertion, this series provides an economic way to upgrade circuits with stability, low noise, low reactance, and temperature coefficient. Color band marking for ease of identification after mounting. The SFR25 series is designed to replace carbon composition (RCR 07 and 20), carbon film, and older design metal film resistors (RL 07 and 20). The SFR25H series is a replacement for RC20, RN60 and RL20 in Mil styles in applications not requiring qualification. Tape and reel product available in multiples of 5000 pc/reel as custom order. Call for price and delivery.

Series 9C Commercial SMD Chip Resistors

The surface mounted chip resistor consists of a glass passivated thick film resistive paste screened onto a high purity alumina ceramic substrate. The nominal resistance value is achieved by varying the composition of the paste prior to the screening process and by laser trimming the film after it has been screened on. To insure mechanical and environmental integrity, the chip is covered with a silicon based "procoat." The conductive layer consists of a precious metal and a wrap around termination is deposited at each end to allow mechanical and electrical attachment. These chip resistors and adaptable to high speed automated mechanization assembly. They allow excellent printed circuit board density as well as utilization of both board sides. Zero ohm jumper available as custom order in full reels only.

Series 9B Precision MELF Surface Mount Resistors

The MELF resistor consists of a high alumina core on which metal film is deposited. A cap is applied at each end and the resistor is spiraled to value. The resistor is then coated, color coded, and end caps treated to facilitate soldering. Zero ohm jumper available as custom order in full reels only.

Silicone Coated Series 100 Wirewound Resistors

The RCD 100 Series of precision silicone coated power wirewound resistors is manufactured to provide highly reliable continuous operation under MIL-R-26 and MIL-R-39007. Load life stability after 1000 hrs. is typically below $\pm 0.25\%$ ΔR at full rated power. Improved performance results from single layer, tension free windings of premium grade resistance wire. Special ceramic cores feature optimum thermal conductivity, resulting in a reduced temperature rise over conventional wirewounds. The coating is resistant to most solvents but should not be brushed while wet. **125 Terminal Strength:** Pull test 7 lb. max., approx. weight: .33 Grams. **135 Terminal Strength:** Pull test is 15 lb. max., approx. weight: 1.3 grams. **160 Terminal Strength:** Pull test 15 lb. max., approx. weight 4 grams. All resistors have tinned leads and solderability conforms to MIL-R-26E. Non-inductive, extended resistance range, and radial leads available on special order. Call for price quote and availability.

Series 600 High Power Resistors – Highest Quality

RCD Series 600. Compact power wirewound resistors offer continuous high-power dissipation. These devices are molded in high density aluminum heat sink for a maximum heat dissipation. Maximum environmental protection provided by a hard anodized housing (per MIL-A-8625 Type 2). Inside the rugged housing, accurate concentricity of the resistive element allows a high level of voltage protection. Other features include complete welded construction (terminal to terminal), oxide-free premium grade resistance wire windings, low noise and thermal EMF. Meets or exceeds MIL-R-18546 requirements.

▶ Outperforms Carbon-Comp MIL-R-11

▶ Flame Retardant Coating And Color-Banding

▶ Excellent Long-Term Stability

▶ Resistant To Industrial Solvents

Series CF resistors provide improved performance over industry standards without increasing costs. Load life stability at a typical 1000 hrs. is less than 0.5%ΔR. These quality standards are achieved through strict process controls and highest grade materials. Cores are high thermally conductive ceramic, creating superior heat dissipation and overload capability which allows reduced sizes unavailable until now. Specially electroplated leads for faultless soldering, even after lengthy storage times. Industrial solvent-resistant multilayer epoxy coating and color-banding. **Note:** 1/8, 1 and 3 Watt sizes available from factory in 1000 pc. multiples as custom order.

Types PW5/5-Watt and PW10/10-Watt Resistors

Axial lead resistors. Welded cap to lead for improved noise levels and long term stability. Precisely wound element with glass fiber core and sealed in rectangular ceramic case. **Tolerance:** ±5%. **Wide resistance range:** 1Ω to 5K. **Improved TCR:** ±200 PPM Typ. (Values above 1Ω). **Power rating:** 25°C ambient. **Maximum operating temperature:** 275°C. Other values available in 100-piece multiples as custom order. 2, 3, 7, 15, 20, 22, and 25 watt sizes available in 100 piece multiples as custom order. PW series utilizes either wire-wound or film elements. Specific type may be requested at time of order as special order item with 1000 piece multiples. If not specified, either may be shipped.

See the Wide Selection of Value-Priced Resistor Kits for Prototyping, Repair or Maintenance Uses in the Kits Section.

Carbon Composition Resistors

These 1/4 and 1/2 watt composition resistors meet or exceed all requirements specified by MIL-R-11 and RS-172. Operation at full wattage rating at 70°C without derating. ±5% tolerance. 1/8 watt available in 1000 piece minimum and multiple only.

Metal Film 1% Tolerance Resistors For Commercial Applications

- ▶ Voltage Coefficient, 1/10-Full, 0.5 ppm
- ▶ For Precision Instrumentation.
- ▶ Color Band Marking

- ▶ Low Noise Levels: -20 Db on Standard Values, 0.1µV per Volt; -30 Db on Low-Med Values, 0.5µV per Volt
- ▶ Offer Low Electrical Noise

- ▶ High Stability Under Load
- ▶ Other Values Available in Packages of 1000 Pieces Only

Replace XXX In Stock No. With Appropriate 3 Digit Number From Values Table (Below). Sold Per Package of 100.

Metal Oxide Mini Series Resistors

SEI Type RSM

- Ideal Substitute Where Size Restraints Apply.
- Low Cost Alternative for Power Carbon Composition and Wirewounds.
- Flameproof - Meets Overload Test of UL #1412.
- Meets Solvent Test of Method 215 of MIL-STD 202.
- Temperature Coefficient of $\pm 200\text{ppm}/^\circ\text{C}$.
- Performance Tested Per MIL-R-22684 Rev. C.
- Available on 2500 Piece Tape & Reel as Special Order Item.
- Available From .1 ohm to 9.1 ohm as Special Order Item.

NTC, PTC, Cryogenic Thermistors and Inrush Current Limiters

Precision Thermistors $\pm 0.2^{\circ}\text{C}$ from 0°C to 75°C

Keystone precision units are the designers' choice for low cost, close-tolerance temperature measurement. These ultra-stable thermistors are accurate to $\pm 0.2^{\circ}\text{C}$ from 0°C to 75°C . They are widely used in OEM applications because they offer close-tolerance temperature measurement without requiring individual calibration. A protective coating is standard for all precision thermistors listed in the table below.

NTC Thermistors

Negative temperature coefficient thermistors decrease in resistance as temperature increases. Temp. coefficients range from $-2\%/^{\circ}\text{C}$ to $-5\%/^{\circ}\text{C}$ at 25°C . Max. oper. temp.: 150°C + Max. temp.: 125°C .

*Resistance Ratio—ratio of zero power resistance @ 0°C to zero power resistance @ 50°C .

Inrush Current Limiters

- Protect against high peak inrush current, especially in AC/DC switching power supplies.
- All resistances $\pm 2\%$ at 25°C .
- All parts are insulated with a protective coating.

Cryogenic Thermistors

Keystone cryogenic thermistors are extremely useful for liquid level detection in various cryogenic liquids. In this application, the thermistor is slightly self-heated by passing a small current through the unit. The heat generated in the unit is more easily dissipated when the thermistor is immersed in cryogenic fluid than when the fluid level falls below the thermistor. The resulting change in thermistor temperature is easily detected by the change in resistance.

Dissipation Constant
in mW/°K

Electrical Input (mW)	O ₂	N ₂
1.0	2-4	2-7
10.0	5-15	4-14

PTC Thermistors

Positive temperature coefficient thermistors are characterized by an extremely large resistance change in a small temperature span. Temperature at which resistance begins to increase rapidly is referred to as the transition temperature ($^{\circ}\text{C}$).

Glass Encapsulated Thermistors

- Temperature Range: -50°C to $+204^\circ\text{C}$
- Time Constant: 3 sec.
- Dissipation Constant: 2.0mW/ $^\circ\text{C}$
- Tolerance: $\pm 10\%$ @ 25°C

Keystone glass encapsulated NTC thermistors are tiny pellets of thermistor material hermetically sealed in glass bodies. The hermetic seal makes these parts extremely stable in applications up to 204°C (400°F).

Note: For KCC type for Style II Delete AL prefix and add G100 suffix. Not stocked at Allied. *Max. Application Temp. is 150°C .

Kits

Type A-681. Inrush Limiter Kit. Contains one each of 20 different types of current inrush limiters. 837-0681. A-681.....EACH 42.00

Type A-973. Contains two each of 12 different types of surface mount glass encapsulated thermistors. Surface Mount Encapsulated NTC Kit 837-9901. A-973.....EACH 45.75

GLASS BEAD (Model G1)

Time Constant: 16 sec.
Dissipation Constant: 0.75 mW/ $^\circ\text{C}$

GLASS PROBE (Model G15)

Maximum Operating Temperature = 260°C
Time Constant: 17 sec.
Dissipation Constant: 1.20 mW/ $^\circ\text{C}$

Glass Beads and Glass Probes

Glass bead thermistors are exceptionally stable because the glass seal protects the thermistor from hostile environments.

How to Select a Power Supply

There are times when you need a power supply but you don't have a part number to reference. You know the end application but you have many power supplies to choose

from. How do you determine what type of supply to purchase. Here are some hints to make your search/selection easier.

Linear???

8-750 Watts
Larger
Heavier
<5 mV
Runs Warm
115/230 VAC
40% Typical

Or

Power Level
Size
Weight
Output Ripple
Temperature
AC Input
Efficiency

Switcher???

30-400 Watts
Smaller
Lighter
<50 mV
Runs Cool
85-264 VAC
75% Typical

SPW Series Regulated Linear Power Supplies

- ▶ World-Wide AC Input Range
- ▶ World-Wide Safety Standards
- ▶ UL, CSA, and TUV Approved
- ▶ Industry Standard Package
- ▶ Built-In OVP on 5 V Output
- ▶ Optional OVP for Other Outputs
- ▶ Overload Protection with Automatic Recovery
- ▶ 100% Burn-In

Specifications

AC Input Voltage: 100/120/220/230/240 selectable. **Frequency Range:** 47-63 Hz typical, 60 Hz; 10% derated output current for 50 Hz. **Transient Response:** 50 msec at 50% load changes. **DC Output. DC Output Adjustment Range:** $\pm 5\%$, min. **Line Regulation:** $\pm 0.05\%$ for 10% line change. **Load Regulation:** $\pm 0.05\%$ for 50% load change. **Ripple:** 3.0 mV P-P, max. **Overvoltage Protection:** standard on all 5 V output; factory set at 6.2 V ± 0.4 V; other outputs use optional OVP. **Remote Sensing:** provided on main outputs; refer to output rating chart. **General. Stability:** $\pm 0.05\%$ for 24 hours after warm-up. **Operating Temperature:** 0° to 50°C derate to 40% at +70°C. **Temperature Coefficient:** $\pm 0.01\%/^{\circ}\text{C}$, typical. **EMI/RFI:** inherently low conducted and radiated noise levels; meet requirements of FCC Class B and VDE 0871 Class B. **Overload Protection:** automatic current limit/foldback. **Safety Specification:** recognized to UL, CSA and TUV.

Switching Power Supplies

LSW200 Series 200 Watt Output Switchmode Power Supplies

Input Specifications

- ▶ Input Voltage: 90-30 or 180-260 VAC (Autorangeing)
- ▶ Input Frequency: 47-440 Hz
- ▶ Input Current: 4.5A (rms) for 115 VAC; 2.6A (rms) for 230 VAC

Output Specifications

- ▶ Total Output Power: 25-200 Watts

Standard Features

- ▶ Autorangeing Universal Input
- ▶ Built-In EMI Filter
- ▶ Short Circuit Protection with Auto Recovery

Power Failure Detection

- ▶ 100% Burn-In at Full Rated Load
- ▶ Quantity Pricing Always Available

The LSW200 Series is comprised of single and multiple output models for 200 watts of continuous output power. The Autorangeing input allows the units to operate from any line voltage throughout the world without a selector strap. All Auxiliary outputs are equipped with magnetic amplifiers or linear regulators for maintaining regulation. The units are constructed on a printed circuit board with a U-bracket for mechanical support and heat sinking.

Notes: 1) Peak current is 12 A on +12, 9 A on +15, and 6 A on +24. 2) Output 1 — single output; Output 4 — floating, they can be connected externally for a positive or negative output. 3) 200 watt requires 350 LFM of moving air, 150 watts for convection (maximum current of Output 1 and 2 to 70%).

SPS "Blue-Line" Series 15 to 350 Watts of DC Power

Standard Features

- ▶ Adjustable Output Voltage
- ▶ Selectable Input 115/230 VAC, 47-440 Hz
- ▶ Temperature Compensated Circuitry
- ▶ Floating Outputs on Most Models
- ▶ UL Recognized
- ▶ Remote Sense on High-Output Current Units
- ▶ Safety Shielding for Logic Level (5 VDC) Single Output Power Supplies
- ▶ Computer-Grade Capacitors
- ▶ 24 Month Warranty
- ▶ Quantity Pricing Always Available

Dual

Optional Features

- ▶ Overvoltage Protection Available

The SPS "Blue-Line" Series offers a total of 17 models to choose from. Single, dual, and triple outputs satisfy virtually any voltage current requirement for your system application. AC input voltage capabilities are 115/230 VAC at 47-440 Hz. (Fan cooled units operate 47-63 Hz only.) The SPS Series is a time proven, durably designed open-frame power supply with industry standard voltages and currents.

High Reliability 250 Watt Switcher

- ▶ MTBF 200,000 Hrs. Calculated Per MIL-217E
- ▶ Meets FCC and VDE Levels A Emission Standards
- ▶ Meets UL 1459 and 1950, CSA 22.2-220, IEC 950, EN60950 Licensed
- ▶ Automatic Input Voltage Range Selection (90-132/180-264)
- ▶ Power Fail/Remote Inhibit
- ▶ All Outputs Floating
- ▶ High Temperature Burn-In
- ▶ 20 Millisecond Minimum Hold-Up Time at Low Line, Full-Load
- ▶ In-rush Current Limiting
- ▶ Remote Sense and Built-In OVP On Main 5 V Output
- ▶ Covers Optional
- ▶ Chassis Dimensions: Multiple Output — 2.5" x 5.0" x 10.5", 3 Lb., 12 Oz.; Single Output — 2.5" x 5.0" x 9.5", 3 Lb., 1 Oz.
- ▶ Quantity Pricing Always Available

¹PDT adjustable 24-28 VDC (shipped with 24 V output). ²Transformer tapped for 24 and 28 VDC Operation (shipped with 24 V output).

"Black-Line" Series Bulk Power DC Supplies

High Reliability — Efficient Bulk Power

- ▶ High Surge-Current Capabilities
- ▶ MTBF to 500,000 Hrs. Per MIL 271E
- ▶ Maximum Efficiency to 90%
- ▶ UL Recognized to UL 478
- ▶ FCC Level B EMI
- ▶ Floating Output
- ▶ Quantity Pricing Always Available

The "Black-Line" Series is a low-cost alternative for many DC power applications where regulation is not needed ... "raw power" without the bells and whistles but retaining high-quality components assures reliable performance in unregulated applications such as powering solenoids, DC motors, relays, lamps, and signal systems.

LSW Series — Low Profile Switchers

- Compact Size
- Universal Input Range: 85 to 264 VAC
- High Efficiency
- Up to Four Outputs
- Input RFI Filter to VDE Standards

- Current Mode, MOSFET Topology
- Overcurrent and Overvoltage Protection Main Output
- 100% Burn-In
- Open PCB Construction
- UL Listed, CSA Certified, TUV Approved

Specifications

AC Input. Input Voltage: 85-264 VAC. **Frequency:** 47-440 Hz. **Current:** LSW30 — 0.8 A at 115 VAC, 0.5 A at 230 VAC; LSW40 — 1.2 A at 115 VAC, 0.7 A at 230 VAC; LSW65 — 1.6 A at 115 VAC, 1.0 A at 230 VAC; LSW110 — 3 A at 115 VAC, 1.8 A at 230 VAC. **Inrush Current:** LSW30, LSW40, LSW110 — 15 A at 115 VAC - cold start, 30 A at 230 VAC - cold start; LSW65 — 30 A at 115 VAC - cold start, 60 A at 230 VAC - cold start. **Leakage Current:** to EN60950. **DC Output. Output Range:** $\pm 5\%$ on main output. **Line Regulation:** $\pm 0.5\%$. **Load Regulation:** 1% single output, 3% main output (50 to 100% load change). **Cross Regulation:** 5% typical. **Ripple and Noise:** 1% peak to peak typical. **Overload Protection:** overload and short circuit protected. **Overvoltage Protection:** 5.6-6.6 V on +5 V. **Minimum Load:** approximately 10% on main output. **Power Failure:** on LSW110 series only. **Efficiency:** 65% min. at full load. **Holdup Time:** LSW30, LSW110 — 12 msec; LSW40, LSW65 — 10 msec. **General. Operating Temperature:** 0° to 50°C. MTBF: 100,000 hours minimum. **RFI Performance:** VDE 0871A (some units to "B"). **Cooling:** some units require forced air for maximum output power.

DC BOSS Power Support System

— NEW —

DCBoss
pss

MADE IN USA

- ▶ NEMA Type 1 Enclosure
- ▶ Wall Mount
- ▶ Fused Output
- ▶ AC/DC Rectifier/Charger
- ▶ Pre-Connected, Maintenance-Free Batteries
- ▶ Security Key Lock
- ▶ GFI, AC Convenience Outlet
- ▶ 220/240 V, 50 Hz and 120 V, 60 Hz Models
- ▶ 1 Amp to 19 Amps
- ▶ 12, 24 or 48 Volt Outputs
- ▶ 1 Hour to 8 Hours Battery Backup
- ▶ Options Available: Audible Alarm and Redundant Charger

The DC BOSS PSS provides DC battery backup for DC meters, instruments and controls. Supporting both domestic (120 VAC) input and international (220/240 VAC) input requirements with 1 amp to 19 amp DC loads.

Used in a wide range of applications such as security systems, detention centers, geophysical, chemical and other processing plants, and hazardous gas detection equipment.

*Model numbers shown are for 120 VAC input applications. Consult factory for 220/240 VAC input, as well as other 12 VDC, 24 VDC and 48 VDC output models.

DC BOSS MICRO Backup Battery System

DCBoss
micro

MADE IN USA

- ▶ NEMA 1 Enclosure
- ▶ Welded Steel Frame
- ▶ Designed to Meet Seismic Zone 4 Rating of 1992 UBC Code
- ▶ Frame Protected by ABS Plastic Battery Trays
- ▶ Base Will Accommodate Pallet Jack

The DC BOSS MICRO system provides a cost effective solution for UPS extended run times.

Designed to meet standard DC bus voltages of most UPS manufacturers, the DC BOSS MICRO power system houses our standard 10-year prorated warranty batteries. Battery systems come complete with battery terminals to connect the UPS for easy, on-site installation.

DC BOSS MINI The Complete Battery System

MADE IN USA

DCBoss
mini

- ▶ NEMA Type 1 Enclosure
- ▶ Pre-Connected Batteries
- ▶ Johnson Controls AGM, Valve Regulated, Sealed, Maintenance-Free Batteries
- ▶ Enclosure Protected by ABS Plastic Battery Trays
- ▶ Fused Output

All steel construction.

Available in 12, 24, 48, 72 and 96 volt models, the DC MINI BOSS is a complete battery system housed in a NEMA 1 enclosure and is a simplified version of the DC Boss for users with smaller VA requirements. It provides back-up battery power with only two connections to be made on-site.

DC mini BOSS Enclosure Information and Outline Dimensions
The enclosure is a NEMA Type 1 steel enclosure with internal fuse.

DCBoss

DC BOSS Flex Power

— NEW —

MADE IN USA

- ▶ 19" or 23" Rack Mount
- ▶ Panel Mount for OEM Use
- ▶ 12, 24 and 48 VDC Models
- ▶ High Power Density
- ▶ Light Weight
- ▶ Surge Protected
- ▶ Ruggedized Design
- ▶ UL Recognized

The DC BOSS FLEX POWER Battery Charger/Rectifier utilizes high frequency switchmode technology. Panel Mount units accept 120 VAC, 50/60 Hz input and 12 V, 24 V or 48 V DC outputs. Rack mount units can accept 120 VAC, 208 VAC or 240 VAC inputs with 24 V or 48 V DC outputs. Battery back-up can be easily added. Smaller units can be panel mounted for OEM internal designs while larger applications are adapted to 19" or 23" rack mounted shelves. Rack mount units are hot swappable.

Suitable for power flow meters, control systems, radio equipment, lab instruments, microwave systems, telephones, communications, modems, gas monitoring instruments, alarms and other security systems.

Single Output High Power Brute Series

Size Chart (Inch/mm)

Model	A	B	C
Brute I	6.75/171.5	11.00/279.4	7.66/194.5
Brute II	6.75/171.5	12.00/304.8	7.66/194.5
Brute III	10.00/254.0	14.00/355.6	11.12/282.6

The Brute series with remote sensing provides well regulated high current DC that is continuously adjustable over either a 2 to 25 or 5 to 50 volt range. They can be set for either constant voltage or constant current operation. Brute can be used as a battery charger. Adjustable damping for inductive loads makes Brute attractive for driving relays, solenoids, and motors. Reliable SCR regulators are used to provide precision regulation ($\pm 0.1\%$) with maximum efficiency (75%). A series inductance and a capacitor filter circuit provide low noise operation over all load and line conditions. **AC Input:** 105-130/210-260 volts AC, 1 phase, 47-63 Hz. **Regulation (Line and Load):** $\pm 0.1\%$ or 50 mV. **Ripple:** 1% or 500 mV rms max. **Overload Protection:** by adjustable current limiting. **Controls:** current limit adjust 0 to 100%; output voltage adjust 10 to 100%.

Class and Type Designations

Cords on this page are UL listed. The type designations of the National Electrical Code are as follows: **SJ** — junior hard-service cord. Rubber insulation, ethylene propylene rubber or other rubber jacket. 300 V. **SJO** — junior hard-service oil-resistant cord. Rubber insulation, PVC jacket or neoprene jacket. 300 V. **SJT** — junior hard-service cord. Polyvinyl chloride insulation and jacket. 300 V. **SPT-1** — all plastic parallel cord. 30 mils polyvinyl chloride insulation/jacket. 300 V. **SV** — rubber insulation, rubber jacket, 300 V. **SVT** — all plastic cord. Polyvinyl chloride insulation/jacket. 300 V.

LPS-100 Series Programmable Power Supplies

LPS-100 series is the newest addition to AMREL's family of high quality power supplies. This series features the tightest line/load regulation in its class, a mere 0.01% +1mV. The very low 0.3 mVrms in our LPS means your circuit is well protected from unwanted overshoot and noise. Furthermore, our LPS-100 series is the best in its class with a temperature coefficient of 200 ppm.

Specifications

Configuration: LPS-101, LPS-102, LPS-103, LPS-106 — Single Output; LPS-104, LPS-105 — Triple Output. **Output Power:** LPS-101 — 30 W; LPS-102 — 60 W; LPS-103 — 90 W; LPS-104 — 80 W; LPS-105 — 200 W; LPS-106 — 60 W. **Voltage:** **Output Voltage:** LPS-101, LPS-102, LPS-103, LPS-104, LPS-105 — 30 V; LPS-106 — 60 V. **Setting Resolution:** 2.5%. **Line/Load Regulation:** 0.01% +1 mV. **Noise (RMS):** 0.3 mV; **Ripple (Peak) (B.W. — 10 Hz - 20 MHz):** 5 mV. **Transient Response:** 50 μ s/<100 mV. **Temperature Coefficient:** 200 ppm. **Current:** **Output Current:** LPS-101, LPS-104, LPS-106 — 1 A; LPS-102 — 2 A; LPS-103, LPS-105 — 3 A. **Setting Resolution:** 2.5%. **Line/Load Regulation:** 0.1% +2 mA. **Noise (RMS):** 2 mA. **Ripple (Peak):** 5 mA. **Temperature Coefficient:** 0.1%. **Fixed Output Voltage (Partial Adjustment):** LPS-101, LPS-102, LPS-103 — N/A; LPS-104, LPS-105, LPS-106 — 3 V - 6.5 V. **Fixed Output Current:** LPS-101, LPS-102, LPS-103 — N/A; LPS-104, LPS-105, LPS-106 — 3 A. **Transient Response:** LPS-101, LPS-102, LPS-103 — N/A; LPS-104, LPS-105, LPS-106 — 50 μ s. **Display:** Analog. **Common Mode Voltage:** +240 Vdc. **Temperature Rating:** 0-40°C. **Relative Humidity:** 29%-90% max. **Dimensions (H x W x D):** LPS-101, LPS-102, LPS-103, LPS-106 — 6 1/2" x 5 1/8" x 13"; LPS-104, LPS-105 — 6 1/2" x 10 1/4" x 13". **Weight:** LPS-101 — 7.5 lbs.; LPS-102, LPS-106 — 8.5 lbs.; LPS-103 — 9 lbs.; LPS-104 — 15 lbs.; LPS-105 — 19 lbs. **Cooling Fan:** Convection. **Warranty:** 3 Years.

Ultra-Low Cost Linear Programmable Power Supplies

User-Friendly with LCD Readouts at Analog Prices

- ▶ Microprocessor Controlled
- ▶ Digital Programming and Readback
- ▶ Keypad Data Entry
- ▶ Power-off Memory
- ▶ Voltage and Current Slew Function
- ▶ Low PARD/Noise and Ripple
- ▶ Superior Line and Load Regulation
- ▶ Output Enable/Disable
- ▶ Three Year Warranty

Each LPS includes many user-friendly features to simplify operations. Power-off memory retains both voltage and current settings and an output enable/disable function allows the user to safely disable the output without changing the voltage or current settings. Status annunciators on the LCD panel are updated continuously to inform the user of the power supply's status at all times. Today's testing demands the latest technology and the highest accuracy. The AMREL LPS series DC power supplies offer the ease of keypad data entry and four digit LCD readout accuracy. Far outclassing analog power supplies and other units in its class, AMREL DC power supplies have no equal for accuracy and ease. All this at analog prices.

Specifications	LPS-301	LPS-302	LPS-303
Configuration	Single Output • Dual Range		Single Output
Output Power	30 Watts	60 Watts	90 Watts
Output Voltage	0 to 15 V (HI) 0 to 30 V (LO)	0 to 15 V (HI) 0 to 30 V (LO)	0 to 30 V
Voltage Accuracy	± (0.2% of reading + 2 digits)		
Setting Resolution	10 mV		
Line Regulation	1 mV		
Load Regulation	2 mV		
Noise (RMS)	1 mV rms

External AC/DC Switching Power Supplies

Standard Features

- ▶ 90-264 VAC Input
- ▶ Efficient typically 72-82%
- ▶ Internal EMI filter to meet VDE and FCC class B emission range
- ▶ 25-48 watts output
- ▶ Complies with UL Class II requirements
- ▶ IEC 320 inlet connector mates with interchangeable cords for worldwide use
- ▶ Output loading may be removed and reapplied without cycling the input power
- ▶ UL, CSA, TUV approved
- ▶ Internally fused

Note: 1. Over 50 additional standard product solutions available with cord and connector combinations from factory on special order. Specific minimum quantity orders and additional lead time may apply. Consult Allied for details.

Connections: Model No. 3. Pinout Code — center contact — positive. Description — Switchcraft 760 plug or equivalent. Suggested Mating — Switchcraft #712A jack. **Model No. 12.** Pinout Code — (1) Com, (2) Gnd, (3) +5V, (4) -12V, (5) +12V. Description — 5-pin DIN 180 ° male connector. Suggested Mating Connector — Various styles of straight or right angle panel or p.c. mounted DIN connectors.

Model No. 21. Pinout Code — Transformer — (1) AC, (2) Gnd, (3) AC, Power Supply — (1) DC, (2) Com, (3) Gnd. Description — 3-pin overmolded Molex connector (Housing 26-03-4030 — Terminals 08-50-0187). Suggested Mating Connector — 0.045 square pin on 0.156 centers (Ref: Molex Series 2220, 5273, 5274).

AC/AC Transformers and AC/DC Battery Chargers

WE POWER INNOVATION.

External AC/AC Transformers

Ault's standard line of wall-plug transformers is UL and CSA approved. Input 120 VAC/60 Hz. Use of an external transformer reduces weight and size of the system being powered. Hazardous voltages within the end product are

eliminated. Safety agency approval costs are minimized. Products are used in data communications, telecommunications, security, and computer applications such as modems, LANs, and security systems. Units are grounded and center tap.

Note: 1. CSA versions available. 2. Over 500 standard product solutions available with cord and connector options from factory on special order items. Specific minimum quantity orders or additional lead time may apply.

External AC/DC Battery Chargers

Ault Battery Chargers Are Suitable for a Wide Variety of Applications Including:

- ▶ Portable Medical Devices. Everything from Blood Analyzers to Electrocardiographs
- ▶ Mobile Telecom Devices. Portable Cellular Telephones to Rechargeable Transceivers
- ▶ Industrial Products. From Portable Lighting to Radio-Controlled Equipment

- ▶ Portable Computers. Laptops, Notebook and Related Peripheral Products
- ▶ Commercial Applications. Mobile Ticket Dispensing to Portable Dictation Equipment
- ▶ Consumer Products. Everything from Cordless Tools to Security Systems

Bright Orange 3-Conductor Extension Cords

Bright orange vinyl reduces risk of accidentally cutting cord. Type 15197 designed for tool benches and other tight areas. Longer lengths recommended for industrial equipment, electric lawnmowers, snowblowers and other outdoor applications with three-conductor power supply cords. All cords UL listed.

*CSA Certified. †Regular SJT cords are UL listed and CSA certified. CSA does not recognize SJT low leakage cords. ‡Belden SJT Type low-leakage 60 Hz power cord reduces the hazards of shock due to current leakage between the two conductors and from the conductors out through the jacket. Maximum leakage at 120 VAC is 7 microamps from each circuit conductor to the grounding conductor, and 15 microamps from each circuit conductor through the cord jacket. Designed for the hospital use and critical medical applications. Helps equipment meet the requirements of UL 554.

Model 1760 Triple Output DC Power Supply

- ▶ Two 0-30 VDC, 2 A Section Capable of Independent, Series or Parallel Operation
- ▶ One 4-6.5 VDC, 5 A Section
- ▶ Switchable Series/Parallel Operation — 30 V Sections
- ▶ Adjustable Current Limit Controls — 30 V Sections
- ▶ Two 3-Digit LED Displays — One Reads Volts or Amps of "B" Supply — One Reads Volts or Amps of "A" Supply or 4 V-6.5 V Supply
- ▶ Unique Variable Tracking, 8 Track A at 5% to 100%

— NEW —

731-1760. Model 1760 EACH 649.00

Model 1651 Compact Triple Output DC Power Supply

- ▶ Two 0 to 24 VDC Outputs (0.5 A)
- ▶ One Fixed 5 V Output (4 A)
- ▶ Independent or Tracking Operation
- ▶ Adjustable Current Limiting
- ▶ Designed to Operate Continuously at Rated Output
- ▶ Short Circuit Protection, Overload Protection, Reverse Polarity Protection
- ▶ Connect Outputs in Series for Higher Voltage Output or in Parallel for Higher Current Output (Switch Selectable)

731-1651. Model 1651 EACH 429.00

Models 1686/1688 High Current DC Power Supplies

- ▶ 3 to 14 Volts DC Output
- ▶ 25 Amps Typical at 13.8 V, Model 1688
- ▶ 12 Amps Typical at 13.8 V, Model 1686
- ▶ Current Limiting Overload Protection
- ▶ Over Voltage Protection
- ▶ Short Circuit Protection
- ▶ Reverse Polarity Protection
- ▶ Thermostatically Controlled Cooling Fan
- ▶ Thermal Protection (Model 1688)
- ▶ Operates Continuously at Full Load Without Overheating
- ▶ Connect Two in Parallel for More Current
- ▶ Connect Two in Series for Higher Voltage

731-1688. Model 1688 EACH 299.00
731-1686. Model 1686 EACH 199.00

Model 1655 Isolated — Variable AC Power Supply

- ▶ Power Line Leakage Tester
- ▶ Variable-Isolated Output — 0-150 VAC
- ▶ 3 A Continuous, 4 A Intermittent Output
- ▶ Built-In Solid State Soldering Iron Temperature Control
- ▶ Expanded Leakage Scale
- ▶ Circuit Breaker Overload Protection
- ▶ Display Volts, Amps, VA, Leakage

731-1655. Model 1655 EACH 499.00

Model 1653 — NEW — Isolated — Variable AC Power Supply

- ▶ Variable Isolated 0-150 VAC, 2 A Continuous Output
- ▶ Displays Voltage or Current Readings
- ▶ Isolation Transformer to Eliminate Shock Hazard While Servicing "Hot Chassis" Equipment
- ▶ Compact, Rugged

731-1653. Model 1653 EACH 319.00

Model TR-110 Dual Output Isolation

- ▶ Direct and Isolated Outputs
- ▶ UL Listed

— NEW —

Specifications. Input Requirements: 105-130 VAC, 60 Hz. Output Power Rating. Direct: 500 VA continuous. Isolated: 350 VA continuous, 500 VA intermittent. Connections. Direct: Duplex outlet (3-conductor). Isolated: Duplex outlet (3-conductor). Selection. Direct: Convenience duplex outlet provides line voltage for auxiliary equipment up to 500 VA. Isolated: Two 3-position slide switches provide 9 combinations of voltage selection from 90 to 140 volts, up to 350 VA continuous or 500 VA intermittent. Self-contained power switch with pilot lamp. General Specifications. Regulation: No load to full load (350 VA), voltage change <4%. Isolation: Complies with UL standard 1012, May 1977. Dimensions (H x W x D): 14 x 13 x 20 cm (5 1/2 x 5 1/8 x 8"). Weight: 5 kg (11 lbs.).

731-0110. Model TR-110 EACH 219.00

Model 1604 Isolation Transformer

— NEW —

- ▶ For Safe Testing of Transformerless Equipment

Specifications. Isolation: Leakage less than 0.1 mA. Output Voltage: 117-124 V nominal (120 V input). Output Current: 1.25 A continuous (2 A intermittent). Power Requirements: 120 VAC, 60 Hz, 175 W. Operating Temperature: 0°C to +40°C. Dimensions (H x W x D): 10 x 10 x 14 cm (4 x 4 x 5 1/4"). Weight: 2.7 kg (6 lbs.).

731-1604. Model 1604 EACH 114.00

DC Power Supplies

— NEW —

- ▶ Fully Overload Protected
- ▶ New Compact Style
- ▶ Coarse and Fine Voltage Controls
- ▶ Operate Continuously at Full Load without Overheating
- ▶ Constant Voltage or Constant Current Operation
- ▶ Continuously Monitor Voltage and Current Output on Two Meters
- ▶ Biggest Selection of Voltage and Current Ratings Ever Offered
- ▶ Connect Two Supplies in Parallel to Double the Current Output
- ▶ Connect Two Supplies in Series to Double the Voltage Output
- ▶ Overload Protection: Current, Limiting, Reverse Polarity, Overvoltage, Short Circuit
- ▶ Power Requirements: 120 VAC $\pm$ 10%, 60 Hz Only (120/220/230/240 VAC $\pm$ 10%, 50/60 Hz Version Available)
- ▶ Operating Temperature: 0° to 40°C, <75% R.H.
- ▶ Storage Temperature: -15° to +70°C, <85% R.H.
- ▶ Reliable, Durable
- ▶ Excellent Regulation
- ▶ Very Low Ripple
- ▶ Made in USA

International II Linears

- ▶ UL1950 Approved without D3 Deviation
- ▶ World-Wide AC Input Ranges
- ▶ World-Wide Safety Standards
- ▶ Industry Standard Packages
- ▶ VDE/IEC Transformer Construction
- ▶ TUV Approved, IEC 950
- ▶ CSA Approved, 22.2, 234
- ▶ 2-Hour Burn-In with Cycling
- ▶ 3 Year Warranty
- ▶ Capacitors Have Highest C/V and Ripple Current Ratings in Industry
- ▶ Anti-Latchup Circuit on Duals and Triples
- ▶ MTBF of Over 200,000 Hours per MIL Handbook 217D on Most Units

Specifications: AC Input: 100/120/220/240 VAC +10%, -13%. 47-63 Hz. Tolerance for 230 VAC operation is +15%, -10%. Derate output current 10% for 50 Hz operation. **DC Output:** See charts. **Adjustment Range:** ±5% minimum. **Line Regulation:** ±0.5% for a 10% change. **Load Regulation:** ±0.5% for a 50% load change. **Output Ripple:** 2 to 15 V unit — 5.0 mV PK-PK maximum; 20 to 200 V unit — .02% PK-PK maximum. **Transient Response:** 50 microseconds for 50% load change. **Short Circuit and Overload Protection:** Automatic current limit/foldback. **Overvoltage Protection:** Built-in on 5 V models, set at 6.2 V ± .4 V. Other models use optional overvoltage protection. **Remote Sensing:** On all models 3 Amps and above; open sense lead protection built-in. **Stability:** ±0.5% for 24 hours after warm up. **Temperature Rating:** 0°C to 50°C, full rated, derated linearly to 40% at 70°C. **Temperature Coefficient:** ±0.1%/°C maximum. **Efficiency:** 5 V units — 45%; 12 V and 15 V units — 55%; 20 V and 24 V units — 60%. **Vibration:** Per MIL-STD-810B, Method 514, Procedure 1, curve AB (to 50 Hz). **Shock:** Per MIL-STD-810B, Method 516, Procedure V.

OverVoltage Protection Modules

Optional OVP modules are available to protect your load from an overvoltage condition. These modules are adjustable from 6.2V to 34 VDC and mount directly on your power supply chassis. The OVP-12 is available for outputs which will not exceed 12 Amps and for loads up to 30 Amps. One OVP-12 protects both outputs on the dual output ±12 VDC and the ±15 VDC power supplies. Note that models with factory built OVP are indicated in the table above.

World Class Medical Switchers

CONDOR'S international medical multi-output switchers – approved to UL 544/IEC 601/CSA 22.2, 234. CONDOR'S medical switchers are designed to meet full international specifications, as well as European EMI specifications.

- **Features**
- 17 Models, 5 Power Levels, 30 to 110 Watts
- Multi-Output (Up to 5 Outputs)
- AC Input: 90-132 VAC/180-264 VAC, 47-63 Hz
- Designed to Meet the Toughest Domestic and International Medical Safety Specifications
- Proprietary Low Leakage – High Attenuation EMI Filter (Patent Pending)
- Less Than 30µA Leakage Current
- Meets Stringent FCC and VDE 0871 Class B EMI Specs
- Power Fail Available on 110-Watt Units
- Versatile Output Configurations for Wide Variety of Applications
- Industry Standard Packages
- 24-Hour Full Load Burn-In and 2-Year Warranty
- Covers Available for All Units

World Class Medical Linears

CONDOR'S international medical linears, approved to meet UL 544/IEC 601/CSA 22.2, 234. CONDOR'S medical linear power supplies offer innovative yet cost-effective design solutions for both high- and low volume users.

- **Features**
- 34 Models (Single, Dual and Triple Output)
- 3 Power Levels (5 to 92Watts)
- AC Input: 110/120/220/240 VAC, 47-63 Hz
- OVP On All 5V Outputs
- Meets EMI Per FCC/VDE B
- Hermetically Sealed Power Transistors and ICs
- MTFB 200,000+ Hours Per Mil Handbook 217D
- 8-Hour Burn-in With Cycling
- Full 3-Year Warranty

SDM/SDS International Specifications

SAFETY SPECIFICATIONS: SDM and SDS Series Safety Design Parameters. **Safety Spacings:** Primary to secondary circuitry 8.0 MM; primary to ground circuitry 4.0MM; Secondary to ground circuitry 4.0MM. **Leakage Current:** input to ground 0.5 MA RMS. **Dielectric Withstanding Voltage:** Input to output 4000VAC RMS; output to ground 500VAC RMS. These safety design parameters meet or exceed the requirements of the following international safety specifications: IEC 435, Class 1 and 2; VDE 0730 Part 2P, Class 1 and 2; VDE 0806, Class 1 and 2; UL 478; UL 1012; BPO STD #26; CEE-10 Part 2, Class 1 and 2; CSA 22.2, No's 143 and 154; ECMA-57, Class 1 and 2; and IEC 380, Class 1 and 2.

EMI Specifications: SMD and SDS Series EMI Design Parameters. All Condor International Series Switching Supplies are designed with built-in EMI filters on the output line to reduce conducted emissions to the following maximum levels: 150 KHz to 450 KHz, 54 DB V; 450 KHz to 30 MHz, 48 DB V. These EMI design parameters meet or exceed the requirements of the following EMI specifications down to 150 KHz, FCC 20870, Class A and B (V Series Class A only); VDE 0871, Class A and B. The level B specifications are the most stringent in the industry.

A-suffix models with quasi-regulated secondary outputs for high peak current capability are ideal for powering multiple floppy disk and Winchester systems. B-suffix units have tightly regulated secondary outputs—perfect for applications such as video display units and other linear applications. Versatility is unsurpassed on several models, since their isolated +12V can be stacked with their existing +12V to provide 24V. For very high +12V peak loading applications, the floating 12V can be paralleled with the dedicated +12V on several models.

PAC Series: Encloses Switching Power Supplies

- FCC Class B and VDE 0871 Class B Conducted and Radiated EMI Filtering ► VDE, IEC, U.L. and CSA Approved
 ► Worldwide AC Input Ranges 90-132/180-264VAC with Auto-Switchover - No taps or Switches

These fully enclosed switching power supplies have a safe, ultra-compact design. Their extremely versatile output configurations are made for your tough and varied applications. The IEC AC output connector and VDE approved On/Off switch mean that no additional AC system wiring is required. Other features include an internal fan for full system cooling, high peak current disk drive outputs (as well as 3 terminal type closely regulated outputs), full load burn-in and a 2-year warranty. Plus, with the PAC Series, agency approvals are very easy since all critical parameters are controlled within the supply. There is an additional remote turn-on for add-on applications such as hard disk sub-systems. AC power line signal is provided on 150 and 185 watt units. **Dimensions.** 85/105 Models: 5.75 x 3.70 x 4.20; 2.1 lbs. 150/185 Models: 10.00 x 4.00 x 4.10; 3.0 lbs. **Specifications.** AC Input: 90-132/180-264VAC with fully automated switch-over (no switches or taps required), 47-63 Hz, single phase. Input connections are made through standard IEC320/CEE-22 international type input connector. **AC Switch:** The input AC is controlled by a standard VDE approved DPST rocker switch. In addition, a remote turn-on option is available which allows the unit to be switched on by the application of a +5V logic signal. It is particularly useful for add-on systems (hard disks, etc.) where the remote turn-on line is simply connected to the +5V of the main computer.

*Isolated. †Not Used.

SDM45/SDS45
SDM80/SDS80

SDM110/SDS110

Notes

- A.** Full regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of +5.0V is ±1.0%.
- B.** Dual sensed reg. output. +5V and +12V outputs (") are sensed in combination to provide tighter reg. of +12V output. Additional cross reg. factor +2.0% must be added in applications where the main +5V output varies ±25%. Initial setting of +5V output is ±1.0%.
- C.** Fully regulated output utilizing fixed 3-terminal regulator.
- D.** Quasi-regulated output requires 20% min. load to meet regulation specs. Additional cross regulation factor of +3% must be added in applications where the main +5V output varies 25%.
- E.** Fully isolated output. May be connected in series with any output, and may be connected for 3 output. May be paralleled with the same output voltage and reg type. (Quasi-Reg and 3-pin outputs will not share loads if connected together).
- F.** The total current for +5V and +12V outputs must not exceed 10A (14A PK).
- G.** The total current for +5V and +12V outputs must not exceed 13A (17A PK).
- H.** The total current for +5V and +12V outputs must not exceed 15A (20A PK).
- J.** The total current for +5V and +12V outputs must not exceed 20A (28A PK).

PAC 150/185

Notes:

- A:** Full regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of +5.0V is ±1.0%.
- B.** Quasi-Regulated output requires 20% minimum load to regulation specs. An additional cross regulation factor of ±3.0% must be added in those applications where the main +5V output varies ±25%.
- C:** Fully regulated output utilizing fixed, 3 terminal regulator.
- D:** Fully isolated output. May be connected in series with other outputs for higher voltage applications. May be connected in parallel with another output if both outputs are the same voltage and quasi-regulated.

Options:

- 1.** Mating AMP output connectors with pins are available.
Model 18-30234-0013. For PAC 85 and PAC 105.
744-0002.....EACH 7.28
Model 18-30234-0016. For PAC 150 and PAC 185 (these power supplies require 2 output connector kits).
744-0003.....EACH 10.40
- 2.** A mating IEC 320/CEE-22 type AC input plug and cord set is available. This 6 ft. cord set comes with a standard 3-prong ground plug.
744-0004. Model 20-30793-0001.....EACH 6.24
- 3.** Remote turn-on: This remote turn-on option allows the unit to be switched on by the application of a +5VDC logic signal. 'ON' = 2.4 to 5.5VDC @ 25mA (5V). 'OFF' = 0 to 0.8VDC. This feature is particularly useful in add-on disk systems where the remote turn-on line is simply connected to the +5V of the main computer. Add suffix 'R' to the mfr.'s part number for this non-stock

2" x 4", 40 W, Single Output

General Specifications. **AC Input:** 85-264 VAC, 47-63 Hz single phase. **Input Current:** Maximum input current at minimum 120 VAC, 60 Hz with full rated output load not to exceed 1.3 A. **Output Noise:** 0.5% RMS, 1.5% PK-PK, 20 MHz bandwidth, differential mode. Measured with noise probe directly across output terminals of the power supply. **Reverse Voltage Protection:** All outputs protected against inadvertent application of reverse voltage up to 1 times rated current of the reversed output. **Overload Protection:** Factory set to power limiting at 55 W $\pm$ 6 W. **Efficiency:** 70% minimum at full rated load, nominal input voltage. **Input Protection:** Fuse to be provided by customer. **Inrush Current:** Inrush is limited by internal thermistors. The inrush at 240 VAC, averaged over the first AC half-cycle under cold start conditions, will not exceed 37 A. **Overvoltage Protection:** A latching overvoltage protection provided.

*GPM = Medical. GPC = Commercial. Replace X in Stock No. with 1 for medical, 2 for commercial.

20 W. Wide Range

General Specifications. AC Input: 90-264 VAC, 47-63 Hz single phase. **Input Current:** Maximum input current at minimum 120 VAC, 60 Hz with full rated output load is .65 A. **DC Outputs. Hold-Up Time:** 15 mSec minimum from loss of AC input at full load, nominal line (115 VAC). **Output Power:** Normal continuous output power is 20 W, 24 W peak for 60 seconds max. duration. Factory set to begin limiting at 28 W. **Output Regulation:** Regulation measured by $\pm 40\%$ load change from 60% rated load with all other outputs at 60% full rated load and a line voltage change from low line to high line. Initial set tolerance is measured with all outputs at 60% of full rated load. **Overload Protection:** Fully protected against short circuit and output overload. Short circuit protection is cycling type power limit. **No Load Turn-On/Standby:** No degradation of reliability will occur however regulation could be affected. **Output Noise:** 0.5% RMS, 1" PK-PK, 20 MHz bandwidth, differential mode. Measured using a 12" twisted pair harness with 47 μ F capacitance at terminating end. Fundamental switching frequency ripple and noise may be substantially improved by placing a 100 μ F low ESR capacitor at load. **Transient Response:** 750 μ Sec. typical response time for return to within 0.5% of final value for a 50% load step change, $Di/Dt < 0.2$ A/ μ Sec. Maximum voltage deviation is 3.5%. **Overvoltage Protection:** Built in with firing point set per table below. OVP firing reduces output voltage to less than 75% of nominal voltage in 50 msec.

Output V	Trip Point
5 V	6.2 V ± 0.6
12 V	14.0 V ± 1.0
15 V	19.0 V ± 1.5
24 V	28.0 V ± 2.0
28 V	34.0 V ± 2.8

Voltage Adjustment: Factory set with fixed resistors to maximize reliability. **Efficiency:** 72% minimum for 5 V model and improves as output voltage increases. **Overshoot:** Less than 3% overshoot at turn-on under nominal conditions, inversely proportional to input voltage and temperature. Less than 2% overshoot at turn-off under all conditions. **Turn-On Time:** Less than 1 second at 110 VAC, 25°C (inversely proportionate to input voltage and thermistor temperature). **Input Protection:** 2 internal AC fuses provided on all Medical units. 1 internal AC fuse provided on all Commercial units. Designed to blow only if a catastrophic failure occurs in the unit — Fuses do not blow on overload or short circuit. **Inrush Current:** Inrush is limited by internal thermistors. The inrush at 240 VAC, averaged over the first AC half-cycle under cold start conditions will not exceed 25 A. **Temperature Coefficient:** 0.03%/°C typical on all outputs. **Temperature Range:** 0 to 50°C at full rated output power. See Operating Temperature Table for additional details on each model. For operation in a confined space, moving air may be required. Under all conditions, the cooling vs. load profile should be such that heatsinks and/or chassis temperatures do not exceed 95°C for extended periods. **Storage:** -40 to -85°C. Units should be allowed to warm-up under non-condensing conditions before application of power. **Altitude:** -500 to 10000'. **EMI Compliance:** All models include built-in EMI filtering to meet or exceed the emissions requirements of FCC Class B, CISPR 11-Class B, CISPR 11-Class B, and VDE 0871 Class B to 150 kHz. Typical margins -3 dB at all frequencies and line/load conditions. **Safety:** All GSC models are approved to UL 1950 (with no D3 deviations), CSA22.2 No. 23, Level 3, IEC950, EN60950 and VDE 0805 (contact factory for approval status). Leakage current not to exceed 300 µA. All GSM models are approved to UL 2601, CSA C22.2 No. 234 Level 3 and CSA C22.2 601.1, IEC601-1, EN60601-1 (contact factory for approval status). Leakage current not to exceed 30 µA. **Packaging:** Units are shipped in 50 piece multiples, a 50 piece minimum order is required. **Shock and Vibration:** All models are designed to meet MIL-STD 810E, Method 514.4 Category I. This test consists of random vibration at 0.015 g²/Hz from 5 to 50 Hz, declining linearly to 0.0015 g²/Hz at 500 Hz in each axis for 1 Hr. All models designed to meet MIL-STD 810E, Method 516.4. Unpackaged units shall meet the bench handling requirements of Procedure VI for 4 drops per face.

INPUT 4 PIN .1 centers Molex 22-035045	Pin 1 AC Line
	Pin 4 AC Neu
OUTPUT 4 PIN .1 centers Molex 22-035045	Pin 1,2 RTN
	Pin 3,4 OUT

Connector Mates Molex TYPE 50-375043

Packaged units shall meet the requirements of Procedure IV for transit/shipping drops comprised of 4 drops on each face of the standard container from 30" onto a plywood base. Unless otherwise noted, all parameters are measured at 115 VAC @ 25°C and represent the nominal values. For limits at unusual operating conditions, consult factory.

*GSM = Medical. GSC = Commercial. Replace X in Stock No. with 1 for medical, 2 for commercial.

Switching Power Supplies

Global Performance switching power supplies with the agency approvals you need. **Features:** Wide range input (85-264V) and are approved to UL1950, IEC950, VDE0805, CSA, FCC and VDE Class B for EMI. All models also are available in medical configurations, approved to UL 544 and IEC 601. **Input Protection:** Internal A.C. fuse provided on all units. This fuse only blows if a catastrophic failure occurs in the unit — it does not blow on overload or short circuit. A.C. input protected against line transients by metal oxide varistors on all medical units. **Output Noise and Ripple:** 0.5% RMS, 1% PK-PK maximum on all outputs. **Overload Protection:** Fully protected against short circuit and output overload on all outputs. Short circuit protection is cycling type on most outputs; foldback on outputs with 3 terminals regulator post regulation. Overload protection recovery after removal of fault is automatic. **Temperature Coefficient:** 0.03% per degree C typical for all outputs. All medical models are built-to-order, non-cancelable, non-returnable.

Fully protected against short circuit and output overload on all outputs. Short circuit protection is cycling type on most outputs; foldback on outputs with 3-terminal regulator post regulation. Overload protection recovery after removal of fault is automatic. **Minimum Load:** Turn-On/Standby. No minimum load required for proper operation. **Normal Operation:** Output #1 and/or #2 combined load current must meet the minimums listed below for proper regulation as other outputs are loaded (GPX55 1.0A GP × 130 2.0A/GPX80 1.0A Single output — Not Required). **Transient Response:** +5V main output — 500 mS typical response time for a 50 to 100% or 100 to 50% load change; maximum voltage deviation — 3.5%. **Voltage Adjustment:** Built-in potentiometer adjusts voltage from 4.5V to OVP trip point (6.2V nominal) on the +5V output. A separate potentiometer adjusts output #2 ±5% minimum. **Reverse Voltage Protection:** All outputs protected against inadvertent application of reverse voltage up to 1 times the rated current of the reversed output. **Temperature Rating:** 0 to 50°C at full rated output power with natural convection cooling in a non-restricted environment. For operation in a confined space, moving air may be required. For operation above 50°C, it is important that the cooling vs. load profile is such that the heatsinks do not operate above 90°C for extended periods. **EMI Specifications:** All models include built-in EMI filters to meet or exceed the conducted emissions requirements of FCC 20870 Class B and VDE 0871 Class B. **Safety Specifications:** All commercial models are designed to meet UL 1950, CSA 1402C Level 3, IEC 950, VDE EN60950 and VDE 0750. All medical models are approved to UL 544 and IEC 601-1. All commercial models are approved to UL 1950 without D3 deviation, CSA 22.2.234, IEC 950, VDE EN60950 and VDE0750.

GP Models

AC Input: 85-264 VAC, 47-63 Hz single phase. **DC Outputs:** See output rating chart. **Hold-up Time:** 20 mS minimum at full load and nominal line (115 VAC). **Overload Protection:**

*Replace X in Stock No. as follows: 7 = Commercial version for data processing, control, etc., applications; 8 = Medical version. †Optional 5th output up to 2 amps @ ±5, 12 or 15V; consult factory. ‡Not available in Medical. For optional enclosure information, consult factory. **26 CFM forced air cooling required.

350 W Switching Power Supplies — Rainbow Series

- Automatic Line Range Selection
- Fully Regulated and Floating Outputs
- 5.00" × 9.50" × 2.50"
- Modular Output Configurations
- 2 Year Warranty
- FCC/VDE Level B

- Commercial and Medical Safety Approvals
- AC Power Fail Signal
- Remote Inhibit
- Optional Fan/Cover Package
- "SMART LOAD" Eliminates Minimum Load Requirements

Electrical Specifications — Input

- RSx = 90-135 and 180-264 VAC
- AC Frequency Range: 47-63 Hz
- Conducted Emissions: FCC/VDE Class B
- Input Current: 8/4 A
- Inrush Current: 40 A Max.

Electrical Specifications — Safety Agencies

- Commercial Units: UL 1950 (No D3 Deviations), IEC950, CSA 22.2 No. 234, EN60950
- Medical Units: UL 544, IEC601-1, CSA 22.2 No. 601.1 for Patient Vicinity (Non-Invasive) Applications, Consult Allied for Approval Status

Electrical Specifications — Output

- Adjustment Range: $\pm 5\%$
- Power: 350 W with 12 CFM (390 W peak)
- Minimum Load: "SMART LOAD" Eliminates Minimum Load Requirement
- Output Noise: 0.5% RMS, 1% pk-pk
- Line Regulation: $\pm 0.2\%$ All Outputs
- Total Regulation: Main — $\pm 1\%$; Aux. — $\pm 2\%$
- Remote Sense: Standard on Main Output
- Hold-Up Time: 20 mSec
- Overcurrent Protection: Automatic Recovery, Set at 415 W
- Efficiency: 74% Minimum at Full Load
- Overvoltage Protection: Included on All Outputs

Electrical Specifications — Environmental

- Operating Temperature: 0-50°C
- Storage Temperature: -40-85°C
- Thermal Shutdown: Automatic

Output Configurations

- "A" Auxiliary Output Adjusts From 4.7 to 5.3 VDC
- "B" Auxiliary Output Adjusts From 11.5 to 15.5 VDC
- "C" Same as "B"; Factory Set at 15 VDC
- "D" Auxiliary Output Adjusts From 23 to 29 VDC
- Specifications Subject to Change

40 W Wide-Input, GLC Series

- AC Input: 90-264 VAC, 47-63 Hz Single Phase
- Input Current: Maximum Input Current at Minimum 120 VAC, 60 Hz with Full Rated Output Load Is 1.3 A
- Hold-Up Time: 20 mSec Minimum from Loss of AC Input At Full Load, Nominal Line (115 VAC)
- Output Power: 40 W
- Output Regulation: Regulation Measured by $\pm 40\%$ Load Change from 60% Rated Load with All Other Outputs at 60% Full Rated Load and a Line Voltage Change from Low Line to High Line. Initial Set Tolerance Is Measured with All Outputs at 60% of Full Rated Load
- Overload Protection: Fully Protected Against Short Circuit and Output Overload; Short Circuit Protection Is Cycling Type Power Limit on Output #1 and #2; Foldback Type on Output #3; Factory Set to Begin Power Limiting at 55 W
- No Load Turn-On/Standby: No Degradation of Reliability Will Occur However Regulation Will Be Affected
- Output Noise: 0.5% RMS, 1% Pk-Pk, 20 MHz Bandwidth, Differential Mode; Measured with Scope Probe Directly Across Output Terminals of the Power Supply with Load Terminated with 0.1 μ F Capacitor
- Transient Response: Main Output — 500 μ Sec Typical Response Time for Return to Within 0.5% of Final Value for a 50% Load Step Change, Di/Dt < 0.2 A/ μ Sec; Maximum Voltage Deviation Is 3.5%

- Overvoltage Protection: Built In On +5 V Output with Firing Point Set at 6.2 V ± 0.6 V; OVP Firing Reduces +5 V and Output #2 to Less Than 50% of Nominal Voltage in 50 mSec
- Voltage Adjustment: Factory Set on Standard Unit; However, Optional Potentiometer Adjusts Voltage from 4.7 V to OVP Point (6.2 V Nominal) on the +5 V Output; Note: Output #1 Must Not Be More Than 1% Below Nominal to Achieve Full Output Voltage Range on Output #2; Output Regulation Limits in Some Models May Be Exceeded When the Main Output Is Adjusted Beyond $\pm 1\%$ of Nominal Voltage; High Voltage Settings May Degrade the Reliability of the Unit Due to Excessive Power Dissipation in Some Outputs, Consult Factory for Application Assistance
- Efficiency: 65% Minimum at Full Rated Load, Nominal Input Voltage, Depending on Model and Load Distribution
- Overshoot: Less Than 3% Overshoot at Turn-On Under Nominal Conditions, Inversely Proportional to Input Voltage and Temperature; Less Than 2% Overshoot at Turn-Off Under All Conditions
- Turn-On Time: Less Than 1 Second at 110 VAC, 25°C (Inversely Proportionate to Input Voltage and Thermistor Temperature)
- Input Protection: Internal AC Fuse Provided on All Units; Designed to Blow Only if a Catastrophic Failure Occurs in the Unit; Fuse Does Not Blow on Overload or Short Circuit
- Inrush Current: Inrush Is Limited by Internal Thermistors; The Inrush at 240 VAC, Averaged Over the First AC Half-Cycle Under Cold Start Conditions Will Not Exceed 37 A
- Storage: -40 to +85°C; Units Should Be Allowed to Warm-Up Under Non-Condensing Conditions Before Application of Power

- Temperature Coefficient: 0.03%/°C Typical On All Outputs
- Temperature Range: 0 to 50°C at Full Rated Output Power for 40; For Operation in a Confined Space, Moving Air May Be Required; Under All Conditions, the Cooling Vs. Load Profile Should Be Such that Heatsinks and/or Chassis Temperatures Do Not Exceed 90°C for Extended Periods
- Altitude: -500 to 10,000 Feet
- EMI Compliance: All Models Include Built-In EMI Filtering to Meet or Exceed the Emissions Requirements of FCC Class B, CISPR 11-Class A and VDE 0871 Class A to 10 kHz; Typical Margins > 3 dB at all Frequencies and Line/Load Conditions
- Safety: All GLC Models Are Approved to UL 1950 (With No D3 Deviations), CSA 22.2 No. 234 Level 3, IEC950, EN60950 and VDE 0805 (Consult Allied for Approval Status)
- Shock and Vibration: All Models Are Designed to Meet MIL-STD 810E, Method 514.4 Category I; This Test Consists of Random Vibration at 0.015g²/Hz at 500 Hz from 5 to 50 Hz Declining Linearly to 0.0015g²/Hz at 500 Hz in Each Axis for One Hour; All Models Designed to Meet MIL-STD 810E, Method 516.4; Unpackaged Units Shall Meet the Bench Handling Requirements of Procedure VI for Four Drops Per Face; Packaged Units Shall Meet the Requirements of Procedure IV for Transit/Shipping Drops Comprised of Four Drops on Each Face of the Standard Container from 30 inches onto a Plywood Base
- Packaging: Each Unit Individually Wrapped in Anti-Static Bag
- Unless Otherwise Noted, All Parameters Are Measured at 115 VAC at 25°C and Represent the Nominal Values; Consult Allied for Limits at Unusual Operating Conditions

Value Line Switching Power Supplies

These VDE, IEC, UL and CSA approved switching power supplies feature full load burn-in and a 2-year warranty. V-Series types have high peak current disk drive outputs, as well as 3 terminal type closely regulated outputs. An internal AC fuse is provided on all units for input protection. All outputs are protected against the Class A conducted EMI filtering.

SPECIFICATIONS. AC Input: 90-132/180-264VAC user selectable, 47-63 Hz single phase. **Overload Protection:** Fully protected against output overload and short circuit. Automatic recovery after removal of fault. **Reverse Voltage Protection:** All outputs protected against inadvertent application of reverse voltage. **Input Protection:** Internal AC fuse provided on all units. **Current Limit Adjustment:** Built in potentiometer factory set to begin current limiting at the following peak power output minimum under nominal line conditions. **Efficiency:** 70% $\pm$ 5% depending on model and load distribution. Measured at 100% of rated power. **Over voltage Protection:** Built in on+5V outputs with firing point set at 6.2V $\pm$ 0.6V. **Output Noise and Ripple:** 0.5% rms, 1.5% p-p maximum on all outputs.

*Ratings of these negative outputs assume that other negative output is at no load. Total combined loading cannot exceed 100%; that is, if one negative output was running at 70% of rated load, then the other negative output cannot exceed 30% of rated load.

Notes:

A: Fully regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of +5.0V is $\pm$ 1.0%.

B: Quasi-Regulated output requires 20% minimum load to meet regulation specs. An additional cross-regulation factor of $\pm$ 3% must be added in those applications where the main +5V output varies $\pm$ 25%.

C: Fully regulated output utilizing fixed, 3-terminal regulator.

D: Fully isolated output. May be connected in series with any output, and may be connected for (-) or (+) output. May be paralleled when same output voltage and reg. type. (Quasi-Reg. and 3-pin outputs will not share loads if connected together.)

E: Dual-sensed, regulated output. +5V and +12V outputs are sensed in combination to provide tighter regulation of the +12V output. An additional cross-regulation factor of $\pm$ 2.0% must be added in those applications where the +5V output varies $\pm$ 25%. Initial setting of +5V output is $\pm$ 1.0%.

MATING CONNECTOR WITH PINS

For Value Line Switching power supplies, Series VFA, VHA, VKA only.

*Output pins can be connected in series to make a 24 V output or 30 V output.

DC-DC Converters: Designed for Small Size and High Reliability

- Overcurrent, Overvoltage Protection
- Aluminum Die-Cast Housing Allows for Low EMI Noise
- Power Inhibit Control
- Output Voltage can be Controlled by Additional External Circuits
- With Dual Outputs, Connected in Series, Single 24 V and 30 V Are Possible

Single Output

LCA Series: Designed for Low Cost, Small Size and High Reliability

- ▶ Input AC 85-132 V
- ▶ Overcurrent, Overvoltage Protection
- ▶ PC Board Open Frame Construction
- ▶ Noise Regulation: Complies with FCC-B, VCC1-2

- ▶ Two Year Warranty
- ▶ Quantity Pricing Always Available
- ▶ UL Recognized, CSA Certified

LDA Series: World-Wide Input, Single Output

- ▶ Low Cost
- ▶ Small, Lightweight Open Frame PC Board Type
- ▶ Universal Input (85 ~ 264 VAC)
- ▶ Inrush Current, Overcurrent, and Overvoltage Protection Circuits
- ▶ Noise Regulation: Complies with FCC-B, VCCI-2, and Vlg 243/91
- ▶ UL Approved, CSA, TÜV
- ▶ 2 Year Warranty
- ▶ Quantity Pricing Always Available

LDC Series: World-Wide Input, Triple Output

- ▶ Cost Effective
- ▶ Small, Lightweight Open Frame PC Board Type
- ▶ Universal Input (85 ~ 264 VAC)
- ▶ UL, CSA, TÜV
- ▶ Inrush Current, Overcurrent, and Overvoltage Protection Circuits
- ▶ V1 Isolated from V2, V3
- ▶ 2 Year Warranty
- ▶ Quantity Pricing Always Available

AC/DC Switching Power Supplies

COSEL U.S.A. inc.

Single Output Switchers: 10 to 150 Watts

- ▶ Two and three year warranty
- ▶ Protective cover
- ▶ UL and TUV approved, CSA Certified
- ▶ Small size
- ▶ Adjustable output voltage range: $\pm 10\%$

Wallmount Features

- ▶ Single and Multiple Output
- ▶ 4 Watts to 22 Watts
- ▶ UL 1950 Listed — CSA Certified 22.2 No. 220
- ▶ One Year Warranty

Specifications. Input Voltage: 120 VAC, 60 Hz. Output Ripple: 20 millivolts (p-p). Operating Temperature: 0°C to 40°C. Combined Regulation: ±5%. Fusing: Internal, non-replaceable. Thermal Current Limited. Dielectric Withstand Voltage: 1500 VAC, RMS. Options. Connectors. Shielded Output Cable — S Option: Shielded cable with EMI ground tied to outer ring of DIN connector (not to be used as safety ground).

Tabletop Features

- ▶ Single and Multiple Output
- ▶ 4 Watts to 22 Watts
- ▶ UL 1950 Listed — CSA Certified 22.2 No. 220

MIADA II Series

Designed Primarily for the Portable Systems Market

- Specially Designed Case
- Foldable AC Input Plug
- Approved to UL and CSA Requirements
- Meet Class B Emission Standards
- 12-24 Volt DC, 25-35 Watt Range
- Single Output Terminated in a 2.5 mm Barrel Connector
- 3-5 Watts Per Cubic Inch Power Density

Physical Specifications

- Type: Wall-Mount
- Size: 1.2" × 3.6" × 2.3"
- Weight: 5.7 oz.
- Output Cable: 6 Foot Zip Cord
- Output Connector: 2.5 mm Barrel Center Positive
- Safety Agency Approvals: UL 1310, CSA 950

Electrical Specifications

- AC Input: 120 VAC ±10% 60 Hz (U.S.A and Canada)
- DC Output: 12, 15, 18 and 24 VDC
- Line Regulation: ±1%
- Load Regulation: ±5%
- Minimum Load: Zero Watts
- Emissions: FCC Class B
- Set Point: ±3% of Nominal at 60% Load
- Ripple and Noise: ±1% PK-PK Maximum

- Overload Protection: Automatic Recovery
- OVP: Primarily Clamped to 115-135%
- Overshoot: None Above Normal Regulation
- Transient Response: 2% of Nominal Output Within 1 MS After 50% Load Swing
- Hold-Up Time: 16 MS
- Operating Temperature: 0 to 40°C
- Storage Temperature: -55 to 85°C

Features

- ▶ 90-250 VAC, 47-440 Hz or 110-350 VDC
- ▶ FCC/VDE Class B Models Available
- ▶ IEC Input Connector
- ▶ 13 Standard Tabletop Models
- ▶ Single, Dual or Triple Outputs
- ▶ Optional Output Cables/Connectors
- ▶ One Year Warranty
- ▶ Wide Range Input
- ▶ Approved by Major Regulatory Agencies

General Specifications. Storage Temperature: -55°C to +85°C. Operating Temperature: 0-40°C. Size: 6.3" x 3.82" x 2.66". Weight: 13 oz. Input Cable: 6' standard domestic 3 prong. Output Cable: 6' shielded with barrel connector. Output Specifications. Line Regulation: ±2% over 90-132 or 180-250. Maximum Load Regulation: ±5% for 40% load variation (60% nominal). Set Point: ±3% at 60% load. Ripple and Noise: ±1% Pk-PK maximum. Overload Protection: Automatic recovery. Overvoltage Protection: 115-140%. Overshoot: None above normal regulation. Transient Response: Recovery to within 1% of nominal output within 1 ms for a 50% to 100% load step. Maximum excursion is 6% from initial voltage set point.

Input Specifications: 90-250 VAC, 47-440 Hz, or 10-350 VDC. Inrush Current: 35 A PK at 230 VAC. Input Protection: Internal input line fuse.

MED Series — Regulated Medical Instrumentation Power Supply

Approvals

- UL approved to Medical Standard UL544
- CSA approved to Standard C22.2 No. 22D, CSA evaluated to C22.2 No. 125 (Medical Applications)
- FCC Class B and VDE Class B Emissions

Features

- Medical Agency Approved
- Tabletops and Wallmounts
- All outputs fully regulated
- Output connector options
- Off-the-shelf availability

General Specifications

- A/C Input: 120VAC, $\pm 10\%$, 60 Hz (all models except MED 220)
- AC input MED 220: 115VAC, $\pm 10\%$, 60 Hz
- AC input cable 6 foot hospital grade cord (Tabletops)
- DC output cable 6 foot
- Load Regulation $\pm 5\%$
- Line Regulation $\pm 0.5\%$
- Ripple and Noise: 20 millivolts P-P
- Minimum Load: 0 watts
- No overshoot on turn-on/turn-off
- Short circuit protected
- Thermally fused primary
- Standard 5 pin DIN connector
- Operating temperature 0-40°C
- Storage temperature -25°C to +85°C
- Size: Models MED 075, 112, 113, 113TT, 144 = 2.3 x 3.1 x 4.4 inches; Model MED 220 = 2.7 x 3.8 x 6.3 inches

DC Power Supplies

Transistorized Inverter

A dependable source of power to operate standard 117V, 60 Hz AC equipment. Its 250 VA output is ample for portable TV sets, radios, soldering irons, portable electric tools, CB equipment, PA systems and many other appliances. Features automatic electronic overload protection. When output is accidentally shorted or overloaded, inverter turns off instantly; turns back on when short is removed. Relay in circuit assures 100% reverse polarity protection, unit and battery. Indicator light gives low battery charge warning; warns when output is shorted or overloaded. **Input Voltage:** 12 VDC. **Output Voltage:** nominal 117 V, 60 Hz. **Voltage Regulation:** 15% max., no load to full load constant battery voltage. **Frequency Regulation:** 4 Hz max., no load to full load. **Input Terminals:** for connecting 12 VDC source (battery) to inverter (connecting leads included). **Fuse:** 30 amps. **ON-OFF Switch:** controls DC voltage to inverter. **Output Receptacle:** for appliance plugs. **Size:** 4 1/2"H x 10"W x 7 1/2"D. **Weight:** 13 lbs. **780-6312. Model TI-250B**.....EACH 229.50

Power Supplies

MODEL EF

GFL SERIES

SERIES NFB

PS-1000

Model EF Medium Duty Power Supply

Features continuously variable 2 DC Output: 0-28 VDC or 0-14 VDC up to 5 amps, continuous duty. Up to 10 amps at intermittent loads. **Ripple:** less than 1% at 5 amps. **Load Regulation:** 0.9 V/A (1 to 5A) for 0-28 V range. 0.6 V/A (1 to 5A) for 0-14 V range. **DC Impedance:** 0.9 (1 to 5A), 0-28 V range; 0.6 (1 to 5A) for 0-14 V range. **Overload Protection:** primary fuse. **AC Input:** 117 V, 60 Hz. 6' heavy duty line cord with three prong molded plug. **Panel Components:** two 2% D'Arsonval meters—output 0-50 VDC; 0-6 ADC. Off-on switch. Variable voltage control knob; 0-14/0-28 VDC range selector switch. Primary fuse. 5-way binding posts. **Cabinet:** 7"H x 12"W x 8 1/2"D. Heavy steel, blue hammerloid finish. **Weight:** 21 lbs. **780-2200. Model EF**.....EACH 353.50

Model EFB and EFBF Power Supplies

DC Output: 0-32 VDC continuously variable, up to 4 ADC. 0-16 VDC continuously variable, up to 8 ADC. **Ripple:** less than 0.1% rms. **Load Regulation:** 32 V range—output voltage varies 1.25 volts for each ampere of load current change between 0 and 4 amps; 16V range—output voltage varies 1 volt for each ampere of load current change between 0 and 8 amps. **DC Impedance:** 1.25 ohms for 32 VDC range. 1.0 ohms for 16 VDC range (no load to full load). **AC Input:** 117 V, 60 Hz. 6' cord. **Overload Protection:** primary fuse. **Panel Components:** variable voltage control knob. Two 2% D'Arsonval meters, voltmeter has two scales for easy reading, 0-40 and 0-20 VDC; Ammeter 0-10 ADC, 0-32/0-16 VDC selector switch. On-off switch. "5-way" binding posts. **Cabinet:** 7"H x 12"W x 8 1/2"D. **Model EFB** has 8 3/4" high x 19" wide rack panel to fit Western Electric and EIA racks. 18 gauge steel, blue hammerloid finish. **Weight:** Model EFB—26 lbs. Model EFBF—34 lbs. **780-2300. Model EFB**.....EACH 399.50
780-6301. Model EFBF.....EACH 463.50

GFL Series Power Supplies

GFL Series delivers up to 625 watts of well filtered DC power. **DC Output:** 0-125 VDC continuously variable, up to 5 ADC. **Ripple:** less than 0.5% rms with continuous 5 A, 125 V load. **Load Regulation:** output voltage varies 1.5 volts for each ampere of load current from 0 to 5 A. **DC Impedance:** 1.5 ohms, no load to full load. **AC Input:** 117 V, 60 Hz. 8' cord. **Overload Protection:** both primary and secondary circuit fuses. **Panel Components:** pilot light. Variable output voltage control knob. Two 2% D'Arsonval meters. 0-150 VDC, 0-5 ADC. On-off switch. 5-way binding posts. **Cabinet:** 14 1/4"H x 19"W x 9 3/4"D. **Model GFLR** has 10 1/2"H x 19" wide rack panel to fit Western Electric and EIA racks. Blue hammerloid finish. **Weight:** GFL—88 lbs. GFLR—100 lbs. **780-6302. Model GFL**.....EACH 861.50
780-6303. Model GFLR.....EACH 936.50

Model D-612T Heavy Duty Power Supply

Two continuously variable ranges: 0-8 VDC, 10 ADC and 0-16 VDC, 10 ADC; up to 20 volts for milliampere loads. **Extremely low ripple:** less than 0.5% rms up to 5 A; less than 2% at 10 A. **Load Regulation:** on 16 V range—output voltage varies 3.1 volts with load change from 3 A to 10 A. On 8 V range—output voltage varies 2.1 volts with load change from 3 A to 10 A. **AC Input:** 117 V, 60 CPS. 6' heavy-duty line cord with three prong molded plug. **Overload Protection:** secondary circuit fuse. **Panel Components:** continuous variable voltage control knob. 2 meters: output voltage—0-20 VDC and output current—0-10 ADC. 0-8, 0-16 VDC selector switch. On-off switch. Secondary fuse. Output terminals. **Cabinet:** 7"H x 12"W x 8 1/2"D. 18-gauge steel; blue hammerloid finish. Rubber feet. **Weight:** 22 lbs. **780-1000. D-612T**.....EACH 269.50

Model H Dual Range Power Supply

DC Output: 6 VDC up to 20 ADC continuous duty; 12 VDC up to 10 ADC continuous duty. Up to 50% overload for short periods. **Ripple:** less than 5% rms at maximum rated current. **Load Regulation:** on 12 V range—output voltage varies 1.6 V with load change from 3 A to 10 A. On 6 V range—output voltage varies 2.1 V with load change from 3 A to 10 A. **AC Input:** 117 V, 60 Hz. 6' heavy-duty line cord with three prong molded plug. **Overload Protection:** primary fuse. **Panel Components:** 8-position voltage control knob. 2 meters: output voltage—0-20 VDC and output current—0-30 ADC. On-off switch. Primary fuse. "Five-way" binding post terminals. 6/12 VDC selector switch. **Cabinet:** 7"H x 12"W x 8 1/2"D. 18-gauge steel; blue hammerloid finish. Rubber feet. **Weight:** 30 lbs. **780-6308. Model H**.....EACH 299.50

Models PS-30, PS-50

General purpose power supplies feature primary fuse overload protection and an 8-position tap switch for flexible voltage adjustment. **DC Output:** PS-30—12 VDC up to 30 A continuous duty. PS-50—12 VDC up to 50 A continuous duty. **Ripple:** PS-30—less than 1% rms at max. rated current; PS-50—0.5% rms at max. rated current. **Load Regulation:** PS-30—output varies 0.12 volts/ampere with load change from 6 A to 30 A; PS-50—output varies 0.17 volts/ampere no-load to full load. **DC Impedance:** PS-30—0.27 ohms, no load to full load; PS-50—0.17 ohms, no load to full load. **AC Input (both models):** 117 V, 60 Hz. 8' heavy-duty line cord with 3-prong molded plug. Cabinet is 18-gauge steel with blue hammerloid finish. Solid carrying handles. Rubber feet. **Size:** PS-30—9 3/4"H x 14 1/4"W x 14 1/4"D, 68 lbs.; PS-50—9 3/4"H x 14 1/4"W x 19 1/4"D, 106 lbs. **780-6200. Model PS-30. 68 lbs.**.....EACH 652.50

Models PSR-12-25 and PSR-12-50

Regulated transistorized 0.01% load regulation and only .0001 volts ripple. Solid state circuitry throughout including IC Op Amp. **DC Output:** PSR-12-25—0-25 VDC at 0-500 mA; PSR-12-50—0-50 VDC at 0-250 mA. **Impedance:** DC-1 kHz. 0.05 ohms; 1kHz-50kHz, 0.5 ohms; 50 kHz-500kHz, 3 ohms. **AC Input:** 105-125 V, 50/60 Hz. 6' heavy-duty line cord with 3-prong molded plug. **Panel Components:** voltage control knobs, 2% accuracy D'Arsonval meter calibrated for two ranges; output voltage and output current. Meter range switch. DC output terminals and chassis terminal. Neon pilot light. On-off switch. Fuse on rear panel. **Overload Protection:** primary fuse, current-limiting. **Cabinet:** 5 1/4"H x 3 1/4"W x 9 1/4"D. Recessed panel. 18-gauge steel. Black textured finish. **Weight:** 6 lbs. **780-6300. Model PSR-12-25**.....EACH 282.50

Alliance Series

- Self-Diagnostic Turn On Test
- Automatic Power Boost During Brownouts Without Use of Batteries
- 2 Year Product Warranty

- Site Wiring Fault Indicators
- Visual and Audible Indicators of All Power Conditions
- \$25,000 Connected Equipment Coverage

Minuteman's Alliance Series packs a lot of power protection in a small package at an excellent price. Designed to back up desktop PCs, fax machines, telephone systems, cash registers and file servers, the Alliance Series incorporates more features than competitive UPSs, yet these units are priced below their competition. The Alliance Series provides total protection from surges, spikes, brownouts and blackouts. The A500 and above are line-interactive UPSs providing automatic voltage regulation without accessing the batteries, along with a communications port allowing communications with Minuteman's optional power monitoring and shutdown software.

PowerMind Series

- Automatic Frequency Selection (50 or 60 Hz)
- Automatic Power Boost During Brownouts Without Using Battery
- True Sine-Wave Output

- \$25,000 Connected Equipment Coverage and 2 Year Warranty
- Self-Diagnostic Test on Turn On
- Site Wiring Fault Indicators

The PowerMind (PML) Series from Minuteman are microprocessor-based intelligent UPSs that provide a true sinewave output. Designed for desktop PCs, telephone systems, critical file servers and LAN workgroups, the PMLs also incorporate extensive status indicators and audible alarms. The unique line-interactive technology built into the PMLs provides protection from brownout conditions without using the batteries. In addition, the PML Series provides complete protection from surges, spikes and blackout conditions.

XRT Series

- Regulates Voltage From 88 to 140 V Without Battery Use
- Isolation Transformer Provides Superior Noise/Surge Filtering
- Extended Back-up Times With Stackable External Battery Packs
- True Sinewave Output
- \$25,000 Connected Equipment Coverage and 2 Year Warranty

XRT
 SERIES

Minuteman XRT Series provides the best surge, spike and EMI/RFI filtering available. The series also incorporates a true automatic voltage regulator, a programmable LCD display (available on XRT1000 and above), and a built-in microprocessor that performs advanced battery management utilities. Minuteman's optional LanMaster monitoring and shutdown software is used for power and event management. **NOTE:** XRT600 includes batteries, all other units require external battery packs. Any number of additional battery packs can be added for increased run time. Each added pack will provide 20 to 30 minutes additional time. Perfect for critical servers and telecommunication equipment.

CP Series

Minuteman's Continuous Power Series features true on-line double-conversion UPS technology that provide unsurpassed power protection for mission-critical applications. With extensive status indicators, synchronized sinewave output and a two-stage alarm, the CP Series represents the finest power protection money can buy. 208 and 240 volt units are available.

30-400 Watt AC/DC Switching Power Supplies

- Universal Input/User-Selectable
- Over 1,000,000 User-Adjustable Voltage Settings (ZPS-150A-400A Series)
- Fully Featured
- 90-265 VAC (All Models)
- 120-364 VDC (30-45 Watt Series)
- Compact Design
- Quad Outputs (150-400 Watt Series)
- Single and Triple Outputs (30-60 Watt Series)
- Complete Unit Protection
- U-Channel Aluminum Construction
- Open Frame or Enclosed
- 100% Cycled Burn-In
- 100,000-500,000 Hours MTBF
- 1-2 Year Warranty
- Standard, Off-the-Shelf Delivery
- Enclosed Units End In "C"

Approvals/Compliance To

- UL 1950
- CSA 22.2

NRG275 and NRG350 Series

- ▶ Automatic Selecting AC Input: 85-132/170-264 VAC, 47-63 Hz
- ▶ Terminal Block Connectors
- ▶ All Outputs Fully Regulated
- ▶ MOSFET Switching Technology
- ▶ Rugged Wrap-Around Chassis With Standard Cover
- ▶ 75% Typical Efficiency
- ▶ High Power Density, Up to 3.1 Watts/Cubic Inch
- ▶ Optional Fan
- ▶ Extra Output Voltage to Power External Fan
- ▶ Thermal Shutdown
- ▶ UL Recognized, CSA Certified
- ▶ TÜV Certified to: EN 60950
- ▶ Meets Domestic and International Safety: 3750 VAC Isolation; VDE Safety Spacings
- ▶ Meets Domestic and International EMI: FCC 47CFR, Part 15, Level B; VFG 243 Level B
- ▶ Internal Input Line Filter
- ▶ Power-Fail Warning Signal
- ▶ Output Good Signal
- ▶ Full Load Burn-In and Thermal Cycling
- ▶ 2 Year Warranty

General Specifications. AC Input: Automatic selecting dual range 85-132 VAC or 170-264 VAC. 47-63 Hz single phase. NOTE: AC input range selection is fully automatic. No manual switchover is required. **DC Outputs:** See voltage/current rating chart. **Output Power:** See voltage/current rating chart. **Brown-Out Protection:** Regulation is maintained down to 85/170 VAC, at full rated load, with no compromise in performance. **Hold-Up Time:** 20 msec minimum at full rated load and nominal AC input voltage. **Power-Fail Warning Signal:** TTL compatible signal goes low 4 msec before the main output drops to 95% of its steady state value at full rated load. **Efficiency:** Measured at full rated load and nominal AC input voltage. 75% $\pm$ 5% depending on how the load is distributed among the outputs. **Regulation Characteristics:** See voltage/current rating charts for individual module ratings; Line — Measured over an 85-132 VAC or 170-264 VAC line change; Load — Measured over a min. to max. load change; Multiple output model regulation is subject to the minimum load requirements mentioned below. **Initial Setting Tolerance:** Measured at 50% of full rated load on all outputs. **Minimum Loads:** 10% minimum load on the main output is required to maintain regulation. **Remote Sensing:** Provided on the main output. **Transient Response:** All output — Less than 1 msec typical for a 50-100% load change and recovery to within 1% of initial voltage set point; Maximum excursion — 3% from initial voltage set point. **Overload Protection:** Entire unit hiccups if V1-V3 is overloaded; V4 is self limiting. **Overvoltage Protection:** Provided on the main output; Hiccups over AC operating range. **Output Noise and Ripple:** 1% PK-PK maximum on any output (20 MHz BW). **Overtemperature Protection:** Initiates shutdown in the event of an overtemperature condition; Automatic reset. **Power-Up Initialization Period:** 2.0 sec. maximum turn-on delay assures orderly ramp-up and stabilization of all output voltages during power-up. **Input Protection:** AC input line fuse provided; Internally located. **Inrush Current:** Internally limited at 80 A PK, cold start. **Temperature Rating:** Operating — 0°C to 50°C at full rated output power; Consult factory for operating information between 50°C to 70°C; Storage — -55°C to +85°C. **External Cooling:** External cooling air velocity measured $\frac{1}{4}$ " above and at the middle of chassis, input to output — NRG275, NRG350 — 300 LFM. EMI: VDE and FCC level B EMI. **Vibration:** Operating: 5-32 Hz and 32-5 Hz, Sinusoidal, 0.02 in (DA); 32-2000 Hz and 2000-32 Hz, Sinusoidal, 1 g (PK). Non-Operating: 10-350 Hz, 0.04 g/Hz; 350-2000 Hz, 0.007 g/Hz, 6.15 g (RMS) overall. **Shock:** Operating — 10 $\pm$ 3 msec, 3 axes, Half Sine, 20 g (PK); Non-Operating — 10 $\pm$ 3 msec, 3 axes, Half Sine, 40 g (PK). **Dielectric Withstand Voltage (min):** Input to Ground — 1500 VAC; Input to Outputs — 1500 VAC; Outputs to Ground — 500 VAC. **Leakage Current:** Line to ground (max.) — 3 mA. **Altitude:** Operating — 10,000'; Non-Operating — 40,000'. **Relative Humidity:** Non-condensing, 95% Maximum. **Dimensions:** 9.0" $\times$ 5.0" $\times$ 2.5". **Weight:** 3 lbs., 9 oz.

Outputs #1 and #2 are positive polarity. Outputs #3 and #4 are floating and can be referenced as either + or -.

SPL Switching Power Supplies

AC Input: Standard dual range — 90-132 VAC or 180-264 VAC, user selectable; 47-63 Hz, single phase. Consult Allied for 400 Hz operation. **Brown-Out Protection:** Regulation is maintained down to 90/180 VAC, at full load, with no compromise in performance. **Hold-Up Time:** 20 msec minimum at full rated load and nominal AC input voltage. Hold-up time increases to 40 msec at 50% load. **Power-Fail Warning Signal:** Single Output Models — Provided on SPL250 models only. TTL compatible signal goes low 10 msec minimum before the output voltage drops 5%, at a 100% load condition. Multiple Output Models — Provided on models with a "P" suffix. Signal goes low 5 msec minimum before +5V main output drops 5%, at a 100% load condition. Warning time increases at reduced load levels. **Efficiency:** Measured at full rated output power and nominal AC input voltage. 70% $\pm$ 5% depending on how the load is distributed among the outputs. **Regulation Characteristics:** Line — Measured over a 90-132 VAC or 180-264 VAC line change; Load — Measured by varying the load current from 60% to either 20% or 100% of full rated. **Cross Regulation:** Multiple Output Models — Where indicated, cross regulation specifies the maximum voltage change on an auxiliary output when the +5V main output load current is varied from 75% of full rated to either 50% or 100% of full rated. **NOTE:** The effect of load and cross regulation are generally not cumulative, and may actually act to cancel each other in an operating system environment. **Minimum Load:** Single Output Models — 5% of full rated output current; Multiple Output Models — Minimum load required on the +5V main output for full load capability on auxiliary outputs: SPL40, SPL50 - 1A, SPL53 - 2A, SPL175 - 3A, SPL200 - 6A, SPL130 - 5A. **Remote Sensing:** Single Output Models — Provided on SPL53, SPL130, and SPL250 series models; Multiple Output Models — Provided on the +5V main output of SPL130, SPL200, and SPL400 series models. **Output Noise and Ripple:** 0.3% RMS, 1: PK-PK maximum. **Output Overshoot:** No overshoot on turn-on or turn-off. **Transient Response:** Recovery Time — 500 msec typical for a 50-100% load change and recovery to within 1% of initial voltage set point; Maximum Excursion — 3% from initial voltage set point; Multiple Output Models — Above applies to +5V main output only. **Output Overload Protection:** Fully protected against output overload and short circuit. Automatic recovery upon removal of overload condition. **Overvoltage Protection:** Set at 6.2V $\pm$ 0.6V; Single Output Models — Provided on all 5V models; Multiple Output Models — Provided on +5V main output. **Reverse Voltage Protection:** Inherently protected from damage due to application of reverse polarity voltage across DC output terminals. **Input Protection:** AC input line fuse provided. Internally located. **Inrush Current:** Internally limited by thermistor. Cold start, peak current at 230 VAC input. SPL40 through SPL53 — 9A maximum; SPL130 through SPL250 — 17A maximum; **Operating Temperature Rating:** 0°C to +50°C at full rated

output power. Consult Allied for operating information between +50°C to +70°C. **Storage Temperature Rating:** -55°C to +85°C. **Temperature Coefficient:** $\pm$ 0.03%/°C typical, $\pm$ 0.05%/°C maximum over entire operating temperature range of 0°C to +70°C. **Cooling:** Convection cooling is adequate where non-restricted air flow is available. When operating in a confined area, forced air cooling is recommended. **Vibration:** Per MIL-STD-810D, Method 514.3, Category 1, Procedure I. **Shock:** Per MIL-STD-810D, Method 516.3, Procedure III. **Options:** **Overvoltage Protection:** Available on all single output models. **Input/Output Connectors:** Quick-disconnect terminals are available for all models except SPL50 and SPL175. Amp or Molex wafer style connectors (.312 centers) are available for SPL40 and SPL53 series models. **Safety Covers:** Available for SPL130, SPL200, and SPL250.

Safety Specifications. All models exceed the following safety standards. **Leakage Current:** Line to Ground (max.) — 0.75 mA. **Safety Spacings:** 8.0 mm minimum between primary and secondary circuitry; 4.0 mm minimum between primary and grounded circuitry. **Dielectric Withstand Voltage (min.):** Input to Ground — 3750 VRMS; Input to Outputs — 3750 VRMS; Outputs to Ground — 700 VDC. **UL Recognized:** UL File Number E55974. **CSA Certified:** CSA File Number LR38879. **TUV License Numbers:** Tested and certified by TUV to VDE 0806 and IEC 380. SPL40 — R30059; SPL53 — R30060; SPL175 — R50177; SPL250 — R50174; SPL50 — R50006; SPL130 — R30062; SPL200 — R30063. **EMI Specifications.** All International Series models are equipped with internal line filtering which allows compliance to the conducted emission limits of FCC Docket 20780 Part 15 Class A, and VDE 0871/6.78 Class A. **Agency Limits — Class A. Frequency Range 150 KHz - 450 KHz:** VDE 0871 Level A — 66 dB μ V; FCC 20780 Part 15 — Not specified by FCC; SP Series Design Standards: <63 dB μ V. **Frequency Range 450 KHz - 30 MHz:** 60 dB μ V; FCC 20780 Part 15 — Consult Allied; SPL Series Design Standards — <57 dB μ V. Models may be brought into compliance with Class B limits by the addition of an optional single stage line filter. Please consult Power-One for more information.

Notes: A = Voltage level adjustable from 4.75V to 0Vp trip point. Factory set to $\pm$ 1% of nominal.

B = Fully regulated output, voltage fixed (3 terminal regulator).

C = Quasi-regulated output.

D = Fully regulated output, voltage adjustable, $\pm$ 5% minimum. Factory set to $\pm$ 1% of nominal.

E = The sum of the main +5V and AUX 1 load currents must not exceed 30A.

F = The sum of the main +5V and AUX 1 load currents must not exceed the main +5V current rating.

G = Maximum load is 10A or 120W.

- ▶ TÜV Certified: EN 60950
- ▶ Industry Standard Packages
- ▶ 77 Models: 6 to 280 Watts
- ▶ Up To 4 Regulated Outputs
- ▶ VDE Construction
- ▶ 2 Hour Burn-in
- ▶ 2 Year Warranty
- ▶ Made In U.S.A.

General Specifications. AC Input: 100/120/220/240 VAC +10%, -13%, 47-63Hz. Tolerance for 230 VAC operation is +15%, -10%. Derate output current 10% for 50 Hz operation. Factory wired for 120V operation. **DC Output:** Adjustment range ±5% minimum. Voltage nonadjustable on "3 terminal regulator" outputs of models HAD12, HAD15. **Line Regulation:** ±0.05% for a 10% line change. Exceptions — ±0.01% for F, G case models and CP197-A; ±1% for HAD12 and HAD15; ±0.5% for all other outputs using "3 terminal regulators." **Load Regulation:** ±0.05% for 50% load change. Exceptions — ±0.02% for F, G case models and CP197-A; ±1% for HAD12 and HAD15; ±0.5% for all other outputs using "3 terminal regulators." **Output Ripple:** 5V through 15V models — 5.0 mV PK-PK maximum (3.0 mV PK-PK maximum for F, G case models and CP197-A); 24V through 250V models — 3.0 mV PK-PK plus .02% of output voltage, maximum; All "3 terminal regulator" outputs — 0.2% PK-PK maximum. **Transient Response:** Less than 50 µsec for a 50% load change. **Short Circuit and Overload Protection:** Automatic current limit/foldback. **Overvoltage Protection:** Provided on 5V outputs where indicated. Set at 6.2V ±0.4V. Other outputs use optional overvoltage protectors OVP12 and OVP14. **Remote Sensing:** See Voltage/Current Rating Charts. Provided on output where indicated. **Stability:** ±0.3% for 24 hours after warm-up. **Operating Temperature Ratings:** 0°C to 50°C full rated, derated linearly to 40% at 70°C (CP197-A requires 50 CFM forced air over heatsink area for full 50A output). **Storage Temperature Ratings:** -40°C to 85°C. **Temperature Coefficient:** 0.1%/°C typical, 0.3%/°C maximum. **Efficiency (Typical):** 5V outputs — 45%; 12V and 15V outputs — 55%; 24V through 250V outputs — 60%. **Master/Slave Operation:** Provided on F, G and CP197-A models only. For parallel operation of up to 6 units. **Vibration:** Random vibration from 10 Hz to 2 KHz, 6.15 grms (3 axis). **Shock:** Operating 20G peak acceleration. **EMI/RFI:** These linear power supplies have inherently low conducted and radiated noise levels. For most system application they will meet the requirements of FCC Docket 20780 for Class B equipment and VDE 0871 for Class B. **Safety Specifications.** All models exceed the following safety standards. **Leakage Current:** Line to Ground (Max.) — 0.05 mA. **Creepage Distance:** Live Parts to Dead Metal (Min.) — .345" (9.0mm). **Dielectric Withstand Voltage (Min.):** Input to Ground — 3750 Vrms; Input to Outputs — 3750 Vrms; Outputs to Ground — 500 VDC. **UL Recognized:** UL File Number E55974/E131905. **CSA Certified:** CSA File Number LR38879. **TÜV Licensed:** TÜV to VDE 0806 and EN 60950. Consult Allied for current TÜV license numbers. **Corcom VS&F (Voltage Selecting and Fuse Connector) Compatibility.** All International Series models interface directly with Corcom's VS&F power entry module. The VS&F is an internationally approved AC line connector, a fuseholder, and a means of externally changing AC line voltages with a unique voltage selector card. With the VS&F, your equipment can be operated anywhere in the world, without modification at time of installation. Developed for the manufacturer who markets his products worldwide, the VS&F eliminates the need for internal transformer wiring changes and for stocking different line cords. The VS&F is also available with a built-in RFI filter for protection of your equipment. Contact Allied for further details.

*Overvoltage protection provided. Set at 6.2V ±0.4V.

**Adjustable Outputs: F15-15-A — 12-15V; F24-12-A — 24-28V;

HA15-0.9-A — 12-15V; HA24-0.5-A — 24-28V.

†Remote sense provided.

‡Isolated output, can be referenced as + or -.

*Nonadjustable 3 terminal regulator.

‡Adjustable 3 terminal regulator.

*Can be made into an isolated output by removing jumper W1.

Overvoltage Protection Options

These optional overvoltage protection modules are offered for use with Power-One's International Series Linear power supplies. Each is user adjustable from 6.4V to 34V.

NOTE: Outputs with factory built-in OVP are indicated in the Voltage/Current Rating Chart for each model. OVP is not available for 48V through 250V models.

OVP Selection Guide

Model	Case Size	OVP Modules Required
Single Output	B	1 — OVP-12
Single Output	C	1 — OVP-12
Single Output	N	1 — OVP-12
Single Output	D	1 — OVP-12
Single Output	E	1 — OVP-24
Single Output	F	1 — OVP-24
Dual Output	AA	1 — OVP-12 protects both outputs
Dual Output	B	1 — OVP-12 protects both outputs
Dual Output	BB	1 — OVP-12 protects both outputs
Dual Output	CC	1 — OVP-12 protects both outputs
Dual Output	E	1 — OVP-24 protects both outputs
Dual Output	F	1 — OVP-24 protects both outputs
Triple Output	AA, BAA, BAA, D, CBB, 131, DBB, DCC	1 — OVP-12 protects both 12V through 15V outputs
High Peak Current	N, BAA, CBB, 131, CP340-A, CP510-A	1 — OVP-12 protects any output not provided with built-in OVP

MAP Series — International Series DC Power Supplies

- ▶ Automatic Selecting AC Input: 90-132/175-264 VAC, 47-63 Hz
- ▶ Universal Terminal Block Connectors
- ▶ All Outputs Fully Regulated
- ▶ MOSFET Switching Technology
- ▶ Universal Mounting System
- ▶ Rugged Wrap-Around Chassis
- ▶ 75% Typical Efficiency
- ▶ High Power Density, Up to 2.2 Watts/Cubic Inch
- ▶ Platinum Barrier Schottky Rectifiers
- ▶ Convection Cooled
- ▶ Thermal Shutdown with Warning
- ▶ UL Recognized, CSA Certified (Map130)
- ▶ TÜV Certified to: IEC 380, VDE 0805; IEC 950, VDE 0806; EN 60950
- ▶ Meets Domestic and International Safety: 1500 VAC Isolation; VDE Safety Spacings
- ▶ Meets Domestic and International EMI: FCC 47CFR, Part 15, Level B; VDE 0871 Level B
- ▶ Internal Input Line Filter
- ▶ Power-Fail Warning Signal (Mapsc0, Map130)
- ▶ Full Load Burn-In and Thermal Cycling
- ▶ 2 Year Warranty

AC Input: Automatic selecting dual range — 90-132 VAC or 175-264 VAC, 47-63 Hz single phase. **NOTE:** AC input range selection is fully automatic. No manual switchover is required. **Peak Output Power:** Peak power capability is recommended for short term operation only. Contact Power-One for technical assistance on specific applications. **Brown-Out Protection:** Regulation is maintained down to 90/175 VAC, at full rated load, with no compromise in performance. **Hold-Up Time:** 20 msec minimum at full rated load and nominal AC input voltage. Hold-up time increases to 40 msec at 50% load. **Power-Fail Warning Signal:** TTL compatible signal goes low before the main +5V output drops 5%, at full rated load on MAP80 and MAP130. **Minimum Warning Time:** MAP80 — 5 msec; MAP130 — 2.5 msec. Warning time increases at reduced load levels. **Efficiency:** Measured at full rated load and nominal AC input voltage. 75% ±5% depending on how the load is distributed among the outputs. **Initial Setting Tolerance:** Measured at 50% of full rated load on all outputs. **Minimum Loads:** The following minimum loads are required to maintain regulation. Multiple output model ratings are expressed as current on the main 5V output. **Chassis Models Only (Multiple Output):** MAP130 — 3A; MAP80 — 1A; MAP55/MAP40 — 0.5A. **Chassis Models Only (Single Output):** MAP130 — 15 watts; MAP80 — 5 watts; MAP55/MAP40 — 3 watts. **Remote Sensing:** Provided on MAP130 multiple output models on the main +5V output and on MAP130 single output models. **Output Noise and Ripple:** 0.3% RMS, 1% PK-PK maximum on main +5V output. **Transient Response:** Main +5V output —

500 µsec typical for a 50-100% load change and recovery to within 1% of initial voltage set point. Maximum Excursion — 4% from initial voltage set point. **Overload Protection:** Fully protected against output overload and short circuit. Automatic recovery upon removal of overload condition. Delayed-foldback current limiting characteristics assure reliable turn-on into reactive and non-linear loads. Provided on MAP130 series models. **Overvoltage Protection:** Provided on the main +5V output. Set at 6.2V ±0.6V. **Overtemperature Protection:** Initiates shutdown in the event of an overtemperature condition. Automatic reset. Power-Fail Warning Signal is initiated prior to shutdown. Provided on MAP130 series models. **Power-Up Initialization Period:** Typical 2.0 sec turn-on delay assures orderly ramp-up and stabilization of all output voltages during power-up. **Input Protection:** AC input line fuse provided. Internally located. **Inrush Current:** Internally limited by thermistor. **Operating Temperature Rating:** 0°C to +50°C at full rated output power. Consult factory for operating information between +50°C to +70°C. **Storage Operating Temperature Rating:** -55°C to +85°C. **Temperature Coefficient:** ±0.03%/°C typical, ±0.05%/°C maximum over entire operating temperature range of 0°C to +70°C. **Cooling:** Convection Cooling is adequate where non-restricted air flow is available. When operating in a confined area, forced air cooling is recommended. **Vibration:** Random vibration from 10 Hz to 2 KHz, 6.15 grms (3 axis). **Shock:** Operating — 20G peak acceleration. For initial setting tolerance, line and load regulation, and output adjustment range, consult Allied. **Safety Specifications.** All models exceed the following safety standards. **Leakage Current:** Line to Ground (Max.) — 500 µA. **Safety Spacings:** Meets IEC 950. **Dielectric Withstand Voltage (Min.):** Input to Ground — 1500 VRMS; Input to Outputs — 1500 VRMS; Outputs to Ground — 500 VDC. **UL Recognized:** UL File Number E131905. **CSA Certified:** CSA File Number LR38879. **TÜV Essen Certified:** TÜV certified to meet the requirements of VDE 0805, VDE 0806, and EN60950. **EMI Specifications.** Chassis mounted models and the MAP40-3100 are equipped with internal line filtering which allows compliance to the conducted emission limits of FCC 47CFR, Part 15, Level B; and VDE 0871 Level B. The MAP40-3000 and 3003 meets FCC Level B and VDE 0871 Level A.

AC Power Inlets

► Max. Rating: UL and CSA 15 A/250 VAC — VDE 10 A/250 VAC

AC Power Inlets. Male power inlets produced with UL94-VO material includes snap-in and screw mount types with solder tab, .187 Q.D. solder tab or .250 faston.

Stock No.	Mfr.'s Type	Description	Terminals	Fig.	EACH	
					1-24	25-99

689-3505	703W-00/04	Screw Mount	.250 Faston	D	.83	.72

*For Panel Thickness of 1.5 mm (1.0 mm, 2.0 mm and 3.0 mm available upon request).
**Universal Snap-In Feature. Fits panel thickness 0.8 mm -2.0 mm.

AC Power Cord Plug Assemblies

► Max. Rating: UL and CSA 10 A/250 VAC — VDE 10 A/250 VAC

AC Power Cord Plug Assemblies. Male and female rewirable plug connectors utilizing UL94-VO mold material with straight and 90° angle cable entry. Easily converts a power cord into a detachable power cordset.

Stock No.	Mfr.'s Type	Description	Terminals	Fig.	EACH	
					1-24	25-99

IEC Connectors With Voltage Selector

► **Max. Rating: UL and CSA 10 A/250 VAC — VDE 10A/250 VAC**

IEC Connectors. Male power inlet produced in UL94-V0 material containing fuseholder and voltage selector switch with snap-in and screw mount types available.

Stock No.	Mfr.'s Type	Description	Terminals	Fig.	EACH	
					1-24	25-99

*Panel Thickness: 1.0-1.6 mm. **Panel Thickness: 1.0-1.8 mm. ‡Fuseholder composed of 2 compartments with either single or double fusing.

Power Entry Modules

The Schurter IEC 320 power entry modules come in many variations combining AC connector, on/off switch, 1- or 2-pole fuseholder and voltage selector. These units are approved at 250 V by a multitude of international agencies including: UL, CSA, VDE, SEMKO and SEV. Fuses sold separately.

AC Inlet and 2-Pole Fuseholder/Switch

Series **KEC 4303/KD** with or without series voltage selection. DPST, 35 A switch in-rush current. Terminals are 4.8 mm x 0.8 mm quick-connect. Order fingergrasp fuse drawers separately below.

Medical Group

Outlets are designated by a green dot. Features a circuit breaker, white aluminum housing, snap-on clips, impact resistant end caps and a maximum rating of 15 Amps-125 Volts. Note: When used in hospital environments, grounding can only be achieved when plugged into a "Hospital Grade" or a "Hospital Only" receptacle.

Sentrex® High Performance Series

Plug in surge suppressors for maximum protection of critical computer network and electronic equipment. High performance units provide four stages of protection and clamp at 260 V with a 330 V UL 1449 rating and surge indicator light. Capable of up to 33,000 A maximum surge current. Rated at 15 A/120 V with circuit breaker. Units available with Fail-Safe™ shut down feature to cut off all power to equipment if surge protection fails. LIFETIME product and \$30,000 connected equipment warranty.

Perma Power® Computer Grade Series

Plug in surge suppressors offer substantial performance to protect stand alone PCs and electronic equipment in the office environment. Computer Grade units provide one stage of protection and clamp at 340 V with a 400 V UL 1449 rating and surge indicator light (SR10 and SRD10 include audible alarm). Capable of up to 13,000 A maximum surge current. Rated at 15 A/120 V with circuit breaker. Units available with Fail-Safe™ shut down feature to cut off all power to equipment if surge protection fails. Five year product and \$10,000 connected equipment warranty.

Perma Power® Electronic Grade Series

Plug in surge suppressors offer economical surge protection for home and office equipment that is not mission critical. Electronic Grade units provide one stage of protection and clamp at 350 V with a 400 V UL 1449 rating (500 V for PR609) and surge indicator light. Capable of up to 4,500 A maximum surge current. Rated at 15 A/120 V with circuit breaker (PR609 has no circuit breaker). Two year product warranty.

Industrial Surge®

Residential and Commercial Panel Protection

Panel Protection for home and commercial applications to be mounted at the breaker panel to provide surge suppression for all equipment fed from panel. Or mount at larger permanently wired equipment to provide suppression as close to these systems as possible. Single Phase protect a home or small office, and Three Phase units guard against surges generated by Three Phase manufacturing equipment. UL 1449 and CSA certified. **Clamping Voltage:** 480 V peak. EMI/RFI noise filtering. **Max. Surge Current:** 60,000 A per phase. Suppressor indicator light per phase. **Operating Temperature:** -40°C to +55°C. Compact NEMA 12 enclosure. 3/4" Conduit connection and 36" 14 AWG wire leads. Wall mounting bracket standard. Five year warranty.

Sentrex™ Personal Computer Line Conditioners (PCLC)

Sentrex™ ferroresonant PCLC, CLC and CLT Line Conditioners provide completely regulated, computer compatible sinewave power to sensitive electronic equipment. They protect against brownouts, spikes, surges, harmonic distortion, noise...everything short of a complete blackout.

- ▶ Workstations
- ▶ Remote Computer Peripherals
- ▶ Micro Computers
- ▶ LANs
- ▶ FAX Machines
- ▶ Input Voltage: 96-132 VAC
- ▶ Output Voltage: 120 VAC, $\pm 5\%$
- ▶ 6 Foot Line Cord
- ▶ Output Waveform: Sinewave, Approx. 5% THD
- ▶ Response Time: Instantaneous (No Measurable Delay)
- ▶ Safety: UL Listed and CSA Certified
- ▶ Three Year Warranty
- ▶ 50 Hz Units also Available
- ▶ Protection Against all Powerline Problems Short of a Blackout, Including: Brownouts, Harmonic Distortion, Noise, Voltage Spikes and Transients
- ▶ Protects against Power Interruptions up to 3 Milliseconds

- ▶ Safety: UL Listed
- ▶ Warranty: 5 Years

How To Determine The Size You Need:

1. List all equipment to be protected, including terminals, printer and other peripherals.
 2. Determine the VA (Volt Amp) required for each device by multiplying the amperes drawn (the number is usually found on the nameplate and/or in the owner's manual) by 120 volts, i.e. 120V X 2.0 amps = 240VA.
 3. Consider an allowance for future system expansion.
 4. Choose the appropriate Sentrex™ for the VA required.
- For further assistance, contact the factory directly at 1-800-367-5811.

- ▶ Built-In Circuit Breakers
- ▶ Grounded Outlets
- ▶ Maximum Rating of 15 Amps-125 Volts
- ▶ Grounded Electrically and Mechanically

Compact Models

Designed to provide power where space is limited. Aluminum housing in beige and gray, except for P6 which is plastic.

Industrial Models: 2 ft., 4 ft., and 6 ft.

Ideal for situations where many receptacles are needed. **Suggested applications include:** workbenches, electronic cabinets, computer rooms, POP displays, and exhibits. Silver gray aluminum housing. Outlet strips with "mounting ears" use "UL listed" or "UL recognized" components. Models are available with or without a circuit breaker, and has a maximum rating of 15 Amps-125 Volts. Features silver gray aluminum housing.

Compact Models BC=6ft.cord, BD=15 ft.

Automatic Voltage Regulators

- Covers 95.3% of Power Problems
- Conditions Hi/Low Voltage, In 2 Cycles, RFI/EMI Noise, Surges
- Rack Mount With Accessory Bracket
- Two Year Warranty

Perma Power Automatic Voltage Regulators protect your system from 95.3% of the problems that power lines encounter . . . transient surges, overvoltages, undervoltages and FR/EMI noise. The Perma Power AVR responds instantly to voltage changes in the power line . . . whether created in the utility or in your facility. It supplies constant, safe 117 VAC (ANSI C84.1) power to your computer, even if the incoming voltage sags as low as 85 V or rises as high as 150 V. **Maintenance Free:** With its tap changer design, it costs less than other types and operates more quietly and efficiently. **Indicator Lights:** Model AVR-600 has surge suppressor failure light. Models AVR-1200 and AVR-1800 have LED indicator for AC voltage, reverse polarity, improper grounding and surge suppression status, and a warning buzzer sound for extremely high or low voltage or surge suppressor failure. **Appearance:** Heavy duty 18 gauge beige enclosure, 6' line cord from back panel; molded-on plug (NEMA 5-15P). **Response Time:** Approx. 2 cycles. **Noise Reduction:** Normal mode 15 dB, common mode 12 dB. **Short Circuit Protection:** Circuit breaker, manually reset. **Warranty:** 2 years.

Stand-By Power Systems

Features

- Back-Up Power When The Utility Power Fails; Gives You Time To Save Valuable Data Before Your Computer Shuts Down
- Ultra Fast Assured Transfer Time
- Output Voltage 120 VAC $\pm 5\%$ (On Battery)
- Receptacles On Rear
- Input Voltage Range 97-187 VAC
- Surge Suppression To Protect Equipment From Damaging Spikes On The Power Line and Reduces Data Errors
- Audible Alarms and LED Indicators
- UL Listed
- Two Year Warranty

Standby Power Systems provide Blackout protection for many applications such as personal computers, terminals, work stations, small phone systems and point of sale terminals. These SPS systems offer the maximum performance at the lowest possible cost with many standard features.

Sentrex® 2.1-10 KVA Uninterruptible Power Systems

- Advanced Battery Management For Prolonged Battery Life
- Dual Conversion On-Line Technology, Quiet Operation (8 and 10 KVA Are Parallel On-Line)
- Advanced Power Isolation
- Power Management Software Capability
- Microprocessor Controlled Interface
- UL and CSA Listed
- Plug In and Hard Wired Units Available (Consult Factory For Distribution Options)
- 2.1-6 KVA Come Standard With Four 5-15R Receptacles (10 On Plug In Units)
- Automatic By-Pass Transfer For Added Reliability
- Remote Power Off (REPO) Standard (2.1-6 KVA), Optional (8-10 KVA)
- 50/60 Hz Auto-Sensing (2.1-6 KVA)
- Output Voltage Regulation $\pm 2\%$
- Extended Battery Time Available
- One Year Warranty

Sentrex Uninterruptible Power Systems offer outstanding **No-Break Power** protection with plenty of power in a small package. Units are packed with features and deliver clean, computer-grade, uninterruptible power using advanced Parallel on-line technology. A variety of options are available offering flexibility to meet your specific application. **Applications Include:** IBM AS/400™, DEC VAX 3000, 11/750, MicroVAX II, HP 3000 and 9000 series, telecommunications and more.

Sentrex® ZoneGuardian

Protect your Electronics from damaging Power and Data surges with one modular system!

- ▶ Premier 5 Stage Hybrid Power Protector
- ▶ UL 1449 Listed, L-G, N-G, L-N All 330 Vp 6 KV (1.2/50 µs), 500 A (8/20 µs)
- ▶ CSA Certified
- ▶ Data Modules Snap Easily Into Place (Up To 4 Modules Can Be Used With WP3G and Up To 7 Can Be Used With P3G and P7G)
- ▶ Telecom Modules Are UL 497A Listed
- ▶ All Plastics Are UL 94-5V, UL's Highest Flame Retardant Material
- ▶ Thermal Overload/High Capacity Fusing
- ▶ Data/LAN Modules Comply With Appropriate IEEE/EIA Operating Standards

Sentrex® ZoneGuardian is the first 100% customer configurable combination power line and data line surge suppressor offering state of the art power surge protection with add-on data protection modules.

Sentrex® Communications/Data Surge Suppressors

Today's electrical and data communication networks are extremely susceptible to transient overvoltages not only on the power line but on the data cables as well. All too often Band-Aid solutions are implemented without considering their impact on the balance of the communication system or Network. A partial solution, such as only power protection, leaves many system components more vulnerable than before. Therefore it is imperative to protect all data and communications cables with a Sentrex® communication protection device.

DIN Rail Series

DIN Rail Mounted modular surge protection units offer tremendous flexibility. They are designed with snap-on DIN rail mounts, assuring fast and easy installation. All telecommunications protection circuits are UL 497A Listed secondary protectors.

Interface Surge Protectors

DB9, DB15 and DB25

Interface Surge Protectors provide in-line protection between incoming data cables and equipment I/O ports operating under EIA Standards. These bipolar units plug directly into the I/O ports and their respective cable connectors.

Power Master® Whole House Surge Arrestor

Protects household electrical and electronic equipment from transient voltage surges entering via the main power line. Designed to be hardwired into house circuitry; mounts on breaker box. Absorbs maximum surge current of 26,500 amps. Clamping response time of less than 1 sec. **Electrical rating:** 15 A, 120/240 VAC, 60 Hz. Includes filter integrity indicator light. 3 1/8" L x 2 1/4" W x 1 1/8" H. UL listed. Three Year Limited Warranty.

Wave Tracker™ The Ultimate Noise and Surge Filter

The ultimate in surge and noise protection, these products have the highest proven levels of noise attenuation available and are backed by an Unlimited Lifetime Connected Equipment Warranty.

- ▶ Patented 3 Stage, 3 Line Surge Protection (MOV, Gas Tube, Silicon Avalanche Diode)
- ▶ Highest Level of Series Noise Filtering Available (75 dB to 125 dB)
- ▶ Sine Wave Tracking
- ▶ Audible/Visual Surge Indication
- ▶ Isolated Surge and Noise Protection
- ▶ Lifetime Unlimited Connected Equipment Warranty
- ▶ UL1449 Suppressed Voltage Rating of 330 V (UL's best rating)
- ▶ Maximum Surge up to 72,025 Amps
- ▶ 1 Pico Second Response Time
- ▶ CSA Certified

Sola Hardwired CVS 30 VA to 7.5 kVA

Features and Benefits

- Applications Requiring Precise Voltage Regulation Can Expect to Receive $\pm 1\%$ Output Regulation for Input Variation of $+10$ to -20%
- Protects Premise Wiring Since Non-Linear Loads are Reflected Back to the Utility as Near Sinusoidal
- Safety Agency Approved: All CVSs are UL Listed and CSA Certified
- Dual Function. Can Act as a Stepup or Stepdown Transformer in Addition to Providing Regulation
- Sinewave Output Even With a Distorted Source; Input Harmonics Are Eliminated
- Half Load Input Voltage Range of $+15$ to -50% Input for $+5$, -10% Regulation

Precise Voltage Regulation for Industrial Applications

The Sola CVS Series voltage regulators provide highly regulated sinewave voltage output with less than 3% harmonic distortion. CVS transformers are commonly used in industrial applications where voltage regulation is of primary importance. This unit is only available in the hardwired form and is recommended for installation at the distribution panel.

Specifications

Input

VA Ratings: 30 to 7,500 VA. Input Voltage Range: $+10/-20\%$ of nominal.

Output

Voltage Regulation: $\pm 1\%$ for an input line variation of $+10/-20\%$. No loss of output for line loss of 3 mSec. **Overload:** Output collapses with overload; limits output current to a maximum of 2x rated current. **Output Harmonic Distortion:** 3% total RMS content at full load. **Harmonic Rejection:** Rejects severe waveform harmonics. **Noise Isolation:** 40 dB common and normal mode. **Surge Suppression:** UP to 6,000 Volt surges are suppressed to safe levels per ANSI/IEEE C62.41-1980 Class A and B waveforms. **Efficiency:** Up to 92% at full load.

Environmental

Operating Temperature: -20°C to $+50^{\circ}\text{C}$. Audible Noise: 34 dB to 65 dB.

Approvals

Listed to UL 1012; Certified to CSA C22.2, No. 66.

Warranty

10 year limited warranty.

60 Hz

Applications

- Marine Navigation Equipment
- Analytical Laboratory Equipment
- Photographic Enlargers
- Photo Processing Equipment
- Closed Circuit TV Transmission
- Sound/Recording Systems

Sola Hardwired MCR 120 VA to 15 kVA

Features and Benefits

- Protects Facility Wiring From Odd-Order Harmonics (Excessive Currents in Building Wiring) Caused by Switchmode Power Supplies (Computer Loads); Non-Linear Load Currents are Reflected Back to the Utility as Near Sinewave
- Regulates Voltage, Provides Surge Suppression, Isolation and Harmonic Filtering
- Acts as a Stepup or Stepdown Transformer
- Rugged Design Handles Hostile Industrial Environments
- Smooth $\pm 3\%$ Voltage Regulation for Input Variation of $+10$ to -20%
- 10-Year Warranty; 25-Year Typical Life

Permanent Protection Against Surges, Sags, Spikes, Brownouts, Harmonics and EMI/RFI Noise

The Sola Hardwired MCR Series protects equipment from nearly all power problems short of a total power failure. Hardwired MCR models are designed to be permanently wired into the user's system and are available in sizes from 120 VA to 15 kVA.

Specifications

Input

VA Ratings: 120 to 15,000 VA. Input Voltage Range: $+10/-20\%$ of nominal.

Output

Voltage Regulation: $\pm 3\%$ for an input line variation of $+10/-20\%$ (50 Hz units $\pm 5\%$). No loss of output for complete line loss of 3 mSec. **Overload:** Output collapses with overload; limits output current to a maximum of 2x rated current. **Output Harmonic Distortion:** 3% total RMS content at full load. **Harmonic Rejection:** Rejects severe waveform harmonics. **Noise Isolation:** 120 dB common mode; 60 dB normal mode. **Surge Suppression:** UP to 6,000 Volt surges are suppressed to safe levels per ANSI/IEEE C62.41-1980 Class A and B waveforms. **Efficiency:** Up to 92% at full load.

Environmental

Operating Temperature: -20°C to $+50^{\circ}\text{C}$. Audible Noise: 35 dB to 65 dB.

Approvals

60 Hz: Listed to UL 1012; Certified to CSA C22.2, No. 66. 50 Hz: Models comply to VDE 0805, 0806, and 0550.

Warranty

10 year limited warranty.

Also Available: 60 V input models and 50 Hz models.

Applications

- Programmable Logic Controllers (PLCs)
- Machine Tools
- Computer Loads
- Robotics
- Industrial Panels
- Electronic Equipment

Sola Portable MCR — 70 VA to 3 kVA

Applications
 ► PC-Type Computers
 ► POS Terminals

► Telephone Systems
 ► Facsimile Machines
 ► Small Printers

► Lab Equipment
 ► Security Systems
 ► PCs, LAN, WAN

Features and Benefits

- Portable, Quiet and Easy to Use, The MCR is Ideal for Office and Home Use
- Sinewave Output Even With a Distorted Source; Input Harmonics Are Eliminated
- Smooth $\pm 3\%$ Voltage Regulation for Input Variation of +10 to -20%
- Lower Output Impedance Easily Powers Computers
- Reduces Wear on Components for Longer MTBF on Your Electronic Equipment
- 10-Year Warranty; 25-Year Typical Life

Cost-Effective Power Protection for the Office or Home

The Sola MCR Portable Series power conditioners provide excellent protection from surges, sags, spikes, brownouts, harmonics and EMI/RFI noise. Data-sensitive and microprocessor-based systems are susceptible to errors, damaged components and lost operating time caused by these voltage disturbances. These power-related problems vanish and your system's performance improves when it receives clean, regulated noise-free power from the Sola MCR.

Specifications

Input

VA Ratings: 70 to 3,000 VA. Input Voltage Range: +10/-20% of nominal.

Output

Voltage Regulation: $\pm 3\%$ for an input line variation of +10/-20% (50 Hz units $\pm 5\%$). No loss of output for complete line loss of 3 mSec. **Overload:** Output collapses with overload; limits output current to a maximum of 2x rated current. **Output Harmonic Distortion:** 3% total RMS content at full load. **Harmonic Rejection:** Rejects severe waveform harmonics. **Noise Isolation:** 120 dB common mode; 60 dB normal mode. **Surge Suppression:** UP to 6,000 Volt surges are suppressed to safe levels per ANSI/IEEE C62.41-1980 Class A and B waveforms. **Efficiency:** Up to 90% at full load.

Environmental

Operating Temperature: -20°C to +40°C. Audible Noise: 34 dB to 49 dB.

Approvals

Listed to UL 1012 and designed to meet UL 478. Certified to CSA C22.2, No. 66 (all models except 3000 VA).

Warranty

10 year limited warranty.

Sola Portable MPC — 70 VA to 1 kVA

Applications
 ► Monitors
 ► Diagnostic Equipment

► Imaging Systems
 ► Any Data Sensitive Patient Care Equipment
 ► Medical Carts

Features and Benefits

- Exceptionally Low Leakage Current Exceeds the Requirement of UL 544
- Safe to Use; Units are UL Listed to 1012 and 544, Also Certified to CSA 22.2 and 100.66
- Orange Output Receptacles With Green Triangles Indicate the MPC has Isolated Ground Outputs and Is Safe for Hospital Grade Use
- Quiet, Portable and Easy-To-Use; Just Plug It In

Reliable Power Protection for Critical Medical Applications

The Sola MPC Series medical power conditioner is your prescription for effective protection from surges, sags, spikes, brownouts and noise. Imaging systems, monitors, diagnostic and patient-care equipment are prone to loss of data integrity, poor performance and increased downtime caused by electrical disturbances. Safely protect your vital equipment from power-related problems and increase performance with regulated, noise-free power from the MPC.

Specifications

Input

VA Ratings: 250, 500, 1,000 VA. Input Voltage Range: +10/-20% of nominal.

Output

Voltage Regulation: $\pm 3\%$ for an input line variation of +10/-20%. No loss of output for complete line loss of 3 mSec. **Overload:** Output collapses with overload; limits output current to a maximum of 2x rated current. **Output Harmonic Distortion:** 3% total RMS content at full load. **Harmonic Rejection:** Rejects severe waveform harmonics. **Noise Isolation:** 120 dB common mode; 60 dB normal mode. **Surge Suppression:** UP to 6,000 Volt surges are suppressed to safe levels per ANSI/IEEE C62.41-1980 Class A and B waveforms. **Efficiency:** Up to 87% at full load.

Environmental

Operating Temperature: -20°C to +40°C. Audible Noise: 43 dB.

Approvals

Listed to UL 1012 and UL 544. Less than 50 μ A leakage current for indirect patient care products per UL 544. Designed to meet UL 478. Certified to CSA C22.2, No. 66.

Warranty

10 year limited warranty.

SOLA 310

300, 400, 750 and 1000 VA, 50/60 Hz, Single Phase UPS

Applications

- Personal Computers
- File Servers
- LAN Equipment
- Retail/POS Equipment

- Telecommunications
- Industrial Controllers
- Modems

Features and Benefits

- Critical Protection When Power Fails** — When A Blackout Occurs, The SOLA 310 Instantly Transfers To Internal Battery Without Interrupting Your Critical Load
- Voltage Regulation** — If Incoming Voltage Is Low, The SOLA 310 Boosts Output Voltage Without Draining The Internal Battery. If Line Voltage Is Too High, The SOLA 310 Automatically Provides Power From Its Battery
- Cold Start Feature** — Allows Smooth UPS Start Up Without AC Input (Mains) or Generator Power

- System Communications** — SOLA 310 Communicates Critical Information To Your Computer or Network Through The DB-9 Port On The Rear Panel Of The Unit
- Diagnostics** — Functionality and Battery Status Are Automatically Tested Upon System Start Up. A Test Button Allows You To Confirm Proper UPS Operation At Any Other Time
- Internal, Maintenance-Free Battery** — SOLA 310 Is Equipped With A High-Quality, Long-Life, Rechargeable Battery

Specifications

Input

Voltage Range: 93-137 V; $\pm 3\%$. **Frequency:** 50/60 Hz auto-sensing.

Output

Waveform: Modified sine wave. **Line Mode Regulation:** For input voltage between +15% and -15% of nominal, $V_{out} = V_{in}$; for input voltage between -15% or -22.5% of nominal, $V_{out} = V_{in} \times 1.12$. **Battery Mode Regulation:** For input voltage beyond +15% or -22.5% of nominal, $V_{out} = V_{nom} \pm 10\%$. **Battery Recharge Time:** 8 hours to rated runtime at $V_{in} = V_{nom}$. **Transfer Time:** <10 ms (typical in blackout condition). **Frequency:** Line Mode or Boost Mode, same as input frequency; Battery Mode — 50 Hz/60Hz, ± 1 Hz, auto-select.

Status Indicators and Controls

Front Panel: Normal — Green LED; Back-up (on battery) — Steady yellow LED; Battery Low — Blinking yellow LED; Fault — Red LED; Test/Silence Pushbutton. **Rear Panel:** ON/OFF — Switch; Input Receptacle — Fused IEC; Contact Closure Interface — DB-9 Connector compatible with all major networks and operating systems (signals include AC utility fail, low battery and remote shut down). **Audible (Alarm):** Line Loss — One beep every four seconds; Battery Low — One beep every second; UPS Fault — Continuous tone; Overload — Continuous tone.

Environmental

Operating Temperature: 0° to 40°C (32° to 104°F). **Storage Temperature:** -20° to 50°C (-4° to 122°F). **Humidity:** 0 to 95%, non-condensing. **Acoustic Noise Level:** <45 dB (on battery back-up). **Cooling:** Convection cooled.

Approvals

Listed to UL 1778, CSA 22.2 No. 107. TÜV EN50091-1 (1993.05). Compatible with all major network operating systems.

Warranty

Full two-year warranty. Extended Warranty and Service Plans are available.

SOLA 510

600, 900, 1250, 1650 and 2000 VA, 50/60 Hz, Single Phase, Sine Wave UPS

Applications

- Personal Computers
- File Servers
- LAN Equipment
- Retail POS Systems

- Telecommunications
- Industrial Controllers
- Modems

Features and Benefits

- Sine Wave Output** — Sine Wave Inverter Technology Is Compatible With The Widest Variety Of Loads, Including Switch-Mode Power Supplies
- Critical Protection When Power Fails** — When A Blackout Occurs, The SOLA 510 Instantly Transfers To Internal Battery Without Interrupting Your Critical Load
- Voltage Regulation** — If Incoming Voltage Is Low, The SOLA 510 Boosts Output Voltage Without Draining The Internal Battery. If Line Voltage Is Too High, The SOLA 510 Automatically Provides Power From Its Battery

- System Communications** — SOLA 510 Communicates Critical Information To Your Computer or Network Via RS-232 Through The DB-9 Port On The Rear Panel Of The Unit — SNMP Ready.
- Diagnostics** — Functionality and Battery Status Are Automatically Tested Upon System Start Up — Front Panel Buttons Confirm Proper UPS Operation and Display Size Of Supported Load
- Internal, Maintenance-Free Battery** — SOLA 510 Is Equipped With A High-Quality, Long-Life, Rechargeable Battery
- Add-On Battery Capability** — Optional Battery Packs Providing Extended Back-Up Time Are Available For 1650 VA and 2000 VA Units

Specifications

Input

Voltage Range: 97-137 V; $\pm 2\%$. **Frequency:** 50/60 ± 3 Hz auto-sensing.

Output

Waveform: Sine wave. **Line Mode Regulation:** For input voltage between +15% and -15% of nominal, $V_{out} = V_{in}$. For input voltage between -15% or -20% of nominal, $V_{out} = V_{in} \times 1.12$. **Battery Mode Regulation:** For input voltage beyond +15% or -20% of nominal, $V_{out} = V_{nom} \pm 10\%$. **Battery Recharge Time:** 8 hours to rated runtime at $V_{in} = V_{nom}$. **Transfer Time:** 4 ms typical. **Frequency:** Line Mode or Boost Mode, same as input frequency; Battery Mode — 50 Hz/60Hz, ± 0.1 Hz, auto-select.

Environmental

Operating Temperature: 0° to 40°C (32° to 104°F). **Storage Temperature:** -20° to 50°C (-4° to 122°F). **Humidity:** 0 to 95%, non-condensing. **Acoustic Noise Level:** <45 dB (on battery back-up). **Cooling:** Convection cooled, 600 VA. All others fan cooled in back-up mode.

Status Indicators and Controls

Front Panel: Test Switch/Alarm Silence Switch; LED Indicators — Power on/AC present; Battery mode; Battery low/weak (steady/flashing); Fault; Overload; Load level in 25% increments. **Rear Panel:** ON/OFF — Switch; Fuse/Circuit Breaker; DB-9 Connector — RS-232/Contact Closure Interface compatible with all major networks and operating systems (signals include AC utility fail, low battery and remote shut down). **Audible (Alarm):** Line Loss — One beep every four seconds; Battery Low — One beep every second; UPS Fault — Continuous tone; Overload — Continuous tone.

Approvals

Listed to UL 1778, CSA 22.2 No. 107. Compatible with all major network operating systems.

SOLA 700

The Ultimate In Power Protection For Mission-Critical Applications
1.0-3.0 kVA, 50/60 Hz, Single Phase, On-Line UPS

Applications

- Midrange Computer Systems
- Computer Aided Design/Manufacturing Workstations
- File Servers
- Retail POS Systems
- Industrial Controls and Automation
- Telecommunications Systems
- Medical Diagnostics
- Robotics

Features and Benefits

- **True On-Line UPS** — When A Blackout Occurs, The SOLA 700 On-Line Inverter Provides Continuous, No Break, Transferless Power To Your Critical Load
- **Magnetically Isolated, Low Impedance** — SOLA 700 Provides Exceptional Noise and Spike Attenuation While Supplying, Undistorted, The Peak Current That Your Load Needs
- **Active Power Factor Corrected Input** — The SOLA 700 Eliminates Excessive Harmonic Currents In Building Wiring Because The Input Current Is Sinusoidal, Even With Non-Linear, High Harmonic Current Loads. SOLA 700 Input Is Exceptionally High Power Factor and Low Current Distortion, Regardless Of Load
- **Unity Power Factor (Watts=VA) Inverter** — Designed To Run Modern, Active Power Factor Corrected Loads With No Derating. SOLA 700 Provides More True Power
- **Sophisticated Battery Management** — SOLA 700 Assures The Longest Battery Life With A Microprocessor-Controlled Charger That Temperature Compensates, and Auto-Equalizes The Battery
- **SNMP Ready, Advanced RS-232 Interface** — System Operating Modes, Metering Functions, Alarm Messages, and Programmable Threshold Levels Are Automatically Provided
- **Compatible With Novell®, 3-Com®, Banyan®, and Microsoft® Networks**
- **Add-On Battery Capability** — Optional Battery Packs Protect From Extended Power Failures
- **Cold Start Capability** — Smooth Start-Up Even If There Is No AC Line or Generator Available Prior To Blackout; Unlike Most UPS Systems
- **Two Year Warranty** (On-site for 2.2 KVA and 3.0 KVA Models)

Specifications

Input

Voltage Range: +12 to -20% of set nominal input voltage. **Frequency Range:** ±5 Hz of Nominal; 1 Hz/sec. without loss of phase lock. User programmable for narrower window to ±1 Hz. **Power Factor:** Typically 0.98 or greater, regardless of load. **Input Current Distortion:** Typically 5% or less, regardless of load. **Protection (Input Circuit Breaker):** 1.0 kVA/220-240 V_{IN} — 10 A; 1.2 kVA/110-120 V_{IN} — 15 A; 2.2 kVA/110-120 V_{IN} — 30 A; 2.2 kVA/200-240 V_{IN} — 20 A; 3.0 kVA/110-120 V_{IN} — 50 A; 3.0 kVA/200-240 V_{IN} — 30 A. **DC Input (Breaker Protected):** 1.0/1.2 kVA — 48 VDC; 2.2/3.0 kVA — 60 VDC × 2 (120 VDC). **DC Input (Amps Max. With Full Computer Load):** 1.0 kVA — 18.25 A @ 40 VDC; 1.2 kVA — 21.9 A @ 40 VDC; 2.2 kVA — 15.5 A @ 100 VDC; 3.0 kVA — 21.2 A @ 100 VDC.

Output

Waveform: Low impedance, pure sine wave with typically less than 3% THD. **Voltage Regulation:** Smooth and stepless, typically ±2%. **Frequency:** ±0.1% during AC fail. **Transfer Time:** None. True on-line inverter always runs the load whether AC is present or during AC fail. **Noise Attenuation:** >120 dB Common Mode and >60 dB Normal Mode. **Surge Attenuation/Lightning Protection:** IEEE 587 (ANSI C62.45-1991) Category B 6 kV, 3 kA spikes to less than 15 V. Category A 6 kV, 200 A spikes to less than 0.5 V common mode and less than 10 V normal mode. **Leakage Current:** 110/120 V input models have less than 500 µA to meet the leakage current requirement of UL 544. High voltage models when hardwired meet IEC 601 medical leakage current requirements. **Overload Protection:** Fused inverter is current limited, overload protected, and short circuit proof. **Available Peak Current:** AC Present — 1400% for 1/2 cycle, 700% for 1 cycle, 500% for 1 second; AC Fail — 300% peak, 150% 10 seconds, 130% 5 minutes, 110% continuous.

Battery

Type: Sealed maintenance-free, 3-5 years typical life. **Recharge Time:** Typically 8 hours.

Status Indicators and Controls

Front Panel: Output, AC Fail, and Overload LEDs 3-digit, 7-segment LED display indicates — output voltage, input voltage, output current, battery voltage, battery current, % load, line frequency, and alarm codes. Alarm silence and meter select pushbuttons. **Rear Panel:** Output enable switch, Dip switches to set voltage/frequency configurations, circuit breaker(s), and DB-9 connector for Interface. **Network Interface:** The SOLA UPS Interface provides normally open and closed contacts for AC fail and low battery. Remote off is included. Compatible with all major network and operating systems. When queried by an RS-232 signal, the network interface converts to a full-featured RS-232 interface that is ready for advanced communications and diagnostics with your system or a SOLA SNMP Remote Interface Unit. **EPO Contacts:** Normally closed contacts for Remote Emergency Power Off.

Environmental

Operating Temperature: 32° to 104°F (0° to 40°C). **Storage Temperature:** -4° to 122°F (-20° to 50°C). **Relative Humidity:** 5 to 95%, non-condensing. **Altitude:** 5000 ft. without deration. **Cooling:** Fan cooled, speed controlled. **Audible Noise:** Typically 45 dB or less.

Mechanical

Weight: 1.0/1.2 kVA — 95 lbs., Optional casters; 2.2 kVA — 210 lbs., Standard casters and leveling feet; 3.0 kVA — 240 lbs., Standard casters and leveling feet.

Approvals

110/120 V and 208 V Models: UL 1778 and 1449, CSA 107.1, and CE Mark. **200/240 V Models:** UL 1778 and 1449, CSA 107.1, TUV, and CE Mark.

Notes: 1. Output voltage same as input voltage, except that a low voltage output that is half the high voltage output is available. For example: When set for 230 V input, the low voltage output tap will be 115 V. For USA applications of 208 V input/output, the low voltage tap becomes 120 V. The low voltage tap is limited to 75% of the UPS kVA/kW rating. 2. UPS is easily user settable for 110 V, 50 Hz operation. UPS kVA/kW rating is derated to 83%. 3. These are true world models,

bearing the CE mark, full safety agency approvals (UL/CSA/TUV) and conformance to European normalized standards. 4. Unit requires optional receptacle panel, see options listed below. 5. Hardwired Input/Output: standard, includes conduit knock-outs. Optional output receptacle panels and optional input line cord are available.

Optional Battery Pack Runtimes In Minutes (Full Load/Half Load)

Stock No.	Mfr.'s Type	1.0 KVA	1.2 KVA	2.2 KVA	3.0 KVA	Dimensions H x W x D inches (mm)	Weight (Lbs.)	EACH

Notes: 1. Runtimes: Full load/half load in minutes. All packs are UL/CSA/TUV; and bear CE Mark. 2. 912-4833-31 and 912-12033-31 battery packs include an internal charger. 3. Charger packs are 90-137 and 160-269 V, 45-65 Hz auto-ranging input. 4. 912-12033-31: 2 boxes; total weight 342 lbs.; 21"H (534 mm) when stacked. SOLA 700 UPS is

designed for unlimited runtime. SOLA 700 battery packs can be daisy-chained for additional runtime, or custom systems can be designed for extra long runtime needs. For larger applications, SOLA Interact 5 kVA UPS (56-503-99) is available.

Advanced Network Plus UPS

400, 600 and 1000 VA; 120 V, 60 Hz, Single Phase, Isolated and Regulated, Line-Interactive UPS

Applications

- Retail/POS Terminals and Equipment
- Industrial Computers and PLCs
- LAN Equipment

- CAD/CAM Workstations
- Telecom/Datacom Equipment

Features and Benefits

- Generous Internal Battery For Extended Runtime. Over 90 Minutes For A Typical PC
- Hot Swappable Batteries. User Replaceable, Without Powering Down Critical Loads
- Low-Impedance Isolation Transformer With Neutral-Ground Bond On Output For Superior Protection Against Surges, Spikes, and EMI/RFI

- Add-On Battery Packs For Additional Protection During Extended Power Failures
- Battery Monitoring Shows Runtime Remaining and Alerts You When The Battery Is Marginal and Should Be Replaced
- "Upward Compatible" Network Interface; Communicates With All Major Networks and Operating Systems; SNMP Ready
- Standard 2 Year Warranty

Extended Runtime Power Protection For Industrial and Retail Electrical Environments

Sola's Advanced Network Plus is a patented, line-interactive, microprocessor-based UPS with an internal battery backup capacity two to three times as long as competitive units.

Specifications

Status Indicators and Controls

Controls: On/Off, Output Enable, Load Test and Alarm Silence. **Status Indicators, Visible:** Power On — Green LED; AC Fail — Yellow LED; Alarm — Red LED; Alphanumeric LED Display Indicates — Low AC Volts, % Load, Battery Time Remaining, Voltage Input, and Voltage Output. The display also provides alarm codes that indicate — Low Battery, Battery Not Present, Replace Battery, System Fail, Inverter Fail, Charger Fault, Overload Shutdown, and High Temperature Shutdown. **Audible:** Coincides with alarm code.

Mechanical

Dimensions (H x W x D) Inches (mm): Portable — 10.2 x 8.2 x 18.9 (259 x 208 x 480); Hardwired — 10.2 x 8.2 x 21 (259 x 208 x 533). **Color:** Computer white.

Output Panel

Portable: Contains 6 NEMA 5-15R receptacles. **Hardwired:** 5-position input/outputs terminal block accessible through rear junction box with knock-outs.

Environmental

Operating Temperature: 32° to 104°F (0° to 40°C). **Storage Temperature:** -4° to 104°F (-20° to 40°C). **Humidity:** 0 to 95%, non-condensing. **Altitude:** 8000 feet. **Cooling:** Convection cooled inverter (400 VA and 600 VA). Fan cooled inverter (1000 VA).

Approvals

UL 1778 and CSA STD 107.1.FCC Class A, Canadian DOC Class A, NOVELL approved.

Warranty

Full two-year warranty. Extended warranty and service plans available.

Advanced Network Rackmount

900 and 1300 VA Rackmount; 120 V, 60 Hz; Single Phase, Line-Interactive, Sine-Wave UPSs

Applications

- Industrial Controllers
- File Servers
- Workstations
- Telecom/Datacom Equipment

- Minicomputers
- Test Fixtures
- Robotics

Features and Benefits

- Line-Interactive Design Provides Voltage Regulation and Enhanced Surge and Noise Filtering
- Input Voltage Boost Eliminates Battery Depletion During Brownouts
- Easy To Read Display Alerts You To All UPS Functions

- Unity Power Factor Output (VA = W)
- Battery Monitoring Alerts You When The Battery Is Marginal and Should Be Replaced
- "Upward Compatible" Network Interface; Communicates With All Major Networks and Operating Systems; SNMP Ready
- Standard 2 Year Warranty

Sine Wave Power Protection For Industrial Electrical Environments

The Sola Advanced Network UPS provides a sine-wave output compatible with a wide variety of switch-mode, linear and inductive loads.

Specifications

Output

Transfer Time: Typically 2-4 ms. **Noise Suppression:** 60 dB (common and normal mode). **Surge Protection:** ANSI/IEEE C62.41 Class A and B 6000 volt spikes are safely attenuated to a low let-through of 0.3%. **Harmonic Distortion:** Less than 3% THD (from inverter). **Lightning Protection:** Suppresses ANSI/IEEE 6000 volt surges to a let-through of <0.3%.

Battery

Type: Maintenance-free lead-acid battery. **Battery Recharge Time:** 8-12 hrs. typical.

Status Indicators and Controls

Controls: On/Off, Load Test and Alarm Silence switches. **Status Indicators:** Green Output LED, red AC Fail LED and red Alarm LED. Alarm LED also flashes different patterns to indicate Battery Not Properly Charged, No Phase Lock and Inverter Overload. (See Network Interface for additional indicators).

Environmental

Operating Temperature: 0° to +40°C. **Storage Temperature:** -15° to +50°C. **Humidity:** 0 to 95%, non-condensing. **Altitude:** 0 to 8200 feet maximum. **Cooling:** Fan cooled (while operating on battery power).

Mechanical

Dimensions (H x W x D) Inches (mm): Rackmount — 7 x 19.05 x 17.05 (177.8 x 483.87 x 433.07). **Color:** Rackmount — Black.

Approvals

Listed to UL 1778 and CSA approved. Meets FCC and Canadian DOC Class "A".

Warranty

Full two-year warranty. Extended warranty and service plans available.

*900 and 1300 VA only.

120 V/60 Hz, Input and Output

*Configured for 19" rackmount installation.

Network Interface

The SOLA UPS Interface provides normally open and closed contacts for AC fail and low battery. Remote Off is included. Compatible with all major network and operating systems. When queried by an RS-232 signal, the network interface converts to a full-featured RS-232 interface that is ready for advanced

communications and diagnostics with your system or a SOLA SNMP Remote Interface Unit. Sola Network Interface is standard on UPS products above.

Sola 700 Options

*All 999-XXXX-99 options are SOLA installed. Order with the UPS. Call Allied for pricing.

Required Output Panel For The 1.0 KVA UPS, Select 1*

- 999-908-01-99, French 230 V x 2
- 999-909-01-99, Schuko CEE-7 x 2
- 999-910-01-99, British 230 V/13 A x 2

- 999-1410-99, NEMA L14-30 R x 2
- 999-1411-99, IEC-320-10 A x 4
- 999-1412-99, IEC-320-16 A x 2
- 999-1413-99, Australian 240 V/10 A x 2
- 999-1414-99, British 230 V/10 A x 2
- 999-1415-99, Schuko CEE-7 x 2
- 999-1416-99, Blank Plate (Two are standard for hardwired)

Line Cord Options: 2.2 and 3.0 KVA*

- 999-1420-99, Line Cord L5-50 P (3.0 KVA, 120 V)
- 999-1421-99, Line Cord L5-30 P (2.2 KVA, 120 V)

Line Cord Options — Continued

- 999-1422-99, Line Cord L6-20 P (2.2 KVA, High Voltage)
- 999-1423-99, Line Cord L6-30 P (3.0 KVA, High Voltage)
- 999-1424-99, Line Cord L14-20 P (2.2 KVA, High Voltage)
- 999-1425-99, Line Cord L14-30 P (3.0 KVA, High Voltage)

Battery Packs: Optional

- 912-4814-01, 48 V 14 Ah, (For 1.0/1.2 KVA UPSs)
- 912-4833-31, 48 V 33 Ah, (For 1.0/1.2 KVA UPSs)
- 912-12014-01, 120 V 14 Ah, (For 2.2/3.0 KVA UPSs)
- 912-12033-31†, 120 V 33 Ah, (For 2.2/3.0 KVA UPSs)

†Consists of two boxes.

Optional Hardware

- 999-1440, Caster Option (1.0/1.2 KVA UPSs and Battery Packs)
- 999-1460, Maintenance Bypass Switch (2.2/3.0 KVA Hardwired Units Only; 40 A, 3-pole MBS is UL/CSA/TUV)
- 999-1450-99, IBM® AS/400® Interface (2.2/3.0 KVA Only)

UPS Software and Cabling For Computer Interface

Software packages and necessary cabling by Sola. Allows you to maintain control of your system even when your power source fails. Whether you want automatic system shutdown or monitor your systems power status, Sola has the proper UPS connectivity solution for your needs. Contact factory for specific applications for other operating systems.

Solid Power Supplies

Printed Circuit Mounting

Series Regulated Solid Power Supplies are designed for printed wiring board mounting and point of use regulation. Single, dual or triple tracking outputs are available. Solid power supplies feature automatic overload protection. Operation at rated load from -25°C to 50°C ambient. Fully tested and 'burned-in' three times. **Specifications. Source (Input) Voltage:** 115 VAC ±10 VAC (50 to 400 Hz). **Output Voltage Accuracy:** ±1%. **Operating Ambient Temp.:** -25°C to 70°C. **Temp. Effect Coefficient:** 0.02% per °C. **Storage Temp.:** -25°C to 85°C. **Source (Input) Isolation:** 50 megohms. **Source (Line Regulation):** ±.05% or 2.5 mV. U.L. Recognized, CSA certified.

Linear Encapsulated Power Modules — Chassis Mount

The 85-Series Direct Chassis Mount Modular Power Supplies are designed for applications where printed circuit mounting is impractical or undesirable. Total epoxy encapsulation is an advantage where high vibration or adverse atmospheric conditions exist. The convenience of threaded insert mounting and terminal strip connections allows easy prototyping and efficient one-shot design work. Single, dual or triple outputs are available. 5 V outputs come with overvoltage protection, set to trip at 6.2 V nominal. Specifications for chassis mount models are the same as those for printed circuit mount models. Quantity pricing always available.

Low Wattage Multi Output Switchers

- Features**
- High Efficiency
 - Built in EMI Filter
 - UL Recognized
 - CSA Certified
 - VDE Certified
 - Industry Standard Packages
 - Meets FCC and VDC Class A Emissions
 - 100% Burn In
 - Dual Input Voltage 115/230 VAC
 - Over Voltage Protection
 - Short Circuit Protection

- Applications**
- CRT Monitors
 - Disk Drives
 - Terminals
 - Peripheral Equipment
 - Testing Equipment
 - Microprocessor Based Systems

- Specifications Summary**
- All Unit Voltage Selectable 90-130 VAC /180-260 VAC
 - AC Input Frequency 47-63 Hz
 - 65% Efficiency Typical
 - Overcurrent Protection on all Outputs
 - 20 MS Hold Uptime @ Full Load
 - MTBF Greater than 50 k hrs. @ Full Load
 - In Rush Current: 60 Amps @ 115 VAC; 8 Amps @ 230 VAC Typical

Designed to provide the industry with a quality power supply at competitive prices.

- Overvoltage Protection**
► Automatic Overload Protection
► 10 mS Holdup Time Minimum at 100 VAC Input
► UL Recognized, CSA Certified

- 240 Watt Model Is VDE Certified**
► Remote Sense
► Soft Start
► Warranted for One Full Year

Input
Input Voltage: Limit — 90-132 VAC, 180-264 VAC, User Selectable. **Input Frequency:** Limit — 47-400 Hz, Single Phase.
Input Protection: Limit — External Fuse Required. **Inrush Current:** Condition — 115 VAC; Limit — 16 Amperes Peak.

Output
Regulation Line and Load: Limit — .25%. **Holdup Time:** Condition — 100 VAC/Full Load; Limit — 10 mS Minimum.
Output Overshoot: Condition — Turn On/Off; Limit — 2%. **Overvoltage Protection:** All models. **Output Ripple:** Condition — Full Rated Load; Limit — 0.3% RMS Total.

General
Operating Temp.: Condition — Full Rated Load; Limit — 0 to 40°C. **Storage Temp.:** -40 to 85°C. **Efficiency:** Condition — Full Rated Load; Limit — 65% Minimum. **MTBF:** Condition — Per MIL-HDBK 217D; Limit — 50,000 Hours.
Vibration: Condition — Designed to Meet MIL-STD-810D, Method 514.3, Category 1, Procedure I. **Shock:** Designed to Meet MIL-STD-810D, Method 516.3, Procedure II.

Regulated Linear Single Output

- Convection Cooled**
► Complete Serviceability

- Constant Voltage**
► Overvoltage Protection Available

Low cost DC power supplies give you a precise integrated circuit regulator with superior drift characteristics. Features short circuit protection, automatic foldback current limiting, automatic reset, and isolated, floating output. Low noise and ripple (part). Designed for both bench and rack use.

Input
Input Voltage: Limit — 104-127 VAC, 208-254 VAC. **Input Frequency:** Limit — 50-400 Hz.*

Output
Source and Load Effect Combined: Limit — Regulation Line and Load; Limit — ±0.1%. **Pard (Ripple and Noise):** Limit — 0.1% pk/pk. **Periodic Deviations (ripple):** Limit — 10 mv RMS. **Output Voltage Adjustment:** Limit — ±5% Minimum. **Overvoltage Protection:** Limit — Available for all models as an option. Provides both transient and power supply malfunction protection. **Transient Recovery time:** Condition — (1/2 L to FL); Limit — Less than 20µ Sec.

General
Storage Ambient Temp.: Limit — -40°C to +85°C. **Operating Ambient Temp.:** Limit — 0°C to +55°C. **Temp. Effect Coefficient:** Limit — 0.03%/°C. **Polarity:** Limit — May be used positive or negative. **Short Circuit Protection:** Limit — Protected with automatic recovery. **Max. Allowable Lead Drop For Remote Sensing:** Limit — 5%. **Max. Output Current:** Limit — 120% rated current. **Max. Short Circuit Current:** Limit — 30% rated current. **Input/Output Isolation:** Limit — 1000 Megohms D.C., 2500 VAC.

*Derate load to 75% for 400 Hz operation. Specifications are typical, contact factory for more information.

SOLA Silver Line Linears

- Features**
- ▶ Tight Regulation, 0.10% Line and Load Combined
 - ▶ Full Output Ratings to 50C
 - ▶ Built-In OVP on 5V Models (Optional on 12 V, 15 V, 24 V)
 - ▶ Foldback Current Limiting
 - ▶ 100% Four-Hours Burn-In
 - ▶ Warranted for 2 Full Years
 - ▶ UL Recognized, CSA and TÜV Certified
 - ▶ These Models Are Form, Fit and Function Replacement for Most Major Manufacturers

- Specification Summary**
- ▶ Input AC Voltage Selectable 100/120/220/230/240
 - ▶ Input Frequency: 47 to 63 Hz
 - ▶ Ripple: 3.0 mV Maximum p-p
 - ▶ D.C. Output Adjustment: $\pm 5\%$ Minimum
 - ▶ Transient Response Time: 50 μ Sec. for 50% Load Changes
 - ▶ Remote Sensing
 - ▶ Operating Temperature: 0 to $+50^{\circ}\text{C}$
 - ▶ EM/RFI Meets FCC Class B and VDE 0871 for Class B
 - ▶ Shock/Vibration Per MIL-STD-810C

CVDC Series Regulated Constant Voltage Supplies

- Features**
- ▶ Isolated Output
 - ▶ Short Circuit Protected
 - ▶ Operating Temperature at 50°C
 - ▶ MTBF Greater Than 300,000 Hours
 - ▶ High Efficiency
 - ▶ Warranted for One Full Year
 - ▶ UL Recognized, CSA Certified

- Applications**
- ▶ Process Controls
 - ▶ Drives
 - ▶ Telecommunications

Rugged, simple and dependable power supplies in both modular and rack-mount styles. Units contain a constant voltage transformer, rectifier and filter circuit, and provide tight regulation, quick response isolation and current limiting.

Specifications

Input
Input Voltage: 100 to 130 VAC 60 Hz.

Output
Source Frequency Effect: Actual variation is approximately 1.4 percent voltage change for a 1 percent frequency increase or decrease. Line Regulation: $\pm 1\%$. Load Regulation: $\pm 5\%$ ($1/2$ FL to FL). Periodic Deviations (Ripple): 1% RMS of output. Ripple — Telecommunications Models: 35 dBm C (15 mV RMS). Response Time: 25 msec.

General
Efficiency @ Full Load: 80% to 90%. Operating Ambient Temp.: 0°C to 50°C . Current Limit: 250% rated current.

Rack-Mount Style

Single phase. Standard 19" rack mount. PARD is 1% of output voltage.

100-130 VA 60 Hz Input Source

Copperline High Power Adjustable DC Power Supply

- Features**
- ▶ Universal 120/240 VAC, 50/60 Hz Input
 - ▶ Single Supply for Multiple Applications
 - ▶ Parallel Operation for Increased Power Output
 - ▶ UL Recognized, CSA Certified
 - ▶ Reliable SCR Design
 - ▶ Warranted for One Full Year
 - ▶ Adjustable Voltage From 2 to 50 Volts
 - ▶ Can Be Paralleled for More Power
 - ▶ Adjustable Constant Current From 0 to 100%

- Applications**
- ▶ Engineering Bench Supply
 - ▶ Slot Power Supply
 - ▶ Telecommunications
 - ▶ Manufacturing Test Applications
 - ▶ Automotive Product Testing
 - ▶ DC Motor Drives
 - ▶ Relay and Solenoid Drives

Copperline supplies can be used in either a constant voltage or constant current mode. The Copperline offers such features as a single supply to be used in applications where separate supplies are required for each output voltage. Three phase operation for high current, low ripple operation may be achieved by connecting three Copperline power supplies to three different phases and connecting the power supply outputs in parallel. Large filter capacitors provide low noise operation over a wide line range. Panel mounted voltage control provided AC.

Specifications

Input
Input Voltage: 105-130/210-260 VAC (user selectable). Input Frequency: 47-63 Hz. Input Protection: Ext. slow-blow fuse required.

Output
Line Regulation: 0.1% or 50 mV. Load Regulation: 0.1% or 50 mV. Output Ripple @ Full Rated Load: 1.0% or 50 mV RMS max.

Controls
Current Limit Adjust: 0-100%. Output Volt Adjust: 10-100% coarse adjust (may be mounted remotely). Fine adjust fine tunes output for no load and full load conditions.

General
Operating Temp. @ Full Rated Load: 0 to 50°C . Storage Temp. @ Full Rated Load: -20 to 70°C . Efficiency @ Full Rated Load: 75%. Vibration: Designed to meet MIL-STD-810D, Method 514.3, Category 1, Procedure 1. Shock: Designed to meet MIL-STD-810D, Method 516.3, Procedure III.

*Includes capacitor.

Power Line Conditioners

PLC Series Power Line Conditioners utilize the automatic voltage regulator technologies with a double shielded isolation transformer for precise regulation and good clean power. PLC filters common and transverse mode noise along with transient suppression. Single and three phase designs with less than 1% THD and efficiencies of 99%.

Automatic Voltage Regulators

Precise voltage regulation with no distortion. Single and three phase units from 2.3KVA to 1500KVA with output voltage accurately regulated to $\pm 0.75\%$. For line frequencies 47 through 63Hz. Solid State sensing, voltmeter, pilot light, output level set point. Transient suppressor and isolation transformer are options for power condition and noise suppression.

"SPP" Series are multi-shielded isolation, tap switching transformer conditioners with zero-current switching technology for optimum performance. These units provide $\pm 4\%$ output voltage regulation, quiet operation EMI filtering, remote emergency power off, bypass switch, circuit breakers, choice of output receptacles and noise attenuation. (140 dB common, 60 dB normal). Three phase is available.

Stock No.	Mfr.'s Type	Input Service	Input Volts	Output Volts	KVA	Input Connection	Wt.	EACH

SPP units shown are standard with a 5-20R2 receptacle. Optional receptacles (up to 5 more and in any configuration) are available by special order. Options of systems status monitor/RPO and repo only are also available as specials. Contact your Allied sales office for pricing.

PQI Series STABILINE® Power Quality Interfaces (Transient Voltage Suppressors/RFI Filters)

- ▶ Attractive, Office/Home, Lightweight ABS Plastic Housings
- ▶ Choose from 29 Models
- ▶ Wall Mount, Desktop, 19-Inch Rack Mount, NEMA 12 and Industrial Hardwired Models Available

PQI Series units are transient voltage suppressors/RFI filters that divert and attenuate all modes of power disturbances before they reach the circuitry of sensitive electronic equipment. All North American types are UL 1449 listed (clamping level 330 V) and CSA certified. All types are covered by a 10-year warranty.

The unique, performance-proven, multi-stage suppression and filtration design is state-of-the-art and utilizes MOVs, gas tubes, filter capacitors, inductors and silicon avalanche diodes depending upon the model selected. Users have a choice of "good" Series 1000, "better" Series 2000 and "superior" Series 3000 performance levels. Types with "D" suffixes have two RJ11 modular jacks with telephone line transient suppression for use with fax/modems.

Power System Configurations:
 1 — Designed for 120 V Line to Neutral connection. It is intended for use on power systems with 0 V Neutral to Ground and 120 V Line to Ground.
 2 — Designed for 208-240 V Line to Line connection. It is intended for use on power systems with 120-140 V from each Line to Ground.
 3 — Designed for 220-240 V Line to Neutral connection. It is intended for use on power systems with 0 V Neutral to Ground and 220-240 V Line to Ground.

SL Series STABILINE® Uninterruptible Power Supplies

- ▶ Serial Communication Capabilities with Extensive (Optional) Power Monitoring Software
- ▶ UL 1778 Listed and CSA Certified
- ▶ 95% On-Line Efficiency
- ▶ Unique "Battery Sleep" Feature for Prolonged Battery Life

SL Series units are feature-rich, advanced solutions for today's demanding power quality requirements and provide ideal protection for every kind of mission-critical electronic load. They are offered in six models with power ratings between 400 to 2000 VA for user selectable 110, 120 or 127 VAC, 60 Hz operation.

SL Series units are compact and manageable, easy to transport, install and operate. There are no complex instructions and few simple operations to perform. A "boost/buck" tap system is used for tight output regulation control over chronic low or high input voltage conditions. Bidirectional surge diverting/filtering circuitry is used for protection of electrical noise generated from either the AC input or the protected load. Advanced battery management technology is utilized to prolong battery life, speed recharge times and provide advance notice of impending battery service. The ergonomically designed front panel features a self-diagnostic routine of start-up and indicators for site wiring fault, battery service, communication operation, input line condition, battery and percent load levels. Models for 50 Hz operation are also available on request.

Input Voltage Range: ±20% of nominal with a user-selectable extended range of ±25% available. **Nominal Operation:** User selectable, 110, 120 or 127 VAC, via dip-switch selection. No power is drawn from the internal batteries as long as the utility is within the voltage range. **Output Voltage Range:** Utility operation — -10%, +6% of nominal; Battery operation — +5%. In the extended operating input voltage range mode (±25%), the output voltage under utility operation is -15%, +10%.

*The SL BAT48 External Battery Pack is required and included with SL 2000 and SL 2200 models. SL BAT48 is shipped separately. Approximate Weight Lbs. (kg): Net — 65 (29.5); Shipping — 70 (31.8). †Internal Battery Backup (Min.)

SP Series STABILINE® Standby Power Supplies

SP Series STABILINE® Standby Power Supplies provide the most cost-effective, compact and efficient power quality solution for PCs, workstations, POS systems, cash registers and any other electronic device by instantly switching to battery power when an AC power outage occurs. North American types are UL 1778 listed and CSA certified.

SP Series types utilize economical synthesized sine wave (step wave) output technology and come complete with audible and visual alarms and optional (400 VA model only) computer interface software for Novell, UNIX and other platforms. Like the STABILINE® SL Series, all SP Series units incorporate advanced battery management features to ensure prolonged battery life, speedy recharge time and advance notification of impending battery service requirements. Models for 50 Hz operation are also available on request.

Models are UL 1778 and UL 1449 Listed and CSA Certified. **Transfer Time to Inverter:** 2 ms typical, 4 ms max. **Transfer (Low Line) Voltage to Battery:** User selectable for 88, 93, 95 and 103 VAC operation. Units shipped for 103 VAC operation. †Internal Battery Backup (Min.)

PowerVerter Series DC to AC Inverters

Solid state power inverters convert 12 V battery DC into 120 VAC (60 Hz). Simply plug your household appliances into your inverter for convenient power anywhere. **PowerVerter** models operate most household appliances and are an economical solution to your mobile power needs. **PowerVerter Plus** models are frequency-controlled to protect sensitive equipment such as tape recorders, test equipment or computer systems. They also provide 200% of rated output for heavy start up loads.

Precision Regulated DC Power Supplies

PR 25

Converts 120 VAC to 13.8 VDC. Features solid state circuitry, high quality filtering and electronic foldback for automatic over-current protection. Perfect for CBs and ham radios. Output voltage maintained up to 95% of no load value. Heavy-duty transformer for complete isolation. Crowbar protection prevents overvoltage damage to connected equipment (available on 15 amp units and larger). Also features indicator light and on/off switch on faceplate. 3-conducted grounded cord on 10 amp and larger models. 230 V models have 220/240 V input and IEC-320 cord plug. PRXXINT models are 230 V input.

Line Conditioners

- Regulates Incoming Voltages From 87 to 140 VAC Back to 120 VAC
- Provides Complete Surge/Noise Suppression

► Rackmount Units Available

Brownout correction and surge and line noise suppression in one low cost unit. Automatically adjusts the widest range of incoming voltage (from 87 to 140 V) back to 120 VAC nominal output within ANSI C84.1 specifications. LC 1200, 1800 and 2400 feature built-in Isobar surge suppression. Up to \$25,000 Ultimate Lifetime Insurance coverage for connected equipment; 2-year product warranty.

APS Series UPS Systems For Extended Backup Times

APS units automatically sense and switch AC output between outside AC power and DC battery power. You supply battery packs to provide the backup time you need. Perfect for phone systems, security systems or anywhere extended backup times are needed. A fully regulated battery charger maintains batteries while outside AC power is available. APS models feature a rugged metal case for use as a mobile battery power source. All models are peak power rated and frequency controlled 2-year product warranty.

Isolation Transformers

The Isolator provides true line isolation to protect sensitive electronics. Clean, portable ground eliminates the need for dedicated lines. Efficient operation generates less heat than ferroresonant devices. Features exceptional, low frequency line noise rejection and external resettable circuit breaker. Comes with 6' cord. Output Voltage: 120 VAC.

ISOBAR® Premium Surge and Noise Suppressors

The world's best known, best-selling surge suppressors. "Cascade" circuitry offers increasing levels of protection for more sensitive equipment. Exclusive isolated filter banks eliminate interference between connected equipment. Instantaneous surge response with suppression to 45,000 amp spikes, 1,080 joules. ULTRA models feature space saving right angle plug, advanced diagnostic indicators to alert you to improper outlet wiring, loss of AC power and damage to protection circuitry. Rugged all-metal housing.

Standard Surge Suppressors

- ▶ Reliable, Economical Surge and Line Noise Suppression
- ▶ Surge Suppression To 36,000 Amps
- ▶ Diagnostic LEDs/Fax Modem Protection Available
- ▶ TR-6 Recently Rated #1 In Protection By A Leading Consumer Publication

Designed to provide economical protection for valuable electronic equipment. Up to 36,000 amps, 720 joules of surge protection is available. Models with diagnostic LEDs alert user to ground faults or damage to protection circuitry. All units are UL listed and provide basic noise suppression. Up to \$10,000 Ultimate Lifetime Insurance.

DataShield™ Data Communications Line Surge Suppressors

Network file servers, hubs, routers, print servers and workstations are increasingly susceptible to problems from dataline transients as transmission rates continue to rise and vital processing power is decentralized. Tripp Lite's DataShield™ dataline surge suppressors safely divert damaging dataline surges before they reach critical network equipment.

BC Pro

BC Series Standby UPS Systems

- Complete Blackout, Brownout and Surge Protection
- Phase Synchronized 2 ms Switchover To and From Battery
- \$25,000 Ultimate Lifetime Insurance Connected Equipment Coverage
- Full 2-Year Product Warranty

All BC series battery backup systems offer excellent protection from brownouts, blackouts, surges, spikes and line noise. Their phase synchronized 2 ms switching is so fast and smooth your computer will never detect an interruption.

BC Personal Series Standby UPS Systems

BC Personal models are perfect for home or stand-alone use. These units protect your computer from data loss and equipment damage with long lasting battery backup. Up-front LEDs provide information on line status, battery use and (on BC 420 and BC 500) alert you to low battery charge or replacement.

BC Pro Series Standby UPS Series

BC Pro models feature a Db9 LAN port and support the unattended shutdown of virtually any network operating system with PowerAlert software. Larger VA ratings allow protection of multiple file servers. These units also feature up-front, diagnostic LEDs, automatic inverter shutdown and SNMP compatibility.

OmniPro® Line Interactive UPS Systems

- Corrects Brownouts Without Using Battery Power
- Total Blackout, Brownout, Surge and Line Noise Protection
- All Models LAN Compatible
- \$50,000 Ultimate Lifetime Insurance Connected Equipment Coverage
- Full 2-Year Product Warranty

OmniPro keeps you working through extended brownouts without using battery power. Voltage correction automatically adjusts a wide range of incoming voltage (from 92 to 150 volts) back to 120 VAC. Advanced microprocessor controlled functions include a special UPS self-test and up front LED displays for voltage correction, UPS load, battery charge and condition. All models (except Pro 280) support unattended shutdown of any network operating system. 2 year product warranty.

SMART Series Line-Interactive Intelligent Network UPS Systems

**ULTIMATE
LIFETIME
INSURANCE**

- Microprocessor Control Of All UPS functions
- Complete Protection Against Blackouts, Brownouts, Surges and Line Noise
- Line Interactive Design Adjusts Incoming Voltages From 87 To 140 VAC Back To 120 V
- Multi-Color Front Panel LEDs
- Rackmount and Expandable Run-Time Models Available
- Works with PowerAlert Software To Provide Advanced Network Support and Unattended Shutdown

Microprocessor control and advanced network management make the SMART series the ultimate in network UPS protection. SMART series units feature a line-interactive design to provide clean, 120 volt power during brownout or overvoltage conditions without using battery power. All units provide complete protection against blackouts, brownouts, surges and line noise. Advanced LEDs alert you to battery status and operating conditions, while a built in microprocessor provides high levels of network protection, communications, management and reliability.

AZ420 Miniature General Purpose Relay

- Rugged Construction for High Reliability
- Life Expectancy Greater Than 100 Million Operations
- DC Coils to 115 V
- High Sensitivity at 25 mW Per Pole Available
- Current Sensitive and Voltage Sensitive Coils Available
- Round Core and Larger Coil Volume Provide Greater Pull Force
- Hydrogen Annealed Iron Magnetic Circuit
- Form A, B, C, and D Contacts Available
- Up to 6 Poles in Less Than One Cubic Inch
- Dry Circuit, 2 Amp, 3 Amp, or 7.5 Amp Contacts
- Printed Circuit or Solder/Plug-in Terminals
- Balanced Spring-Held Armature Allows Dependable Operation in Any Position
- Sealed Version Available (2 and 4 Pole)
- UL and CUR File E43203; VDE 0110 Gr. A

Polycarbonate enclosed general purpose relays. Plug-in terminals are gold plated copper alloy. PC terminals are tin plated copper alloy. **Contacts:** 40LUS and 10LUS, bifurcated crossbar in fine silver/gold plated, 4WLUS and 1WLUS are single crossbar fine silver/gold plated, 4WHUS and 1WHUS are single crossbar, moveable, silver cadmium oxide/gold plated. Available in standard DC voltage, sensitive DC voltage (V), and sensitive DC current (C). Sealed version — AZ2428 and AZ2429 Series.

Sockets and Hardware

- International Standard Spacing — Accommodates Most Cradle-Type Relays
- Unique Knife-Edge Connector Assures Positive Contact
- Unbreakable Fiberglass Filled Polyester Base Material
- Spacing Riser Prevents Flux Contamination
- Low Profile Mounting With Right Angle Sockets
- PC Terminal Spacing for 0.1 or 0.2 Inch Grids
- UL File E 43203; CSA File LR36664; VDE 0110 Gr. A

Stock No.	Mfr.'s Type	Description	EACH

AZ2690 Series

- Isolation Spacing Greater Than 8 mm
- Dielectric Strength 4000 Vrms Coil to Contact
- Approvals/Standards Include UL, CSA, VDE, IEC, CEE, and SEMKO
- THINPAK™ Version Less Than .500" Height
- SLIMPAK™ Version Saves Board Space
- 10 Amp Switching
- Life Expectancy to 30 Million Operations
- Epoxy Sealed Version for Automatic Wave Soldering and Cleaning
- UL File E44211; CSA File LR 85091; VDE 4120-4940-4002/A1

Miniature Power Relay in P.B.T. polyester enclosure. **Contacts:** SPDT, silver cadmium oxide, 10 amps. **Terminals:** PC, tinned copper alloy, Sensitive relay coil.

AZ5 Subminiature PC Board Relay

- Subminiature Size for High Density Packaging
- Coil Sensitivity to 100 mW
- Extremely Low Cost
- Coil to 24 VDC
- Epoxy Sealed for Automatic Wave Soldering
- 1 Amp Contacts
- Life Expectancy to 10 Million Operations
- Meets FCC Part 68.302 1500 V Lightning Surge
- Meets FCC Part 68.304 1000 V Dielectric
- UL File E43203; CSA File 74120

Light Duty PC Board Relay in P.B.T. polyester enclosure. **Contacts:** SPDT (1 form C) welded crossbar construction; silver alloy gold clad. **Terminals:** Tinned copper alloy. **Weight:** 3.5 grams.

AZ8 Miniature PC Board Relay

- Subminiature Size
- High Sensitivity, 110 mW Pick Up
- Epoxy Sealed for Automatic Wave Soldering
- Life Expectancy to 20 Million Operations
- Extremely Low Cost
- Class B Insulation (130°C) Standard
- Class F Insulation (155°C) Version Available
- UL, CUR File E44211
- VDE Approved Versions Available

Miniature PC Board Relay available in unsealed or epoxy sealed (E) version. **Contacts:** SPDT (1 form C) in 3 amp (silver) or 6 amp (silver nickel). **Termination:** Tinned copper alloy, PC terminals. **Enclosure:** P.E.T. polyester. Available in sensitive coil (DSE).

AZ830 Series

- ▶ Low Profile for Compact Board Spacing
- ▶ DC Coils to 48 VDC
- ▶ High Sensitivity, 100 mW Pick Up
- ▶ High Switching Capacity, 60 W, 125 VA
- ▶ Life Expectancy to 100 Million Operations
- ▶ Fits Standard 16 Pin IC Socket
- ▶ Epoxy Sealed for Automatic Wave Soldering and Cleaning
- ▶ Meets FCC Part 68.302 1500 V Lightning Surge
- ▶ Meets FCC Part 68.304 1000 V Dielectric
- ▶ UL File E43203; CSA File LR 36664

Polarized Dip Relay, single side stable. Contacts: DPDT (2 Form C) bifurcated cross bar contacts in silver alloy, gold clad, 2 amps. P.B.T. enclosure. Tinned copper alloy PC terminals. Available in standard coil and sensitive coil (DSE) relays.

AZ830 4 Pole Series

- ▶ Single Side Stable
- ▶ High Sensitivity, 90 mW Pick Up
- ▶ Low Profile DIP Package
- ▶ Life Expectancy to 10 Million Operations
- ▶ Meets FCC Part 68.302 1500 V Lightning Surge
- ▶ Meets FCC Part 68.304 1000 V Dielectric
- ▶ Epoxy Sealed for Automatic Wave Soldering and Cleaning
- ▶ UL File E43203; CSA Approved

4 Pole Polarized Miniature Dip Relay in 4PDT (4 Form C) contact arrangement. Bifurcated crossbar contacts; silver palladium, gold clad. Enclosure: P.B.T. polyester. Tinned copper alloy PC terminals. Available in standard coil and sensitive (SEA) relay version.

AZ820 Series

- ▶ Low Profile for Compact Board Spacing
- ▶ DC Coils to 48 VDC
- ▶ Life Expectancy to 10 Million Operations
- ▶ Standard PC 0.1" Grid Terminal Spacing
- ▶ Fits Standard 16 Pin IC Socket
- ▶ Epoxy Sealed for Automatic Wave Soldering and Cleaning
- ▶ Meets FCC Part 68.302 1500 V Lightning Surge
- ▶ Meets FCC Part 68.304 1000 V Dielectric
- ▶ UL File E43203; CSA File LR 36664

Subminiature Dip Relay with DPDT (2 Form C) bifurcated Crossbar Contacts. Contact Material: Silver palladium, gold clad. Enclosure: P.B.T. polyester. Terminals: PC, tinned copper alloy.

Time Delay Relays

Delay on Operate

C Series

The C Series has solid state analog circuitry with SPST or SPDT relay output. Delay on operate timing mode. Compact Size. **Timing Selection:** Knob adjustable potentiometer or fixed. UL File #E96739(M). CSA File #LR62586. **Contact Rating:** 1/2 Amp @ 110-120V AC, 1 amp @ 32V DC. **Oper. Temp. Range:** -25°C to +60°C. **Mounting:** Single screw or optional 2-screw panel mount.

Ordering Information:

115 A NO .1 -60 S C
A B C D E F G

- A: Denotes nominal input voltage. Voltages available: 12, 24 and 115V AC; 12, 24, 48 and 110V DC. Custom voltages are available.
B: Denotes type of current required for operation: A = AC — Alternating Current. D = DC — Direct Current.
C: Denotes contact form: NO = SPST — 1 form A, C = SPST — 1 form B, SPDT = 1 form C.
D and E: Denotes range of knob adjustability for timing (in seconds) where: D = Minimum time delay, E = Maximum time delay for adjustable TDR's. **Note:** 1.) Ranges available: 0.1 - 60, 60 - 120, 120 - 180, 180 - 240 and 240-300 secs. Custom Timing is available. 2.) Both values (D and E) can be replaced by single value for a factory preset time delay in seconds from 0.1 through 300 secs.
G: Denotes form of termination - Blank = .110 male electro-plate solder terminals, X = .250 male quick connect terminals, S = screw terminals.
H: Denotes use of solid state analog circuitry of C Series.

C10 Series (Low Cost 10 Amp TDR)

The C10 Series has solid state analog circuitry with DPDT relay output. Delay on operate timing mode. **Timing Selection:** Knob adjustable potentiometer or fixed. UL File #E96739(M). CSA File #LR62586-3. **Contact Rating:** 10 Amps @240V AC res. **Oper. Temp. Range:** -45° to +70°C. **Mounting:** 8-pin octal style plug.

Ordering Information:

120 A P .1 -60 C
A B C D E F

- A: Denotes nominal input voltage. Voltages available: 12, 24 and 120V AC; 12, 24, 48 and 110V DC. Custom voltages are available.
B: Denotes type of current required for operation: A = AC — Alternating Current. D = DC — Direct Current.
C: Denotes contact form: P = DPDT — 2 form C, S = SPDT — 1 form C.
D and E: Denotes range of knob adjustability for timing (in seconds) where: D = Minimum time delay, E = Maximum time delay for adjustable TDR's. **Note:** 1.) Ranges available: 0.1 - 60, 60 - 120, 120 - 180, 180 - 240, 240 - 300 and 300 - 480 secs. Custom timing is available. 2.) Both values (D and E) can be replaced by a single value for a factory preset time delay in seconds from 0.1 through 480 secs.
F: Denotes use of solid state analog circuitry of C10 Series.

DC10 Series

The DC10 Series has CMOS digital circuitry with DPDT relay output. Delay on operate timing mode. **Timing Selection:** Knob adjustable potentiometer or fixed. UL File #E96739(M). CSA File #LR62586. **Contact Rating:** 10 Amps @ 240V AC res. **Oper. Temp. Range:** -45°C to +70°C. **Mounting:** 8-pin octal style plug.

SWUDC Series Four Mode TDR

The SWUDC has CMOS digital circuitry with DPDT relay output. **Four Timing Modes:** Delay on Operate, Delay on Release, Delay on Operate and Release, and Interval or One-Shot all in one unit. **Timing Selection:** Binary coded DIP switch plus vernier knob adjustment. User selectable timing ranges covering 0.1 secs to 77.5 hrs. UL File pending. CSA File pending. **Contact Rating:** 10 A at 240 V AC res. **Operating Temperature Range:** -45°C~+70°C. **Mounting:** 11-pin octal style plug.

Freedom 10 Time Delay Relay

- ▶ Voltage and Polarity Friendly From 24V to 240; AC or DC; and 50/60 Hertz
- ▶ 2 Calibrated Controls: 1-100 Seconds and 0-15 Minutes
- ▶ DPDT Relay, Rating 5 Amps, Resistive 1/10 HP @ 120/240VAC

- ▶ 1% Repeatability
- ▶ Time Delay Range of 1 Second to 15 Minutes
- ▶ CMOS IC Control Circuitry
- ▶ -20°C to +55°C Ambient
- ▶ Octal or Spade Termination
- ▶ UL Listed

The Freedom 10 Time Delay Relay operates from any supply voltage from 24 to 240 volts AC/DC, 50/60 Hz. DPDT output contacts rated 5 amps resistive or 1/10 HP motor load at 120/240VAC. Timing is adjustable from 1 second to 15 minutes by using the two calibrated controls together in any combination desired. The Freedom 10 is available with either octal or spade termination.

4300 Interval Timer

Model 4300 is an interval timer that permits operating voltage to be applied to a load circuit for a preset timing period. The load will operate only once for each application of power for the preset time and then turn off. Should the power be removed during the timing period the load would turn off, and the timing period reset to the start of another cycle. In order for the load circuit to see the full interval of operating voltage, the input voltage must be present for a duration that exceeds the preset timing interval. U.L./CSA listed. Other voltages and times available from factory.

Stock No.	Mfr.'s Type	Voltage	Adjustable Timing Interval	EACH			
				1-9	10-24	25-49	50-99
519-4301	4300A-3-1	24VDC	0.1-30 sec.	23.45	21.78	20.33	19.05

Interval/Single-Shot Timer

Model 4310 can perform as an interval timer, or as a single-shot timer. The difference between interval and single-shot operation is the operation of the initiate switch. If the load is to operate from a continuous closure from the initiate switch, wire the timer with no jumper between terminals 6 and 7. In this mode the Model 4310 will function as an interval timer. If the load circuit is to operate for the entire timing period even if the initiate switch is closed for a short duration, connect terminals 6 and 7 and operate as a single-shot timer. In single-shot operation the power switched to the load cannot be removed with the initiate switch once the cycle has been initiated. **10 amp zero voltage switching.** UL/CSA Listed. Other voltages and times available from factory.

4710 Delay-On-Dropout Timer

The Model 4710 is a Delay-On-Dropout Timer which can control DC loads to 1 Amp or AC loads to 10 Amps with additional heatsinking. Closure of the initiate switch will energize the load. The timing period begins when the switch opens and resets to the beginning whenever it re-closes. To energize the load or reset the time delay, the switch must close for at least 100 milliseconds. All other specifications are identical to the Model 4310 above. UL/CSA listed. Other voltages and times available from factory.

Adjustable Repeat Cycle Timers

Model 4600 can be used in most applications which require a load circuit to "turn-on" for a predetermined period of time, "turn-off" for a period of time, and then repeat the cycle for as long as operating voltage is applied. Can control loads up to one ampere. Controlled by external resistors which establish the "Repeat Cycle Time" and the "Energize Time". Provides a Non-Zero Voltage switching output. UL/CSA listed. Model 4610 is the high power version of the 4600 Repeat Cycle Timer. Can control loads up to 10 amperes and provides zero-voltage switching. Operates from AC voltage only. UL recognized. UL/CSA listed. Other voltages and times available from factory.

Universal Delay on Make and Universal Interval Solid State Timers and Universal Flashers

Artisan's Universal Series of Time Capsules is now available in three different timing modes: Delay On Make, Interval and Flasher.

All models are available in voltage ranges from 24 to 240 volts. They differ only in timing ranges and how the times are set. There is no need to observe polarity with any of this series. **Output:** 10 milliamps to 1 ampere inductive. Eight volt maximum drop across. **438, 438UI and 438UF.** The timing period is set by connecting a resistor across the middle two terminals. A jumper across the timing terminal produces a one second delay, add 10K per second to increase time. **438USA, 438USAI, 438USA-INT, 438USAF.** All timing is set by the binary coded DIP switch, which has ten programmable switches enabling the time to be easily set over the entire timing range. **438UP, 438PI, 438UPF.** Timing is controlled by a sealed potentiometer located between the terminals.

438A Time Capsule

The 438A Time Capsule is an all solid-state timing module for DELAY ON MAKE control of any load device. The timing period is controlled by a fixed or variable resistor connected across the center two terminals of the Time Capsule. Supplied in three timing ranges: (-1) is adjustable from 0.1-30 seconds. (-2) is adjustable from 1-300 seconds. (-5) is adjustable from 30-8000 seconds. To use the 438A over its full timing range, a 10 megohm potentiometer must be connected across the center two terminals. U.L./CSA listed.

AC and DC Flashers

423 DC Flasher. Solid-state device intended for use in electrical and electronic equipment as a flasher for lamp, relay and solenoid circuits and in electronic systems as a power pulser or system clock-driver. Delivers one-half ampere at the operating voltage (24 VDC). (Output is fixed at a 50% duty cycle at 1 pulse per second. (60 flashes per minute).

251-1060	RHS 00	DIN rail mounting clip (not a heat sink)	≥ 12.5	5.50
251-1061	RHS 100	Heat sink for one single phase SSR	≥ 3.0	24.00
251-1062	RHS 301	Heat sink for one or two single phase SSRs or one three phase SSR	≥ 0.8	60.00
251-1063	RHS 301F 115C	RHS 301 heat sink with 115 VAC fan to cool heat sink	≥ 0.25	180.00

156 Series 4PDT 3 and 5 Amp Industrial Relays

Fig. 1

Fig. 2

For use in data processing and industrial control applications requiring 1/10 horsepower, 125VA, 120/240VAC. 4PDT relays are available with either solder-plug-in or printed circuit terminals, and either silver or gold flash or silver cadmium oxide with gold flash contacts. Silver contacts are rated 3 amps, 28 VDC, or 120 VAC, silver cadmium are rated 5 amps, 28 VDC or 120 VAC. All units are dust covered and UL recognized. **Operating Temperature range:** -45°C to +75°C. **Size:** 1.281" L x 0.859" W x 1.109" H.

157 Series General Purpose Relays

Industrial design power driver. Cool running coil insures over-voltage and high ambient temperature performance. Maximum contact resistance 0.1 ohms. Coil rated 6 to 240 VAC 50/60 Hz. 6 to 110 VDC, continuous duty. 3/4" silver cadmium oxide contacts rated 10 amps for type numbers with 200 suffix; 15 amps for types with 300 suffix. 28 VDC/120/240 VAC, 80%pf. **Operate Make Time:** 20 MS maximum. **Operate Release Time:** 10 MS maximum. 0.187" quick-connect terminals. UL recognized.

158 Series General Purpose 10 Amp Industrial Relays

UL Recognized and CSA Certified

Designed for motor controllers through 240VAC, in accordance with UL standard 508, industrial control equipment. Available SPDT PC terminals with nylon cover, or DPDT plug-in terminals with Lexan® cover. Silver cadmium oxide contact rated 10 amp, 28VDC, 120VAC. Coil has nominal power rating of 1.2VA AC and 0.9 watts DC plus a maximum continuous rating of 2VA AC and 2 watts DC. Rated for continuous duty operation. **Size:** 1.28" L x 0.859" W x 1.109" H.

159 and 160 Series Mercury-Wetted Relays

Type 159

Miniature single coil, mercury wetted contact relays feature long life, low power operation and no contact bounce. Life is rated in the billions of operations with fast-operate time. Must be operated in the upright position but variations up to 30° will cause only slight changes in operation. Contact rating is 2 amps maximum, 500 volts maximum, 100VA maximum for switching and 5 amps maximum for non-switching loads. **Type 159:** 0.625" H x 0.125" L enclosure and terminals. **Type 160-1:** 0.090" L x 0.093", **Type 160-3:** 0.09" L x .100" grid enclosure and terminals. **Type 160-4:** .125" L x .100" grid enclosure and terminals.

190 Series 16-Pin Dual-In-Line Power 2-Amp Relays

190 Series units are DPDT relays, silver/gold flash by bifurcated crossbar contacts. "S" in type number designates sensitive coil. Rated 2 amps @ 28VDC resistive or 120VAC resistive. **Dielectric breakdown:** 1000VAC coil to poles, 1000VAC between poles, 1100VAC across open contact (1500 VDC FCC surge). **Nominal power rating:** 550mW. Initial contact resistance of 50 milliohms for low level switching. Dual-in-line terminals for 16-pin DIP socket mounting and inert gas sealed for direct printed circuit board insertion and immersion. Nominal 12VDC coil. 10 million mechanical operations. 50K operations minimum rated load. UL/CSA rated.

188 Series 30-Amp Relays

188 series relays are available with solder/quick connect terminals in an open style (188-1) or in a flanged dust cover (188-3). 1/4" diameter silver-cadmium-oxide contacts. Rated at 30 amps, 28VDC or 120/240/277 VAC. 1HP at 120VAC. UL recognized, File No. E38802. CSA certified, File No. LR22861. All relays listed are Form Y, SPST NC-DB except type 188-34Q200 which is Form X, SPST NO-DM.

Coto Wabash is the country's leading maker of reed relays for instrumentation and many other industries. The distinctive red Coto Wabash relays are manufactured to the most exacting quality specifications using computer automated testing and advanced SPC techniques. All this adds up to reliability you simply can't find in other relays. So consider Coto Wabash the next time you're specifying reed or solid state relays.

Solid State Switches and Relays, Reed Relays

MRB and 922 1 x 0.1 Inch Grid Relays

MRB Series units have ruthenium contacts rated 10VA switching power, 200VDC or peak AC switching voltage, and 0.5A switching current. **Contact resistance:** 200Ω. **Life expectancy:** 100 x 10⁶. **Breakdown voltage:** coil to contact 1000Vrms, 1400 VDC; across contacts 175Vrms, 250VDC. **Operate and release time:** 2.0ms, max. **Insulation resistance:** 10¹⁰. UL listed, CSA Certified, FCC 68 qualified. 922 Series units have rhodium contacts rated 3VA switching power, 28VDC or peak AC switching voltage, and 0.25A switching current. **Contact resistance:** 200mΩ. **Life expectancy:** 20 x 10⁶. **Breakdown voltage:** coil to contact 1000Vrms, 1400VDC; across contacts 125Vrms, 175VDC. **Operate and release time:** 3.0ms, max. **Insulation resistance:** 10⁹.

Optomos® AC/DC Solid-State Switches

Ideal for telecommunications, data acquisition, process and industrial control, alarm systems, automatic test equipment, instrumentation, electronic metering and office equipment. Typical applications include tip/ring interface, hookswitch/dial pulse, AC ring injection, groundstart, flying capacitor multiplexing, I/O modules, microprocessor interface and replaces optocouplers, mechanical relays. Feature AC/DC switching, optical isolation to 3750V, FCC compatible, negligible offset voltage, 100% dv/dt immunity, no EMI/RFI generation, no snubber needed, no contact bounce, machine insertable, wave solderable, low drive power, long life and conserves PC board space. Available in a 6-pin or 8-pin design. BAPT and BSI approved. UL recognized.

AC Solid-State Relays

Ideal for industrial control, vending machines, business equipment, gasoline pumps, temperature monitoring, process control, medical equipment, programmable controllers, appliance control and gambling machines. Typical applications include input/output modules, solenoid driver, motor, blower, heater and temperature controls, control of relays, switching fans, TTL-compatible driver for contactors and replacing TRIAC/TRIAC drivers. All versions feature optical-isolation and 1 Form A normally open contacts, as well as DC control/AC output. TTL- and CMOS-compatible, these units provide interface between logic and power systems, high transient immunity, high surge capability, and they save PC board space. No arcing, no contact bounce and long life. **Type PM** Power-MINI relays, **Type PD** PowerDIP and **Type PS** PowerSIP relays also feature 5mA sensitivity, zero-crossing detection, low EMI and RFI generation, inherent noise immunity, are machine insertable, wave solderable and PC board space. **Type OFA** OptoFILM™ relays have all the features listed above with the exception of 5mA sensitivity, machine insertable and wave solderable. Type PD, PS and OFA relays are UL recognized. **Type MX** and **JTA** PowerBLOC relays feature random turn-on and are UL recognized, CSA certified.

HGJ2MT Series Mercury-Wetted Reed Relays

2 form C, DPDT relays feature the same electrical characteristics as the HGJM series relays, except they are shielded and insulation resistance is 10,000mΩ, minimum. **Common open time durations:** 50μ minimum at 100Hz for capacitor transfer technique applications. Excellent input to output isolation and electrostatic shielding.

0.400" (10.16) High Sensitivity Single-Side Stable With Shield

HGWM Series Mercury-Wetted Reed Relays

Feature maintenance-free long life for billions of bounce-free operations. **Contact rating:** 100VA maximum; 500VDC or peak AC, maximum; 2 amp switched maximum, 5 amp maximum carry current. **Contact circuit resistance:** 30mΩ maximum; stable with ±2mΩ over life. **Life expectancy:** greater than 20 x 10⁶ operations at rated load with proper contact protection. **Operate and release time:** 1.25ms, maximum. **Bounce time:** none. **Breakdown voltage:** coil-to-contact and across contacts 1000VAC, rms, minimum or 1400VDC; 60Hz between all mutually insulated terminals. **Insulation resistance:** 1000mΩ minimum. **Operating temperature range:** -38.8° to +85°C. No interruption of signal or processing of false signals. Excellent input to output isolation. Mount on standard 0.100" (2.54) grid pattern; upright within 30° of vertical. 1 Form C, SPDT. FCC 68 qualified.

CTD 46 and 43 Series Temperature Controller

- ▶ 1/16 Din-sized Enclosure
- ▶ 5 Temperature Control Modes
- ▶ Multiple Temperature Range (°F and °C)

- ▶ Auto-tuning
- ▶ Built-in Alarm
- ▶ Soft Start Function
- ▶ Nema 4X Front Panel

The CTD Series is a temperature controller available in two basic models: the CTD 43 is a single display unit and the CTD 46 is a dual display unit. Both models have a temperature range of -199 to 999°F or -199 to 999°C and will accept J, K, L, or N type thermocouples and RTDs as temperature sensors. Control modes include ON-OFF or proportioning action (PID, P, PL, PD). The main output can be programmed for direct (cooling) or inverse (heating) operations and the relay alarm output programmed to 16 different alarm configurations. The auto-tuning "Smart" function will calculate and set automatically the optimum values for the PID mode to insure the closest control of any heating or cooling load.

Stock No.	Mfr.'s Type	Description	Each
793-3001	89421108	CTD 43, Relay Output, 110/220 VAC	213.00

GA 3 Series Three-Phase Solid State Relays

- ▶ 10, 25 and 45 Amps Output Per Channel Available
- ▶ 24 to 600 VAC Output Voltage Range Suitable for Many Applications
- ▶ 1200 Volts Peak Blocking Voltage Helps Protect Against Transients in Harsh Electrical Environments.
- ▶ Internal RC Snubber Network
- ▶ 4000 VAC Optical Isolation
- ▶ 4 to 32 Control Voltage for a Wide Variety of Logic Circuit Applications
- ▶ Zero Voltage or Random Turn-on
- ▶ Industry Standard Package

G Series Power Relays

- ▶ Back-to-back (dual) SCR Output for Severe Inductive Loads.
- ▶ Superior False Turn-on Immunity and Positive Turn-off at high dv/dt.
- ▶ Current Ratings to 90A
- ▶ Output Voltage Rating to 660 VAC with 24 VAC Minimum
- ▶ AC or DC Inputs
- ▶ 4KV Optical Isolation
- ▶ Zero AC or Random Turn-on Models
- ▶ RC Snubber Network for Inductive loads
- ▶ UL Recognized (E46203, E79183), CSA Certified (38595)
- ▶ VDE Approval on Many Models (37421)
- ▶ UL/CSA 5 H.P. Rated Models

GENERAL SPECIFICATIONS. Operating Temperature Range: -20 to +80°C. Storage Temperature Range: -40 to +100°C. Input to Output Isolation Voltage: 4,000 Vrms. Input/Output to Ground Isolation Voltage: 2,500 Vrms. Capacitance Input to Output (Typical): 8pF. Line Frequency Range: 47 to 80Hz. Maximum Line Voltage (VRMS): 280, 480, 660. Minimum Line Voltage (VRMS): 24, 36, 48. Max. Off-state Voltage (Vpeak)*: ±600, ±1,200, ±1200. Max. Off-state Leakage (mArms)*: 15.0, 15.0, 20.0. Static (off-state) dv/dt (V/μs)*: 200, 200, 200.

C4 Series Input Modules

Features

- ▶ Built-in LED Status Indicator
- ▶ New Industry Standard Packaging
- ▶ 4000 VAC Optical Isolation
- ▶ AC and DC Inputs
- ▶ UL and CSA Approvals

Output Specifications

- ▶ Maximum Logic Supply Voltage: 32 VDC
- ▶ Minimum Logic Supply Voltage: 4.5 VDC
- ▶ Maximum Logic Supply Current: 16 mA
- ▶ Maximum Logic Leakage Current: 10 μ A
- ▶ Maximum Output Voltage: 30 VDC
- ▶ Maximum Output Leakage Current: 10 μ A
- ▶ Maximum Output Voltage Drop: 0.2 VDC

The C4 I/O Modules provide all the features of standard I/O Modules plus an LED status indicator and, (for the Output Modules) a replaceable 2 AG type fuse. AC and DC Inputs, new industry standard packaging, **Input to Output Isolation Voltage:** 4000 VAC. **Operating Temperature Range:** -30 to 80°C. **Storage Temperature Range:** -40 to 100°C. The mounting boards will accept either input or output modules. Both the modules and boards are UL and CSA approved.

C4IAC Input Specifications. Nominal Voltage: 120 VAC. Resistance: 28 K Ω . Maximum Current: 5 mA. Maximum Turn-On Time: 20 ms. Maximum Turn-Off Time: 30 ms. Input Allowed for No Output: 2 mA/50 VAC.

C4IACA Input Specifications. Nominal Voltage: 240 VAC. Resistance: 75 K Ω . Maximum Current: 5 mA. Maximum Turn-On Time: 20 ms. Maximum Turn-Off Time: 30 ms. Input Allowed for No Output: 2 mA/100 VAC.

C4IDC Input Specifications. Nominal Voltage: 4-32 VDC. Resistance: 1 K Ω . Maximum Current: 34 mA. Maximum Turn-On Time: 5 ms. Maximum Turn-Off Time: 5 ms. Input Allowed for No Output: 1.5 mA/2 VDC.

Stock No.	Mfr.'s Type	Input	DC Logic Output	EACH
793-8031	C4IDC	4 - 32 VDC	4.5 - 32 VDC	10.00

Series AO 241

- ▶ Compact Package for High Density PC Board Mounting
- ▶ TTL Logic Compatible Input
- ▶ 4000 Vrms Optical Isolation
- ▶ Both "Zero Voltage" and Phase Controllable "Random" Switching Versions

1.0 AMP, 24-280 VAC Triac Output, DC Output AC Mini-SIP

The CRYDOM AO241/R AC relays are 1.0 amp rated SPST-NO miniature SIP solid state relays. Utilizing the popular 100-mil. grid they occupy only 0.36 square inches of board space. These miniature relays have the same high technology and reliable design found in all CRYDOM products. UL, CSA pending.

Series CX

- ▶ Extra High Surge Rating
- ▶ Extra Low Leakage (Off-state)
- ▶ Opto-Isolated 4000 Vrms
- ▶ Random And Zero Voltage Switching
- ▶ Compact Package for High Density PC Board Mounting
- ▶ 3-15 Vdc Logic Compatible Input

5.0 AMP, 12-280 VAC SCR Output, DC Control

The CX series is a group of solid state relays designed by CRYDOM to achieve the highest power switching capability in a PC mounted air cooled package. They feature exceptional steady state and high surge ratings by means of over sized inverse-parallel SCR chips, together with highly efficient thermal management for greatly increased cycle life. UL, CSA & VDE pending.

Series DO 061

DC Mini-SIP

The DO 061 are miniature DC output modules in a conformally coated SIP package, measuring only 0.46 x 0.9 x 0.4 in. with pinouts on the popular 100-mil grid. The input-to-output isolation is 4000 VRMS with an isolation resistance of 1 x 10⁹ ohms. The units are derated 10mA per degree C above 60°C ambient temperature. Operating temperature range is -30°C to +80°C. When used for inductive loads, diode suppression across the load is recommended.

Series D2W

Solid State Relays Low Cost AC Output 80 to 280 VAC, 2 Amps

The D2W202F is designed to achieve optimum performance at a record low cost by means of completely automated assembly using labor saving robotics. The package has a hard skin-tight epoxy coating which provides excellent environmental protection and a pinout that matches the Series 6.

General Specifications. Control Signal Range: 3 to 28 VDC. Must Operate Voltage, max.: 3 VDC. Must Release Voltage, min.: 1 VDC. Input Current @ 5 VDC max.: 4 mA. Input Impedance, min.: 1500 OHMS. Dielectric Strength 50/60 Hz: 2500 VRMS. Operating Temperature Range: -20° to 80°C.

Series CMX — 6 - 10 Amp, DC SIP

- MOSFET Output
- Extra Low On-State Resistance

- Printed Circuit Board Mounting

New DC output SPST-NO solid state relays use MOSFET output for high switching capabilities in a PC-mount air-cooled package. Pinouts are compatible with Series 6 and ODC type I/O modules. **Operating Temperature Range:** -30°C to 80°C. **Isolation Voltage:** 2500 Vrms. **Approvals:** UL E116950.

CTX240D3Q

- Four AC Output Relays in One Package
- Extra High Surge Rating
- Extra Low Leakage (Off-State)
- Opto-Isolated 2500 Vrms

- Random and Zero Voltage Switching
- Compact Package for High Density PC Board Mounting
- 4-10 VDC Logic Compatible Input

The CTX240D3Q features four independently controlled solid state relays in one package. This model is an extension of Crydom's popular CX Series which is designed to achieve the highest power switching capability in a PC mounted air cooled package. The CTX240D3Q exhibits exceptional steady state ratings by means of highly efficient thermal management for greatly increased cycle life.

Input Specifications. Control Voltage Range: 4-10 VDC. Nominal Input Impedance: 270 Ohms. Typical Input Current at 5 VDC: 15 mAdc. Must Turn On Voltage: 4.0 VDC. Must Turn Off Voltage: 1.0 VDC. **Output Specifications.** Nominal Line Voltage: 240 Vrms. Load Current Range Per Section: 1 Section On — 0.1 - 6.0 Arms; 2 Sections On — 0.1 - 4.0 Arms; 3 Sections On — 0.1 - 3.0 Arms; 4 Sections On — 0.1 - 2.5 Arms. Surge Current, 1 Cycle (Max.): 120 Apk. Load Voltage Range: 24 - 280 Vrms. Transient

Over-Voltage: 600 Vpk. Frequency Range: 47-63 Hz. Off-State dv/dt (Min.): 200 V/μsec. Off-State Leakage Current (Max.) at 240 Vrms: 0.1 mArms. On-State Voltage Drop (Max.): 1.4 Vpk. Series MP — 3 - 4 Amp, AC Output, SIP

- High Packaging Density

- Compatible with 5 through 24 Volt Logic Systems

Available in 3 Arms and 4 Arms ratings, all are SPST-NO PC-mount relays that provide greater packaging density and compatibility with pinout of Series 6 and OAC output modules. Models include internal snubber for high dv/dt applications, together with zero-voltage switching to reduce high inrush currents and electrical noise. **Operating Temperature:** -30°C to 80°C. **Isolation Voltage:** 2500 Vrms. UL Approval E 116950.

Series 1

- 2.5 to 90 Amp
- 120, 240 and 480 VAC

- Panel Mount
- Solid-State Relays

- SCR AC Output

These Crydom SSRs make it possible to switch AC power loads up to 47 kw. Output circuit consists of inverse-parallel (back-to-back) dual SCRs to meet the most demanding requirements. Features include zero voltage switching, phase control and normally closed models available. **General Specifications.** Isolation Voltage: 4000 VAC Std. (Input to Output). Operating Temperature Range: -30°C to 80°C. UL and CSA. **DC Input Control Models.** Control Signal Range: 3-32 VDC. Must Operate Voltage: 3 VDC Max. Must Release Voltage: 1 VDC Min. Input Current: 4 mA max. @ 5 VDC. Additional DC input models available upon special order: "Normally Closed" —B Suffix; "Non-Zero Switch" —10 Suffix; "400 Hz" —4 prefix. **AC Input Models.** Control Signal Range: 90-280 VAC. Must Operate Voltage: 90 VAC Max. Must Release Voltage: 10 VAC Min. Input Current: 2 mA max. @ 120 VAC.

Series 1 — 110 - 125 Amp, 240 Volt AC Output

- Zero Voltage and Random Turn-On Switching
- Panel Mount

Featuring state-of-the-art Surface Mount Technology, these SPST- NO relays deliver proven reliability in the most demanding applications. Output consists of an SCR AC switch and is available in zero-cross, random turn-on (phase controllable) versions with either AC or DC input (coil) control.

Series HA, Series HD — 12-90 Amp, 480 Volt AC Output

- Zero Voltage and Random Turn-On Switching
- 1200 Volt Blocking
- Panel Mount

Crydom's new HA (AC Control) and HD (DC Control) relays incorporate the same proven technologies as the Series 1. All models come with 1200V blocking as standard. Operating Temperature: -30°C to 80°C. Isolation Voltage: 4000 Vrms. Minimum Off-State dv/dt: 500 V/μsec. Approvals: UL (E116949), CSA (LR81689), VDE (10104).

50 To 90 Amp, 48-530 and 48-660 VAC High Voltage AC Output Solid-State Relays 1000V-1200V Blocking

The highest power rated SSRs, up to 59kw. 4000V of isolation with the high available blocking voltages (1.2 KV) below which the SSRs will not mistrigger. The wide margin between operating and blocking voltages permits the proper use of transient suppression (MOV) devices on the 480V line. Features include high dv/dt and zero voltage switching.

General Specifications

Control Signal Range: "WD" —4 to 32 VDC; "CA" —90 to 140 VAC. **Input Current @ 5 VDC:** 15 mA max. **Isolation Voltage 50/60 Hz:** 7000 VRMS. **Operating Temperature Range:** -30°C to 80°C. **1.2 KV Blocking Voltage.**

Series DC60 — 3 - 7 Amp, DC Output, 60 VDC

► Industry Standard Package

► Cost Effective

Bipolar transistor outputs are available in 3, 5, and 7 amp ratings. Cost-effective relays offer 4000 volt isolation and come in Crydom's standard panel-mount package. Operating Temperature: -30°C to 80°C. Isolation Voltage: 4000 Vrms.

Series 53TP

3 Phase Solid State Relays
25A and 50A RMS 530V RMS

- Opto-isolated Input-Output 4000V rms
- Electrically Isolated Mounting Base
- DC or AC Control Signal Option
- Zero cross-over load voltage turn-on standard; instantaneous turn-on option available

The Crydom 53TP range of three phase solid state relays is designed to switch line voltages of up to 530V rms directly to loads such as motors, transformers and heating elements. The use of power semiconductor technology ensures switch-on at close to the zero cross-over point of load voltage thus virtually eliminating the generation of r.f.i. and electrical noise. For switching of highly inductive loads, an instantaneous turn-on option is available. Power semiconductors generate heat energy during operation and a suitable heatsink must be used to keep the unit within its temperature ratings. The high current surge characteristics allow trouble-free switching of capacitive loads. UL, CSA & VDR pending.

Series 6

AC And DC Microprocessor Input/Output Modules—3.5 Amps, 60 VDC, 120 and 240 VAC

For electrically clean, photo-isolated, noise-free interfacing between logic level programmable controllers, microprocessors and computerized machine controls and power level loads. Input modules accept power level signals and convert them to logic level signals. Output modules accept logic level signals to switch AC or DC loads to 3.5 Amps.

General Specifications—All Models. Dielectric (Input/Output): 4000 VRMS. Isolation Resistance (Input/Output) @ 500 V: 10^{10} Ohms. Capacitance (Input/Output): 8.0pF. Operating Temperature Range: -40°C to 80°C.

Liquid Level Sensors/Float Switches

► Reliable Reedswitch Contacts

► Rugged Design

► Simple to Mount and Use

A range of reedswitch/magnet operated liquid level sensors suitable for a host of applications. Vertical or horizontal mounting styles are offered in a variety of plastics to suit most industrial applications. GFS Nylon is rated from -4°F to +167°F and suitable for use in organic chemicals, oils, fuel and diesel. GFS Polypropylene is rated -4°F to +212°F and suited for use in hot water applications. Polysulfone, rated from 14°F to +185°F is manufactured in FDA approved material and recommended for use in food grade applications. On vertical devices NO or NC operation may be achieved by removing the clip and reversing the float chamber; on horizontal devices, simply rotate through 180°.

High Voltage Reed Relays

► Low Contact Resistance Option (DAR7 Series)

Series DAR7 and DAT7 provide 10 kV isolation, switch voltages up to 8000 volts and come in a PCB mount package. Series HV1 are available with normally open or normally closed contacts, are capable of switching 10,000 VDC and come in a panel mount package.

DAR7/DAT7

Series LPCV

► Precise Proportional Load Control

Series LPCV linear proportional controllers control load up to 110 amps. Changes in the input signal linearly vary the firing angle of the thyristor load control device. Control circuitry and power switch are in a single package. PS120 and PS240 are power supplies suitable for providing 20 VAC required in addition to control voltage.

Series RPC Proportional Controllers

► Uses Standard Potentiometers
► Manual Power Control

The R family of proportional controllers provide a stable yet less expensive method of controlling power. An inexpensive potentiometer connected to the input provides the proportional control. All models come with KS100 safety cover.

Series 2—8 Amps, 120 and 240 VAC AC Output, Panel Mount Solid-State Relays

General Specifications. Control Signal Range: 3.5 to 8 VDC. Control Signal Range "221C": 3.5 to 7 VDC. **Must Operate Voltage:** 3.5 VDC max. **Must Release Voltage:** 1 VDC min. **Must Operate Current:** 12 mA max. **Isolation Voltage:** 2500 VAC. **Operating Temperature Range:** -30° to 80°C. **Snubber:** Internal.

The Crydom Series 2 solid-state relays combine small size, zero voltage switching and high current rating in a package designed for heat sink or panel mounting. Standard 0.187" push-on terminals allow quick connection and are positioned to provide maximum isolation between control and power circuits.

Case Style 3

Series 3

AC Output PC Board Mount Solid-State Relays 0.3 Amps, 120 and 240 VAC

Designed for PCB applications. Units require only 1 sq. in. space on boards. Overall height of 0.45" on case 3 allows spacing on 0.5" centers. High current rating. Zero voltage switching.

General Specifications. Control Signal Range: 3.5 to 8 VDC. (Models S3013A/S3023A: 3.5 to 18 VDC). **Must Operate Voltage:** 3.5 VDC max. **Must Release Voltage:** 1 VDC min. **Isolation Voltage:** 2500 VAC. (Models S3013A/S3023A: 4000 VAC). **Operating Temperature Range:** -30°C to 80°C.

Soft-Start Power Modules/Relays—90-140 and 180-280 VAC—10 to 75 Amps

A control module is used in combination with a Crydom phase control relay (-10 Suffix) to provide gradual application of power to the load. **General Specifications.** Input Operate Voltage Range: 3.5 to 10 VAC. **Minimum Release**

Voltage: 1 VDC. **Input Current @ 5 VDC:** 1.6 mA.

54 Series SPDT 318 Series

At a 150W maximum power rating, these medium size switches accomplish a variety of switching functions. With BNC, TNC or N connectors on the same plane as the power coil, this switch is suited for mounting in various positions. The switches are manufactured to the requirements of MIL-S-3928 with gold-plated silver contacts and two-bladed construction allowing 50 dB isolation at 50 MHz and 30 dB at 4 GHz.

Series 60 SPDT Remote Coaxial Relays

Remotely operated, ruggedly constructed, SPDT coaxial relays for operation to one kW. Specifications following for use in a 50-ohm transmission line. UHF connectors not recommended above 400 MHz. Operating time, 25 ms max. Gold plated silver contacts. *Has two Form C5A, 115VAC auxiliary contacts.

164 Series SPDT 315 Series

The 164 series is a small compact relay that has all connectors mounted opposite the mounting plane. Gold-plated contacts provide excellent low-level RF performance (50 dB isolation, .03 dB insertion loss, VSWR 1.03:1). With good performance to 1 GHz, these switches have many general purpose applications.

Stock No.	Mfr.'s Type	Coil Volts	Conn.	Amphenol Model	EACH

401 Series SPDT

The 401 SPDT switch with SMA connectors operates DC-18 GHz with minimum isolation of 60 dB (85 dB below 1 GHz), maximum VSWR of 1.5:1, and maximum insertion loss of 0.5 dB. Handles up to 200 W CW (25W at 18 GHz). Standard coils on failsafe relays are 12VDC (42 ohms), and 28VDC (260 ohms). Operate time at 20°C is 15ms max. Type 401-2208 is standard. Type 401-230832 has a set of form C indicator contacts. **Dimensions (excluding connectors):** 1.40"H x 1.34"L x .50"W (35.6 x 34.0 x 12.7mm). **Weight:** approximately 2 oz.

402 Series SPDT

The 402 series SPDT failsafe switches operate DC-12.4 GHz with minimum isolation of 60 dB (85 dB below 1 GHz). **Maximum VSWR:** 1.5:1. **Maximum Insertion Loss:** 0.5 dB. Handles up to 1KW continuous power (100W at 12.4 GHz). Operate time at 20°C is 20ms maximum. N type connectors. Type 402-220132 is with a set of Form C indicator contacts. **Dimensions (excluding connectors):** 2.20"H x 2.64"L x 1.09"W (55.9 x 67.1 x 27.7mm). **Weight:** approximately 9 oz.

Gentron's Solid State Relays are designed to handle loads from 10 amps to 250 amps and voltage as high as 1200 volts in standard industry package. Many of the recent developments in superconductor technology such as MOSFETS, IGBTs, and other types of newer devices, offer some interesting choices and performance advantages. Some of the vast advantages are: Selective On and Off control, Reduced RFI, Alterable Switching

Slopes, Reduced Off State Leakage, Higher Immunity to False Triggering, Latch Free Operation, Absolute Zero Cross Firing (with options to switch on voltage or current for either on or off switching) and PWM availability. Available intelligence options are: Current Sense™, Thermal Shutdown, Load Fault and Current Limit.

Solid State Relay Single Pole Zero Cross (D) OR NON ZERO CROSS (R) or AC Control (A)-AC OUTPUT-SCR

Super Solid State Power Breakers and Contactors

- Its Overall Package Design Resembles a Large Mechanical Contactor/Breaker 8" x 5" x 4"
- Includes the Complete Drive and Protection Circuitry
- Low Inductive Losses and Common Thermal Properties
- Customized Product

These contactors and breakers are rated at 50, 500 and 1000 volts DC and up to 1000 amperes with a maximum power dissipation of 5000 watts. Some parts are designed so that as little as 125 watts is dissipated per pole and each pole drops less than a volt. Load current in either direction is monitored by use of Gentron's Current Sense™. Analog and digital current sense outputs are provided for current level monitoring and indication of over current conditions. Over temperature conditions are monitored by a temperature sensor mounted on the power contactor substrate which is in close proximity to the power semiconductors. Additional options include: Soft Start, Energy Saver for AC Types, Voltage Control or On/Off, Status Indicators, Short Circuit Protection, Self Calibrating, Manual or Programmed Restart, Self Diagnostics, Deviation Analysis and Serial Interface.

Standard, Miniature And G-5 Refusable Input/Output Modules

- ▶ G5 Refusable Module With Integral LED
- ▶ UL Recognized And CSA Certified
- ▶ Meets IEEE 472-1974 And ANSI C37.90 Noise Immunity Standards
- ▶ Surface Mount Internal Construction Provides Excellent High Thermal Conductivity
- ▶ Lifetime Warranty For All Standard I/O Module Part Numbers

Output Modules - 5 Volt Logic

T and TP Series Tubular Solenoids

Tubular solenoids are available in either pull (T series) or push (TP series). TP series dimensions are identical to T series. Notched assembly of shell and bushing permits tightening of mounting nut without damaging coil. **Insulation Material:** Class "A" (110°C). **Termination:** 6" leads. Mounting hardware included. T and TP series recognized under the Component Program of Underwriters' Laboratories, Inc.

*U.L. Model.

Industrial AC and DC Solenoids

Solenoids in a wide selection of sizes for AC or DC applications. Types 11 and 28 are for either AC or DC voltages. Laminated solenoids Types 14, 16 and 18 are for AC operation only. Tubular pull/push are for DC operation only. Intermittent-duty coils should not be energized for more than 3 consecutive minutes or be permitted to rise more than 85°C above 25°C ambient without time for cooling between cycles; continuous-duty types will not have a temperature rise of more than 85°C at rated voltage and ambient.

**DC Pull-Type or AC/DC Push-Type Solenoids
12 and 120 Volt AC/DC Push-Types**

Intermittent or continuous duty. Lengths of the push rods are equal to the maximum stroke length specified. Type 28P is approximately 20% less power than listed. Other

specifications same as Tubular Pull Types. Please Specify Allied Stock Number, Manufacturer's Type Number, Volts and Duty.

DC Types (Specify Type No., Volts and Duty)

Time Modules

KH ICSotimer

The KH series incorporate a thick film hybrid R-C timing circuit that offers reliable timing ranges from 0.1 to 300 seconds in a very small package. These timers may be wired directly into a circuit with their 22 ga. flexible tinned leads or mounted directly onto a PC board. Other voltages and time ranges available from factory: 24VAC, 12VAC, 12VDC, 240VAC, 48VDC, 110VDC; 1-10 Sec., 5-50 Sec., 6-60 Sec., 12-120 Sec., Special Time or Fixed Time.

KD ICSotimer

The KD series incorporate a digital countdown circuit that offers excellent repeat accuracy with timing ranges from 0.1 seconds to 10 hours. These timers may be wired directly into a circuit with their 22 ga. flexible tinned leads or mounted directly onto a PC board. Other voltages and time ranges available from factory: 24VAC, 24VDC, 12VAC, 12VDC, 240VAC, 48VDC, 110VDC, 10-600 min., Special Time or Fixed Time.

* Off and On times are equal (single adjustment). ** Off and On time appears first catalog number.

OP Series Time Delay Relays

The OP4 series incorporate KH or KD series timing modules operating a 10 Amp DPDT long life relay with an LED indicator. Octal bases are used on all types except the OP42 OFF DELAY which uses an eleven pin round base. The timing is knob adjustable. Other voltages and time ranges available from factory: 24VAC, 24VDC, 12VAC, 12VDC, 120VAC, 48VDC, 110VDC; 1-10 Sec., 5-50 Sec., 6-60 Sec., 12-120 Sec., 10 to 600 sec., Special Time or Fixed Time. **Input Voltage:** 120 VAC.

* Off and On times are equal (single adjustment). ** Off and On times are independently adjustable. Off time appears first in catalog number. Options: Fixed and special time ranges from .05 to 10 hours and special voltages.

RSS Series Solid State Relays

- ▶DC/AC and AC/AC models
- ▶Photo isolation
- ▶600 volt blocking voltage
- ▶4000 volt isolation
- ▶Zero voltage turn-on
- ▶Built-in snubber
- ▶100% tested at rated current
- ▶High surge capability
- ▶UL recognized (File No. E59804)
- ▶Dual SCR output (40 A)

RSS series relays provide highly reliable means of switching AC loads. Available in both AC and DC input voltage. **Dimensions:** 2.23" x 1.74" x .90".

Snap-Mount DIN Rail Sockets

Snap-mount sockets are designed to mount on BNDN-1000 mounting rail. The built-in mounting clip eliminates mounting hardware and reduces mounting time by eighty percent. For spacing between adjoining sockets, use SA-406 DIN rail spacer. Spacers are .197" in width. Spacing can be adjusted according to the amount of spacers added. To prevent sideward movement, use BNL-5 end clip at each end of socket row.

To Mount: Place socket on mounting rail and press down.

To Remove: Pull clip out with screwdriver and lift socket.

Timers, Time-Delay Relays

Delay DPDT GT3 Series

Features

- ▶ Compact spacing-saving size: 1.42" (36m) wide
- ▶ Choice of four basic series: Multi-Mode — On-Delay, Interval-On, Single-Shot and Cycle (available with optional input controls). OFF-Delay — "True Off-Delay" requires no external control switch to initiate timing sequence. Sequence — Dual knob control provides separate time-delay settings. Variable Duty Sequence — Solid-State outputs (AC/DC), duty sequence variable from 0 to 100%
- ▶ Repeat accuracy $\pm 0.2\%$, ± 10 msec
- ▶ POWER on and timing OUT LED indicators
- ▶ Choice of power voltage range: 100V to 240 VAC, 12V AC/DC, and 24V AC/DC
- ▶ All timers compatible with IDEC's 8-pin and 11-pin DIN rail, panel mount sockets. Optional panel-mount adapter available
- ▶ UL recognized and CSA certified

Specifications

Input Voltages: 100V to 240V AC; 12V AC/DC; 24V AC/DC. **Contact Configurations:** Delayed SPDT, Delayed DPDT, Delayed SPDT + Instan. SPDT, solid state. **Contact Load Ratings (Maximum):** 250V AC/5A, 30V DC/5A. **Insulation Resistance:** 100M Ω , minimum. **Time Ranges:** 0.05 seconds to 180 hours (GT3A), 0.05 seconds to 10 minutes (GT3F), 0.1 seconds to 6 hours (GT3W), 0.01 to 10 minutes (GT3P). **Reset Time:** 60 msec., maximum. **Life Expectancy:** Electrical — 100,000 operations, mechanical — 20,000,000 operations. **Termination:** 8- and 11- pin.

RTE Series

Multi-Function/Time Range Electronic Timer

Features

- ▶ Redesigned compact housing
- ▶ Multi-function operation: On-Delay/Interval or Off-Delay/Single-Shot
- ▶ Multi-time range settings from 0.1 second to 10 minutes and 0.1 minute to 10 hours
- ▶ High repeat accuracy of $\pm 0.25\%$
- ▶ Standard pin and blade termination
- ▶ UL recognized and CSA certified

Specifications

Input Voltages: 120V AC + 10% to -20% (50/60 Hz)
12V AC/DC, $\pm 10\%$
24V AC/DC, +10% to -15%
Contact Configuration: 2 Form C, DPDT (Delay outputs)
Contact Load Ratings: 10A Resist @ 240V AC, 30V DC
7A Inductive @240V AC, 30V DC
1/6 HP @ 120V AC
1/3 HP @ 240V AC
Power Consumption: 2.2VA, maximum
Repeat Accuracy: $\pm 0.25\%$ maximum, 10 ms
Reset Time: 0.1 second, maximum
Dielectric Strength: 1500V AC, 1 minute (Bet. power and output terminal, except bet. contacts of the same pole)
Life Expectancy: Mechanical — 50,000,000 operations
Electrical 250,000 operations

"Time Ranger" Multi-Range Cycle Timers

File No.
E109466

File No.
LR-45565

- ▶ 16 Time Ranges In Single Timer
- ▶ Pin For Pin Interchangeable With Most Timers In The Field
- ▶ User Sets Time Ranges. No Math Required — Just Flip Switches
- ▶ Fine Tune Knob For Precision Timing
- ▶ All Timers Operate On Either AC Or DC
- ▶ 0.5% Repeatable Accuracy

Suitable for continuous use. Line transient protected (MOV-10,000 V/ 20 microseconds). **Recycle Time:** Typically 60 mS. **Power Consumption:** 2.5 W maximum. **Operating Temperature:** -30° to + 160°F. **Output:** DPDT 10 A (resistive) at 240 VAC and 30 VDC. 1/3 HP at 240 VAC. **Timing:** Programmable, 0.1 sec. to 2 hrs.

SS 631 Series Repeat Cycle — "Off" Time First. Pin Wiring: 8 Pin Octal.

Action: Upon application of power "off", time period begins. When "off" time completed, "on" time period begins. When "on" time completed, "off" time again begins and cycle repeats until power is removed.

SS 661 Series Single Cycle — Delayed Interval. Pin Wiring: 8 Pin Octal.

Action: Upon application of power "off", time period begins. When "off" time completed, "on" time period begins. When "on" time completed, timer returns to "off" state and remains there. Power must be removed and re-applied to initiate action again.

Compact Solid State Time Delay Relays

File No. E109466

- ▶ Output — 3 A SPDT at 120 VAC and 28 VDC, 1/10 HP at 120 V
- ▶ 8 Pin Octal Plug-In Socket
- ▶ Adjustable Time Delay
- ▶ 3 Watts Max. Power Consumption
- ▶ Operating Temperature: 0°F to +130°F
- ▶ 2% Repeatable Accuracy

SS 6 Series On Delay

Action: Upon application of control power, time delay period begins. At end of time delay, output switch operates. When control power is removed, output switch returns to normal.

SS 8 Series Off Delay

Action: Upon closure of the control switch, output switch operates. Upon opening of control switch, time period begins. Any control switch closures prior to the end of the time period will immediately reset the time. At the end of the time period, output switch returns to normal. Continuous power must be furnished to timer.

XTRA•GUARD®

FAMILY OF CABLES

The **XTRA•GUARD®** family of cables have been designed for continuous operation while exposed to hazardous conditions that normally result in cable failures. **XTRA•GUARD®** cables are "hazard-matched" to survive the most demanding environments.

Powerful Solutions to Critical Problems!

XTRA•GUARD® 2

XTRA•GUARD® 4

**INDUSTRIAL
STRENGTH
PROTECTION.**

**TEMPERATURE
RESISTANCE
TO THE
EXTREME.**

Specify **XTRA•GUARD® 2...**
A heavy-duty cable with PVC-insulated conductors and polyurethane jacketing that resists most oils, chemicals, fuels and solvents, as well as mechanical abuse and abrasion. Select from nine jacket colors for easy cable identification: orange, blue, green, yellow, grey, red, beige, white or black.

Specify **XTRA•GUARD® 4...**
A general purpose outdoor cable with TPE (Thermoplastic Elastomer) insulation and jacketing to ensure flexibility at -60°C and performance at temperatures up to 125°C. **XTRA•GUARD® 4** has a UV-stabilized jacket that resists most oils, chemicals, fuels and solvents, as well as mechanical abuse and abrasion.

FIT[®] HEAT SHRINKABLE TUBING

**ALLIED ELECTRONICS Offers The Widest Variety Of
The Electronic Industry's #1 Brand Call-Out.**

Alpha's broad range of **FIT[®]** tubing offers you the precise product for your specific and unique applications. Insulate, seal and protect the component and connection.

Whether it's polyolefin, high temperature teflon, dual wall or specialty compound tubing, you can count on consistent product uniformity and integrity. You are assured reliable results with Alpha's precision processing techniques guaranteeing precise memory, uniform wall thickness and premeasured encapsulant/adhesives for optimal field application performance. Most of Alpha's **FIT[®]** line meets the conformance/performance requirements of MIL-123053 and are both UL Recognized and CSA Certified.

You'll find these useful **FIT[®]** product options available in the Alpha Fit Heat Shrinkable Tubing pages of Section 17 in this Allied Catalog.

- Variety of shrink ratios (2:1 to 6:1)
- Assorted precut lengths (4 ft. to 1 1/2 inches)
- Assorted spool lengths (1000 ft. to 16 ft.)
- Multiple colors
- Surface marking options
- Preformed shapes
- Specialized kits designed for lab, R & D, MRO, marine, automotive and industrial environments

HOOK-UP WIRE DISPENSER KIT *A Unique Wire-Dispensing System*

Alpha's Hook-Up Wire Kits contain an assortment of 100 ft. (30.5 m) spools of hook-up wire suitable for military or UL/CSA applications. These kits have been designed for use by technicians, engineers and designers in the R & D lab or maintenance shop.

Each kit contains five spools of hook-up wire in a unique, rack-mounted, transparent dispensing tube. The tube and rack system keeps hook-up wire neat, clean and conveniently at hand.

Allied Part # 708-9891 / Alpha Part # HU-KIT-10

Wire dispensing kit containing assorted colors of 22 AWG stranded MIL Spec hook-up wire for use in the R & D Lab or Maintenance Shop.

Reorder Part No.: 1551

Contains: (5) Spools of Wire (100 Ft.) MIL-W-76B TYPE MW in the following colors, White, Black, Red, Green, Blue, plus (1) Cut and Strip Tool. Each: 50.00

See Alpha Wire Corporation's complete line of wire, cable and heat shrinkable tubing products available in Section 17 of this Allied Catalog.

Allied Part # 708-9892 / Alpha Part # HU-KIT-20

Wire dispensing kit containing assorted colors of 22 AWG stranded UL/CSA hook-up wire for use in the R & D Lab or Maintenance Shop.

Reorder Part No.: 3051

Contains: (5) Spools of Wire (100 Ft.) UL 1007, CSA TR64 in the following colors, White, Black, Red, Green, Blue, plus (1) Cut and Strip Tool. Each: 50.00

- Convenient Wire-Dispensing System
- Five assorted Hook-Up Wire Colors
- Includes cut & strip tool
- Uses standard Alpha Hook-Up Wire Spools when refills are required

Metral[®] Connector System

For Futurbus[®] users... the selected high density, modular, 4-row, 2 mm system. Meets global metric standards. A complete system available in Press-Fit or S-T-B with coax, power and cabling options. Staged mating is standard.

Berg Stik[®] Headers

2.54 mm (0.100 inch) centerline. Can be manually broken to desired length. Retention tails hold header firmly in place prior to soldering. High-temperature plastic body.

Quickie[®] III IDC

Receptacles and Headers

2.54 X 2.54 mm (0.100 X 0.100 inch) grid, IDC system. 4-walled shielding protects pins, keying prevents misalignment. Available in 6 to 64 positions. Latching system saves valuable board space. MIL-C-83503-2A compatible. UL recognized and CSA approved.

Minitek[®] II System

2.00 mm (0.079 inch) centerline for compact board-to-board and cable-to-board connection. Available from 4 to 50 positions.

For more reliable power protection, you can't do better than BEST.

Best Power knows the whole reason you buy power protection is reliability. That's why our products consistently win high marks in independent reliability and customer satisfaction surveys. And why their predicted Mean Time Between Failure numbers are among the industry's highest.

Beginning with FERRUPS® uninterruptible power systems (still relied upon worldwide in the toughest power protection jobs) and right on through our newest products, Best Power has steadily engineered solutions that increase power protection reliability.

UNITY/I™ systems are the most failproof UPS advanced engineering can devise. Extremely fault-tolerant. Compatible with voltages and frequencies throughout the world. And equipped with brilliant self-diagnostics.

UNITY/I

Fortress® is today's best value in *true* uninterruptible protection. Affordable. Intelligent. Easy to use, easy to program to *your* application.

Fortress

Patriot® standby power systems set reliability standards, too. Where else will you find advanced microprocessors in economy systems like these? Or such speed of response to the entire range of power problems?

Desktop workstations. Local area and wide area computer networks. Telecommunications. Data centers. Factory floors. Home offices. The computer in the den. Wherever reliable power protection is needed, you can't do better – or get better price/performance – than the products of BEST®.

There may be only one power source more reliable than our switchers.

**Condor's Global
Performance[®] power
supplies offer continuous
range input, full agency
approvals and more.**

Our Global Performance switchers give you reliability, performance and full agency approvals, including UL1950 without D3 deviation, CSA22.2 No. 234 Level 3, IEC950, EN60950, VDE0805 Class B EMI and VDE0871 Level B EMI. Medical versions are approved to UL544, IEC601-1, CSA234 Level 3 and VDE0750.

Features include:

- 71 models (single- and multi-output)
- Industry-standard packages
- Custom designs available
- 8 power levels (40 to 225W)
- Continuous-input voltage (85-264VAC)
- OVP on all 5V outputs and single-output units

- MTBF 100,000+ hours per Mil Hndbk 217E
- 8-hour burn-in with cycling (24 hours on medical versions)
- Computerized testing (data sheets furnished)
- 2-year warranty
- 30-day FREE evaluation (call for samples)

If you want top performance and reliability with quick turnaround and competitive pricing, try Condor's Global Performance switchers. The only approval they're missing is yours!

WORLD CLASS RELIABILITY
CONDOR

Autoringing Gorilla

PC board mount switching power supplies

COSEL introduces AC to DC encapsulated PC board mount switching power supplies with an autoringing input. The YAS and YAW Series expand on their popular Gorilla line introduced

last year. Available in 5 and 10 watt versions, these power supplies come in both single and dual output. With an input range of 85 Vac to 264 Vac, these are the power supplies required by designers worldwide. Standard features are the same as for the YS and YW Series and come with a two year warranty. For more information, contact COSEL USA Inc., 3283 Scott Blvd., Santa Clara, CA 95054. (800) 888-3526, Fax: (408) 980-9754.

ZU Series DC/DC Converter

Ultra-thin (0.33") profile

COSEL USA introduces a new line of DG/DC converters. Slim profile is obtained by using high frequency circuitry with isolated input and output. Aluminum die-cast housing allows for low

EMI. ZU Series are available in 15W and 25W with output voltages: 5V, 12V and 15V. Offered DC input ranges 9V-18V, 18V-36V, 36V-72V. Output voltages can be controlled by additional external circuitry. Features include over current and over voltage protection, and power inhibit control. ZUW are dual output models. The state of the art ZU Series are produced in ISO 9001 certified facilities in Japan. For more information, contact COSEL USA Inc., 3283 Scott Blvd., Santa Clara, CA 95054. (800) 888-3526, Fax: (408) 980-9754.

DA Series DC/DC Converter

Wide range input voltage range 88-370 Vdc

COSEL introduces a new addition to its popular Z Series. The DA comes in 50 W and 100 W. Output voltages come in 5, 12, 24 Vdc. Small, low profile and wide input voltage make the DA Series one

of the easiest DC/DC lines to apply in your design. DAS100F can be used in parallel configuration. Teflon electrolytic capacitor, with PTFE/rubber seal, extends life three times longer than conventional switchers. Other features include remote inhibitor, over-current, and over-voltage protection. Delivered with a three year warranty. The state of the art DA Series is produced in the ISO 9001 certified COSEL Ltd. facilities in Japan. For more information, contact COSEL USA Inc., 3283 Scott Blvd., Santa Clara, CA 95054. (800) 888-3526, Fax: (408) 980-9754.

LDC Series Universal Input Triple Output Switchers

COSEL USA Inc. introduces new LDC series AC/DC switchers built exclusively with premium quality components. The LDC series features glass composite PC boards in an open-frame configuration. These units are available in 15, 30, and 60 watt versions with two output voltage combinations: +5, ± 12 or +5, ± 15 . ISO 9001; Two year warranty. (800) 888-3526, Fax: (408) 980-9754.

LCA Series Switching Power Supplies

COSEL USA Inc. introduces the LCA Series AC/DC switching power supply which is smaller and lighter than ever. Components used for these open frame units are the same as those found on power supplies costing many times more. Available in 10, 15, 30, 50, 100 and 150 watt power ratings with 5, 12, 15, and 24 volt outputs. ISO 9001; Two year warranty. (800) 888-3526, Fax: (408) 980-9754.

LDA Series Universal Input Single Output Switchers

COSEL USA Inc. introduces the LDA series which combines the cost savings of the LCA series with the flexibility of a wide-range input voltage. This compact and lightweight design provides unbeatable quality at a competitive price. Available with or without a chassis and cover, these switchers come in 10, 15, 30, 50, 75, 100, and 150 watt versions with 5, 12, 15, and 24 volt outputs. ISO 9001; Two year warranty. (800) 888-3526, Fax: (408) 980-9754.

1/8 DIN Process Indicator

- ✓ 4 Digit Display
- ✓ 10 or 24 Vdc Excitation Standard
- ✓ Minimal Panel Depth
- ✓ Front Panel Digital Tare
- ✓ 4-20 mA, 0-5 V, 1-5 V, or 0-10 V Selectable Inputs

Model IDP
\$155
Basic Unit

Micro-Infinity™
ICN77000 Series
\$219
Basic Unit

1/6 DIN Autotune Temperature/Process Controllers

- ✓ Easily Programmable
- ✓ Single and Dual Output Models Available
- ✓ Dual 4-Digit LED Display with Indicators for Output and Alarm Status
- ✓ Relay, SSR, dc Pulse, 0 to 10 V and 0 to 20 mA Output Types
- ✓ Thermocouple, RTD or Process Voltage/Current Input

DIN Rails
Also Available!

DRN Series
\$295
Basic Unit

High Performance DIN Rail Signal Conditioners

- ✓ Manually Scalable or Computer-Configurable Models
- ✓ Models Available for Thermocouple, RTD, Process, Strain, Frequency/Pulse, ac Voltage and Current
- ✓ 0-10 V, 4-20 mA or 0-20 mA Analog Output

For Additional NEWPORT Products, See Section 14

STANDARD ELECTRONIC ENCLOSURES PLUS

Ideal for
computer/test
equipment

You get big plusses with PacTec "standard" enclosures: free design engineering assistance to help create the ideal custom-modified enclosure for your product... your enclosures are extremely economical... and you'll get your enclosure VERY FAST!

Over 60
new enclosures
for 1995!

- ✓ Hundreds of standard & custom-modified enclosures
- ✓ FREE engineering design assistance
- ✓ Competitively priced with custom molding in high quantities
- ✓ Prototyping system for immediate samples and small runs

Ideal for
medical
products

Ideal for
hand-held
units

Specify quality P&B relays and circuit breakers for the performance your applications demand

- General Purpose Relays
- P.C. Board Relays
- Power Relays & Contactors
- Automotive Relays
- Latching Relays
- Time Delay Relays
- Solid State Relays & I/O Modules
- Magnetic Circuit Breakers
- Thermal Circuit Breakers

Whatever your application requires, there's probably a Potter & Brumfield product which can fill your need. And chances are good it's available off-the-shelf.

Of course, the entire P&B line of switching components is designed to provide the kind of rugged dependability your toughest applications demand. Plus, you're assured of outstanding service and off-the-shelf delivery from:

Time Delay Relays

"Time Ranger" Multi-Range Plug-In

File No. E109466
File No. LR-45565

- ▶ 16 Time Ranges In Single Timer
- ▶ Pin For Pin Interchangeable With Most Timers In The Field
- ▶ User Sets Time Ranges. No Math Required — Just Flip Switches
- ▶ Fine Tune Knob For Precision Timing
- ▶ All Timers Operate On Either AC Or DC
- ▶ 0.5% Repeatable Accuracy

Suitable for continuous use. Line transient protected (MOV-10,000 V/ 20 microseconds). **Recycle Time:** Typically 60 mS. **Power Consumption:** 2.5 W maximum. **Operating Temperature:** -30° to +160°F. **Output:** DPDT 10 A (resistive) at 240 VAC and 30 VDC. 1/3 HP at 240 VAC. **Timing:** Programmable, 0.1 sec. to 2 hrs.

Power to timer must be off before setting switches

SS 602 Series On Delay. Pin Wiring: 8 Pin Octal.

Action: Upon application of control power, time delay period begins. At end of time delay, output switch operates. When control power is removed, output switch returns to normal.

Stock No.	Mfr.'s Type	Input	Fig.	EACH			
				1-9	10-24	25-49	50-99
819-1000	SS-60222	120 VAC/VDC	A	41.95	40.62	38.77	36.56
819-1001	SS-60228	24 VAC/VDC	A	41.95	40.62	38.77	36.56
819-1002	SS-60226	12 VAC/VDC	A	41.95	40.62	38.77	36.56

SS 605 Series Interval On. Pin Wiring: 8 Pin Octal.

Action: The relay will operate immediately when the input voltage is applied. At the end of an adjustable interval the relay will release and remain in this state until reapplication of the input voltage.

Stock No.	Mfr.'s Type	Input	Fig.	1-9	10-24	25-49	50-99
819-1003	SS-60522	120 VAC/VDC	A	44.50	43.09	41.14	38.79

Standard Plug-in Relays

- ▶ All Timers Operate On Either AC Or DC
- ▶ Independent Timing Ranges From 0.1 Seconds Up To 24 Hours Available
- ▶ 10 A DPDT Output
- ▶ $\pm 0.5\%$ Repeat Accuracy

Suitable for continuous use. Line transient protected (MOV-10,000 volts/20 microseconds). Recycle time typically 60 mS.
Power Consumption: 2.5 watts maximum. **Operating Temperature:** -30 to 160°F. **Output:** DPDT, 10 amperes at 240 VAC and 28 VDC, 1/2 hp at 240 VAC. For description of action see preceding pages.

*Internal Clamping Diode.

Low cost solid state relay designed to switch low to medium current AC loads from low level logic signals. Can be chassis mounted and connected with standard push on connectors. Compatible with TTL logic. Unit is completely potted to resist shock and moisture effects. DC input versions have LED activated optoisolator input. **Operate time:** 8 msec **typ.** **Release time:** 25 msec **typ.** **Dielectric strength:** 2500 VAC rms from input to output and case. Units have continuous current rating without heatsink of 0.05 to 1.5 amps; 0.05 to 7 amps with heatsink.

Class 388 Square Base Relays

Low cost, UL recognized CSA certified general purpose relays. AC and DC operated types, 13, 12 and 11 amps SPST, DPDT, or 3PDT silver alloy gold flashed contacts. Terminals are 3-way for plug-in, solder, or $\frac{3}{16}$ " $\times$.020" quick connect. UL/CSA E43641/LR37547.

Class 388 Sockets

Heavy-duty molded thermoplastic screw terminal socket has closed back construction that requires no insulation. Nylon sockets offer choice of solder, quick connect, or printed circuit. U.L. recognized, File No. E43641, and CSA certified, File No. LR37547.

*Accepts all Class 388 plug-in relays.

Class 389 General Purpose Relays

Class 389 General Purpose Relays are designed to switch larger contact loads without increasing overall size. It is similar in design to Class 388 relays and features a flange mounted cover. **Contact Materials:** silver cadmium oxide, gold flashed. **Temperature Range:** Operating, -30°C to $+50^{\circ}\text{C}$ AC; -30°C to $+65^{\circ}\text{C}$ DC. **Enclosure:** Clear polycarbonate. Quick connect terminals are $\frac{1}{4}$ " $\times$.032" and suitable for soldering. **Size (max.):** $2\frac{29}{32}$ "L $\times$ $1\frac{17}{32}$ "W $\times$ $1\frac{13}{32}$ "H. **Weight:** 3.3 oz UL/CSA E436 41/LR37547
